☞ We have the Second Annual Report of the Pittsburg, Fort Wayne and Chicago Railroad Company for the year 1863, but owing to the press of other matter have been obliged to defer the publication of it until another week.

California Central Railroad.

We have received late information through the attention of Jerome B. Polley, Esq., Engineer in Chief of the Central Railroad, California, of the progress of this important work. The company is grading the line between Lincoln and Marysville, a distance of 22 miles, which will be finished by the 1st of June next. The rails are on the way and will be laid as soon as the road bed is ready. The gauge of the present 18 miles will be changed from 5 feet to 4 feet 8½ inches, so as to correspond with the gauge of the Pacific Railroad. This will unite Sacramento and Marysville. The road passes through some of the best farming and mineral lands in the State, and the stock will unquestionably be a paying one.

Cotton in Utah.—Oranges.

Eleven bales of cotton raised in Utah, recently reached San Francisco by the way of San Pedro, where it was brought on mules from the neighborhood of Salt Lake City. A large amount remained behind waiting the result of the venture. The staple is fine though short; color, strength and quality good. It is said that the Counties of Santi Barbara, Los Angelos, San Bernardino, and San Diego contain large tracts of land admirably adapted to the culture of cotton. Frosts seldom or ever occur in these localities. At the Mission, San Gabriel, there is a cotton tree, (the trunk of which is eight inches in diameter,) which bears a staple resembling the sea island in many respects. Oranges are also raised in Los Angelos, of which the fruit is large, sweet and of exquisite flavor.

☞ The London Railway *News*, says the land occupied by railways in Great Britain is under 200,000 acres, and that used for agricultural purposes is forty millions of acres. The same authority states, that fifteen millions five hundred thousand pounds sterling are invested in the locomotive stock of the leading railway companies, and that steam engines of the value of one million and a half are annually shipped abroad. Up to the end of 1834, when not a hundred miles of railway had been opened, the annual average number of travellers by coach was six millions a year. Now the average daily of the railways there is half a million of passengers, or about one hundred and eighty millions a year. The number of locomotives employed on the British railways is 6,500, and each engine is calculated to run 480,000 miles with proper care. After that it is usually sent to the scrap-heap. The average consumption of coal and coke of the passenger locomotives is 27.3 lbs. per mile; for the freight locomotives 36½ lbs. per mile.

The Ten-Forty Loan.

The following is an official copy of the Act of Congress authorizing the Ten-Forty Loan, under which the Secretary of the Treasury has decided to issue bonds to the amount of $200,000,000 bearing interest at the rate of five per cent per annum in gold, payable on bonds of $100 and under annually on the 1st day of March, and on bonds of $500 and upwards semi-annually on the 1st days of March and September. The bonds are both registered and coupon, and dated March 1, 1864, and are redeemable at the pleasure of the government after ten years, and payable forty years from date. Subscriptions are now being received at the office of the Assistant Treasurer of the United States in this city. Subscribers will receive either registered or coupon bonds as they may prefer. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000 and $10,000; and coupon bonds of the denominations of $50, $100, $500 and $1,000. Subscribers to this loan will have the option of having their bonds draw interest from March 1 or September 1, as the case may be, by paying the accrued interest in coin or United States notes, or the notes of National Banks, adding fifty per cent for premium, or receive them drawing interest from the date of subscription and deposit.

AN ACT supplementary to an act entitled "An Act to provide the ways and means for the support of the Government," approved March 3, 1863.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That in lieu of so much of the loan authorized by the act of March 3, 1863, to which this is supplementary, the Secretary of the Treasury is authorized to borrow, from time to time, on the credit of the United States, not exceeding two hundred millions of dollars, during the current fiscal year, and to prepare and issue therefor coupon or registered bonds of the United States, bearing date March 1, 1864, or any subsequent period, redeemable at the pleasure of the Government after any period not less than five years, *and payable at any period not more than forty years from date in coin*, and of such denominations as may be found expedient, not less than fifty dollars, bearing interest not exceeding six per centum a year, payable on bonds not over one hundred dollars, annually, and on all other bonds semi-annually, in coin; and he may dispose of such bonds at any time, on such terms as he may deem most advisable, for lawful money of the United States, or, at his discretion, for Treasury notes, certificates of indebtedness, or certificates of deposit, issued under any act of Congress; and all bonds issued under this act shall be exempt from taxation by or under State or municipal authority. And the Secretary of the Treasury shall pay the necessary expenses of the preparation, issue and disposal of such bonds out of any money in the Treasury not otherwise appropriated, but the amount so paid shall not exceed one-half of one per centum of the amount of bonds so issued and disposed of.

Approved, March 8, 1864.

☞ We learn from the Toronto *Globe* that a bill has been introduced to legalize an agreement between the Grand Trunk and the Buffalo and Lake Huron Companies, to establishing a through route between Buffalo and Detroit. By this agreement the Grand Trunk Company will run its trains on the Buffalo and Lake Huron Railway between Stratford and Buffalo, and the Buffalo and Lake Huron Company will run its trains over all the roads owned or rented by the Grand Trunk between Stratford and Detroit, each company employing its own engines, cars, conductors, etc.

Double Story Cars.

The Bombay, Baroda and Central India Railway, of India, use, for their third class passengers, two-storied cars, which carry seventy in the first and sixty in the second story. The seats are longitudinal instead of transverse, and the car is stated to be only 21 inches higher than the one story one. The upper roof is very light, and only intended to protect from sun and rain. The weight of the car thus constructed is 7 tons less 1 cwt., while the single story cars on the English railways weigh 7 tons 7 cwt. It is contended that a saving in money, time and trouble is effected by the use of these cars, and that the annual saving on the line is already £20,000 per year. The length of the train being diminished nearly one half, the atmospheric resistance is about the same as it would be to the ordinary train.

Railway Refreshment Rooms.

The refreshment rooms at the railway stations on the French and Belgian railways are of a very superior kind, everything being of the best, and admirably served. Those in England are very poor. Buns, cakes and pork pies, says the railway *Times* are the invariable fare. It is said that the most elegant refreshment stations in our country are on the Atlantic and Great Western, but there are many excellent ones on our other great roads.

☞ The newly organized Chamber of Commerce in Chicago have already raised $200,000 for the purchase of a lot and the erection of a new and splendid building for the use of the Chamber. They expect to raise $100,000 additional within a short time. The cost of the lot will be about $100,000. The Chamber of Commerce and the Board of Trade have practically been merged into one organization.

Atlantic and Great Western Railway.

The Broad Gauge is advancing this way at about the rate of one mile per day. The laying of the track was resumed last week. The track is now about twenty miles distant from Urbana.

Atlantic and Great Western cars (with narrow trucks,) go through Urbana daily conveying ties, bridge timber, &c., to points on the road south of Urbana.—*Urbana Union.*

☞ The Halifax *Express* of the 30th March says: "Mr. Sandford Fleming, accompanied by Mr. Tremain, of Nova Scotia, and a staff of three or four assistants, engaged in Fredericton, left that place on Friday afternoon, for the Tobique country, where the survey of the Inter-Colonial Railway is to commence. It it said that Mr. F. gave his professional opinion against the route on the western side of the St. John. His instructions from the Canadian Government are very general, confining him to no route, locality, time or expense."

☞ By a despatch from St. Catharines, C. W., we learn that the Welland Canal was opened for navigation on 13th inst.

☞ On Friday the rolling stock of the North Missouri Railway was crossed over the Missouri river on steamboats, at St. Charles, where the river is two thousand feet wide. This is an important feat, and the method will obviate the difficulties of rises in the river. The time employed in crossing the locomotive and cars, loaded with freight, from the main track on one side to the main track on the other, was twenty-three minutes.

Pittsburg, Ft. Wayne and Chicago Railway.

We find in the advertising columns of the daily papers the following statement made by the President of this Company to the Board of Directors:

NEW YORK, April 8, 1864.

GENTLEMEN: The unanimous action of the Stock and Bondholders has liberated the net income of the railway after paying interest and sinking fund, so as to place it at the disposal of the Board of Directors for the purposes of dividends, surplus funds, and other objects consistent with the interests of the corporation.

The first and second mortgage bonds being five-sixths of the whole funded debt were so arranged in six series as to make the amount due for interest each year payable in monthly installments of one-twelfth each month. Two years having confirmed the theory upon which the plan was adopted it might now be well to assimilate to it the plan of paying dividends on the capital stock by paying quarter annual dividends instead of annual or semi-annual dividends as is generally customary with other corporations.

I herewith submit an approximate statement of the earnings, expenses and disbursements, for the months of January, February and March past, which is sufficiently near correct to justify the Board acting upon it with a view of making a dividend if it is thought best to declare one at this time.

Earnings for January		$290,675 81
Earnings for February		455,211 02
Earnings for March		602,603 28
Total for the three months		$1,348,490 11
Deduct Operating Expenses:		
For January	$210,296 21	
For February	263,328 22	
For March	330,000 00	
		803,624 43
Balance		$544,865 68
Less interest and Sinking Fund, as follows:		
Three months on First Mortgage	$91,875 00	
Three months on Second Mortgage	90,300 00	
Three months on Third Mortgage	35,000 00	
Three months on Chicago Depot Bonds	1,737 50	
Three months on Interest and Sinking Fund on Alleghany Bridge b'ds	6,000 00	
Sinking Fund of one per cent. on First and Second Mortgages for 3 months	26,025 00	
		$250,937 50
Leaving a balance of		$293,928 18

Which is applicable to dividends, and subject to the order of the Board. The above balance of unexpended and unappropriated income is equal to a dividend of 4.52 per cent on the outstanding Capital Stock.

The small earnings for January were caused, as you are aware, by an almost total suspension of the business of the Railway for about one-fourth of the whole month, arising out of a combination of the Locomotive Runners to interfere with the police and management of the Railway.

It would not be prudent at this time to divide all the surplus earnings, as unforeseen circumstances may affect future earnings, and to enable the Company to make full dividends in adverse times a surplus fund ought to be accumulated. Respectfully submitted.

G. W. CASS, President.

To the Board of Directors of the Pittsburgh, Fort Wayne and Chicago Railway Company.

Upon the reading of the above report, it was unanimously resolved to declare a dividend of 2½ per cent for the quarter year from Jannary 1 to March 31, 1864, payable at the office or agency of the Company on the 15th day of May next.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of March, compared with the same period last year, were as follows, viz:

	1864.	1863.
Freight	$397,594 06	$317,519 35
Passengers	183,247 04	125,791 86
Express matter	5,400 00	2,993 75
Mails	7,825 00	7,825 00
Rent of railway	7,083 34	7,083 34
Miscellaneous	1,453 84	751 62
Total	$602,603 28	$461,964 92
Increase		$140,038 36
En'gs fr. Jan. 1 to Mar. 31	$1,348,490 11	$1,165,912 96
Increase for three months		$182,577 15

Increase for March, 30 3-10 per cent.; average increase to March 31, 15 7-10 per cent.

These earnings are, by far, the largest in the history of the Company, and are exclusive of about $40,000, for Transportation of troops, which is not treated as earnings till collected from the Government.

The earnings of the Galena and Chicago Union Railroad Company for the month of March, 1864, were $177,066 57
Corresponding month of previous year 129,226 09
Increase $47,840 48

The earnings of the Michigan Central Railroad for the month of March, 1864, were $348,802 13
Corresponding month of previous year 236,431 81
Increase $112,370 32

The approximate earnings of the Marietta and Cincinnati Railroad Company (as re-organized) for the month of March, 1864, were $90,754 90
Corresponding month of previous year. 60,540 08
Increase $30,214 82

The earnings of the Toledo and Wabash Railroad Company for the month of March, 1864, were $132,896 21
Corresponding month of previous year 103,056 20
Increase $29,840 01

The earnings of the Chicago and Northwestern Railway for the month of March, 1864, were:

From passengers	$66,496 14
" freight	87,641 35
" mail	2,337 49
" express	1,411 67
" miscellaneous	75 00
Total	$157,961 65
Corresponding month of previous year	92,483 18
Increase, 70¾ per cent	$65,478 47

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of March, 1864, were $88,222 00
Corresponding month of previous year. 44,925 00
Increase $43,297 00

The earnings of the Chicago and Rock Island Railroad Company for the month of March, 1864, were. $198,119 00
Corresponding month of previous year 119,836 00
Increase $78,283 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of March, 1864, were $333,058 00
Corresponding month of previous year 254,209 00
Increase $78,849 00

The earnings of the Cleveland and Pittsburg for the month of March, 1864, were $202,857 72
Corresponding month of previous year 135,211 59
Increase $67,646 13

The earnings of the Cleveland and Toledo Railroad for the month of March, 1864, were. $205,365
December, 1862 164,845
Increase $40,520

The traffic receipts of the European and North American Railroad for March, 1863 and 1864, were:

	1864.	1863.
Passengers	$4,246 38	$2,893 58
Freight	7,411 82	5,910 62
Mails and Sundries	471 50	402 67
	$12,129 70	$9,206 87
Increase 1864		$2,922 33

The traffic receipts of the New Brunswick and Canada Railway for the month of March, 1864, were $4,725 04
Corresponding month of previous year.. 3,011 03
Increase $1,713 21

The following shows the gross receipts of the Chicago and Alton Railroad during the month of March, compared with the earnings for the same time last year:

March 1864 $162,163 00
March 1863 113,026 00
Increase $49,137 00

The earnings of the Chicago and Milwaukee Railroad Company for the month of March, 1864, were $49,837 37
Corresponding month of previous year. 36,586 69
Increase $13,520 68

The gross earnings of the Ohio and Mississippi Railroad for the month of March, 1864, were:

Eastern Division	$146,621 30	$200,680 98
Western Division	90,035 75	110,000 00
Total	$236,657 05	$310,680 98
Increase		$74,023 93

The earnings of the Hudson River Railroad for the month of March, 1864, were $356,625 94
Corresponding month of previous year 366,801 84
Decrease $10,175 90

Railroad Earnings--Weekly.

The earnings of the Ohio and Mississippi Railroad for the 1st week of April, were:

	1863.	1864.
Eastern division	$30,405 00	$44,052 00
Western division	21,657 00	26,653 00
Total	$52,062 00	$70,705 00
Increase		$18,643 00

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending March 31, were:

	1864.	1863.
Freight	$16,008 40	$8,315 41
Passengers	16,009 70	6,619 72
Mails, rents	1,042 70	968 96
Total	$33,070 80	$15,904 09

The earnings of the Chicago and Alton Railroad Company for the week ending April 7, were:

	1864.	1863.
Passengers	$13,673 70	$11,002 29
Freight	17,750 81	16,652 66
Sundries	1,373 29	1,047 97
Total	$32,797 80	$28,702 92
Increase 1864		$4,094 88

The earnings of the Chicago and Rock Island Railroad for the 1st week in April, 1864, were $38,818 00
Corresponding week of previous year.. 30,882 00

Increase..... $7,936 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of April, 1864, were $66,600 00
Corresponding week of previous year.. 54,116 00

Increase..... $12,484 00

The earnings of the Grand Trunk Railway for the week ending March 26, 1864, were:

Passengers	$32,783 53
Express freight, mails and sundries ...	2,500 00
Freight and live stock	68,542 30
Total	$103,825 83
Corresponding week, 1863	84,612 83
Increase	$19,213 00

The traffic of the Great Western Railroad for the week ending April 1st, 1864, was as follows:

Passengers	$23,450 82
Freight and live stock.	45,007 56
Mails and sundries..	1,241 55
Total	$69,699 93
Corresponding week of 1863	69,010 09
Increase	$689 84

The earnings of the Galena and Chicago Union Railroad for the week ending April 8, were:

	1863.	1864.
Freight	$20,702 35	$32,343 25
Passengers	9,768 69	14,359 91
Mails, &c	1,250 00	1,300 00
Total	$31,721 04	$48,003 16
Increase 1864		$16,282 12

The following is a statement of earnings of the Toledo and Wabash Railway for the first week of April, 1864 ..... $33,663 12
Corresponding week of previous year. 22,733 92

Increase $10,929 20

The earnings of the Michigan Central Railroad for the 1st week in April, 1864, were .. $78,746 82
Corresponding week of previous year.. 47,841 89

Increase $30,904 93

The earnings of the Marietta and Cincinnati Railroad for the 1st week in April, were:

	1864.	1863.
Passengers	$6,261 89	$5,194 56
Freight	8,866 31	10,215 97
Mail, express & telegraph	1,054 58	721 00
Total	$16,182 78	$16,131 53
Total this year to date..	$241,351 27	$168,662 58

☞ Gen. Stuart, in his report to the President on the gunboat canal between tide water and the lakes, estimates the cost of a ship canal around the Falls of Niagara, 105 feet wide on the surface, 95 feet wide on the bottom, 12 feet depth of water, having locks 275 feet long by 45 feet wide in the chamber, capable of passing a gunboat of 1,250 tons burthen, $5,958,947 25 with single locks, and $7,538,529 with double locks. This is the average cost of five lines surveyed last year. The average length of the lines is 8 miles and 3,070 feet.

Cape Cod Central Railroad.

We learn that the contracts for grading and masonry on the Cape Cod Central Railroad were closed on Saturday last at Boston, and the contractors are expected here in a few days to make preparations for commencing work on the line.—*Cape Cod Republican.*

Nova Scotia Mines and Minerals.

Of the natural riches of Nova Scotia there is none which shows the inexhaustible wealth of which she is possessed so much as the gradual development of her mineral resources. It is now nearly forty years since the spade and pickaxe of the hardy miner gave to commerce the fine bituminous treasures which has become known and prized at home and abroad. Notwithstanding the serious drawbacks arising from a lack of knowledge; the want of capital and energy in working the mines: the amount of coal raised in the first 30 years (say from 1827 till 1857) has been almost doubled from 1858 till 1863 inclusive. We propose giving a compendium of the report on Mines and Minerals, just issued from the Crown Land Office by Mr. S. P. Fairbanks, Commissioner and Inspector of Mines, which we think will be interesting to our readers.

The report shows an increase of export in 1863 over that of the previous year of 37,000 tons, the greater part of which has been shipped from Cape Breton. The mines of that island have fallen short in their production full 10,000 tons, and the Albion Mines at Picton 4,429 tons, besides depreciating in quality. Other mines, however, have more than made up for this falling off, showing an aggregate increase of supply of 24,000 tons.

There have been new and extensive fields discovered in Cumberland county, which have been partially worked; but so soon as the preparations which are now making are completed they will be developed on a much greater scale. The applications for licences in this district alone, for the past year, has realized $2,590.

The Inspector recommends a revision of the mining regulations; a law which will guard against monopoly; the greater encouragement of foreign capitalists, who have already invested largely in mining operations in this Province, as productive of mutual benefit; the necessity of appointing a local superintendent whose task it will be to see to the drainage, ventilation, &c., of the mines.

The Albion and Sydney mines were the first opened in Nova Scotia, by the General Mining Association, and have yielded largely. The former has produced and exported since 1827 nearly 3,000,000 tons, and the latter almost as much. During the past year the Sydney mines have raised and shipped 104,342 tons, and the Albion 193,313 tons, with the labor of 533 men and boys, 79 horses, and 5 engines of 360 horse power; and 660 men and boys, 86 horses, and steam of 580 horse power, respectively.

In 1830 the General Mining Association also opened the Bridgeport mines and worked them till 1850, when the supply of coal entirely failed. In 1833 this Association commenced operations at Little Bras d'Or, which also gave up in twenty years. The Joggins Mines were next opened, and continued to yield till the present.

Several mines have subsequently been opened at Little Bras d'Or and other places, which we shall notice further on.

In the Abstract of Returns, Cumberland county is first on the list, commencing with the *Joggins Colliery.* Amount of coal for 1863, 46,488 tons. Lawrence Coal Mining Company, River Herbert coal raised and shipped—9,108 tons; expenditure on mine $19,600 00.

Frazer Mines, Pictou County, lies 6½ miles from navigable water, and have not been worked for else than local consumption. They were first opened with a view of obtaining coal oil but they were abandoned, and the proprietor is now engaged in inaugurating a company to develop the mines thoroughly.

The Little Bras d'Or Collieries, owned by Collins, Goutro & Collins & C. J. Campbell, have more or less fallen short in 1863. But with increased energy and a liberal expenditure they may be rendered paying investments when the seams are not exhausted. Gross amount of coal raised—4,170 tons.

Roach & McInnis have opened a mine near North Sydney, but as yet with no satisfactory results.

Union Mines, Bridgeport, opened in 1858. The coal has a fair market reputation; but the success of this colliery is seriously marred by the want of a suitable shipping place. Quantity past year 4,197 tons.

Little Glace Bay Colliery, the property of an American Company, produces coal of a very superior quality, both for gas and domestic purposes. It is called the Hub-vein coal. These enterprising capitalists have constructed an artificial harbor with great skill and expense, and purpose to expend in the present year $134,708. The amount of coal raised and sold during the past year was 26,728 tons.

Big Glace Bay Colliery, belongs to J. & A. Campbell. It was opened in Jan. 1863—the sum expended $2,900—amount of coal raised 508 tons. The drawback to the Union Mines, viz., a want of proper shipping places, applies to this colliery also.

Schooner Pond Colliery, to the N. W. of the North head of Cow Bay is the property of Messrs. Ross, Kaye & Symonds. Formerly it was worked by private individuals for their own use. Preparations are now being made to put it in paying order. Already $3,572 have been laid out and 1,878 tons of coal raised and shipped.

Block House Colliery, Cow Bay, belongs to Mr. Belloni, of New York. From the opening of this mine under Mr. Marshall Bourinot, Belloni supplied the funds, and has now personal management of the works. This gentlemen has been at a very great expense in making every necessary improvement. He is now having built a wharf, extending into the harbor 1,000 feet, 75 feet wide, and reaching a depth of water of 5 fathoms. In 1863, $37,000 was expended on various improvements and amount of coal raised 15,630 tons.

Gowrie Colliery, Cow Bay, Hon. T. D. Archibald & Co., is a very valuable and well conducted property. During the past two years $91,000 have been laid out, one of the items of expense being a wharf extending into the bay 770 feet, and a break water 100 feet by 50 feet. The expense for 1863 was $63,260 00; and total amount of coal raised and shipped 15,069 tons, of very superior quality.

Mire Bay, Young, Tracy & Slattery. Want of shipping place prevents this from becoming a profitable investment, for the coal is good. Amount raised and shipped, 549 tons.

Kelly Cove, or New Campbell Town Colliery, owned by C. J. Campbell, promises to be a valuable property. Mr. C. is prosecuting the work with great energy, and has laid out $34,000 last year. Amount of coal raised and shipped, 4,000 tons.

Richmond Colliery, situated 2½ miles from mouth of Little River. There has been altogether expended $24,499 upon the mine, and a large quantity of coal, some good and some containing much sulphurid of iron; but only 1,100 tons have been shipped.

Sea Coal Bay Colliery, Richmond Co., owned by Mr. John Campbell, has made very little progress as a renumerative speculation, although more than $12,000 have already been expended on it. 219 tons is all that has been shipped in 1863.

On the subject of iron and copper works the report says but little. Notwithstanding the immense quantity of iron ore to be found in the Province, there is only one establishment for its manufacture in active operation, viz: the Acadian Charcoal Iron Works in Londonderry township. An American Company has obtained a lease at Cheticamp for working copper ore. As yet this is in its infancy, although very rich veins have been found.—*Halifax Sun.*

☞ A bill has been introduced into the New Brunswick Legislature to incorporate the European and North American Railway Extension Company.

☞ The Dunkirk *Union* says a petition is being circulated asking the Legislature to authorize the construction of a street Railway between Dunkirk and Fredonia.

Interest and Dividends.

The Pittsburg, Fort Wayne and Chicago Railway Company has declared a dividend of 2½ per cent. on the capital stock for the quarter ending on the 31st of March, out of the net earnings of the first three months of the present year. The dividend will be paid, free of government tax, on and after the 16th of May.

The St. Louis, Alton and Terre Haute Railroad Company will pay on the 2d of May, at the Bank of North America, a dividend of seven per cent. on the preferred stock.

The Central Railroad Company of New Jersey have declared a quarterly dividend of two and a half per cent., free of Government tax, payable on and after the 15th inst.

The New York and New Haven Railroad Company have declared a dividend of three dollars per share, (free from Government tax,) payable on and after the 2d day of May next.

The dividend of 3½ per cent. upon the preference stock of the Toledo and Wabash Railroad, is declared payable on the 1st of May.

The Cleveland and Pittsburg Railroad Company have declared a dividend of 4 per cent., payable April 28th.

The interest on the bonds and stocks of the city and county of New York, due on the 1st of May next, will be paid after that date by the City Chamberlain at the Broadway Bank.

The Lehigh Valley Railroad Company have declared a quarterly dividend of 2½ per cent., payable on and after the 15th instant, clear of State and National tax.

The Directors of the Cambria Iron Company have declared a dividend of six per cent., payable on and after the 30th instant.

Pittsburg, Fort Wayne and Chicago R. W.

The following changes have been made in the contract of reorganization of the Pittsburg, Fort Wayne and Chicago Railway Company, commencing the 1st of January last, by a unanimous vote of the shareholders and bondholders:

1. The capital stock of the Company may be increased from $6,500,000, the present capital, to an amount sufficient to construct a double track, and to properly equip the same, the increase for the present year not to exceed $3,500,000; afterward, from year to year, as may be needed by vote of the share and bondholders at their annual meetings, after estimates carefully prepared of the amount that can be usefully and economically expended for that year. The money arising from such sales to be exclusively appropriated to the purposes aforesaid. J. F. D. Lanier, J. Edgar Thomson, J Harbaugh, S. J. Tilden, and L. H. Meyer, are appointed a Committee to direct the sale of the stock and see to the proper application of money arising therefrom.

2. The revenues of the Company, after paying expenses, interest and the sinking fund hereinafter named, to be held subject to such dividends to shareholders as the Board of Directors may deem expedient.

3. An annual sinking fund of $52,250 applicable to the first mortgage bonds, and $51,160 applicable to the second mortgage bonds, is to be paid over to the trustees in the mortgages, to be applied to the purchare of said classes of bonds at the lowest market rates, the accumulations from interest on the bonds taken up to be applied in the same manner.

4. The former system of sinking fund is abrogated.

5. The right of the Railway Company to redeem the first and second mortgage bonds at par at any time after the 1st July, 1867, or to require their conversion into 6 per cent bonds, is abrogated, leaving them an irredeemable 50-year 7 per cent bond from their date, or 48 years from the present time.

6. The interest on the third mortgage bonds to be paid half-yearly, 1st April and 1st October, instead of annually.

7. The right to vote in common with shareholders in first and second bondholders is extended—instead of one vote for each $200 to be one vote for each $100, that is, ten votes to each $1,000 instead of five.

8. The general result is that future expenditures for construction will be provided for out of new capital instead of from the current net earnings. Some $4,000,000 of net earnings have been spent upon the road and property during the last few years in what is properly new construction. The revenues being liberated by the new arrangement, will hereafter be applicable to dividends at the sound discretion of the stockholders.

9. None of the bonds are convertible into stock. The whole amount of the bonds is at present $12,410,000, and of the stock $6,500,000. All increase of net earnings, therefore, apply exclusively upon the stock.

10. The net earnings for 1863, counting the operating expenses at 59 per cent, which is rather above their true amount, were about $2,106,623, on $6,500,000 of stock; and $1,517,162 of it was expended on the road and the rolling stock.

11. The gross earnings for the month of March were $602,000, and to that is to be added the military earnings, which make the whole amount about $625,000. This is sufficient to pay the operating expenses at the average rate of last year, 59 per cent, the proportion of the interest, of the two sinking funds just adopted by the bondholders, and to leave 2½ per cent on the whole capital stock as the results of the business of a rough month.

☞ A British Banking Company is "promoted," as the saying in London is, to be established at San Francisco. The principal arguments in its favor are the present telegraphic communication between San Francisco and New York, the centralization of eastern commerce at San Francisco, and the certainty of the construction of the Pacific Railroad.

☞ The St. Louis *Democrat* thus announces the arrival of a lake steamer: "The Ozaukee arrived here the other day from Chicago, by Lake Michigan, Green Bay, and Fox, Wisconsin and Mississippi Rivers. She lay at Montrose all winter. This steamer draws four feet light, has two engines, with 10 inch cylinders. She wants a trade or a purchaser."

Oswego Board of Trade.

The 14th Annual Meeting of the Board of Trade of Oswego, was held on the 30th ult., and the following officers elected for 1864:

President.—Frederick B. Lathrop.

Vice President.—Willis S. Nelson.

W. Lewis, D. W. Erwin, John Mott, jr., W. H. Herrick, P. Bundy, R. F. Sage and Theodore W. Wells were elected the Board of Directors, and J. H. Crawford, B. Hagaman and Charles Smyth, Committee of Reference. The Secretary and Treasurer are, by a provision of the Constitution, to be elected by the Board of Directors.

☞ The electric telegraph now extends by way of Russsa to within two hundred miles of Kiatchka, a frontier emporium close to the Chinese Empire, between which and Pekin, about one thousand miles distant, there is a regular post established, so that now it would be quite possible to communicate with Pekin from London in a week.

Commerce of St. Louis.

The following is a condensed statement of the commerce of St. Louis for the years 1862 and 1863:

	1863.	1862.
Cotton, bales	27,500	39,430
Tobacco, hhds	19,330	13,050
Hemp, bales	55,267	78,317
Lead, pigs	78,814	95,800
Flour, bbls	1,407,668	1,554,279
Wheat, bushels	2,703,378	3,850,336
Corn, bushels	1,299,850	1,734,219
Oats, bushels	2,771,848	3,135,043
Pork, bbls	35,300	51,187
Pork, cks. and tcs	4,130	6,515
Pork, boxes	2,155	3,530
Pork, pieces	610,789	487,580
Bacon, cks	7,070	10,833
Bacon, bbls. and boxes	8,700	10,352
Bacon, pieces	40,480	106,315
Lard, tcs	16,609	19,407
Lard, bbls	22,976	24,975
Lard, kegs	2,735	5,993

Potherick Mining Company.

The following gentlemen have been elected directors of this company for the ensuing year: Frederick Beck, *President;* A. W. Spencer, C. C. Evans, W. C. Durant, Augustus Denton, H. W. Nelson, of Boston; John Uren, of Michigan; H. W. Nelson, *Secretary and Treasurer.*

SUBSTITUTE FOR

CAR DUCK.

Kingman's Patent Car Covering.

A HEAVY CANVASS, bedded in Water Proof Paste and Painted. Costing now about half as much as Car Duck. Full particulars, directions, and samples sent. Also an experienced man sent to show the best way to apply it when requested.

WILLIAMS & PAGE, Boston.

SPECIAL NOTICE

TO

BANKERS, BROKERS,

Coal, Mining Companies, Merchants and Others.

THE BUILDINGS

69, 71, and 73 Broadway,

(Cor. of Rector street,)

Are to be altered into and fitted up in a very superior manner as first class offices. Also offices corner of Broad street and Exchange Place, No 4 and 6 Broad street, and No. 19 Wall street. Parties desiring to select space and have improvements to suit themselves can see the plans by calling on

EDWARD MATTHEWS,

Corner of Broad street and Exchange Place, NEW YORK.

Financial Condition of California.

The circulation of California is purely a metallic one. By common consent the legal tender currency, though by law applicable to the discharge of debts everywhere in the United States, is not received there at par but at its value as compared with gold, and he is pronounced a dishonorable person who attempts to deal in any other way. The experiment therefore of conducting business on the solid basis of a specie currency has been fully tried in that State, where if its peculiar advantages could be realized, the results should be not only satisfactory but conclusive. The facts, however, do not justify the claim to its superiority as a system. The losses in trade, in commerce, in landed speculations and in mining, have notwithstanding been enormous, and the fluctuations have been excessive. The standard of gold and silver has not produced any uniformity in prices, and the rate of interest is now 24 per cent. per annum and has often been higher. On the Atlantic coast any such rates would be a drag on business if not ruinous to debtors, and we believe they cannot well be paid in California except on the calculation of unusual profits.

Our attention has been drawn to the financial condition of that State, by a very well written and carefully considered article on the subject, in a review of the market in the San Francisco *Bulletin* of March 11th, from which we propose to make a few extracts, which have much interest at the present moment, when the great abundance of paper money has caused a new movement in the direction of the gold territories.

THE RISKS OF BUSINESS IN CALIFORNIA.

"In accounting for the high rate of interest on money in this country, we have regarded it as attributable, not to any scarcity of money as compared with other States in the Union; for this cause, it has been shown, does not exist; but to the large profits, risks and expenses attending the prosecution of business enterprises in California. The first of these causes—large profits—has already been considered, and we have also adverted incidentally to the great extent of the field open to such pursuits on the Pacific coast. The country is new, and is rapidly accumulating population and wealth. Its vast mineral resources are yet in the infancy of development; but sufficient progress has been made to overcome, in a great measure, the prejudices and satisfy the incredulity of capitalists in older countries. Its agricultural capabilities also are fully established. Not only can it supply abundantly its own inhabitants with the products of the soil for the support and comfort of life, but has, besides, a large surplus for the markets of the world. Its manufacturing interests likewise are prosperous in a very high degree, and expanding with great rapidity. Its industrial classes are munificently rewarded. Its public improvements and stocks offer productive investments. These circumstances conspire to render money valuable in California, and at the same time to attract both capital and labor; and this attraction, by increasing the supply of those great elements of prosperity, presents the only legitimate and adequate means for reducing the rates of interest and wages; for although we have, in proportion to wealth and population, a larger circulating medium than any other State in the Union, yet because of the abundant opportunities to employ capital to great advantage, and the peculiar nature of our leading pursuits, its interest value is maintained.

But other considerations affecting the value of money in California demand a few remarks. That the risks attending business are greater here than in the older States, admits of no doubt. A very large proportion of the enterprises in which our people engage relate to mining, and are, for a time at least, purely experimental in their character, requiring, often, much labor and outlay of money before any result can be approximated, either good or bad. And such is the exciting nature of mining operations, and the brilliant results sometimes accomplished, in the face of great obstacles, long delays and heavy expenditures, that even persons who have reputation for prudence are not unfrequently carried away by the fascination, and give undue weight to circumstances of very slender import.

Without referring to the excitements of early times—the Gold Bluff, Humboldt Bay, Klamath, Kern River, Fraser River and other contagious hallucinations that in those days seized upon the public mind, involving the loss of thousands of dollars and ending in disappointment, we may refer to the brief history of certain mining companies of the present time for illustrations of the great uncertainty attending this branch of business. Organizations that were once in high repute have sunk almost to the lowest scale in public estimation, carrying down with them the fortunes of many deluded victims. The Wide West of Esmeralda District, once popular at $500 per foot, is now selling at $20. The Real del Monte, a few months since worth $400 per foot, is to-day quotable at $40. Josephine (Coso,) once held at about $40, stands now at less than $2. Nor are these changes confined to any one section or district; it is well remembered that even the Ophir was once held at $4,000 per foot, sold at $3,800, and was expected to reach $5,000—now current at $1,650. The Hale and Norcross not long ago was in demand at $2,300, now weak at $750. Chollar, once at $1,300 is now at $350. The Sheba, once at $500 per foot, is now dull at $125. The Santiago, once eagerly sought by the smart men of the town at $150, has now no market value at all.

Thus it will be seen that capitalists have met with great losses.

VALUE OF PROPERTY.

The value of property except in the larger towns, or some favored localities, is often so nearly nominal that the results of a forced sale can hardly be guessed at. In the mining districts a very large class are migatory and unsettled in their habits and may, upon any sudden impulse, depart to distant regions, having the trader not only unpaid but almost without customers, and sometimes without even public officers to issue or enforce judicial process against the absconding delinquents. Moreover, the elements, not unfrequently, do fearful execution. Many of the mining towns are mere encampments, so to speak—stores, dwellings and all composed of canvass or other highly combustible material constructed carelessly and and in such proximity that a single spark may serve to ignite the whole, and with a rapidity that baffles all efforts to save, every article of value is dissolved into smoke and ashes. How often, during our long dry summers, do we hear of interior towns devastated by conflagration? And none of our readers can have forgotten the terrible casualties of the winter of 1861-'62.

But we need not pursue this theme; it certain-

ly cannot be denied that great risks are incident to our home trade as well as to mining, for which the prudent merchant and capitalist will demand a just compensation. It is proper to remark, however, that these risks are diminishing from year to year, and that the business of the country is gradually becoming settled upon a surer basis. Burnt towns are more substantially rebuilt; the casualties of storm and flood more effectually guarded against; the character of ores, the science of mining and the tricks of sharpers are more perfectly understood; the imperfections of laws and their faulty administration are being corrected, and the importance of fidelity and care in the management of mining incorporations is felt and appreciated. At all events, the business man who has survived a few year' experience in this country, is well prepared by it to grapple with such exigencies as may arise.

Expenses in California.

The expenses of living and of business are necessarily much greater than in the Atlantic States. —First because the greater portion of supplies is derived from thence, and reaches us by a long and and expensive transit. The average cost of importing goods from the Atlantic cities is not less than 25 per cent—upon cheap staple articles the per centage is greater; upon goods of more value it is less. Secondly—the expense of distributing merchandise to the consumer is far greater here than on the other side. The wages of competent clerks are from 50 to 100 per cent higher, and the same is true of interior transportation, and in fact of almost every other charge incident to the storage, handling and transfer of merchandise from place to place. We cannot estimate all these items at less than 33⅓ per cent upon prime Eastern cost, exclusive of retail profits, which for reasons already assigned, and others we shall name are necessarily greater here than at the East. Thirdly—All articles of consumption produced here, with the exception of a few agricultural products are furnished at little if anything less than the cost of importing the same from the Atlantic side. Wherever a margin or profit exists, however trifling, the Eastern shipper avails himself of it. Fourthly—the wages of labor in California, as has been already remarked, are fully 100 per cent. greater than in the Eastern States, and this item affects every branch of business and of household expenditure. The banker, the capitalist, the professional man, the miner, the farmer the manufacturer—all are compelled to pay heavy tribute to the laborer.

It remains but to add that this elevated scale of expenditure can only be sustained by profits bearing a fair and equitable relation to them. If the necessary cost of living and carrying on business is very much greater here than on the Atlantic side, the capitalist must be able to reimburse himself for this additional expense by getting more for the use of his money. If the risks of business are greater here than there, for these also he must be compensated.

It will thus be seen that the risks of business, and the expenses of living are a great drawback to regular transactions and commercial success in California, and the possession of a gold currency has had little if any effect in reducing prices, or lowering the rate of interest. The mining business though in the aggregate a great success, is attended in many individual cases with great losses, and it is curious and instructive fact, that Capt. Sutter, to whom the world is indebted for the gold discoveries in California, has been so unsuccessful with every advantage of priority and numerous opportunities, that the Legislature of that State at its recent session, has thought proper to confer a pension on the veteran, of twenty five hundred dollars a month for the residue of his life; an act of gratitude and liberality which cannot be too much commended.

The conclusion which we draw from the consideration of this subject is, that the abundant production of gold, and the use of it as an exclusive currency by no means ensure stability in prices, cheapness of money, or perpetuity in the value of landed property.

The bullionists can make nothing for their abstract theories from the condition of things in California any more than they can out of those of Mexico. The real use of gold is to settle balances in a universal standard, and nothing more, while a paper currency kept to the limits of Commerce, and restrained from excessive issues is one of the greatest triumphs, and most useful agents of civilised countries.

St. Louis, Alton and Terre Haute Railroad.

(Continued from page 371.)

The next report of the company brings down its affairs to the 1st May, 1858, and covers a period of sixteen months. It was presented to the stockholders at their meeting at Shelbyville on the 7th June 1858.

The results of the year were unpromising, and showed a large floating debt, and amounts due for coupons and interest, etc.

The capital stock at this time amounted to $3,011,150, and there remained subscriptions uncollected $59,130 58, for a considerable portion of which suits had been commenced.

The funded debt consisted of the following issues:

1st mort.	(T. H. & A.) 7 pr ct. 1862–'72.		$1,000,000
2d "	(" ") 8 pr ct. 1865–'70.		2,000,000
1st "	(B. & I.) 7 per cent. 1878....		517,000
2d "	(general) 7 per cent. 1869....		494,000
3d "	(" ") 10 per cent. 1874...		503,000
3d "	(" ") 7 per cent. 1883....		9,000
4th "	(" ") 8 pr ct. '60–'63 & '64	}	141,695
4th "	(" ") 7 per cent. 1868 ..	}	
Total funded debt.			$4,664,695

—on which the discount had amounted to $751,169 41. The annual interest accruing on the debt was $363,525.

The floating debt amounted to $777,922 52 not including $74,291 due to the Michigan Southern and Northern Indiana Company and another growing out of the purchase of the Belleville and Illinoistown Railroad, and $198,705 arrears of interest, being coupons past due and unpaid. There were also a few other claims unascertained.

The assets of the company at this date consisted of sums due, and bills and sums receivable $210,313 89; and there were sundry ledger balances amounting to $59,942 50 some of which were in dispute and all unsettled. The amount of capital stock unpaid, as before stated, amounted to $59,130 58.

Thus the floating debt stood at an aggregate (not including unascertained claims) amounting to....	$950,918 52
And the assets including sundry balances and uncollected stock payments to	329,886 47
Net floating debt....	$621,532 05

The company also owned $83,000 of the Belleville and Illinoistown 1st mortgage bonds, and $497,000 of the 3d general mortgage bonds which were pledged as collateral; also $658,805 of the 4th general mortgage bonds. All of these says the report "may be applied as fast and as far as they can be made available to the funding of coupons and payment of the floating debt."

The rolling stock on the road had been increased since last report to 31 locomotives, 30 passenger cars, 8 baggage and mail cars, 242 box freight and stock cars and 174 platform cars.

The road bed and superstructure had been much impaired by the uncessant wet weather of the season, and needed ballasting. Many of the ties required to be replaced by new ones, and several of the culverts would have to be rebuilt. The locomotives were mostly in good order, but the cars generally required some repairs and painting.

Considerable further expenditure was also required to make the road even safe for travel, and work it with economy. The deficiency even for present business was principally in respect to machinery, repair, shops, station and wood houses, fencing, ballasting and improvements at St. Louis.

The earnings for the period embraced in the report for 1857–8 (16 months) were as follows:

Earnings Jan.—Dec. 1857....	$823,767 16
" Jan.—April 1858	256,120 19
	$1,079,887 35

The expenses were as follows:

Operating..	$556,367 66	$123,320 65
Incidental..	79,242 89	21,099 14
Construct'n	117,020 70	6,977 71
	$752,631 25	$151,397 50–904,028 75
Balance of income account....		$175,858 60

The earnings after defraying the charges appropriated to construction, were therefore inadequate to meet the amount necessary for the payment of coupons, by the sum of $187,666 49, and if the sum required for interest on the floating debt, by a much larger amount. The prospects for the future, however, were pronounced excellent, and there appeared to be no doubt, as the country became more and more inhabited and cultivated that the property would pay well. From the year 1855 to 1857, the value of property assessed in the counties along the line had increased by the sum of $5,207,224 or in reality by an amount equal to the cost of the construction of the road.

During the summer of 1857 the St. Louis, Alton and Chicago Company undertook to build another railroad parallel to the Terre Haute, Alton and St. Louis between Alton and St. Louis. This was attempted under the charter of the Sangamon and Northwest Railroad Company. When, however, the graduation was nearly completed, a contract was entered into between the two companies by which the Chicago Company was admitted to the use of the track of the Terre Haute Company, and of the depot at East St. Louis, with the privilege of wood and water at the latter place for the sum of $5,500 per month, and the work on the new road was discontinued. By further agreement the two companies were each to pay to the contractors on the new road for one year a sum equal to 12 per cent. per annum on the amount of their expenditures on the line. This amount was ascertained at $65,998 98, and the monthly rent of track was heretofore subject to a deduction of $660 payable to the contractors.

The annual report ends in this way—"The financial condition of the company rendered it indispensable, that steps should be taken to obtain an extension upon the floating debt, and a portion of the interest coupons. With this view a Financial Committee was appointed last year (1857), and about $141,000 of debt, and $35,000 in amount of coupons have been funded in 4th mortgage bonds,

It is very important as well for the comfort of the passengers of the road, as for the interest of the creditors, that the floating debt and a portion of the coupons should be funded. Let those embarrassments be removed, and the road placed upon a proper basis for economical management, then we may reasonably anticipated that the ordinary business of the line, will be sufficient to pay at least the current expenses and interest."

We have so often in tracing the history of western roads, discanted on the financial difficulties of 1857–'58, which affected not only a section but the whole country, that we have in the present connection hitherto recurred to them, and do so now simply to show their effect on the earnings of the road under consideration. This can be done in no better way than by comparing the earnings of the respective six months previous and succeeding to the 1st November 1857:

May	$64,186	Nov	$67,538
June	67,621	Dec	63,895
July	61,540	Jan	57,129
Aug	77,894	Feb	52,327
Sept.	78,992	Mar	71,230
Oct	82,994	April	75,433
Total	$433,227	Total	$387,552
Average	72,204	Average	64,592

—which exhibits a difference in the earnings of the two periods of $45,675 or an average difference of $7,612 per month.

The next document issued on the part of the company, was a circular dated New York February 1st 1859, and introduced thus "The following statement is submitted for the information of stockholders, and other creditors of the company." The opening exposition of the circular refers to the gross earnings. These for the years 1856, 1858 inclusive were as follows:

	1856.	1857.	1858.
Passenger	$361,154	$435,699	$369,241
Freight	286,728	306,589	347,770
Mail	16,291	19,530	19,828
Miscellaneous	18,687	61,929	43,606
Total	$662,860	$823,767	$780,445

The earnings for 1858 it will be observed were $43,322 less than those of 1857. The falling off occurred in the months of June, July and August, when the road was suffering from the consequences of the great freshet, which seriously interfered with its business until late in August. The remaining nine months show a slight increase over the corresponding months of the previous year. The high water not only diminished the earnings by interrupting business, but also occasioned damage to the road bed, bridges, and other structures involving increased outlay for repairs, and thus adding materially to the ordinary operating expenses.

The income account given in the circular covers only the period from 1st July to 31st December 1858. The earnings for the six months had been | $420,065 81

—and the expenditures as follows:

Ordinary	$198,027 64	
Extraordinary (caused by flood)	22,631 48	
Supplies charged to storekeeper	31,942 37	
		252,601 49
Earnings less operating expenses		$167,464 32
Construction paid from earnings		102,961 80
Leaving		$64,503 02

—as the actual amount of cash realized, and which could be made applicable to interest and other liabilities. The construction expenditures were necessary, a telegraph line of over 200 miles was put in operation, the machine shops enlarged and equipped, several new bridges created, new station houses built and improvements made in the track, all of a permanent kind.

In relation to the financial condition of the company the circular thus descants: "In November 1857 the company made default in payment of interest on its 3d mortgage bonds; and in February and March 1858, it made default upon its 1st and 2d mortgage bonds. It was hoped that it would be able to resume payment of interest upon all classes of bonds by the present time, but in consequence of its diminished earnings and necessarily increased expenditures as before stated, this expectation has been disappointed. The present managers found the company in default upon all classes of its funded and floating debt, with large arrearages of unpaid taxes, wages of operatives and bills for supplies, and other claims which could not be postponed. They however in August and September 1858, resumed and have since maintained the regular payment of interest upon the 1st mortgage bonds of the Terre Haute and Alton Road of $1,000,000, and upon the 1st mortgage bonds of the Belleville and Illinoistown Railroad of $600,000. Although the net earnings for the past six months have been $167,464 32 as above shown, yet it has been seen that the company could not appropriate of its cash means more than sufficient to pay the interest upon its first mortgage bonds without neglecting necessary works of construction, and it is not anticipated that the company will be able to do more the present year, than to continue the payment of interest upon these 1st mortgage issues, and to make those indispensable improvements in the track which the best interests of all parties require. This declaration is due to the holders of the company's securities."

Of the policy to be pursued in 1859, the following is given as an outline.

"Further considerable expenditures are required the present season, in replacing portions of the ties and chairs, and in ballasting the track; and these improvements which cannot longer be delayed without seriously impairing the value of the property, it is proposed to make from the surplus earnings. These expenditures, to a reasonable amount and judiciously applied upon the track would place the road in condition to reduce the operating expenses very largely, while adding to the value of the property, and the security of the bondholders; and it is believed that the true interests of all parties, creditors as well as stockholders, will be promoted by this course. It follows as a necessary consequence that the coupons upon all classes of the Company's funded debt (except the first mortgage bonds), and the floating debt of the company must be further postponed, In January 1858, the Company executed a fourth mortgage for $800,000, under the security of which they issued bonds designed to fund the past due coupons and the floating debt. These bonds have been offered to the holders of unpaid coupons and others creditors, and to some extent have been accepted by them, It is hoped that all the holders of unpaid coupons and the unsecured creditors seeing that it is not in the power of the company to make any other disposition of their claims will fund them accordingly.

"The road and its earnings are the only source to which creditors can look for the satisfaction of their claims. The managers cannot prevent floods or extraordinary accidents, nor can they ensure good crops or improve the general business of the country and thus increase the receipts and net earnings of their lines as fast as they could desire The utmost they can do is to administer the property faithfully and to distribute its net earnings equitably among the parties thereto entitled. The rights of the creditors are fixed by the priorities of their securities and the earnings of the road cannot be diverted from the payment of current expenses, necessary repairs and interest upon the funded debt to the discharge of other and unsecured claims.

"This view of the case should be considered by those who hold unsecured claims. The company can do no more than repeat its offers of fourth mortgage bonds to parties who are disposed to fund such claims. If the debt could all be funded, the road when in good order and in a season of good business would doubtless earn sufficient to meet the interest upon the entire amount."

The general account of the company on the 1st of February, 1859, is given in the circular, and as this statement was the last made by the company before the property passed into the hands of Trustees it is of value as showing its condition at the time:

Capital stock		$3,026,903 32
Funded debt—		
1st mort. (T. H. & A.)	$1,000,000	
2d " "	2,000,000	
1st " (B. & Ill.)	574,000	
2d " (")	494,000	
3d " (T. H., A. & S. L.)	659,000	
4th " (")	213,525	
Fractional certificates	4 750	
Bonds due 1865	90,300	
		5,035,615 00
Bills payable		454,756 17
Coupons past due & unpaid	$331,939	
Less coupons funded	97,490	
		234,449 00
Scrip issued to operatives for wages		57,835 00
Income account, balance		61,694 70
		$8,865,253 19
Construction		$7,608,958 46
Equipment		628,486 43
Real estate		111,718 81
Bills and sums receivable		170,841 06
Due from officers and agents		103,046 94
Liabilities previous to July 1, 1858, since paid, or for which the companies obligations have been given		242,201 49
		$8,865,253 19

Such is the sum of the information divulged by the Circular of February 1st, 1859. We must now trace the steps adopted by the company to place its affairs in order and which resulted in the reorganization of its financial basis.

A new directory was elected in June, 1859, of which Mr. W. D. Griswold, of Terre-Haute, was elected President. On taking possession the affairs of the company were found to be in inextricable confusion, and were thus substantially represented by the President at a meeting of the bondholders held in New York on the 21st of September, following.

To the operatives the company was largely in-

debted and they were on the eve of revolt. Executions were hanging over the road ready at any moment to be put on any property that might be found unencumbered. In consequence of this the officers were at all times resorting to evasive expedients to avoid seizure. Wood was not sold until it was on the tender and office furniture was held in the name of the officers, that the business might go on. Bridges, tracks, culverts and cross ties were out of repair with no stock in hand in repair. But a small fraction of cars were in order for use, and the supply of water along the line was insufficient for running the trains. The treasury too was destitute, and large balances were due for tickets sold to other companies with which they had connection. Moneys too were due for engines and cars which had been purchased on conditional sale, and which they were liable to have forfeited at any moment by reasons of a non-compliance with the conditions in payment.

In this exigency the President had secured means on his own personal responsibility and had paid such arrearages as were imperative, and had made such expenditures for repairs as were unavoidable. This he had been compelled to do or else run away and abandon the trust. The indebtedness paid and the items purchased were specified in the statement. Still greater expenditures would have to be made to get the road in first rate condition, and to do this it would be impossible that the company pay any interest on bonds for two years.

The result of the consultations at this meeting was a series of resolutions directing the appointment of a committee of eight, who with the President of the meeting were to investigate the affairs of the company, and report at an early day to a meeting of the bondholders with suggestions for an equitable adjustment of the different interests in the property.

The following gentlemen were appointed to be such committee: J. G. Richardson, Judge Radcliff, Richard Irving, Mr. Hawley, Charles Butler, William D. Thompson, S. J. Tilden, and L. N. Van Hoffman.

The committee reported in October, and the following general plan was submitted:

The immediate surrender of the road to the Trustees under the second mortgage—the property to be sold and the company reorganized upon the following basis:

The first mortgages to remain intact but one year's interest beyond the now current coupons to be deferred until 1861 and 1862.

The second mortgage bonds to be exchanged for new bonds maturing in 1892, and the new bonds to be given for the coupons in the seconds up to March, 1862. The present second mortgage bondholders also to pay 10 per cent. in cash, receiving new bonds to exchange as above for principal and interest to 1862.

The third and fourth mortgage bondholders to be made preferred stockholders at par, upon condition of advancing 10 per cent. in cash, for which they would be entitled to second mortgage bonds. Failing to do this they are to be entitled only to 30 per cent. of preferred stock.

The general creditors to be made preferred stockholders by paying 10 per cent. to the second mortgage trustees as above, or failing to make a cash advance to get 30 per cent. in stock.

Stockholders to be new stockholders at the rate of 40 new for each 100 old, provided they are not debtors to the company for bonds.

No dividend of over 7 per cent. to be made upon common stock until all the floating debt is paid; and all over 7 per cent. to form a sinking fund to pay off the 1st mortgage debt.

This plan was subsequently adopted in all its material aspects and formed the basis on which the reorganization of the company was conducted. The principal alteration of the programme was in allowing 50 instead of 40 per cent. in the exchange of the common stock.

The Trustees and Receivers, Messrs. Flagg and Wilkinson, took possession of the property on the 12th of December, 1859. These gentlemen made a report to the bondholders, dated 3d September, 1860, and Mr. Flagg the surviving Trustee and Receiver a final report, dated 30th June, 1862. In these reports are set forth the earnings and expenditures of the road and its general business and financial condition from the time when the Trustees took possession until the road passed into the hands of the new corporation which took the title of the

St. Louis, Alton and Terre Haute Railroad Co. —in contradistinction of its predecessor, the "Terre Haute, Alton and St. Louis Railroad Company." In the report of Mr. Flagg are also contained the proceedings of the committee of bondholders and stockholders on reorganization. The results only of their deliberations and actions, being of interest, it is not desirable in this connection to further recur to them.

The following is a summary of the rolling stock transferred to the new company on the 1st July, 1862: 37 locomotives, 23 passenger cars, 4 mail cars, 3 baggage and express cars, 3 baggage and second class cars, 2 smoking and second class cars, 30 covered freight cars, 30 open freight cars, 85 platform freight cars, 163 coal cars, 33 hand cars, 1 paymaster car, and 240 box freight cars.

The basis on which the reorganization was consummated was as follows:

First mortgage 7 per cent. bonds		$2,200,000
Second " 7 " " preferred	$2,800,000	
Second mort. 7 per cent. b'ds income	1,700,000	
		4,500,000
Preferred stock 7 per cent		1,700,000
Common stock		2,200,000
Total representing cost of road		$10,600,000

The principal of all the bonds will become due and payable in the year 1894. In the reorganization the "first mortgage bonds" and certain other liabilities of the old company with the back interest up to 30th June, 1862, inclusive were converted into first mortgage bonds of the new company. This issue was made in two series of $1,100,000 each, the one designated as series A, the coupons on which are payable 1st of October and April in each year, and the other designated as series B, the coupons on which are payable 1st of January and 1st of July in each year. The first coupons on this class of bonds fell due 1st of October, 1862. A sinking fund of $25,000 a year in semi-annual instalments commencing with January, 1864, is provided for the extinguishment of these bonds.

The "second mortgage bonds" and certain other liabilities of the old company with the arrears of interest computed up to the 31st of December, 1862, inclusive, were converted into second mortgage bonds of the new company, and to provide for this an issue was made of $4,[illegible]500,00.

This issue was divided into two classes, the first of which amounting to $2,800,000 was designated "preferred," and the second amounting to $1,700,000 "income." Both classes are secured by the same deed of trust or mortgage. The difference is that in the deficiency of net earnings in any year to pay the interest in full on both classes, the coupons of the preferred stock shall be paid first, and then the coupons of the income. The new bonds carried interest from the 1st day of January, 1863.

The preferred bonds were issued in two series C and D, each of $1,400,000. The coupons of C are payable 1st of February and 1st of August, and of D, 1st of May and 1st of November in each year.

[In the final adjustment of all the outstanding liabilities of the old company, which by the terms of the bondholders' agreement for reorganization were to be paid in first or second mortgage bonds, it is probable that of the first, about $130,000, and of the second, viz., $82,000 of the preferred, and $38,000 of the income classes may not be required, and may ultimately be cancelled.]

The total issue of "preferred stock" is limited to $1,700,000, the whole of which will be required to be issued. This stock in the organization represents third and fourth mortgage bonds of the old company and other liabilities on which the interest was computed and added up to the 1st day of January, 1863. The first dividend will therefore be from the net earnings of 1863, and is payable on the 1st of May, 1864. The company has already advertised its ability to comply with this fundamental arrangement. In point of priority of payment it ranks next to the 1st and 2d mortgages and the 1st mortgage sinking fund; and in case the dividends cannot be regularly earned and paid, as stipulated, all arrears are to be paid as soon and as fast as the net income of the company will allow. Thus the dividend is accumulative, the only instance in railroad finance in which such a principle has been introduced. It may, however, be here stated that a like principle is said to apply to the guaranteed stock of the Michigan Southern and Northern Indiana Railroad Company; but this is not admitted by the company itself, and is still a matter of controversy. Of "common stock" there had up to the end of 1863 been issued—full stock $1,931,900
And scrip convertible into full shares.. 7,617

Total 31st December, 1863 ..... $1,939,517

A further amount of the common stock will be issued in the final adjustment of some outstanding accounts and claims against the old company, and for some shares of the old stock not yet converted; but it is believed that the aggregate issue will not exceed $2,200,000.

Hitherto the great drawback against the success of the companies that have held this railroad has been the fact that the road has never been finished and equipped sufficiently to secure its economical working. In endeavors to complete the work and provide rolling stock sufficient for the business offered, the earnings have been diverted from their legitimate objects, and the credit of the companies involved, terminating

in ruin and repudiation, but as we have seen in final reorganization. Nor is this great obstacle to financial security as yet overcome. It is true that the property is in a vastly better condition now than ever before, and the facilities enjoyed for operating it greater and more economical. Still it is evident that immense and necessary outlays for improvements must continue and ought to be pressed with all the diligence compatible with the means at hand. And *these means must be supplied by the road itself*, and as will be seen when we come to expose the doings of the company since reorganization, the amount of earnings so expended up to the 31st December, 1863, was no less a sum than $469,828 33.

The amount of work yet to be done and charged to construction before the account can be closed is estimated at $792,469.

The following table exhibits the amount of work chargeable to construction required to complete the road:

1. The East St. Louis improvements	$362,222
2. Bridges and abutments, and culverts of stone to raise embankments and to reduce grades on the whole road	166,447
3. Depots, station houses, etc	37,800
4. Additional shop room and machinery.	25,000
5. Fencing	75,000
6. 500 tons new iron for additional sidings, &c.	40,000
7. Three new locomotives	36,000
8. 50 new coal cars	25,000
9. 50 flat cars	25,000
Total	$792,469

In October 1863, the executive committee after conference with the engineer, and impressed with the conviction of the necessities of the road, authorized immediate proceedings. At the date of the report for 1863, considerable progress had been made with the work, and the additional equipment and iron enumerated, been purchased and included in the financial statement. No estimate, however, was made of the cost of re-rolling iron to replace that which had been found to be so worn and damaged as to be dangerous. This will constitute a considerable item of expense for 1864, and must be added—say for re-rolling 3,000 tons, $120,000—to the schedule of extra work. Nevertheless it is the purpose of the managers to put the road in every respect in a high condition, and to keep it so as to enable it do its work with economy, and increase its receipts on the expenditure.

Preliminary arrangements have been made and perfected for the improvement at East St. Louis, and the work will be prosecuted during the present year.

The following is an account of the earnings and expenditures of the company from the 1st of July, 1862, the date of reorganization to the 1st of January, 1864, embracing a term of eighteen months, viz:

Earnings from July 1, 1862, to July 1, 1863		$1,334,295 53
Earnings from July 1, 1863, to Jan. 1, 1864		838,145 84
		$2,172,441 27
Add for sale of coal and other lands	14,790 00	
" of engine and cars	15,183 97	
		$2,202,415 34
Expenditures from July 1, 1862, to July 1, 1863		$837,952 76
Expenditures from July 1, 1863, to Jan. 1, 1864		647,662 48
		$1,485,615 24
Add for charter liabilities		12,149 57
		$1,497,764 81
—of which as before said $469,828 33 was expended on construction and equipment accounts.		
Earnings less operating and construction		$704,650 53
To which should be added earnings prior to July 1, 1862, and collected after that date		37,667 78
Total surplus		$742,318 31

The above surplus is accounted for as follows:

Remitted to the Bank of N. America for the payment of coupons		$661,070 64
Assets due from other roads		81,247 77

The following is a statement of the Deposit Account by the Executive Committee:

Amount remitted to Bank of N. A.		$661,070 64
Interest and premium on U. S. certificates		3,326 40
Interest on loans		7,531 33
		$671,928 37
Coupons paid	$456,837 64	
Sundry payments, etc	2,209 92	
		459,047 56
		$212,980 81
To which add assets as above		81,247 77
Balance Jan. 1, 1864, to credit of Income Account		$294,228 48

From which the dividend on the preferred stock, payable in May, amounting to $119,000 will be taken, leaving a balance of $175,228 48.

The surplus on hand accrued chiefly from earnings for the first six months of operations, and to this is added the sum of $37,669 78, which belonged to the earnings prior to July 1, 1862, but subsequently collected. During the first six months the only charge upon the earnings was the interest on the first mortgage bonds, amounting to about $55,000. The expenditures for 1863, including the large sums expended for construction and equipment, and including also the payment of the coupons of the 1st and 2d mortgage bonds, and the contribution to the sinking fund exceeded somewhat the earnings of the road for that year.

The directors estimate the expenditures for 1864, for permanent and necessary improvements before enumerated at $250,000.

The amount to be paid for interest on bonds, contribution to sinking fund, and dividend on preferred stock before any dividend can be distributed to the common stock is at 7 per cent., $613,000.

A dividend of 7 per cent. on the common stock would amount to $154,000.

Thus the total amount required over operating and improvement expenditures to satisfy the several interests of the company, and proceed with the improvements, will be $1,017,000.

Is the road capable under present circumstances of earning this amount? Admitting that the earnings for 1864 will exceed those of 1863 by 25 per cent., then the results will be—

	1863.	1864.
Earnings	$1,554,912	$1,943,640
Expenditures 50 per cent.	777,456	971,820
Remaining	$777,456	$971,820
Interest, dividend, etc.		1,017,000
Deficit		$45,182

That 25 per cent. excess over 1863 will be earned in 1864 there can be no doubt entertained, and in this case the whole demand of the capital of the company, and for improvements may be satisfied or nearly so. The small deficit above shown is already supplied by the surplus from last year's account, and may be further reduced from the temporary investment of the deposit account, moneys, and other sources.

This conclusion is not visionary. The road is now in a better condition than ever before; it is better supplied with rolling stock; and its conveniences are ample. Another year, however, may pass without a dividend on the common stock, but after that no sane man can doubt the ability of the road to earn all that its capital requires, and the property become one of the safest and best paying investments in the country.

If it has hitherto been derelict, it is at least now in the path of redemption.

The gross earnings of the road from the opening of the 1st section in November, 1854, has been $7,571,414. During construction, and to the 28th of February, 1856, the earnings amounted to $163,346. In the ten months from the latter date to the 31st December, the gross earnings on the entire line (172½ miles, and in November and December 208¼ miles,) amounted to $662,860. In 1857 the gross earnings were $823,767, in 1858, $780,445, and in 1859, $820,535. Up to this date the earnings had all been used in payment of interest and for construction. Since this time the earnings and expenses have been as follows:

Years.	Gross earnings.	Cost of operating construction, etc.	Balance to Int. Acc'nt.
1860	$860,626	$912,654	$.....*
1861	762,997	602,732	160,265
1862	1,140,271	756,591	383,680
1863	1,554,743	1,131,761	422,982

* Excess of expenditures $52,028.

Improvement of the Ohio River.

The citizens of Louisville, Kentucky, are petitioning Congress to improve the navigation of the Ohio river, so as to make it a ship canal to Pittsburg. It is estimated that to construct the necessary locks and dams will require an expenditure of two millions of dollars only, and that the tolls necessary to pay an interest on this sum will not exceed on ordinary merchandize one mill per ton per mile, while the rates on coal boats, rafts, &c., will be merely nominal. The toll would thus be only one cent and a half on a barrel of flour from Louisville to Cincinnati, and two and a half cents on a keg of nails from Pittsburg to Louisville. The boats would make more money than they now do, as they could run all the year, and always carry full trade.

Western Maryland Railroad.

The commissioners of Washington county, under the authority given them by the General Assembly of Maryland at its last session, passed an order at their meeting on the 12th inst., authorizing the endorsement and guaranteeing the payment of $300,000 of the second mortgage bonds of the Western Maryland Railroad Company, to be applied to the extension of their road to Hagerstown.

American Railroad Journal.

Saturday, April 23, 1864.

Stock Exchange and Money Market.

Since our last issue the market has been violently agitated. A panic suddenly seized the street operators which deprived them of all confidence, and threw them off their feet, as if an earthquake had passed along. It was as severe as that in the year 1857, when Banks and operators alike suspended payment, and hundreds of persons were ruined. For some time past, the public had been warned of an approaching crash, by such portions of the press as have profited by history and experience. It has been remarked by a recent English financial writer, that financial disasters in that Country have always occurred at moments when there was apparently the greatest prosperity, and the least danger, and that when the interest of money seemed most likely to fall to 1 per cent. it generally rose to 10. There is no doubt that the recent fall in prices in Wall street was very satis-

factory to a large class of people, especially those who have found that when gold went up 2 or 3 per cent, all the necessaries of life were advanced, no matter with how little propriety, ten per cent. and more, and the hope is generally entertained that a still further decline will take place in the price of the precious metals.

There were some curious circumstances connected with the recent fall in the gold market. It had been openly said that gold would go up, and should go up to 200 in spite of the Treasury Department; that Mr. Chase could not help himself, that the laws of commerce were inflexible, and that five or six millions of capital were combined and ready to assert its supremacy against uncommercial interference.

Mr. Chase came on to New York, and the first thing he did was to cease issuing gold certificates, which though they were a great help to the importers, had little or no effect on the speculators. He next disposed of a large amount of Government bills on Europe, where he had several millions lying idle, remitted there to his credit from California direct.

Then a friend, a banker, no doubt by his advice if not for his account, put a million some say two millions of gold on the market. This comparatively small sum broke down the combination at once. In spite of its boast, gold fell suddenly to 170, and has continued to recede. It is believed this will be followed by a still further decline, and if Mr. Chase will do as he has been advised by the shrewdest of the press, and the most disinterested of his friends, he will not merely anticipate the May dividends, (about fifteen millions of dollars) but put a few more millions of his surplus on the street, and we shall see gold down many figures lower. He has demonstrated the contingent and beneficial power of the Government, and the advantage of using it, as the British Government always does when speculating "madness rules the hour."

Another curious circumstance is the conduct of the Banks just at this time. Of all other institutions none are more easily alarmed than Banks; none change their policy more readily, or will sooner throw their customers overboard, when they fear any coming danger for themselves. Those who depend upon Banks to carry them through a financial crisis are sure to be disappointed. This is the experience of thousands of merchants who have sought their assistance in their extremity. To call in their loans, to refuse to certify Banker's checks before their accounts were made good, and to demand larger margins from some, and utterly to refuse discount to others, were the usual precautions adopted on the present occasion. More than this, after railing at the Government for its inflation of the currency, they found they had little of it; they could not (many of them could not) pay the checks of their customers in legal tenders, and parted with their Government bonds when they could, in payment of their depositors, even at the loss of the accrued and accruing interest thereon, and had the mortification of finding their own bills at 1 and 2 per cent discount, as compared with the much abused Government currency.

This inflation complained of was in fact scarcity during the last week, and 7 per cent. and upwards was gladly paid by houses to be tided over the crisis. We would here notice a remarkable fact. While many persons are vehement against the policy of the Government which, right or wrong theoretically, is practically the only one it can pursue if the rebellion is to be put down, these overlook one fact, that the greatest inflation is at present due to the Banks themselves. Especially so to the Country Banks. The associated institutions of this city on the 9th of April had loaned out, or in other words set afloat by loans and discounts upwards of two hundred millions of dollars, thus adding about one-third to the currency or what is the same as currency, to that already put out. In other words the Banks of the city of New York alone, have swelled the volume of the paper money in circulation by one-third of the whole amount of Governmental issues, not by the use of their capital merely, but the deposits which it now appears, they were not able to refund on demand. And this for the sake of the private gain of individuals called a corporation without patriotic motives, while the Government in a struggle for the Union and our democratic institutions, a struggle for existence, is censured for issuing two thirds more only than the New York Banks. It is this fact which no doubt influences Congress to tax the local banks, this which induces some of its ablest members to believe that these local institutions should give way to national institutions based upon the largest and best of all securities, with a limited circulation as provided by the new laws, but one everywhere at par. Mr. Arnold of Illinois, has therefore introduced the following resolution:

Resolved, That the expansion of the bank circulation of the country is producing a general and ruinous state of affairs, and should be repressed by taxing the issue of such State Banks. This was agreed to by a vote of 62 to 46.

The recent fall of gold no doubt had its effect on other commodities which have been expanding even in a greater degree. Stocks which had risen beyond all precedent, and which if they paid regular dividends on their capital could never be productive at the market price, fell even with greater violence, and the promoters of the advance (many of them,) fell with the decline. The number of the sufferers by the fall are much greater than outsiders have any idea of. Those who attempted to fly highest, like Daedalus, found their wings melting in the heat to which they had exposed themselves, and were the most severely scorched.

The passage of the new gold bill it is thought will have a further effect on prices. It would seem from the text to reach every case of pure gambling, but it is said there is no law through which some persons are unable to crawl, and it may prove so in this case. Still, evasions of the law will be discreditable to those who practice them, and the large majority of the people are in favor of the principle on which the act is framed.

It is observable, that amid all these troubles of individual speculators, not only have the legal tenders maintained themselves, and even risen in price, but the Government short Treasury notes have proved to be the greatest possible convenience at the clearing house, without which its operations would have been brought to a dead lock. Thus the Government instead of injuring the associated banks has really saved them from a most serious dilemma.

The following gives an interesting view of the operations of the Custom House and Sub-Treasury, between the 11th and 16th of April, both inclusive. Firm as a rock the financial system of the Government thus far beats back all the angry waves which rush against it. The fluctuations in Government securities have been inconsiderable, and not worthy of remark.

Custom House receipts, $3,573,651 05, Sub-Treasury payments, $27,046,101 47, and receipts $27,926,192 73. The balance in the Sub-Treasury on the 11th, was $37,619,224 79, and on Saturday following it was $38,499,316 15. On Tuesday it was $40,992,761.

The subscriptions to the new 5 per cent. loan, or 10-40's, are going on as favorably as could be expected. The recent fall in the miscellaneous Share Market has so alarmed the public, that they will prefer an investment that is safe, in preference to indulging in speculations which are "remote and inaccessible," and which are built up into enormous and dangerous dimensions, though standing on a very small base.

The imports at this port for the week ending on Tuesday were moderate, a large portion of the goods entered for consumption were withdrawn from the bonded warehouse. They were $3,676,-260, against $3,995,099 for the same week in 1863, and the exports were $3,181,888 against $2,525,-094 last year.

The week's exports of domestic produce and miscellaneous goods, (exclusive of specie,) have been to the value of $3,660,907, against $2,748,-686 same week last year, and $1,831,629 the corresponding week of 1862.

The amount of exports from Boston for the week ending April 15, was $315,928 against $377,-340 19 for the corresponding week in 1863.

The total value of the exports from Baltimore for the week ending April 16th, was $102,382.

It will be seen that the imports have been somewhat more moderate than usual, and no doubt if they were lessened to the actual amount of our exports, there would be less demand for exchange or gold for remittance; that is to say, if the received theory of the balance of trade amounts to anything. For be it remembered, if the difference between imports and exports gives the true balance of trade, Great Britain must be on the high road to ruin. For it appears from official statements which we have already published in the JOURNAL, that she has imported within the last three years eight hundred and sixty millions of dollars more than she has exported. We marvel that this fact has not been more generally noticed by our commentators on political economy, and our commercial writers who are shedding so many tears over the idea that the balance of trade is against us, and will bring us into irreparable misfortune.

We must confess we are staggered by the prosperous condition of Great Britain with this tremendous balance of trade against that country. If she can survive 860 millions of foreign indebtedness without a dollar of gold of her own to pay the difference, if out of the three years importation of hundreds of millions of gold not reckoned in the above figures, she has been able to retain but fifteen millions, for such is the fact, we may take courage ourselves, and not be frightened to death by the small difference in our exports and imports which we are at all times ready and able to pay on demand in native gold.

We may close our review of the week in a few words, by stating that the market is still disturbed; that the failures of street operators continued to take place, from Monday through several subsequent days; that legal tenders were so scarce that a premium was paid for them; that the banks had not enough on hand to pay their customers' checks; that afterthe great fall in railway shares, a reaction took place, but not great enough to place them as high on the list as previously; that subscriptions to the 10-40's are increasing, and finally that it is now the settled policy of the Treasury to avoid any further expansion of the currency, and the consequence will be that interest will rule at 7 per cent., and even higher, as it has stood during the week, and the market will be steadied.

Sterling bills have sold at 182 to 185, at which figure there is no profit in exporting it according to the calculations at the London Exchange. It is reported that a fifty million loan is about to be negotiated in Europe by Mr. Chase. A considerable sum went forward by the steamers of Wednesday. The fluctuations of the week will be found recorded in our usual tables.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ An extension of the Boston, Concord and Montreal Railroad is contemplated from Littleton to the Grand Trunk Railroad at Northumberland.

British Commerce.

In the year 1861 there entered into Great Britain 6,304,099 tons British shipping, 1,647,076 American, and 2,653,394 other foreign countries. Total, 10,604,569 tons. In 1863 the amount was 7,951,797 tons British, 647,463 American and 3,287,087 other foreign countries. Total, 11,986,347. This shows a large increase of British shipping and a great decline of nearly two-thirds of the American tonnage, or almost a million tons.

☞ The Susquehanna Coal and Iron Mountain Company is not new to a large portion of our citizens, but the stock was for the first time yesterday offered at our stock board, and two hundred shares sold at $5 05 per share—par value $61¼. The land of this company amounts to about 1,900 acres, 1,000 of which are coal lands, and the improvements consist of one coalery, breaker, &c., producing between thirty and forty thousand tons of coal per annum, and other operations in progress of erection. The company is free of debt.—*Balt. Sun.*

☞ We invite the attention of contractors to the Advertisement for proposals for the building of the great railway bridge over the Ohio river, to connect the Marietta and Cincinnati and Baltimore and Ohio railroads, at Parkersburg, West Virginia.

Montreal and Vermont Junction R. R.

The many friends of this most important enterprise will be pleased to learn that it is progressing in the most satisfactory manner—we may say indeed at railway speed. Everything indicates a rapid completion of the whole work. We learn through Mr. G. Churchhill, the very efficient managing agent, that the track is being laid at the rate of about half a mile per day. The iron, in large qaantities has been distributed over the line, and it is now abundantly evident that the undertaking will be carried through quite as early as its best friends could have expected.—*St. John News.*

☞ The County of Bruce, C. E., has offered $400,000 to any reliable parties who will build a railroad through the county to connect with the Grand Trunk. The offer has attracted attention.

Extension of Horse Railroads.

The Salem and South Danvers Horse Railroad Company will, during the coming season, extend their track to Marblehead. We have been informed that the Lynn and Boston Railroad Co., likewise intend to carry their track to the same place, it being already laid to Swampscott. Should this latter intention be carried out it will open direct communication between Marblehead and Boston.

☞ The people of Woodstock, Vermont, are agitating the subject of a railroad from that place to some point on the Vermont Central Railroad.

☞ The Government of Nova Scotia has withdrawn its bill to repeal the Intercolonial Railway act. The bill to continue their present railway to Pictou was passed unanimously.

☞ The Legislative Council of Nova Scotia have passed a law providing that in case the Halifax Council incur any debt beyond the amount limited by law, or specially provided for by Act of Legislature, the members of the Council shall be personally responsible for the same, and such debt shall not be recoverable from the city.

Pork Packing in the West.

The Cincinnati *Price Current* gives a detailed statement of Pork Packing in the West for the last two seasons, from which the following summary is made, viz:

	1862–'63. No. Hogs.	1863–'64. No. Hogs.
Indiana	585,428	394,217
Iowa	404,861	313,331
Wisconsin	201,745	164,576
Missouri	279,611	370,736
Ohio	991,183	648,836
Illinois	1,472,834	1,273,390
Kentucky	130,920	126,019
	4,084,582	3,291,105
	3,291,105	
Decrease	793,477	

The decrease in number per cent 19 1-5
" in weight " 12½

Total decrease 31 7-10

Lard product 1862–'63 ..... 118,016,080 lbs.
" " 1863–'64 ..... 72,874,468 lbs.

Decrease ..... 45,141,611 lbs.
being a fraction over 38 per cent.

The total crop, although 31 per cent. less than in 1862–'63, is 9 per cent. greater than in 1861–'62, and 46 per cent. greater than that of 1860–'61, when the number of hogs reported packed was 2,164,070.

Beloit and Madison Railroad.

Trains Running from Oregon.—In a short time we shall have a new railroad connection with Chicago. Trains on the Beloit and Madison branch of the Galena and Chicago Union Railroad have commenced running from Oregon, 12 miles south of this city. Most of the grading between that point and the city is completed. Mr. W. Abeel, the agent of the road, will make this city his residence on the 1st of May next.—*Madison Journal.*

☞ We learn that there has been a great rise in the value of houses and land in Montreal, Canada, and its vicinity. 736 new buildings have been erected in that vicinity during the last year. We presume this cannot be attributed to the inflation of the U. S. currency.

Northern Central Railroad.

At the annual meeting of the stockholders of this company, held at Baltimore on the 25th of February last, on motion, a committee of five stockholders was appointed, to whom was referred the report of the directors presented at said meeting, to take into consideration the subject matter contained in said report, and especially the question of the expenditure suggested by the report, the committee to report at an adjourned meeting of the stockholders to be held on the 15th of April.

In accordance with the above resolution the adjourned general meeting of the stockholders was held on the 15th inst., at which the President made the following report:

Before the report of the stockholders' committee is read, it is proper for me, on behalf of the board, to explain the reason for the publication of the notice which appeared on the 4th instant, in reference to an increase of the capital stock of the company.

It is well known that the trade offering for some time past has been very much in excess of the capacity of the road to accommodate, which renders the construction of a second track necessary, and to do this, three modes presented themselves: The first was by creating an additional loan. This was objectionable, because of the difficulty of placing it at par, and because of the present indebtedness being much in excess of the capital. The second was by an increase of the capital stock. This could not be done whilst the original stock was selling in the market under par, and it could not by law be sold at less. The remaining mode was to apply the receipts as they were earned, and this mode has been pursued, although it deprived the stockholders of dividends. As soon, however, as the market value of the stock reached par, the directors determined to issue the notice of increase, and are happy to state that the indications are that the whole amount will be subscribed, and they will thereby be enabled to commence the payment of regular dividends out of current net earnings.

The report of the committee of stockholders appointed in pursuance of the above resolution, is as follows:

The attention of the committee was especially directed to the question of the expenditures suggested in the report referred to them.

They are satisfied that the improvements suggested will be highly advantageous to the company. It is of the first importance that the requisite facilities should be furnished for the accommodation of business as it offers. With a single track and the present equipment this cannot be done.

The road and the rolling stock are now strained to their utmost capacity in the effort to meet the demands upon them, but the local interests cannot be provided for as they should be. This at present is owing in a great degree to the fact that the Government has first to be supplied with transportation, and its wants are such as to exclude from the road a large amount of business which would otherwise be very advantageously done. But the committee entertain the belief that even if the road was not thus used by the Government, the amount of business now offering would be fully equal to the utmost capacity of the company with their present facilities.

The sections of the country which contribute to your road are now being developed to an extent and with a rapidity which renders a large increase of your facilities an imperative necessity, if you would keep pace with such improvements. Within a few months the Philadelphia and Erie Railroad will doubtless be opened to the lakes. Your road is the trunk of that road, as also of the Williamsport and Elmira, the Lackawanna and Bloomsburg, and the Shamokin Valley. A number of smaller roads come into it at different points through the valley of the Susquehanna, and at Harrisburg it joins the Pennsylvania Railroad, and forms the link which connects that road with Baltimore, Washington and the southeast coast of the Atlantic.

The mode of meeting the now large and increasing demands upon the road is to construct a double track and procure a supply of rolling stock and materials adequate to these demands.

The officers and managers of the company have fully appreciated the necessity which existed for increasing these facilities. Three modes of raising the requisite funds presented themselves. One was to borrow the money. This was rejected, because of a proper objection to an increase of the debt.

Another mode was to sell the stock; but so long as it would not bring its par value, this was objectionable, as well in a financial as a legal point of view. The only mode left was to reserve the net profit or earnings, and apply them as realized for that purpose. This has been done, and the improved condition of the road and its stock, with the large business now being done, attest the propriety of this course.

But the recent improvement in the market value of the stock has rendered a change in the policy of the company both proper and just. The stock can now not only be readily disposed of at its par value, but being really worth very much more, by an increase of the shares and giving the stock-

holders the privilege of subscribing for it at par, the company can secure all the funds it may require for the proposed enlargement and expansion of its transportation facilities, and the stockholders obtain a large benefit from the advance in its market value above par.

The requisite funds being thus secured, it leaves the board free to use the net profits or earnings of the road in making dividends to the stockholders.

The committee have been informed that the policy adopted by the board as announced by the President of the company will be in the main as is above indicated. They think this the best course for the interests of the company, and that it should meet the approbation of the stockholders.

On motion, the report of the directors presented at the annual meeting was accepted. Also the reports of the President and committee at the adjourned meeting; and they determined to double the capital stock for the purpose stated, and to offer first to the present stockholders at its par value, the new stock to be issued. At a subsequent meeting of the President and Directors, it was—

Resolved, That all subscribers to the new stock to be issued by this company will have the privilege of paying up their subscriptions in full, and receiving a certificate for the same, provided they do so on or before the 6th of May next.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 13th inst., J. W. Garrett, Esq., President in the chair.

A letter from Fred. Fickey, Jr., Esq., Secretary of the Board of Public Works, was presented, stating that a change had been made in the entire State direction, and naming the ten members duly appointed, of whom five, viz: Messrs. John Coates, Thomas J. Pitt, Thomas Sewell, Jr., W. W. Watkins, and George P. Whittaker appeared, were qualified, and took their seats.

After the transaction of other regular business and the adoption of the reports of the Committees of Transportation and Machinery and of Construction, a number of important subjects reported by the Committee of Finance were acted upon. Among them were the following:

The President was authorized to purchase certain bonds of the Northwestern Virginia Railroad Company, amounting to $13,500, secured by a lien on the station property at Parkersburg. The purchase was recommended upon the ground of the inability of the Northwestern Company to protect the property from a sale under the special mortgage, and of its being essential for the transaction of the business of the Company.

A contract with the Marietta and Cincinnati Company (as reorganized) for the construction of a bridge over the Ohio river, to connect the Northwestern Virginia and Marietta and Cincinnati Railroads was presented. After a statement by the President that it was proposed to build a bridge under the charter granted by the Congress of the United States, and that the form of the agreement prepared by the counsel of the Baltimore and Ohio Railroad and Marietta and Cincinnati Companies was deemed the best that could be arranged, it was approved.

The President stated that the insolvent condition and great embarrassment of the finances of the Northwestern Company prevented that Company from furnishing any aid to this enterprise. It was necessary that the bridge should be built independently of that road, and the plan had therefore been proposed that the structure be erected by a fund to be contributed in the proportion of two-thirds by the Baltimore and Ohio Company, and one-third by the Marietta and Cincinnati Company, the whole to be secured by a direct lien upon the bridge. The proportion of the cost for the Baltimore and Ohio Company was estimated at $500,000. In view of the facts that the Marietta and Cincinnati Company, under its re-organization, had effected entire relief from its financial embarrassments, and is rapidly perfecting its line, and constructing an independent route to Cincinnati, it became of great importance to secure the completion of this bridge as early as practicable. He therefore advised the adoption of the agreement, which had been favorably reported upon by the Committee of Finance, and on motion, the contract was unanimously approved.

Statements were presented of the financial condition of the Company, the expenditures for double track, bridges, &c., upon the Washington Branch, and the prospective requirements of the Company, looking to the procurement of increased equipment, the laying of double track on the Main Stem as well as its completion upon the Washington Branch, construction of a bridge over the Ohio river at Benwood, aid to the Pittsburg and Connellsville Railroad Company; after which the Board adopted the following resolutions:

Resolved, That a dividend of 4 per cent. be declared on the Main Stem of the Baltimore and Ohio Railroad, payable on the 26th of April instant, at the Merchants' Bank of Baltimore, and that the transfer books be closed on the 16th instant, and remained closed until the 26th instant.

Resolved, That the United States tax be paid by the Company.

Resolved, That a dividend of five per cent. be declared on the Washington Branch Railroad for the half-year ending 31st of March ult., payable on and after the 16th of April, at the Merchants' Bank of Baltimore.

Resolved, That the United States tax be paid by the Company.

The Committee of Finance presented also the charter granted at the late session of the Legislature of Maryland to the Washington County Railroad Company. This bill authorizes the construction of a railway from any point east of Harper's Ferry, on the main stem of the Baltimore and Ohio Road to Hagerstown, in Washington county. The charter is a most liberal one, authorizing subscriptions to its stock by any corporation in the State of Maryland, as well as specifically, the Commissioners of Washington county, and the Mayor and City Council of Baltimore.

The Committee, after full examination of the subject, recommended a subscription of $400,000 to the stock of this Company.

In support of this recommendation, addresses were made by J. A. Miller, Esq., one of the Commissioners representing the citizens of Washington County, and by Hon. Robert Fowler, Treasurer of Maryland, and also a Commissioner, who were present by invitation to consider the subject. The road was pronounced not only feasible, but important, and from the nature of the country through which it is to pass, teeming with agricultural, manufacturing and other resources, likely to be highly remunerative. The resolutions were then adopted unanimously.

Pacific Railroad.

The Senate Pacific Railroad Committee have authorized Senator Howard to report as amendments to the Pacific act of 1862 to allow the proper companies to issue their own bonds in sums of $1,000, on which the Government will stipulate to pay 6 per cent. interest, without charge for the first year, and will guarantee the payment of the interest at the same rate for nineteen years.

Such payment of interest to constitute a first mortgage on the road and its equipments, and to be on an equal footing with the bonds themselves. The amount of these bonds will be as follows: On the eastern section, to the eastern base of the Rocky Mountains, $24,000 per mile; on the mountain section $196,000 per mile; on the intermediate space, $48,000 per mile; and on the line west of the Sierra Nevada, in California, $24,000 per mile.

It is supposed that between $80,000,000 and $100,000,000 will thus be required. The forfeiture clauses of the act will be repealed. The entire length of lines will be between 1,800 and 2,000 miles.

If this bill passes it will be highly advantageous to all the roads mentioned in the original bill, and ensures to a certainty the rapid construction of the great Trunk and its authorised connections.

Stowell's Railroad Machine.

This is an ingenious contrivance which worked by from three to four yokes of oxen, is said to do the effective work of one hundred men. It is described as follows:

The machine is built on four wheels like a wagon, having a tongue attached to the forward axle-tree; under this axle-tree is the cutter which is twenty inches wide and cuts from four to six inches deep. As the machine moves along, the earth passes over the Cutter on to a belt or apron which is the same width as the cutter. This belt is some fifteen feet long, and extends over the hind axle-tree, and is made to revolve by gearing on the hind wheels. Directly back of this belt is another belt or apron running at right angles with the machine. This belt is from ten to fifteen feet long and conveys the earth on to the bank, and is driven by the same gearing as the first belt. At the outer end of this belt, is a fifth wheel which supports the belt and runs on the bank as the work progresses. It is driven on both sides of the bank, that is through on one side and back on the other, so in this manner it makes a bank thirty feet wide without carts. As for height, the machine will throw six feet high from the bottom of the ditch, therefore it can make any bank, or fill from four to six feet high and any cut four feet deep without carts.

The machine, as arranged for loading carts or wagons, in making cuts or fills larger than the machine will reach, throws the earth into carts or wagons in the following manner: By taking off the hind belt and fifth wheel and putting on one just long enough to convey the earth from the machine into the carts, the belt projects out over the carts, the carts having to move along with the machine just long enough to get its load. As one cart is filled the hind belt or apron is thrown out of gear by the man who attends to the machine until another cart comes under, when it is again started, instantly filling the cart. The machine does not stop. The earth accumulates on the hind belt while one cart is going out and another gets under. In order to keep the machine constantly moving it requires a cart for every twenty feet the machine moves; in this manner it fills from four to six carts or wagons per minute.

It works in any kind of soil, sod, clay, or gravel. It will cut off roots of three inches in diameter with perfect ease; dig a ditch of any size from 20 inches to 20 feet in width, is easily transported on its own wheels with one span of horses, and is always ready for work. It will also cut to any required depth from one to ten inches according to the strength of the team employed. This machine is indeed a marvellous worker, as it will throw into banks without carts a thousand cubic yards per day, or excavate the same quantity from

a ditch. It is not surprising it has come into great favor. Nearly all the grading on the Keokuk and Clayton R. R., and the Memphis and Canton Roads has been done by it. It made a deep cut on the Alton and Jerseyville Railroad, and was used on the Pacific Railroad between Wyandotte and Lawrence. With a portable engine it has thrown into bank 5,000 cubic yards in 10 hours. The price of a machine is $1,000, and it pays for itself oxen and all in a short time. The patentee and manufacturer Mr. B. T. Stowell, resides at Quincy Illinois.

Railroad Earnings--Monthly.

The earnings of the Hannibal and St. Joseph Railroad in March, 1864, were..... $205,568 98
Corresponding week of previous year.. 84,621 29

Increase..... $120,947 69

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of March, 1864, were:

	1863.	1864.
From passengers	$19,324 22	$32,369 50
" freight	16,001 76	25,925 53
" miscellaneous	1,586 74	1,711 74
Total	$36,912 72	$60,006 97
Increase 1864		$23,094 25

The earnings of the Lackawanna and Bloomsburg Railroad in March, 1864, were... $60,854 49
Corresponding month of previous year. 36,472 59

Increase..... $24,381 90

The earnings of the Housatonic Railroad for March, 1864, were..... $31,766 76
Corresponding month of previous year. 20,963 20

Increase..... $10,803 56

The earnings of the Erie Railway for the month of March, 1864, were..... $1,094,508 17
Corresponding month of previous year 956,445 44

Increase..... $138,062 73

The traffic returns of the Atlantic and Great Western Railway for the months of January, February and March, 1864, were respectively as follows:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February	50,189	178,852	229,041
March	50,518	166,215	226,733

The number of miles open is 322.

Railroad Earnings--Weekly.

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending April 7, were:

	1864.	1863.
Freight	$16,094 91	$12,784 45
Passengers	9,599 56	4,538 12
Mails, rents	968 50	1,035 63
Total	$26,662 97	$18,358 20
Increase		$8,304 77

The earnings of the Chicago and Northwestern Railroad for the week ending April 7, 1864, were:

Passengers	$13,731 74
Freight	19,884 91
Mail	584 37
Express	352 92
Total	$34,553 94
Same period last year	21,542 94
Increase, 61 per cent	$13,011 00

The earnings of the Michigan Central Railroad for the 2d week in April, 1864, were... $76,085 47
Corresponding week of previous year.. 52,296 48

Increase..... $23,788 99

The earnings of the Chicago and Alton Railroad Company for the week ending April 15, were:

	1864.	1863.
Passengers	$16,686 52	$13,218 12
Freight	22,127 22	21,519 22

The traffic of the Great Western Railroad for the week ending April 8th, 1864, was as follows:

Passengers	$24,469 72
Freight and live stock	46,396 62
Mails and sundries	1,661 33
Total	$72,527 67
Corresponding week of 1863	65,986 47
Increase	$6,541 20

Common Carriers.—Liability under Special Contract.

In the case of Mallory *vs.* The Tioga Railroad Company, lately decided in the Supreme Court of this State, the defendant was a corporation operating a railroad, from Blossburg in Pennsylvania to Corning New York, a distance of forty miles. The plaintiff was a miner of coal at the former place, which he was accustomed to transport over the defendants' road, sometimes on the cars of the defendant, but generally on those furnished by himself, in which case he also furnished brakemen, to go on the train under the control of the defendant's conductor, and the cars were loaded and unloaded by the plaintiff. When the plaintiff furnished his own cars, the defendant charged him for freight one dollar per ton of coal, when the cars were furnished by the defendant, the charge was one dollar and twenty cents per ton. On the 21st day of June 1854, the plaintiff's cars, loaded with coal, while being transported from Blossburg to Corning, and about ten miles from the former place, in Pennsylvania, were thrown from the track, while passing a curve, and fifteen of the cars were more or less broken in pieces, and the contents spilled and partially lost.

An action was brought against the company as a common carrier, the complaint alleging that the defendant had received from the plaintiff, and had undertaken to carry from Blossburg to Corning certain cars laden with coal; which the defendant had failed to transport. On the occasion in question, the plaintiff furnished his own cars and brakemen, and loads the cars, agreeing to pay a freight of $1.00 per ton to defendant.

On the trial, the plaintiff claimed that the defendant was a common carrier, but was overruled by the court, on that point. He then gave evidence for the purpose of showing negligence on the part of the defendant, and offered to prove specific facts for that purpose. The evidence was excluded, on objection. The court non-suited the plaintiff, and refused to submit to the jury the question of defendants being a common carrier. Exceptions were taken, and on an appeal to the General Term, where the ruling of the judge below was reversed, and a new trial ordered. The opinion of the Court was as follows:

SMITH, J.—I have come to conclusion that the defendants, in receiving from the plaintiff his cars loaded with coal, and undertaking to transport them over their railroad from Blossburg to Corning, assumed the liabilities of common carriers. That they were carriers, generally, cannot be questioned. Their constant employment being the transportation of property and passengers upon their railroad, for hire. It is claimed, however, by the defendants, that their undertaking with the plaintiff was special, and not within the scope of their general business, and that the law does not cast upon them the duty of common carriers in respect to it, for two reasons, 1st. They undertook merely to furnish motive power to draw the plaintiff's cars, laden with his property, over their railroad, he to load and unload them, and 2dly, the plaintiff was to employ brakemen to accompany his cars on the route.

In support of their claim, the defendants cite the case of Wells *vs.* Steam Navigation Company, (2 Const. 207).

There, however, the defendants engaged to tow the plaintiff's boat on the Hudson River, which is a common highway; and the court held that the defendants were not carriers generally, that the property transported was not in their possession or under their control, and that they were not bailees of any description. This brief statement of the points on which that case turned shows that it differs widely from the case in hand.

Yet, in order to allow the defendants all the aid which they can legitimately derive from that decision, I concede that notwithstanding the defendants with the case at bar were carriers generally, and were the proprietors of the route over which the goods were to be transported, in both which respects their case differs from that of the "Steam Navigation Company." Yet if, as is claimed by them they simply entered into a special engagement outside of their general business, to provide the plaintiff with sufficient motive power to draw his cars over their road, under the care and control of his servants, they did not thereby assume the obligation of carriers. But the case proved is, in my judgment, materially different from those thus hypothetically stated.

In the first place, if I correctly apprehend the testimony, the undertaking of the defendants to carry the plaintiff's cars loaded with his coal over their road, was strictly within the scope of their business which they, as a corporation, were per-

mitted to carry on. The act of the legislature of the State Pennsylvania by which they were incorporated and under which they constructed that part of their road lying that state, authorized them to "charge and receive tolls, and for freight in and for the transportation of goods, and for the conveyance of passengers," and among other rates, prescribed one "on empty cars," and another "on all passengers, *excepting* only such as are *necessarily engaged in conducting the cars.*" It also directed that "no person shall *place any car* or other carriage," on the defendants' railroad "without a permit or license, first had and obtained from said company, subject to such rules and regulations as shall from time to time, be established by the said company, to govern the use of said railroad." And it provided "that all persons using the said road shall only use those cars, wagons and conveyances which shall be adapted thereto, which said cars, wagons and conveyances to be used thereon, for the transportation of persons or commodities, shall be prescribed by the said company."

That part of the railroad lying in New York was operated by the defendants under an agreement with the Corning and Blossburg Company, a corporation created by the laws of the latter State, and by which such portion of the road was constructed and owned. By that agreement the defendants bound themselves to operate the entire road from Blossburg to Corning, for the purpose of transporting passengers and property, specifying coal among other things, and for that purpose to furnish and keep in repair the necessary motive power, engines, machinery and cars, (but the agreement expressly provided that they should not be bound to furnish *coal cars.*)

In 1854 the plaintiff was engaged in mining and marketing coal, and had large quantities of it carried over the defendants' road, some of it in defendants' cars, but principally in his own. When he furnished cars he also furnished brakemen, who were under charge of the defendants' conductor, and he loaded and unloaded the cars, whether furnished by the defendants or himself. The price paid for freight per ton was one dollar and twenty cents if the defendants furnished cars, and one dollar when the plaintiff furnished them. On the 21st of June, 1854, the defendants undertook to transport over their road, from Blossburg to Corning, forty-six cars loaded with coal belonging to the plaintiff. On their way fifteen of the cars were thrown from the track, and this action is brought to recover the damages thus occasioned.

It is apparent from this statement not only that the carriage of loaded cars belonging to others over the defendants' road for hire, was a part of the business expressly authorized by the act of their incorporation, and provided for by their agreement with the Corning and Blossburg Company, but that they had been engaged in thus transporting cars for the plaintiff during several months prior to their undertaking to carry the train in question. But independently of the special provisions of the act of incorporation and the agreement above referred to, I am of the opinion that the defendants' undertaking was in the line of their general business. It was certainly competent for them, as carriers, to undertake to transport the cars of the plaintiff whether loaded or unloaded, upon tracks or platform cars belonging to themselves; and in such case they would clearly have been liable as carriers. The mere fact that the plaintiff's cars were run upon their own wheels, instead of being placed upon platform cars of the defendants, does not, in my judgment take the case out of the scope of the defendants' business as carriers, or relieve them from liability as such. If the injury had occurred in consequence of a defect in the running gear of the plaintiff's cars, which the plaintiff ought to have guarded against, the case would have been materially different, for the reason that a carrier is not liable for a loss occasioned by the negligence or fraud of the owner. But I am unable to perceive in the nature of the undertaking, any sound reason for holding that the defendants did not contract with the plaintiff as carriers. In the next place, the plaintiff's cars, while being thus transported over the defendants' road, were not under the care and control of the plaintiff's servants. The entire train was managed and controlled by the employees of the defendants. The plaintiff merely furnished brakemen, whose duties, as the term implies, related exclusively to the running of the train, and not to the care or guarding of the plaintiff's property; and they were in all respects under the control of the defendants' conductor. They had no efficient means of protecting the property of their principal against the consequences of negligence or fraud, and the circumstance that they accompanied the train merely to assist in running it, does not, in any respect, absolve the defendants from their liability as carriers. If a servant of the owner happen to go with the goods, but there is no intention to let him meddle with the care of them, the carrier will be answerable for loss. (Marsh, Ins. B. I. ch. 7, § 5; Abbott on Ship, part 3, ch. 2, § 33; Story on bail, § 533.) So, if a man travel in a stage coach and take his portmanteau with him, though he has his eye upon the portmanteau, yet the carrier is not absolved from his responsibility, but will be liable if the portmanteau be lost. (Per Chambre, J. in Robinson *vs.* Demmore, 2 Bos. & Pull., 418.) It was said by Bronson, J. in Hollister *vs.* Nowlen, (19 Wend., 237,) that "when there is no fraud, the fact that the owner accompanies the property, cannot affect the principle in which the carrier is charged, in case of loss." He likened the liability of a carrier to that of an innkeeper, and cited the remark in Calyes case, (8 Co., 63,) that "it is no excuse for the innkeeper to say that he delivered the guest the key of the chamber in which he lodged, and that he left the door open; but he ought to keep the goods and chattles of his guest there in safety."

The defendants' possession of the plaintiff's cars while on the route, was none the less complete, by reason of the circumstance that they were loaded, and to be unloaded by the plaintiff. In this respect the case is precisely like that of a stage coach proprietor carrying the trunks of his passenger. I have now considered all the circumstances relied upon by the defendant to take this case out of the rule that the carrier is liable for loss, unless he shows that it was caused by inevitable accident, or the public enemies. I fully appreciate the force of the suggestion that the rule is rigorous and sometimes severe, and that courts have, in various instances, refused to extend it to new cases; but, nevertheless, the rule is too well established to be questioned, and I regard this case as fully within its policy, which, as was said by Lord Mansfield in Forward *vs.* Pitland, (1 T. R., 27,) is "to prevent litigation, collision, and the necessity of going into circumstances impossible to be unraveled.

If these views are correct, there should be a new trial.

American Railroad Journal.

New York, Saturday, April 30, 1864.

Canals of the Canadas.

We are indebted to the Honorable Mr. Galt, Financial Minister of the Canadas, for a copy of the Report of the Commissioner of Public Works, 1863, containing an official statement of the condition of the inland navigation of these provinces, light houses, river works, harbors of refuge, landing piers and public buildings. The report is creditable to the commissioner and to the provincial authorities who have charge of these various works.

The Canals of Canada are really of great value and importance, and those known as of the St. Lawrence system are constructed on a grand scale compared with any others on this continent, and have been successful in retaining a large share of the commerce of the lakes, which otherwise would have been diverted to the American ports. The effect of their construction has not only to attract by cheap navigation a large amount of the products of the Northwest, but to make Montreal the greatest city in British America. The minimum capacity of these Canadian Canals is nearly double that of the enlarged Erie, but they are of inconsiderable length, and have a volume of water at their command at every point, which it would be impossible to obtain for a large ship canal along the whole line of the Erie.

We extract from the report some facts immediately interesting in relation to these, regretting that we have not more space for more liberal quotations.

WELLAND CANAL.

The prism of the canal between Allanburg and Port Colborne has been nearly doubled in sectional area. The bottom width, originally intended to be only 26 feet, having been made 50 feet, to admit of two vessels passing each other at any place on the line. The depth has also been increased fully two feet for the whole distance.

This part of the work is now rapidly approaching completion on the scale above stated. The time, however, is not far distant, when its capacity must be still further increased.

But the work of greatest importance to be undertaken, is the construction of a new line of canal from Thorold downwards to Lake Ontario, with locks capable of passing a large class of propellers. This is believed to be so urgently necessary, that it cannot be too often brought under notice. As its execution will necessarily occupy several years, its early commencement becomes all the more imperative; and although the department is not yet in possession of sufficient information to enable it to recommend any precise line, this can readily be obtained, and the extent of the necessary improvements determined, when the means of carrying them out are placed at the disposal of the Government.

The construction of a second tow path on the Thorold level, between Hurst's and Marlutt's Bridges—and the widening of the channel-way between these points, (alluded to in previous reports)—would so much facilitate the passage of vessels, that it is deemed advisable to bring the subject again under notice. The estimated cost of these works is $18,100.

Large fleets of upward bound vessels, being often detained at Port Colborne by winds which are favorable to downward vessels entering the canal, frequently leads to such an over-crowding of the harbor, as results in considerable delay and damage; which, it is believed, can only be obviated by increased accommodation.

REVENUE FOR THE LAST FOUR YEARS.

Totals	$279,321 17	$239,687 63

WILLIAMSBURG CANALS.

These are the highest of the St. Lawrence series, and have less sectional area than any of the others; their bottom width in cutting being only 50 feet.

The comparatively slight rapids which they were constructed to overcome, are generally navigated both ways by passenger steamers, so that they are principally used by upward bound freight craft.

They are now in three divisions, and are collectively 11⅛ miles in length; but separated by stretches of river navigation 4¼ and 10 miles respectively in length.

CORNWALL CANAL.

This is the largest of the St. Lawrence series, being nearly double the bottom width of those immediately above it, and one fourth wider than those below; the locks are ten feet wider than any of the others which form the series. There have been considerable sums expended in repairs of this work the last year.

BEAUHARNOIS CANAL.

This canal is the only one of the series which is located on the south shore of the St. Lawrence, (and we may add the most exposed to injury from any from the American side.)

It passes through a well settled part of the country, and is consequently crossed by a large number of swing bridges. These, together with the long dykes on both sides of its upper entrance, rendered necessary by the backing of the water there, considerably increase the cost of maintenance. 4,000 lineal feet of the dyke through Hungry Bay was raised last year, for a height of about 20 inches, and a like extent will have to be done during the ensuing season. The dam, built across a branch of the St. Lawrence to deepen the upper entrance, requires constant care and watchfulness to maintain it efficiently.

LACHINE CANAL

This is one of the most important of the series.

The Ottawa River enters the St. Lawrence above Lachine by two branches: one opposite the foot of the Beauharnois Canal, and the other (or navigable channel) a few miles further down Lake St. Louis.

The influx of this large body of water has the effect, in time of floods, of greatly increasing the fluctuation to which the St. Lawrence itself is liable, and necessitates all the works at the head of the Lachine Canal being adapted for a variation of at least seven feet between extreme high and low water.

The repairs of wharves, dock-walls, flour sheds, &c., at the foot of the canal, together with those required at Lachine, greatly increase the annual cost of maintenance.

The excessive current produced in this canal by the inordinate supply of water used for milling purposes at various points along the line, has led to so much difficulty in its navigation, as to be a heavy tax upon the trade.

Another great drawback upon the trade is the deficiency of wharfage and basin accommodation at Montreal; vessels being frequently detained several days waiting for a berth at which they can unload. This has been frequently referred to in the annual reports of this department; but no means having been appropriated for the purpose of remedying it, it is therefore considered advisable to draw attention to the urgent necessity which still exists for these improvements.

The enlargement of the St. Gabriel Basin (for which plans were prepared some years ago) would afford about 3,000 lineal feet of additional wharfage, where a large number of inland vessels could lie at one time, and by this means room would be available in basin No. 1 for the larger class which it is intended to accommodate.

Chambly Canal.

The trade by this route during the last season has greatly exceeded that of any preceding year; the revenue from tolls having amounted to $25,070 66.

Several of the locks have been rebuilt, but further repairs are required to keep it in good condition.

The report strongly recommends an enlargement of the Welland and St. Lawrence Canals to a uniform draught for vessels of 800 to 850 tons burthen. The most interesting part of it, however, relates to the project of enlarging the Chambly Canal, or of constructing a ship canal in its place for the purpose of bringing the large lake propellers into Lake Champlain without unlading. This project is one which we have urged and advocated in this Journal for the past two years with all our power, and have endeavored to enlist the public in favor of a corresponding movement on our part by enlarging the Champlain Canal. Governor Seymour alluded to it in his last message; several journals have expressed favorable opinions, and now it has received its greatest assistance in the recommendation of the Commissioner of Public Works, when he recommends a ship canal between the St. Lawrence and Lake Champlain, a distance by the Chambly route of only about twelve miles, and with but 75 feet lift to overcome. We say its greatest assistance, for if the Chicago propellers get into Lake Champlain it will not be very long before their voyage will be continued to the Hudson. We quote this part of the report to give some idea of what the sagacious men of Canada think of the project, and also to show how they calculate the result of a route, most of which is open water and free from tolls, as compared with the Erie Canal enlargement which is talked of still by enthusiastic and thoughtless persons, although it has never yet been used to its capacity by thousands of boats and millions of tons.

"Even before the present canal system was in full operation, it was foreseen that to ensure anything like an adequate return upon the large expenditure then being incurred, it would be necessary to complete the series, by connecting the waters of the St. Lawrence with those of Lake Champlain. By this means it was believed that we could successfully compete with the Erie Canal, either for the carriage of grain to the great centre of distribution for home consumption at Albany, or to New York for exportation to Europe.

The inhabitants of the Northern States on the Atlantic seaboard, being largely engaged in manufactures, have to import food from the agricultural districts of the West; and the magnitude of the trade thus created is estimated by various competent authorities, at from *five-eighths* to *three-fifths* of all the vegetable food which annually arrives at the level of tide water in the Hudson River.

It would therefore seem, that any well-matured scheme, by which the Provincial Canals might be made the principal channel for so large and profitable a transport, would be well worthy of consideration.

In the existing state of our connections, the cargo of a vessel arriving at Montreal, loaded with grain for the Eastern States, cannot be portaged to Lake Champlain, except at such an increase in the cost of transport as would nullify all the advantages of the St. Lawrence navigation, and give the Erie route a decided superiority in point of cheapness.

But were the River St. Lawrence united to Lake Champlain by a canal of dimensions equal to the enlarged scale of navigation above referred to, this serious drawback would then be removed; and the Province would reap the full benefit of the unequalled advantages which it ought to derive from the possession of the *natural* route.

The vast increase in the trade of Oswego, since the opening of the enlarged Welland Canal in 1845, clearly demonstrates the effect of extended natural navigation. Oswego, with vessels of from 250 to 400 tons burthen, which pass through the Welland Canal, is able to compete with Buffalo, although propellers of 750 to 1,000 tons burthen arrive there from Chicago.

This arises from the simple fact that there are about 118 miles less canal navigation on the Oswego route than on that *via* Buffalo to Albany.

The following table will show the comparative amounts of produce which arrived at Oswego from the West, from 1845 to 1862:—

	Tons.		Tons.
1845	44,560	1854	72,975
1846	63,905	1855	124,004
1847	87,329	1856	222,542
1848	90,411	1857	104,332
1849	119,201	1858	172,674
1850	133,473	1859	93,345
1851	146,204	1860	249,069
1852	182,484	1861	277,679
1853	227,681	1862	276,287

It may, therefore, be fairly inferred that a proportionate success would attend the Champlain route, could vessels of large tonnage reach Whitehall without breaking bulk; and that the cities of Montreal and Quebec would also be greatly benefitted, as regards the increased facilities for transatlantic trade which would result by bringing the large inland vessel alongside of the ocean ship.

Even at present, a propeller of ordinary speed, can make the trip from Quebec to Lake Erie in about 5 days, and that from Lake Erie to Quebec in 4 days; whilst the voyage by canal boats, of less than one half their tonnage, seldom occupies less than 12 days between Buffalo and tide water in the Hudson River. Goods shipped from Quebec also reach the upper lakes earlier in the spring than those from New York *via* the Erie Canal; and produce for the European market can be shipped later from Chicago, *via* Montreal, than by the Buffalo route, for the reason that the voyage is made on the river and through our canals much quicker than by the Erie Canal.

The Champlain connection would also facilitate the large export of sawed lumber, which now finds its way into the United States, for home consumption, from various points along the Canadian frontier, by costly, and often circuitous routes; and would enable it to be laid down at the minimum of transport charges at the great lumber mart of Albany. It would also form a direct route for that portion of this staple product of the Ottawa Valley, required for the American market.

Thus the trade, which now merely *crosses* Lakes Ontario and Erie into the United States, from the West and Upper Canada, would find a speedier and less expensive route to market."

The administration which has recently come into power in the Canadas contains some members who are truly representative men. Among these is Mr. Galt, not only respected for the name he bears, but for his zeal in the cause of internal improvements, and his large and liberal views on all subjects.

The great question of the reciprocity treaty, has a close connection with the subject we have already considered. The St. Lawrence Canals and the Canadian railways without such a treaty will lose most of their productive value. For our part we are anxious that our relations with the Canadas may not be disturbed by the folly or prejudices of any short-sighted persons on either side of the St. Lawrence; and we are always pleased when we can speak favorably of the public works, and the increase of the prosperity of the Canadas.

Pittsburg, Fort Wayne & Chicago Railway.

To the Stock and Bondholders of the Pittsburg, Fort Wayne and Chicago Railway.

The Board of Directors have now to present to you the operations of this Railway during the second year of the existence of this Corporation.

The gross earnings of the Railway for the year 1863, were:

From passenger travel	$1,562,409 05
" freight traffic	3,341,033 65
" transportation U. S. mail	93,900 00
" express companies	38,053 75
" Cleveland and Pittsburg Railroad Co., for use of track between Pittsburg & Rochester	85,000 00
" rent of railway and ground	2,835 33
" miscellaneous sources	14,701 96
Total	$5,132,938 74

The transportation expenses for the year were as follows:

For conducting transp.	$779,316 48	
" motive power	904,246 19	
" maintenance of cars	232,078 98	
" maintenance of way	893,311 96	
" general expenses	217,356 95	
		$3,026,310 56

Balance being net earnings $2,106,623 18

This result makes the operating expenses for the year, 59 per cent. of the earnings. For the year 1862, the operating expenses were 50 per cent. of the earnings, showing an increased per centage of the past year over 1862, a fraction less than 20 per cent., while the increase in the cost of labor and supplies has been more than 30 per cent.

In the report of last year the amount for taxes was not charged as part of the operating expenses of the Railway, following in that respect the custom of most Railway Companies in this country. This year the taxes are included in the item of "General Expenses," and constitute more than half of that item. Deducting taxes, the operating expenses were 56¾ per cent. of the earnings. The taxes for the year (exclusive of amount deducted from interest on bonds and paid to the U. S. Commissioner of Revenue,) are equal to a dividend of 1¾ per cent. on the Capital Stock of

the Company, or equal to *thirty per cent. of a six per cent. dividend to stockholders.* This large per centage is in consequence of the small Capital Stock of the Company: but at the same time, it is belived that the taxes paid by the Company are larger in proportion than are paid on any other property, or by other Corporations employing capital differently.

There has been expended during the year on construction and for additional equipment $1,517,162 25.

This is a very large expenditure out of "income," for the permanent extension and improvement of the property which should be paid for out of fixed capital. It is a sum equal to 29½ per cent. of the earnings of the Railway, and equal to a dividend of 23⅓ per cent. on the authorized Stock Capital of the Company.

It was the aim of the Board to keep the expenditures of the year within the income, but the very great pressure of business upon the Railway demanding increased facilities, and the extraordinary advance in price of several leading articles of Railway supply, during the past two years, caused the outlay for construction and equipment to exceed the appropriation for 1862 by $183,671 11, and for 1863 by $223,056 13, making a total to December 31st, 1863, of $405,727 24, which expenditures has been provided for by the Purchasing Committee from assets in their hands; leaving a surplus of means in the hands of the Company of about $140,000 at the close of the year.

The increased earnings of 1863 over 1862, have been $1,387,623 12, or a fraction over 37 per cent. Of this increase $939,403 52, was derived from the freight traffic, and $448,219 60 from passenger travel and miscellaneous sources; being an increase in the freight traffic of 39 per cent., and in the passenger travel of 25 per cent. On the Eastern Division of the Railway, (Pittsburg to Crestline, a distance of 188 miles) the increased earnings of 1863 over 1862, have been $566,143 22, equal to 28¾ per cent; and the increase has been about equal in the two departments of passengers and freight. The earnings of this Division for the year were $13,404 07 per mile of Railway. On the Western Division, (Crestline to Chicago, a distance of 280 miles,) the increased earnings of 1863 over 1862 were $821,479 90, equal to 28.3 per cent., and the increase has been nearly equal in each of the departments of passenger and freight. The earnings of this Division for the year were $9,286 04 per mile of Railway. The earnings per mile for the whole Railway, were $10,960 78 for the year.

The net earnings per mile of the Eastern Division were $5,803 99, and of the Western Division $3,612 97, and of the whole line $4,498 44.

The operating expenses for 1863 exceed those for 1862, $1,147,911 84, or about 61 per cent. This large increase is partly accounted for in the fact heretofore stated, that the very large taxes of the Company have this year been charged to expenses, as have also expense of every kind not clearly chargeable to construction. The large expenditures for maintainance of way, (which have been increased nearly 80 per cent. over last year) contains much that might have properly been charged to construction. The remaining portion of the operating expenses have only been increased in proportion to the increased business of the Railway, and the increased cost of doing work. The Railway, Machinery, Stations, &c., are now such that the business of 1863, at the prices of that year, could this year be done at less per centage of the earnings than the per centage of last year, prices of materials and labor remaining the same. The development of the capabilities of the line, and of the source of traffic during the year, has been very satisfactory. The whole number of passengers carried last year was 841,039, against 656,885 the year previous. The increase has been in the first class travel, the emigrant travel having fallen off, principally, for the reason that no effort has been made for this class of travel, on account of the non-remunerating rate at which it was carried by competing lines.

On the Eastern Division the East-bound local travel increased in number 18 per cent., and the foreign travel only 5½ per cent.; and the West-bound local travel increased 16 per cent., and the foreign travel 6 per cent.

On the Western Division the East-bound local travel increased 30 per cent., and the foreign travel increased 90 per cent. On the West-bound travel, on this Division, the increase on the local was 33 per cent., and the foreign 70 per cent.

The relative movement of the freight traffic on each of the Divisions, compared with 1862, has been as follows: On the Eastern Division the increased number of Tons of local traffic moved, has been 40 per cent., and of foreign 10 per cent.; and on the same Division the increase Eastward has been, on local traffic 40 per cent., and on foreign 16 per cent. On the Western Division the increased number of Tons moved West has been, of local traffic 37 per cent., and of foreign traffic 50 per cent.; and on this Division the increase on East-bound traffic has been, of local traffic 30 per cent., and foreign 24 per cent. Except in the West-bound traffic, on the Western Division, the increase has been the largest in the local freight traffic of the Railway, on both divisions and in each direction.

At the date of Consolidation, August 1, 1856, and previously, the freight earnings of the line of Railway now owned by this Company, were about 33 per cent. of the earnings from all sources. For the year 1858 the freight earnings were a small fraction less than 50 per cent. of the gross earnings, and the year following were a very small fraction more than 50 per cent. of the gross earnings. The importance of the line for freight traffic has been rapidly developing each year, until now the revenue derived from this source is 65 per cent. of the income from all sources. The short equipment of the Railway, the last few years, has effected the freight more than the passenger earnings, for no passenger business has been declined for want of means of transportation, while much freight sought other avenues to market in consequence of the inability of this Company to move it. With a larger and better passenger equipment, the passenger business might also have been greatly increased over what it has been. In the last annual report, it was stated, in referring to the "extraordinary" expenses of the year, that similar extraordinary expense would be required each year, for several years to come, until the Railway and equipment shall be, as expressed in the Third Mortgage Trust Deed, in "high condition." In carrying out the policy thus announced and approved by you, there has been expended during the year 1863, $1,517,162 25. This expenditure has been made for objects the most pressing, and in such manner as to bring the quickest return on this outlay of capital. The condition of the different parts of the property, with reference to doing an increased business, is now so nearly balanced, that to increase the capacity of the property for additional business, in any one particular, will demand an increase in all. An increased number of locomotives will require an increased number of cars, and those two will require additional shop facilities for repairs. An increase of locomotives and cars increases the number of trains, and they can only be run by increasing the wood and water stations, the length and number of side tracks, and, to some extent, at once a double track. An increase in freight traffic involves at once an increase of station-ground, tracks, &c. This statement of the condition of the property, illustrates the remark, in the last annual report, that "time is essential not only to do the work with economy and judgment, but to develop with some clearness, all the requirements which the future may make upon this Railway."

During the year there has been added to the equipment 27 new locomotives, 604 burthen cars, and 12 new passenger coaches, of the most approved pattern and style, 6 of which are of iron. The side tracks for passing trains have been increased 13 miles in length, and new tracks at engine-houses, shops and stations, have been laid down to the extent of 14 miles, making, at the close of the year, 27 miles more of track than at the commencement. New water houses have been erected at Enon Valley, Upper Sandusky, Johnstown, Middlepoint, Monroeville, Maples and Valparaiso; and at Sewickley and Rochester the capacity of the water houses has been greatly increased, and the facilities for procuring water much improved. New engine houses of a permanent character have been erected at Allegheny City, Alliance, and Valparaiso, having an aggregate of 76 stalls. The large new car shop at Fort Wayne has been completed, and the machinery and tools have been purchased and are being put in. A large brick freight house for the local traffic has been built at Fort Wayne, and a substantial and convenient brick transfer house, 400 feet in length, has been built at Chicago, to accommodate the very large business interchanged between this and other roads terminating in that city. Ditching, side draining, widening cuts and embankments, raising road bed, reducing grades and ballasting, have been prosecuted to the extent that labor could be had for the purpose. Permanent new bridges and culverts have been erected, and embankments have been made, to take the place of decaying trestle work. It has been decided by the Board to continue, during the year 1864, expenditures for construction and equipment, to the extent of an outlay of about $1,912,000, if practicable to do so with reasonable economy. The cost of doing this work and the extent of business that may offer at different periods of the year, may, to some extent, modify present plans.

Forty-three Locomotives have been contracted for, and are to be delivered through the several months from this date until and including November next. Nine passenger Coaches have been contracted for, and are to be delivered in May and July next. Three thousand tons of iron rails for new track and sidings, have been contracted for, and are to be delivered in April, May and June. Portions of the work to be done along the line are also under contract, so that if the necessary labor can be had, the work for the year can be commenced early and under favorable circumstances for a vigorous prosecution.

The money to pay for this work and equipment, is to be derived from the earnings of the Railway, and by a loan or advance from the "Purchasing Committee," to the extent of $500,000, if so much shall be necessary, out of a surplus, of assets, now in the hands of the Committee. If the recommendations made in a subsequent part of this report should be carried into effect the earnings will be appropriated to a different object.

An income of $6,000,000, is estimated for this year from the operations of the Railway, and which is expected to yield $2,500,000, applicable to interest, and the work, appropriated for, in the foregoing estimate. If the Locomotives are delivered according to the contract, the estimate of earnings is quite within bounds; but if builders should be slow in filling their contracts, or if the Locomotives should be taken from us, by orders from the War Department, of which there is more danger, the estimate of earnings may perhaps be too large. These are contingencies which cannot be known or provided against.

Of the Locomotives ordered last year, 8 were taken from the shops, a few months since, by orders from the War Department when within a few days or weeks of being completed. Last Fall, we built at the Fort Wayne shops, by order of the War Department, 20 very superior Box Cars, and sent them for the use of the army in Tennessee, and we are now building 20 more, for the same service under similar orders received a few days ago.

The contract made with the Cleveland and Pittsburg Railroad Company, December 15th, 1863, and ratified by you at the last annual meeting, has been acted upon according to its provisions since the 1st of April last. The operations of both roads have been carried on with entire harmony, under the agreement to the great advantage of each, in increasing income and reducing expenses, and mitigating greatly to the officers, the many vexations and irritations incident to Railway management. During the 9 months of

last year, that the contract was in operation, this Company was entitled to $90,042 33 of the earnings of the Cleveland and Pittsburg Railroad Company, a sum equal to $120,056 44 per annum. A modification of the "second article" of the agreement, so as to allow the Company which may earn more than its proportion of the joint earnings, as fixed in that article, some compensation for expenses of earning such excess, has been under consideration by Committees of the two Boards, but no conclusion has been arrived at.

In the month of October last the New Castle and Beaver Valley Railroad Company completed the track of their road, and since that date this company has furnished the motive power and train service, and most of the freight cars, for the business of the road under a temporary arrangement made by the General Superintendent. Passenger trains are now run each way, morning and evening, between Pittsburg and New Castle, a distance of 50 miles, of which 35, (Pittsburg to Homewood,) is over the railway of this company. In two, or at least three months the short link of ten miles north of New Castle will be completed, so as to form a continuous line by means of the Erie and Pittsburg Railroad from Pittsburg to Erie, by way of Homewood and New Castle. This route opens to Pittsburg by rail, all the border counties of Pennsylvania and Ohio, from the Ohio River to Lake Erie. These counties are as rich in agricultural products and mineral resources, as any county in the State. The traffic of this line, must therefore eventually be very large, which will result in increasing materially the business of the railway of this company east of Homewood. A project is now engaging the attention of those most interested, and who are able to consummate the undertaking, to build a road from New Castle to Franklin, a distance of only 40 miles, over a very easy route as to grades and cost, and through the best coal fields of Lawrence and Mercer Counties. With this link of 40 miles completed, we shall have a railroad line from Pittsburg to Oil City, only 97 miles in length, being as is believed, the shortest and best route and quickest built, to this wonderful region, which is said to possess the magic of making rich every person and every railroad corporation within its boundaries. It is certainly worthy a great effort on the part of the citizens of Pittsburg to aid, to an extent that shall insure the immediate completion of a road from New Castle to Franklin; and the enterprise is also worthy of such consideration, on the part of the company, as will promote the early building of the road.

The Atlantic and Great Western Railroad Company, has completed its road from its Eastern terminus on the Erie Railway, to Galion on the Cleveland, Columbus and Cincinnati road, four miles south of Crestline, crossing this company's railway at Mansfield; but its organization does not yet seem to be completed for doing much business, except in the direction of Cleveland. We have not had as yet, any authoritative information, as to the policy that Company proposes to adopt in regard to business with or over your railway.

The contract with the Chicago and Cincinnati Railroad Company, under which the business of their road is carried on your railway between Valparaiso and Chicago, terminates on the 1st of July next. The contract will not be renewed, because the parties controlling the two corporations that own the road between Valparaiso and Richmond, Indiana, have got up a scheme for a new corporation to build an independent line into Chicago.

The last annual report in referring to the fact that the income of the company derived from the ordinary operations of the railway, had been largely used for construction and equipment, states as a reason therefor, that as the company had no other resource to look for her means, than the earnings of the railway, "the earnings had to fulfil the double function of capital and of keeping capital intact by paying for repairs, depreciation and interest." This was said in view of the restrictions contained in the several mortgages, on an increase in the capital stock of the company, and on the theory, that the earnings would be sufficient to pay interest on the mortgage, furnish and equip the road as fast the increase of traffic demanded, and also in a short time pay dividends on the stock. The business of the past two years and the prospects of the future make manifest the fact, that the earnings have been larger than was anticipated, and will continue to increase still more; and the further fact, that the very causes which make the large earnings, also make a call for an additional capital to furnish the railway and equip it, greater than the earnings can accomplish. The very magnitude of the earnings of the railway but increases the magnitude of the capital required to develop the line to the capacity of the demands upon it.

The earnings of the railway, since the consolidation of the three original corporations have been from year to year, as follows:

In 1857	$1,660,424 89
" 1858	1,567,232 22
" 1859	1,965,987 80
" 1860	2,335,353 83
" 1861	3,031,887 42
" 1862	3,734,390 43
" 1863	5,132,933 74

In each of those years, the earnings were limited by the capacity of the railway, which has been during all this period, and is now, limited by reason of an insufficiency of capital, to complete and equip it to the standard its commanding geographical position demands.

To comprehend fully the developments of the line, the annual increase of earnings should be compared with the increase of capital invested. The amount of capital in the railway at the close of each year since the consolidation, as shown by the accounts of the Comptroller, was as follows:

	Shares.	Bonds.	Floating Debt.	Total.
1857	$5,258,837 66	$7,371,000	$1,418,924 02	$14,048,759 75
1858	5,288,950 27	8,453,000	899,159 88	14,631,110 15
1859	5,351,761 84	8,289,500	1,916,517 04	15,557,778 88
1860	5,481,869 32	9,306,485	1,612,754 22	16,401,108 54
1861	5,480,965 54	9,660,825	1,860,430 87	17,002,121 41
1862	6,500,000 00	12,935,173	None.	19,435,173 00
1863	6,500,000 00	12,935,173	None.	19,435,173 00

Of the $19,435,173, stated as invested at the close of 1863, about $1,000,000 is yet in the hands of the Purchasing Committee unexpended, so that at the commencement of this year, the capital invested was about $18,500,000; comparing then the increase of earnings with the increase of capital, we find that from 1857 to 1863 inclusive, the earnings have increased 209 per cent., while the capital has increased but 31.7 per cent. During two years of this period, there was a large amount of capital unproductive, as the railway had not yet been open for use to Chicago. Commencing with the period of the completion of the railway to Chicago, (January 1, 1859,) we find from that date to the 31st of December last, a period of five years, that the earnings have increased 166 per cent., and the increase of capital has been but 19 per cent. We have now presented to you:

First. The operations of the railway for the past year, in which you will, we think, find much for gratulation as to the past, and still more to hope for in the future.

Second. The plan of operation for the current year, with the ways and means of meeting the expense of the same.

Third. The fact that the current income of the railway is not sufficient, (although it has increased beyond the anticipation of the most sanguine,) to complete and equip it as fast as sound policy dictates, and that therefore some new scheme must be devised.

After much consideration of the question, the Board has decided to recommend to you, as the best plan of attaining the requisite amount of money for the purpose, an increase of the capital stock of the company to an extent necessary to the object, but within the assured ability of the company to earn and pay full dividends on such increase of capital stock.

The accompanying resolutions have been prepared, and your approval is asked as proper, to enable the Board to carry out the plan suggested.

To increase the capital stock of the company and sell the same at its value, required the assent of the first and second mortgage bondholders, as stipulated in the eighth article of the "Trust Deeds;" and that the market value of the stock should to some extent correspond with its intrinsic value. This conjuncture has now happily arrived at the time needed. The stock has been selling in the market above its par value, and there are such intimations from holders of large amounts of bonds, that we have good reason to expect the ready consent of a majority to the increase of the capital stock of the company under an arrangement that will appreciate the value of their bonds.

With the assent of the parties in interest, it is proposed at once to increase the capital $3,500,000, which with present capital will make $10,000,000 and to expend the same as soon as practicable on the railway and equipment and appurtenances. That the earnings from the 1st of January last be appropriated to interest, sinking fund, dividend, and surplus fund. Of the money derived from the sale of this new stock, $1,912,000 will be appropriated for the objects stated in a previous part of this report, and the remainder on similar objects—*i. e.*,—double track, increase of sidings, permanent bridge and culverts, improvement of roadway, increase of shops and tools, addition to motive power, rolling stock, &c. The property when thus improved with the amount here provided, will be capable of earning at the present rates of traffic, at least $8,000,000 per annum. And with such a business once upon the line, the earnings will hardly fall below $6,000,000 per annum, in periods of commercial convulsion and depression of business, but should they fall as low as $5,000,000 per annum, all the demands upon the treasury could be met, and a regular quarterly dividend still be paid on the whole capital stock.

There is no leading railway in this country which has a more solid foundation for an increase of capital, with an assurance of dividends, than yours.

First. Its geographical position, having its termini resting on two of the largest cities in the West, one manufacturing and the other commercial, and the depot of the surplus agricultural products of an empire in extent; each of which cities make very large daily demands on each other, for exchange of commodities, and which exchange passes over the entire extent of your railway. The intermediate country is a portion of the territory of four magnificent States of the Union, sub-divided into twenty-four large counties, and on the roadside of this great line are eighty county seats, cities and smaller villages, containing present resources of traffic and travel, nearly sufficient to tax the present capacity of the railway, with the promise of future increase that extravagance can hardly over estimate.

Second. The cost per mile of the railway, or the capital invested subject to interest and dividends, is less per mile than any other important railway, and much less than the average of twenty of the principal railways of the country. The cost of this railway, equipment, appurtenances, lands, &c., is not quite $40,000 per mile, the average cost of twenty of the leading railways of the East and West, (excluding the Reading Railway on account of its high cost,) is about $55,406 per mile.

Third. A large amount of the earnings of the railway have, from time to time, been expended on construction, and not charged to capital, all of which goes to secure the new capital which is now invited into the property. This item, for the last two years alone, as appears by the reports, amount to $2,280,972 63, being more than 65 per cent. of the increase of capital now proposed.

It is not necessary to enlarge on the facts here stated, they are sufficient to enable every unbiased, intelligent mind to form a correct conclusion, and we believe such conclusion will be, that an immediate increase of capital stock is necessary, and that such new stock will be among the best railway investments yet offered the public.

In each of the first and second mortgage bonds

issued by the company, it is stipulated "that at any time after the first day of July, 1867, the said company, on any day on which a half yearly installment of interest shall fall due, may, at their option, redeem the principal of this bond." It is doubtless in consequence of this provision that the second mortgage bonds of the company have been selling nearly down to par, and the first mortgage bonds only five to six per cent. above par. In a little more than three years from this date, any one of the $10,410,000 of these bonds may, by the provisions of the mortgage above recited, be made to fall due, although perhaps but few would be taken up during any one year. This uncertainty depreciates the whole issue. It is therefore desirable to holders of the bonds that this uncertain duration of the loan should be removed, as the security would therefore be made more valuable.

The reason has nearly, if not quite ceased to exist for which article eighth was inserted in the first and second mortgage trust deeds; and it is believed that bondholders will gain far more by increasing the capital stock, so as to enhance the value of the railway, and increase its income than by keeping the capital down, as fixed by that article. There is no controverting the fact that the more money expended on mortgaged premises by the owners, the greater the security of the mortgagee. An extension of the time for the privilege of redemption of these bonds, and an expenditure of several more millions of dollars on the railway and its equipment would increase greatly the market value of the bonds, and make them intrinsically equal, in all respects, to the best class railway securities. No bond could be better secured; and no interest more certain. It being then the interest of both bond and stockholders to assent to an increase in the capital stock, we have every reason to expect your favorable action and assent.

The very large expenditure required for construction under the policy adopted by the Board, rendered necessary the services of an engineer of judgment and skill, who should in justice to the importance of the subject give all his time to that object. To obtain this the organization has been modified by creating the office of Chief Engineer, the incumbent of which has charge of all works of construction. This change enables the General Superintendent to give much closer supervision to the business of conducting the very large transportation on a long railway. The duties heretofore devolved upon that officer were too great for the true interests of the company. The office of Chief Engineer has been filled by the appointment of John B. Jervis, Esq., who resigned the position of General Superintendent. The reputation of Mr. Jervis as an eminent Civil Engineer is already recorded in the history of public improvements in this country, and requires no commendation at our hands. The Board, however, in making the appointment had satisfactory evidence of its fitness in over two years of valuable service rendered the company.

J. N. McCullough, Esq., was appointed General Superintendent to commence the duties of his office on the 1st inst. This appointment was made from the personal knowledge of the members of the Board that the requisite energy, judgment, executive capacity, and experience was possessed by Mr. McCullough to qualify him for this most important post. The Board with pleasure bear testimony to the character, zeal and fidelity evinced during the year in the discharge of their respective duties of the principal officers of the railway.

By order of the Board of Directors,

G. W. Cass, *President.*

Pittsburg, March 16th, 1864.

Beloit and Madison Railroad.

The Beloit and Madison branch of the Galena and Chicago Union Railroad is now in running order to Oregon, within ten miles of Madison, and we learn that the cars will reach the latter place by the 1st of June.—*Brodhead Independent.*

Pittsburg, Allegheny and New Troy Passenger Railroad.

The bill for the incorporation of this company was introduced into the Pennsylvania Legislature on the 9th inst. The capital stock is fixed at 2,000 shares of $50 each, and half may be raised by mortgage on the road. When the people of Allegheny County shall proceed to build a bridge between the Allegheny and Hand street bridges, the company have authority to subscribe one-half the cost, provided the half be not more than $50,000, and they shall have the exclusive right to use the bridge for passenger railway purposes. Dividends to be made out of the net profits. For the first five years after they commence running the cars they shall pay into the Treasuries of Allegheny and Pittsburg $20 per year for each car and three per cent. of the dividends. For the second period of five years, $30 for each car and five per cent., of dividends; and thereafter $40 for each car and five per cent. They shall conform to the lawful orders of the streets traversed, and keep them in perpetual repair from curb to curb. Councils to establish regulations for the company in relation to having repairing, grading, culverting, and laying gas and water pipes along said streets, and the company shall not use locomotives or engines thereon. The fare is fixed at five cents, and the work must be commenced in six months from the organization of the company.

Vermont Central First Mortgage Bonds.

By a decree of the Court of Chancery of the State of Vermont dated January 19, 1864, it was ordered, among other things, that stock of the Vermont and Canada Railroad Company to the amount of $250,000 should be issued to the holders of the Vermont Central First Mortgage Bonds, towards the cost of constructing the Vermont and Canada Railroad to the Canada line in the town of Highgate, and that the same should be paid from time to time, whenever the sum of $70,000 should be expended, which amount is by the decree to be rateably divided by the trustees and receivers among the holders of the First Mortgage bonds. In accordance with the above decree, the trustees and receivers of the Vermont Central and Vermont and Canada railroads give notice that whereas there has now been expended the sum of $70,000 in the construction of said road, a payment of 3½ per cent on the said bonds, being $70,000, will be made in the stock of the Vermont and Canada Railroad Company at the par value thereof, and in cash for all sums less than $100, to all such as may prove themselves bondholders on or before the 20th day of May next.

Holders of Bonds will be required, before payment, to furnish schedules of their bonds stating the number of each bond, the amount of same, with the name and residence of the present owner, and whether registered or unregistered, which schedule must be properly verified by the owner or holder of said Bond and delivered to John M. Pinkerton, Esq., No. 39 State street, Boston, or to the Trustees and Receivers at their office in St. Albans, Vermont. Payment of the stock, or cash, on said Bonds will be made at the office of the Vermont Central Line, No. 5 State street, Boston, on the 1st day of June, 1864, and for ten days thereafter, and on and after June 10, 1864, at the office of the Trustees and managers in St. Albans, Vermont. At the time of said payment, the Bonds must be produced in order that the payment may stamped thereon.

European Central Railway.

Central Europe cannot get into Southern Italy and so to the Mediteranean by any direct or even any continuous line of Railway, in consequence of the barrier of the Alps, which with its lofty eminences and heavy grades seem to defy the skill of the Engineers. The Central Swiss Railway stops at Lucerne, and the South Eastern at Choire. The Berne and Fribourg extends to Lausanne, and thence to Geneva, but these have no connection with the Italian Railways. A tunnel under Mt. Cenis is in process of construction, but it is a tedious job, and will not be finished in five years, and then it will only complete a line from France into Italy. Several projects have therefore been placed before the public to effect a union between Central Europe and Northern Italy. The latest idea, is to commence a railway from Lucerne, carry it round the Eastern shores of the Lake of the four Cantons by Altdorf through the famous pass of St. Gothard, to Biasca, Bellinzona, Lugano and Chiasso to Como; there to join the Italian lines. Another plan is to pass by Coire to Biasca by the pass of Luckmanier. The objects will then be accomplished of obtaining an unbroken line between the North and South, of access to the Mediterranean, from Calais or Ostend, and a saving of three days of sea navigation, and two days of time. The European Central Railway, which proposes the undertaking have already secured from the Canton Tessin, towards the concession of the line from Chiasso to Biasca, the preferential right to extend their line to any junction, with the system of railways of Central Europe at Lucerne or Choire. They intend first to open the line from Chiasso to Biasca, and a contract being made for a sum less than the estimate, the work was commenced on the 18th of January last with the usual formalities.

☞ The following resolutions, attached to the reports of the Baltimore City Council on Ways and Means, were called up in the Second Branch on the 19th inst., and adopted:

Resolved, That the Commissioners of Finance be, and they are hereby authorized and empowered to sell the entire claim of the corporation of Baltimore against the Pittsburg and Connellsville Railroad Company for a sum not less than $1,200,000, of which one million dollars shall be paid on or before the first day of December, 1885, and the balance in cash, or at such period or periods as the Commissioners may determine—not later than the first day of December, 1872, the credit portion of such purchase money to bear interest from the first day of January, 1864, payable on or before the first days of January and July in every year, until paid, and with all necessary stipulations to secure the early completion of the road.

Resolved, That the Commissioners of Finance are hereby authorized and empowered to sell the entire claim of the city of Baltimore against the Northwestern Virginia Railroad Company, for a sum not less than $1,100,000, $100,000 to be paid in cash, and the balance, one million, to be paid at a period not later than the first day of December, 1872, with interest to commence on the first day of January, 1864, and to be paid semi-annually on or before the first days of July and January each, and with all necessary stipulations to secure an early completion of said road, and of a bridge connected with the Marietta and Cincinnati Railroad.

American Railroad Journal.

Saturday, April 30, 1864.

Stock Exchange and Money Market.

The fluctuations in the market during the past week have been sudden and violent. It is almost impossible to follow them with any accuracy of description, or certainty of observation. The changes are recorded in our tables, which are made up with our usual care. We can in these reviews only generalise upon cause and effect, with what judgment our readers may determine for themselves. We recognize the great laws of political economy, and therefore admit that an inflated currency produces high prices, speculation and extravagance, especially the second named. But we fall back on other considerations also, and of greater moment. Such as these.

This effort to maintain the Union and put down this most unjustifiable rebellion, can only be made by the use of means. And these are men and money, the last particularly.

It would have been utterly impossible to have carried on the war on a specie basis. We had not enough in the country for that purpose. We could not have borrowed it in Europe, for there the opinion was that the Union was forever shattered. We could not have relied on a sale of Government stocks at home, which would have been sacrificed at half their value, and the Government would have to disburse whatever currency was received, viz., local bank bills everywhere at a discount, and which would never have been redeemed. Soldiers and contractors would alike have declined taking them after a year or two, and when all the mischief was done, we should have been obliged to resort to Treasury notes. The fault finders must then show us how our financial system could have been better arranged before they join in the condemnation of that, under which we have maintained an expensive and bloody contest.

Say what they may, they cannot deny that the Government has paid the interest on its loans in gold punctually and without hesitation, and has a large surplus on hand. It has saved the debtor class from ruin by the creation of the legal tenders, and given the people the best and the most reliable currency they ever had; preferred to bank paper in every quarter of the Union, sought for within the rebel lines at the rate of 11 dollars of confederate money for one of our own, and in fact setting in motion the whole industrial power and energies of the country. While France and England in their continental wars used their means at a distance from their own shores, and so far reduced the circulation at home of the amount of money raised for the prosecution of war, we have expended almost the whole of our means among ourselves. So far from diminishing the quantity in circulation we have increased it, and in fact added to the exchangeable capital of the Union by just the quantity expended. This makes a material difference in results, in liquidation of general debts, and ability to meet taxation. Sixteen hundred millions have been expended by the Government it is true, but who have got it but the people themselves, who are using it and turning it to account. It is absurd to say that no part of this shall be returned to the Treasury in the shape of taxes, or that it cannot be returned.

It is noticeable, that after a heavy fall in the gold market, and the payment of from 12 to 15 millions in gold as dividends, that a slight recovery in its price was effected by the operators, assisted by the unfortunate loss of Fort Plymouth, which though openly threatened for a month previous, was left without reinforcements either by land or water, though we have upwards of 70 iron clads, and a large force at Fortress Monroe and Norfolk. What a temporary reverse has to do with the price of gold as a purely commercial article we leave to be explained by those who operate in the commodity of disasters as well as the precious metals. Why too, at the circumstance of the arrival in town of the Assistant Secretary of the Treasury, they again fell suddenly, and why on the rumored return of Mr. Chase to this city it should tumble three per cent. in a day as it did on Tuesday, we also leave to those to explain who pretend to believe that the gold market is an honest market, and that it is governed entirely by the laws of trade.

If it be from the excess of importations, which we admit is an evil, why have only two millions of gold left us during the last week, when fifteen millions have been paid out? Where is the scarcity of gold to sanction the high prices, when twelve millions of that paid out, remain behind in the country, and when from the importations from California since the 1st of January, a surplus of three millions is also left with us.

We certainly believe that our importations are too heavy, unless the difference between our exports and imports, as is claimed in England, is the profit of our trade. Should the rule be a good one there, it should be a good one here. If the balance against that country during the last three years by its own showing, is upwards of eight hundred millions of dollars, and its actual increase of specie is but fifteen millions, we need not be much discouraged by the balances which the alarmists are cyphering up in and out of Congress. Nevertheless to be on the safe side, we trust that the increased tariff, and a patriotic spirit of economy in the people of the North, even to the extent of a general agreement to discourage the use of all unnecessary foreign articles, will furnish an immediate remedy.

The imports of the past week were $7,468,933 against $4,622,012, the same week the last season, being the largest amount ever known in any single week before. This is to be attributed to the idea that the newly increased tariff would be avoided, by the introduction of the goods previous to the passage of the law. This plan has, however, met with a complete overthrow, as an act which has passed one branch of Congress, provides for the payment of duties on all such imports. The exports for the last week amount to $3,669,907 against $2,748,686 for the same week in 1863.

The following tables furnished by a cotemporary give us an idea of the trade of the first nine months of the current fiscal year. Total Import of Foreign Merchandise, (exclusive of Specie,)

from July, 1, 1863, to Mar., 31, 1864, of	$154,113,000
Add four weeks in April	21,030,457
Total to date	$175,143,457
Against same time last year	152,078,447
Increased Import since July 1	$23,065,010

The same tables make the Export of Domestic Produce and Miscellaneous Goods, including Foreign articles re-exported from

July 1, 1863, to March 31, 1864	$122,960,000
Add four weeks in April	12,684,538
Total to date	$135,644,538
Against same time in 1853	157,957,230
Decreased exports since July	$22,312,692

The Specie Export from New York, from

July 1, to March 31, amount to	$39,396,000
Add since April 1	4,235,000
Total to date	$44,631,000
Against same time 1863	48,541,000
Decreased specie export since July 1	$3,910,000

The imports at Boston for the two weeks ending April 22, were $2,569,135. The exports for the week ending April 22, were $347,094, against $213,567 for the corresponding week in 1863.

The exports from the port of Baltimore during the past week were $253,640.

The duties received at the New York Custom House, for the three weeks in April (present) amount to $7,314,000, while in 1863 the receipts of the whole month were $3,893,000.

The business of the Sub-Treasury as reported on Tuesday were:

Receipts	$2,305,300 86
Payments	3,209,784 19
Balance	$38,551,760 00

Some idea of the immense amount of business transacted in this city, which just now seems to be the factor for all the Northern, Middle and Western States, may be formed, from the fact that the operations at the clearing house for two weeks ending 23d of April, were $1,319,036,483 44. The total of specie exported since January 1st, is $14,643,639 against $16,352,225 for the same period in 1863.

On the 25th the banks of this city had increased their specie by the amount of $3.180,433.

The 10-40 loan is being rapidly subscribed, as the interest payable in coin is equivalent to 9 per cent. in currency. Great doubt is, however, expressed in financial circles whether it was not an error in Mr. Chase, to have put a 5 per cent. loan on the market at all. This however will be determined by the result. There is at last some prospect of the speedy passage of the Revenue bill as amended in Congress. Never was there a people more anxious and ready to meet adequate taxation than ours. Indeed there is a general feeling of displeasure at the delay which has attended the consummation of legislation, in regard to this important matter. Valuable time has been wasted on the most worthless topics, which should have been given to the National necessities. So, too, the Bankrupt bill has been neglected for personal debates, and useless inquiries on subjects, not intended to be really investigated, and we suppose we shall see a bill of immense length, and intolerable technicality of details, when a simple definition of voluntary and involuntary Bankruptcy in two or three sections, and the residue a mere code of practice under the act, arranged by the Attorney General or any Justice of the Supreme Court, are all that are necessary. There seems to be no one member who comprehends the simplicity of such a bill, with influence enough to get it even reported. It is this continued display of a want of practical common sense which makes the present Congress unpopular with the people.

It is now understood that a considerable number of operators went by the board during the late panic, among them, some large houses who are yet unable to settle their differences. The numerous Mining Companies are also in some doubts as to the success of their schemes. We may mention as an instance of the folly of many of these schemes, at least one example. A Coal Company advertised for subscriptions of several millions, before they had acquired the title to the property on which their operations were based. This property contracted for at less than $200 per acre, was put in the market at an advance of about $600. The first payment was never made on the contract, and the time has been twice extended, and the whole scheme may yet fall through, the consideration money still remaining unpaid, and yet it was expected that the public would, notwithstanding, eagerly rush forward, and without examination subscribe this imaginary capital, and so make the fortunes of three or four persons. Certainly operations like these are pure moonshine.

The railway Share Market has shown signs of weakness, but seems to be renewing its strength, and becoming firm. It should not be forgotten that when it has reached its highest point, there is always the probability of a fall.

The relief obtained by the Erie from the Legislature, appears to be of the following nature, a right to issue eight millions of stock of which three millions are to pay off the maturing 1st mortgage bonds, and five millions for construction. No stock can be issued until the Company file with the Controller a statement of the amount to be issued, and a formal vote by the Board. The old Erie Railroad stockholders—some 300—left out at the reorganization, are allowed to come back into the Company.

There are a good many of the original subscribers to the stock who lost what they paid in, that would like to be let in also, but we do not know whether the terms of the act go so far back as that.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :—

New York.—At. & Gt. Western (Ohio div.) 1st mort., 102; N. Y. Central 6s, 1887, 110; Milwaukee and St. Paul pref., 82½; McGregor Western, 70; Peninsula R. R., 80; do., 1st mort., 100; Sixth Avenue R. The Management of Steel.

Messrs. D. Appleton & Co. have republished a valuable treatise by George Ede, of the Woolwich Arsenal, on the management of steel, forging, hardening, tempering, annealing, shrinking, expansion, and also case hardening. Since steel has become an important article, superseding iron in so many of its former uses, this book comes at the right moment.

Interest and Dividends.

A dividend of 1¾ per cent. will be paid on the preferred stock of the Chicago and Northwestern Railroad Company on the 1st of June next. Future dividend days on the above stock will be on the 1st of December and June.

Interest coupons of the Sinking Fund bonds of the Chicago and Alton Railroad Company, due May 1, will be paid at the office of G. S. Robbins & Son, No. 54 William street. Nos. 441, 755, 363, 338, 17, 41, 73, 378, 458, 305, 550, 176, 519, 2, and 96 of the First Mortgage Sinking Fund bonds have been duly designated for payment, according to the terms of the mortgage. Interest thereon will cease May 1, 1864. The principal and interest as far as accrued of the above bonds will be paid on presentation to S. J. Tilden, 12 Wall street, or L. H. Meyer, 48 Exchange Place.

The Long Island Railroad Company have declared a quarterly dividend of 1½ per cent., free of Government tax, payable on and after May 2, at the Bank of North America, N. Y.

The Manchester and Lawrence Railroad has declared a dividend of 4 per cent., payable May 2.

All Bonds and Coupons, issued by the City of St. Louis (and payable on their face at the Phenix Bank of New York), will be paid, when due, at the Bank of the Republic, New York.

The interest due May 1, 1864, on the Second Mortgage, the Interest and the Equipment Bonds of the Toledo and Wabash Company, will be paid on and after May 2d, at the Bank of the Republic.

Copper Falls Mining Company has declared its first cash dividend of $3 per share, payable June 1.

The Pennsylvania Railroad Company have declared a semi-annual dividend of five per cent., payable May 16, 1864, clear of National and State taxes. Stock and scrip certificates for the extra dividend will be ready for delivery on and after May 2.

The interest on the certificates of profits of the Hudson River Railroad Company, due April 30, will be paid at the treasurer's office.

A dividend of 4 per cent has been declared on the main stem of the Baltimore and Ohio Railroad, and a dividend of 5 per cent. on the Washington Branch Railroad for the half year ending March 31 ult., both free of U. S. tax.

The New York and Nevada Gold and Silver Mill and Mining Company will pay, 2d May, a dividend of 4 per cent. in gold.

Iowa Railroad Decision.

The important case of Meyer & Stucken (contractors of the Mississippi and Missouri Railroad) *vs.* the City of Muscatine, Iowa, decided by the United States Supreme Court in favor of the plaintiffs, renders the city liable in the sum of $130,000, probably with the addition of compound interest for the seven years in which the matter has been in litigation—it having passed through all the lower courts. The plea of the defence was that the city had no right to assist in building railroads or to take stock in them. To this the plaintiff demurred, and the United States District Court overruled the demurrer. The Supreme Court, however, reversed the decision, holding the plea to be bad, and the demurrer well taken, Justice Miller dissenting. The Muscatine *Journal*, from which the above is taken, finds some consolation in the fact that the city will have $130,000 worth of stock in the road.

Milwaukee.—Reduction of its Indebtedness.

It appears from the valedictory of Mayor O'Niel, delivered to the Common Council of Milwaukee on the 22d inst., that its finances have been well administered during the past year. Large reductions of the city indebtedness have been made. The taxes for 1863 have been collected to within 7 per cent of the whole amount assessed. The Comptroller has been able to meet all the current demands on him with promptness, and further, during the past year, $23,000 of the city debt, consisting of readjustment bonds has been paid and cancelled, and a sufficient amount of funds still remain in the hands of the treasurer, belonging to the sinking fund to retire and cancel $25,000 more before the first of June. By this process, the entire bonded debt will be paid up and cancelled ten years before the same falls due, when it is to be hoped that the city never will issue any more bonds.

Of the $166,000 of city bonds which were loaned to the Milwaukee and Horicon Railroad company, $158,500 have been surrendered and canceled during the past year, leaving still outstanding $7,500, for which a sufficient amount of funds has been provided and now remains in the hands of the city treasurer to cancel these on the same terms, whenever presented.

Of the city bonds loaned to the Milwaukee and Prairie du Chien Railroad Company, $33,000 have been surrendered and canceled during the past year, leaving yet outstanding $18,000, for which the city holds on special deposit a sufficient amount of funds to pay in full, both principal and interest, whenever the same shall be presented.

Five thousand dollars of the bonds loaned to the Milwaukee and Watertown Railroad Company have also been surrendered and canceled during the past year.

Thus it will be seen that during the year, $219,000, or nearly a quarter of a million of city and railroad indebtedness has been paid and cancelled. The railroad debt which has hung like an incumbus over Milwaukee for the past eight or ten years, is now so far arranged, that, of the amount for which the city is legally holden, it need not lose one dollar.

Chicago and Northwestern R. R.

The dividend noticed elsewhere of 1¾ per cent. on the preferred stock of this company which has been declared payable on the 1st of June next, it will be observed, is at the rate of 7 per cent. per annum, and is for the quarter ending June 1. This dividend is made for the purpose of adjusting the dividend up to June 1. Dividends will be payable hereafter semi-annually, 1st December and 1st June. The Second mortgage bonds of this company have been largely converted during the past year into a 7 per cent. perferred stock, at the rate of $1,200 of stock for each bond of $1,000, and the interest thereon up to April 1, 1864, as agreed upon by the holders at a meeting last Fall. This conversion we understand leaves the company free of any debt or arrearages of interest on any of its bonds, and in a position to apply its earnings to the payment of dividends. The common stock at the date of the last annual report, April 1, 1863, amounted to $3,731,316. Amount of second mortgage bonds, $2,000,000. The preferred stock, which has since been issued in exchange for this class of bonds, is stated in our tables at $2,400,000. The entire capital stock of the company is therefore not far from $6,131,316.

Railroad Earnings—Monthly.

The following is a comparative statement of the earnings of the Pittsburg and Connellsville Railroad for the month of March:

	1863.	1864.
Freight	$8,362 67	$13,548 30
Passengers	6,722 13	11,708 59
Mail	304 17	304 17
Incidental	51 55	274 86
	$15,440 52	$25,835 92

—Increase $10,395 40, or 67.32 per cent. The receipts of first five months of last fiscal year, $67,284 22; of current year, $110,815 12; increase, $43,530 90—64.1 per cent.

The earnings of the St. Louis, Alton and Terre Haute Railroad for March, 1864	$160,496 57
March, 1863	120,810 00
Increase	$40,186 57

☞ The time for receiving proposals for the building of the great Railway Bridge over the Ohio River to connect the Marietta and Cincinnati and Baltimore and Ohio Railroads, at Parkersburg West Virginia, has been extended to Friday, the 13th of May next. See Advertisement.

Tolls on the Canadian Canals.

The Canadian Government has published an order dated April 16, which declares that after that date, articles of iron of all kinds, and salt, having paid full tolls on the St. Lawrence Canals, shall pass free through the Welland Canal, and that the articles of wheat, flour and corn having paid full tolls through the Welland Canal, shall pass free through the St. Lawrence and Chambly Canals.

Huntingdon and Broad Top Rail Road.

We learn the Huntingdon and Broad Top Railroad Company have purchased the Bedford Railroad, from Hopewell to Bloody run 13 miles, at about one fourth its original cost. Their intention is to finish it at an early day to Bedford, a distance of seven miles. This will prove a valuable acquisition to the local freight and passenger business, both of which are largely increased. The company have now fifty-eight and a half miles of main road and branches, and twelve and a half miles of sideings—making seventy-one miles of single track, a liberal amount of equipment, and 2,600 acres of coal land, with three collieries in operation. Their entire capital, in bonds and funded debt of every description, with common and preferred stock, amounts to but $2,200,000; a less sum than is generally represented by the quantity of coal lands alone, which they hold. We are told that the net earnings of the Company for February and March were double those of the corresponding months of last year, and with the present activity in the coal and iron trade, a great augmentation of receipts may be reasonably expected. A wealthy New York Coal and Iron Co. have purchased 3000 acres of land near Coalmont, and will commence active operations immediately. Another Company from New Jersey have purchased 4000 acres on Broad Top and Terrace Mountains. The Powelton Coal and Iron Company have purchased 5000 acres of valuable ore lands in Woodcock Valley, and expect to build furnaces and rolling mills.

The Groves have commenced the mining of iron ores near Marklesburg with the intention of transporting it, via Broad Top Railroad, to Huntingdon, and thence, by Canal, to Danville; and the Glamorgan Iron Company are opening up their ore banks, near the Broad Top Railroad, preparatory to the manufacture of iron from coke made from Broad Top coal. With all these surroundings the prospects of the Huntingdon and Broad Top Company are more flattering than ever before, and promise an early return to holders.—*Philad. Ledger.*

Railroad Earnings--Weekly.

The earnings of the Galena and Chicago Union Railroad for the week ending April 22, were:

	1863.	1864.
Freight	$22,487 48	$32,102 10
Passengers	8,379 17	13,760 22
Mails, &c	1,250 00	1,300 00
Total	$32,116 60	$47,162 82
Increase 1864		$15,045 72

The earnings of the Marietta and Cincinnati Railroad for the 3d week in April, were:

	1864.	1863.
Passengers	$6,096 85	$3,215 20
Freight	9,302 68	11,721 26
Mail, express & telegraph	1,054 58	721 00
Total	$16,454 11	$15,657 46
Total this month to date	$50,528 16	$46,667 15

The earnings of the Grand Trunk Railway for the week ending April 16, 1864, were:

Passengers	$31,729 64
Express freight, mails and sundries	2,500 00
Freight and live stock	58,948 43
Total	$93,178 07
Corresponding week, 1863	71,121 00
Increase	$22,057 07

The traffic of the Great Western Railroad for the week ending April 15th, 1864, was as follows:

Passengers	$23,416 84
Freight and live stock	41,020 85
Mails and sundries	1,245 27
Total	$65,682 96
Corresponding week of 1863	53,945 54
Increase	$11,737 42

The Detroit and Milwaukee Railroad traffic for the week ending April 14, 1864:

Passengers	$11,429 31
Freight and live stock	12,535 27
Mails and sundries	584 74
Total	$24,513 32
Corresponding week last year	19,435 31
Increase	$5,078 01

The earnings of the Hannibal and St. Joseph Railroad first week in April, 1864, were $46,843 76
Corresponding week of previous year 30,292 52
Increase $16,551 24

The earnings of the Chicago and Northwestern Railroad for the second week in April 1864, were:

Passengers	$14,597 13
Freight	13,157 66
Mail	584 37
Express	352 92
Total	$33,692 08
Same period last year	20,651 97
Increase, 63 per cent	$13,040 11

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending April 14, were:

	1864.	1863.
Freight	$20,624 29	$12,971 92
Passengers	8,576 96	4,690 35
Mails, rents	968 50	1,380 00
Total	$30,169 75	$19,042 27

The earnings of the Chicago and Rock Island Railroad for the 2nd week in April, 1864, were $40,051 00
Corresponding week of previous year 28,283 00
Increase $11,768 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2nd week of April, 1864, were $70,509 00
Corresponding week of previous year 59,238 00
Increase $11,271 00

The earnings of the Michigan Central Railroad for the 3d week in April, 1864, were $77,548 87
Corresponding week of previous year 57,011 30
Increase $20,537 57

The earnings of the Chicago and Alton Railroad for the 3rd week in April were $41,192—an increase of $3,500 over same time in 1863.

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 2nd week of April were $40,712, an increase of $4,865 on same week last year.

Pittsburg, Ft. Wayne & Chicago Railway.

We give elsewhere the report of the President and directors of this Company for the year ending December 31, 1863. The following is a comparative statement of earnings and expenses during the past and preceding years:

Earnings:	1862.	1863.
Freight	$2,401,680 13	$3,341,033 65
Passenger	1,116,740 62	1,562,409 05
Express	36,107 32	33,053 75
Mail	93,900 00	93,900 00
Rent of railway	85,000 00	85,000 00
Rents	3,619 73	2,835 33
Miscellaneous	8,312 82	14,701 96
Total	$3,745,310 62	$5,132,933 74
Expenses, viz:		
Conducting transportation	$504,867 80	$779,316 48
Motive power	634,006 55	904,246 19
Maintenance of way	501,420 68	893,311 96
" cars	169,122 72	232,078 98
General expenses	68,980 97	217,356 95
	$1,878,398 72	$3,026,310 56
Net earnings	$1,866,911 90	$2,106,623 18
Earnings per mile	$7,997 67	$10,966 78
Expenses "	4,011 10	6,462 33
Net earnings pr mile	$3,986 57	$4,504 45
Mileage of engines	2,694,467	3,472,914
" cars	24,533,330	30,523,395
Tons transported	643,107	805,525
Mileage of do	126,046,905	166,570,631
Passengers carried	656,885	842,032
Mileage of do	45,311,455	61,436,269

The outlay for construction and equipment exceeded the appropriation for the year 1862 by $183,671 11; and for 1863 by $222,056 13—making a total to December 31, 1863, of $405,727 24, which expenditure has been provided for by the trustees or purchasing committee, from assets in their hands, leaving a surplus of means in the hands of the Company of $140,000. The Comptroller in his report says:

The release of the future earnings from the burden of the large expenditures, yet necessary for the perfection of, and additions to the Company's property, by an increase of the Capital Stock, and by this method guaranteeing early dividends to the shareholders, and providing, promptly and economically, the additional facilities imperatively demanded for the satisfactory transaction of the business constantly seeking the line as an outlet, is a measure which should engage the early attention of all who are interested, either as shareholders or bondholders of the Company. This effected, the finances will rest upon a broad and safe foundation, and regular dividends on the whole capital will, in all probability, be thereafter secured to the holders of the same.

By reference to the above comparative statement it will be seen that the increase of gross earnings in 1863 was $1,387,628 12; in expenses, $1,147,911 84; and in net earnings $239,711 28. The Superintendent in his report says:

I do not regard it as extravagant to suppose the day is not far distant when the annual traffic will be fifty per cent. more than it was in 1863. The war has doubtless some influence on this; but when the large increase of local traffic is considered, the restriction this has produced on through traffic, and our inability to meet present demands, I cannot doubt a large volume of traffic will find this route its channel, soon after the war is closed. The weight of crops, and the pecuniary condition of the country, will no doubt produce fluctuation, but in any series of five years, for some time to come, an increase may reasonably be expected.

In 1863, the traffic on the Eastern Division was probably over $13,000 per mile of Railway, and on 26 miles the additional traffic ot the Cleveland and Pittsburg passes over it—of these 26 miles 16 are double track. The Committee authorize this track to be completed the present year, though not fully in regard to the high bank at Economy, designing at that place to pass one track through the other for about 2-5 of a mile. This was adopted to postpone an expense of about $30,000, required to complete that embankment. It would be better to have this completed, but it will answer to defer it.

The Railway is now opened from Homewood to New Castle, by the New Castle road, on which two daily trains run. This is a part of the Pittsburg and Erie Railroad Line, which it is expected will be connected through to Erie by July next. No doubt this line will open considerable traffic between Erie and Pittsburg, and probably to some extent require trains exclusively arranged for that line. We now have 22 daily trains to New Brighton, exclusive of extra freight, making a total of 26 to 30 trains. About half of this route from Pittsburg to New Brighton has a double track. The Erie traffic will increase this.

The traffic of the Eastern Division for 1863, is about (have not the exact amount) $13,000 per mile of Railway. An increase of 50 per cent. will require a double track for this Division in order to conduct transportation most economically. What will be true in this respect for the whole Division, is now true for the portion between Pittsburg and Homewood. In my judgment the double track should be extended to Homewood as early as practicable. This will be ten miles from Rochester, the point to which it is now authorized. The line for this ten miles is rather rough to grade for a second track. The line is in places very crooked, and more or less straightening should be done when preparing for a second track. Curves cannot be avoided, but some can be taken out and others very materially softened, so as to greatly improve the line and reduce the wear and tear of rails and machinery. It often happens that lines of railway are located to reduce as much as possible the expense of grading, without regard to the objection to curves in the operations of running it. We have a good many curves on which the rail under present traffic will not last over two years, and what is bad for the rail is equally bad for the machinery and the power required to run it. It is therefore a question of great importance to provide for the most economical management, by expending so much for the straightening of the line, as will be consistent with the advantage in the operation of it. There is no power now to take the original advantage of the ground in many cases, as the work done is too large to be thrown away; but on the Eastern Division there are many curves that could be thrown out, or materially softened at an expense that would be fully warranted by the benefit it would confer in operating the Railway. Attention should be given to this in preparing for a second track.

I have above recommended a second track from Rochester to Homewood, about 10 miles. No detailed estmate has been made for this, but from general observation, I think it would cost about $200,000—including the improvements that should be made in the line.

The next point of importance for a second track is in the vicinity of Alliance where 20 miles would be a great advantage in running trains. This section would be favorable grading and could be made probably for about $15,000 per mile, or $300,000. It would be well to have these two sections of second track as soon as they can be well provided for. If 100 miles of second track could be completed on the Eastern Division in the year 1865, it would be an economical improvement in regard to operating expenses and largely increase the capacity of the Railway.

The question of second track cannot long be deferred, consistent with due regard to the economy of operating the Railway, and its increasing traffic. My view is that sections most pressed, and such as would afford most relief to the general traffic, should first have attention. The latter will generally be, where, from the movement of trains, the greatest number meet. The sections before indicated, appear to me the most urgent, and quite necessary to be entered upon with as little delay as practicable. The Eastern Division will naturally demand the first attention, but the Western Division would indicate more want than its present traffic calls for, if we had the means of accepting all that offered, which we have not by a large amount.

As traffic increases, it will be a serious matter for the Board to consider its eastern outlet. There have been times when we have had from 50 to 250 cars waiting transit east from Pittsburg. This does not often occur except when the river is navigable. When this happens a large amount of freight is brought up for the eastern markets and have proved more than could be taken away, without holding back more or less of our freight. If the Pennsylvania Road cannot increase its capacity to meet such emergency, our business must be restricted to a material extent. In looking to future increase this is an important matter. If we cannot obtain sufficient outlet from Pittsburg, it will be necessary to do all that we can beyond the eastern capacity, via: Lake Shore, and the Atlantic and Great Western.

The Company commenced the year 1864 with 146 locomotives; 67 first class passenger coaches, 18 baggage, 6 mail, 13 express, 16 emigrant, and 8 smoking cars; 642 box freight, 396 stock, and 462 flat cars: 58 drovers, 99 ruble, 117 hand, 7 wrecking and 6 boarding cars. The actual number used in freight is 1,360.

GENERAL ACCOUNT, DECEMBER 31, 1863.

Cost of railway equipment, structures &c	$18,191,293 70
Stock of supplies for current operations	536,719 22
Due from other Companies	296,436 59
Miscellaneous assets	311,724 05
Cash in hand	330,840 10
Balance on debit of income acccunt *	265,727 24
	$19,932,740 90
Capital stock	$6,164,531 89
Funded debt	12,935,173 00
Due to other Companies	34,439 48
Miscellaneous liabilities	242,188 22
Due J. F. D. Lanier, *et al*, Trustees.	12,110 56
Due for current expenditures in December and prior	544,297 75
	$19,932,740 90

* This balance has since been extinguished by the Trustees, and a surplus provided of $140,000.

OFFICERS, 1863–'64.

President.—GEORGE W. CASS.
Vice President.—SAMUEL HANNA.
Gen. Supt.—J. N. M'CULLOUGH.
Chief Engineer.—JOHN B. JERVIS.
Comptroller.—THOS. D. MESSLER.
Treasurer.—J. P. HENDERSON.
Secretary.—WM. H. BARNES.

Russian Railways.

We are indebted to the London Railway *News*, an exceedingly well conducted journal, for an account of the Railways of Russia, and it is interesting to American readers, inasmuch as it gives us a vivid idea of the system in a country which has always been the steady friend of our own, and has patronized on more than one occasion American enterprise and talent.

Previously to the introduction of the system there, there was scarcely anything worthy to be called even a highway, except that between St. Petersburg, Moscow and Warsaw, a macadamized road between Moscow and Warsaw, and a few others less considerable. Wagons without springs, and sleds but little better than boxes, were the principal means of transportation. A mild winter was a real misfortune, for the fields, bogs and morasses were then almost impassable. Starvation might actually occur in a province, when at two hundred miles distance there was an abundant harvest. In spite of temporary assistance by the Government, it was unable to prevent frequent and great distress among the people.

The origin of the railway system is attributed to a German capitalist, the Chevalier von Gerstner, but we may claim for an American, the well-known Col. Whistler, originally connected with the New England railways, the merit of executing the work. The former gentleman began his agitation on the subject in 1833, surveying a line from St. Petersburg to Moscow at his own expense, and a short experimental line was also laid out from the capital to the Emperor's residence at Czar Koleso.

This was opened in 1838, 13 years after the opening of the Stockton and Darlington, and 8 years after the commencement of the Mohawk and Hudson, which was chartered in 1826, commenced in 1830 and finished in 1831. The capital of the Russian Company for its construction was almost all contributed by the lower classes of the people, the merchants and the nobles standing aloof. The capital £156,250 could not, however, be raised till the shares were placed at 57 roubles each, and then it was immediately taken up. This sum even for a short line of 12 miles was found insufficient, and the Government had to come forward with a loan of half a million of roubles. The work was a success. It repaid the Government advance in 10 per cent. instalments, and gave the shareholders a fair dividend. The road was then pushed to Paulosk and the earnings increased. It is now traversed by a million passengers annually, of whom 50 per cent. are of the third class. One of the chief attractions is that of a fine instrumental band which performs during the summer at a hall near the terminus, and this brings great crowds, whose fares materially contribute to the annual dividend of ten per cent. It is curious to see how railways add to the enjoyment of the public as well as to the advancement of their business.

The next movement was the establishment of another short line from St. Petersburg to Peterhoff, a distance of 20 miles, and it succeeded, although there was a competing hourly line of steamers between the two points. Notwithstanding this and the adoption of very low fares, the line is able to make annual dividends at the rate of 6 and 7 per cent. It is proposed to extend it to Riga by the way of Oranienbaum and Reval. This when completed will connect the capital with the Baltic, and thus furnish commercial communication with the ocean during the winter season when the navigation of the Neva is suspended by the frosts.

The success of these two short lines induced the Government to undertake the great line between St. Petersburg and Moscow, at the public expense. Von Gerstner was ready with a route, somewhat circumlocutory, connected with steam vessels on the Volga, and passing through the most important towns of Novrogod, Iver and Moscow. The plan was approved by the Imperial Senate and presented to the Czar Nicolas in 1842, for his sanction. But he was not satisfied with the route. He inquired if it was the shortest which could be laid down, and then taking a map, a ruler and a pencil, he laid the ruler on the map and with the pencil drew a direct line upon it between the two cities. "This," said the Czar, "is my plan." The people of Russia, next to God revere their Emperor, and believe nothing impossible with either. The plan was of course adopted. Count Kleinmichael was selected as Chief Engineer, and he wisely distrusting his own skill and experience, at once employed our countryman, Col. Whistler to take charge of the work. This he did with characteristic energy. He engaged two other Americans, Messrs. Harrison & Eastwick to establish at the expense of the Government, locomotive and rolling stock manufactories at Alexandrowski near St. Petersburg. Ross Winans of Baltimore furnished large portions of the engines and machinery. At one time 50,000 soldiers and 20,000 peasants were employed on the work. The road was finished, regardless of expense in 1851, and in August of the same year five regiments of the guards were sent over experimentally to test its strength and capacity for traffic. Some days afterwards the Emperor and his family went over the line, and in November following, it was opened to the public.

It was found to have cost sixty-five millions of dollars. It has 8 chief stations and 34 stopping places. The time for passenger trains is 30 hours, and express trains 20. The fare is moderate, yet the returns are remunerative. A third class passenger can travel the whole distance of 400 miles by the ordinary trains, for about $3 12½ cents. The express trains charge something more viz., 1st class about $15, 2d class about $10, 3d class about $7 81. The expense of working, all charges included, is about 70 per cent. of the earnings, leaving enough to pay 4 per cent. interest on the capital originally borrowed by the Government for the work, viz., twelve millions of roubles, the rouble being worth 75 cents. It is now disposed to sell out the road to a private company, and negotiations are on foot for the purpose; the price asked being 100 millions of roubles, and 80 millions having been offered by the *Credit Mobilier* of Paris.

Some branch lines are under consideration, but we have no positive information as to the construction of any great and important works.

Progress is now the ruling idea of Russia. Its support of the telegraph line to California, its abrogation of serfdom, its rapid settlement of its possessions in Asia on the coasts opposite ours, the opening of the Amore, and the selection of a port low enough down to be accessible to com-

merce during the winter by American ships, already numerous in that part of the world, are indications of its growing enterprise.

When the Pacific Railroad is finished, we shall see the whole current of the Pacific Ocean trade diverted to our shores.

☞ At the last monthly meeting of the Directors of the Baltimore and Ohio Railroad Company, an appropriation of $400,000 was made by the Board to aid in the construction of a railroad from Hagerstown to connect with the Baltimore and Ohio Railroad at a point east of Harper's Ferry. The sum of $500,000 was also appropriated for the construction of a bridge across the Ohio river for the purpose of connecting the Northwestern Virginia and Marietta and Cincinnati Railroads. Proposals for the construction of this Bridge will be received by James L. Randolph, Esq., Engineer, at Parkersburg, West Virginia, until the 13th of May.

Highways.—Right of Railroad Companies to their use.

In Craig against The Rochester City and Brighton Railroad Company, it was adjudged that the appropriation by a railroad company of a highway and laying its track thereon, is an additional burden upon the soil which entitles the owner of the fee to compensation, and that the Railroad Company acquires the right to such use of the soil in the manner pointed out by law, its proceedings may be restrained by injunction.

The case was heard upon a motion by the defendants, to dissolve an injunction which had been issued to restrain them from laying a railroad track opposite the plaintiff's premises, no consent of the plaintiff who was the owner of the fee to the centre of the street, had been obtained nor had damages been appraised. The defendants had obtained from the city of Rochester, authority to lay the track as proposed. The court denied the motion with the following opinion:

Johnson, J.—In the case of Williams *vs.* The New York Central Railroad Company, (6 N. Y. Rep. 97,) it was held that an appropriation of a highway by a Railroad Company, is the imposition of an additional burthen upon, and the taking of the property of the owner of the fee, within the meaning of the constitutional provision which forbids such taking without compensation; and that the company can derive no title by any act of the legislature or any municipal authority, without the consent of the owner of the fee, or the appraisal and payment of his damages in the mode prescribed by law. The same principle was again asserted in Carpenter *vs.* Oswego and Syracuse Railroad Company, (24 N. Y. Rep. 655,) and also in Mahon *vs.* New York Central Railroad Company (*id.* 658). In the latter case, Clerke, J. who delivered the opinion of the court, says "an easement for the purpose of a highway, does not authorize, as against the proprietors of the soil, the laying down of a railroad upon the track of the highway. The use of the land for a railroad is totally different from that public right of passage for which highways were designed." And still more recently, it is understood the same court, in a case yet unreported, has emphatically reaffirmed the same doctrine. This must now be regarded as the settled law of this State, no other court having the power to overrule, or the right to disregard, the decisions of the court of appeals. These decisions settle and determine most conclusively the questions presented in this case, the important one being whether the defendant can use and occupy the soil of the street for its railroad without the consent of the owner or owners of the fee, on the appraisal and payment of damages to such owners. If anything can be regarded as settled by judicial determination, this, with us at least, is no longer an open question.

It is claimed, however, in behalf of the defendants, that inasmuch as the cars on the defendants' road are to be moved by animal instead of mechanical power, upon the railway, the decisions above referred to do not apply to this case, and several decisions of this Court are cited which do hold that the appropriation of a street or highway, by a railroad company, so far as is necessary for the purpose of laying down and maintaining its track thereon, upon which its vehicles are to be moved by animal power, is not a taking of the property of the owners of the fee, within the meaning of the constitutional provision requiring compensation to be made. There are several cases of this kind, in the court, it must be admitted, distinctly asserting this doctrine. But so far as they are contrary to the decisions of the court of appeals they are of no force or authority whatever, and are not to be followed. This corporation was formed under the general railroad law, and of course has no power, rights, or privileges, superior to other corporations, created under the same law. It can take under its charter and franchise, precisely what other corporations created in like manner can take, without making compensation, or without the consent of the owner, and nothing more.

Nothing can be clearer than that the burthen which the court of appeals has declared to be an addition to that of an easement of a highway and a taking of private property, within the meaning of the provision of the constitution before referred to, does not consist in the particular force by which the carriage is drawn along the street. Every one must see that simply propelling the carriage along the street, whether by horses or mules, or steam, or any other mechanical contrivance, would be simply exercising the right of passage over the highway and no other or different right. But the new and additional servitude or burthen, which constitues the taking or appropriation, consists principally, if not entirely, in the use and occupation of the soil of the street, in laying down and maintaining thereon the permanent structure, upon which alone the principal business of the corporation is to be carried on, as the cases unmistakeably show. This is a permanent and exclusive right and occupancy, which no other corporation or person can enjoy in common with the defendant without its permission.

I am aware of the interpretation put by Brown, J. in the case of The Brooklyn Central and Jamaica Railroad Company, *vs.* The Brooklyn City Railroad Company (32 Barb. 420,) upon the decision in the case of Williams *vs.* the New York Central Railroad Company, above cited. But it is only necessary to refer to the opinion in that case, to show that the learned justice has entirely misconceived the grounds on which the decision must have been rested by the other judges. In the case now before us, it is true, all persons having occasion to use the street, or streets, in which the defendants' track is to be laid, may, under the restriction imposed upon this corporation by the municipal authority of the City, travel upon the track of the road, the same as upon other parts of the street, but not in the same manner, and for the same purpose for which it is to be used by the corporation. To a certain extent, and in very material particulars, the right to the use of the track, for the purpose of passage merely, is in the company exclusively, and not common alike to all. It may be granted that the right of the defendant to the use of its track within the bounds of the city, is considerably less exclusive than it may be beyond those boundaries, where no special restrictions have been placed upon it, beyond those imposed by the statute. But the difference is one of degree merely, and in no respect fundamental.

The provisions of the constitution must apply to the rights and immunities of this corporation in respect to taking private property, alike in Rochester and in Brighton. In either town, so far as the principle of this case is concerned, the sole question is, does the corporation take private property, or to any extent burden it, beyond the servitude of the easement of the highway.

This question, as has been seen, has been repeatedly answered by the court of last resort, and is no longer matter for controversy. Until that court shall seem fit to reverse its numerous decisions upon this question, the defendant, before it can lay down and use its track in the street, must either obtain the consent of the owner of the fee in such street, over which the track is laid, or have the damages appraised, and payment made, as prescribed by statute. I have come to this conclusion after a careful consideration of all the authorities bearing upon the subject, and not without regret on account of the sacrifice of individual interests and public convenience, which it may occasion. But the rule of law, when once ascertained, must be upheld and enforced by all courts, whatever the detriment to the interests of individuals or to the ease and convenience of the public. I shall not attempt to go over the several cases decided in this Court, in the first and second judicial districts, to which we have been referred by the defendants' counsel, for the purpose of pointing out the erroneous character of the decision or of showing their entire inapplicability to the case before us. I rest the decision in this case entirely upon those of the court of appeals, which cannot, as I conceive, without manifest perversion, be distinguished, in any essential particular, from the present case. It may be that in the city of New York where the fee of all the streets is claimed, and held to be in the city, the consent of the city authorities to the laying down and maintaining a railroad in the streets, is to be regarded as the consent of the owner of the fee, as held by my brother Wells, in the case of The People *vs.* Kerr, (37 Barb. 357). But the conclusion of Sutherland, J., in the same case, that the cases of The Trustees of the Presbyterian Church in Waterloo *vs.* The Auburn and Rochester Railroad Company, (8 Hill, 567,) and Williams *vs.* The New York Central Railroad Company, (supra,) "should be considered as having been decided on the theory that the acts of the legislature authorizing the construction of the roads required these companies to acquire title to the soil of the highway

and to compensate the owner therefor," is without any foundation whatever, as will plainly appear from an examination of these cases. But, even if it were so, it would not aid the defendant here, because the act under which it has its being has the same requirement in regard to compensation.

Motion denied.

THE MANAGEMENT OF STEEL.

D. APPLETON & CO.,
Nos. 443 and 445 BROADWAY,

PUBLISH THIS DAY:

THE MANAGEMENT OF STEEL. Including Forging, Hardening, Tempering, Annealing, Shrinking, and Expansion. Also, the Case-Hardening of Iron. By Geo. Ede. Employed by the Royal Gun Factories Department, Woolwich Arsenal. First American from second London edition. 1 vol., 12mo, 50 cents

"Steel being one of the most valuable metals, and requiring great care in the forging, hardening, tempering, annealing, and management of it in general, I think, after having had nearly twenty years' good practice, experience, and study combined, I am now able to give a little information to those who have not had so much to do with it as I have."—[Extract from the Work.

Notice to Contractors.

ENGINEER'S OFFICE
PARKERSBURG, VA., April 20, 1864.

The Baltimore and Ohio and Marietta and Cincinnati Railroad Companies will receive sealed proposals at this office, until the 13th day of May next, for the MASON WORK of the RAILROAD BRIDGE to be built over the Ohio river at Parkersburg, West Virginia.

Plans and specifications can be seen at the Engineer's office at Parkersburg. The Companies reserve the right to reject any or all bids.

Payments monthly in cash, with proper reservation as security for the fulfillment of the contract.

This will be an extensive work well worth the attention of first class contractors.

PROPOSALS.

SEALED PROPOSALS will be received at the office of the Minnesota Central Railway Company, in Minneapolis, Minnesota, until the 5th day of May, 1864, at 12 o'clock noon, for the grading, masonry and bridging on the branch line of said road from Mendota to St. Paul.

This work comprises a large amount of sand rock excavation, and the masonry and superstructure of a bridge across the Mississippi River.

Notice is hereby given that on or about the same date, the work of completing the grading, masonry and bridging on the main line of said road, from Farribault to the Iowa State line, (57) fifty-seven miles, will be contracted for.

The work upon the branch line is of a very heavy character and is worthy the attention of responsible contractors.

Payments will be made monthly, in cash, and bids received for the work in small or large quantities, the company reserving the right to reject any bids not satisfactory as to price or as to the responsibility of the parties making the same.

For information with regard to said work, application may be made to the company's Chief Engineer, at Minneapolis, Minnesota.

S. CHAMBERLAIN, President.
D. S. SHEPARD, Chief Engineer. 4t15

TO THE STOCKHOLDERS OF THE MARIPOSA COMPANY.

Notice is hereby given, that a meeting of the Stockholders of the Mariposa Company will be held at the office of the said Company, No. 54 Wall street, in the City of New York, on the 9th day of May next, at noon, for the purpose of deciding upon the increase, and increasing the amount of the capital stock of the said Company, by an addition of twenty thousand shares to the one hundred thousand shares already issued, making, with such increase, a total capital, of one hundred and twenty thousand shares, at the par value of one hundred dollars a share, amounting, altogether, to twelve millions of dollars, in order that the floating debt of the company may be paid, and the mining and other resources of its estate may be more completely and expeditiously developed.

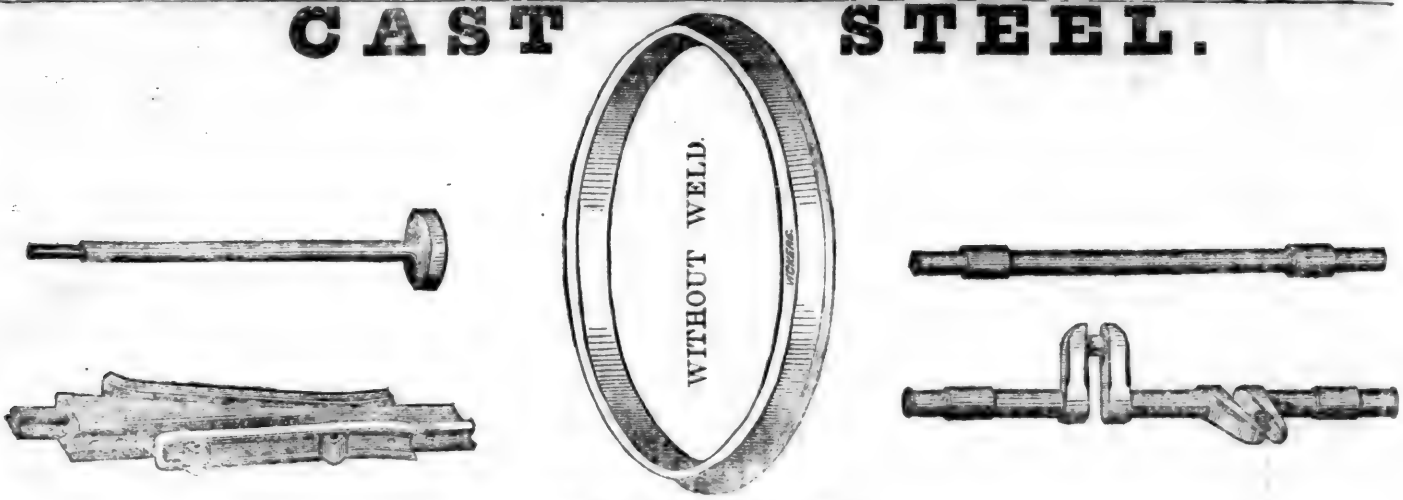
2,000 TONS BEST QUALITY WELSH RAILS, 50 and 56 lbs. per yard.
For sale by
PERKINS & LIVINGSTON,
54 Exchange Place.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. Contracts negotiated by

E. A. & S. W. HOPKINS,
70 Beaver st., New York.



RAILROAD IRON.

500 TONS BEST AMERICAN. Weighing 60 to 65 lbs. to the yard, for immediate delivery.
For sale by
JOSIAH S. LEVERETT & CO.,
4t16 No. 69 Maiden Lane, New York.

RAILROAD IRON.

2,500 TONS RAILROAD IRON, 50 lbs. per yard.
5,000 Tons Railroad Iron, 56 lbs. per yard.
In yard and on shipboard to arrive. All New York and Erie pattern, of best English make, and inspected at the works. For sale by
DEHON, CLARK & BRIDGES,
28 Beaver Street.
New York, 2nd April, 1864.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 89 State street, Boston.

American Railroad Journal.

New York, Saturday, May 7, 1864.

☞ We invite attention to the Circular of the Commissioners of the Pittsburgh, Fort Wayne and Chicago Railway Company, in another part of this week's issue.

American Coal Production.

There is no natural production of our country to which we may look for greater future advantage, all things considered, than Coal. We know that the coal mines of England are the main spring of her industry and wealth. Her farmers having fully occupied the whole agricultural surface of her island as far as practicable, the poorer classes have gone into the coal pits, in some instances 2,000 feet to find new fields of employment and have found them, and what is there produced is one of the great elements of her prosperity. So it is to be of ours. In 1820 there were but 365 tons of coal produced from our mines, and these came from the Lehigh region, and were brought to market by Canal.

In 1860 the production of the mining districts of Pennsylvania alone were 9,412,822 tons. The last census returns from the other Coal regions of the United States give the amount of bushels, with the exception of Rhode Island (where 1,000 tons per annum are produced from a remarkable but not a very valuable coal measure,) as follows:

	Bushels.
Maryland	14,200,000
Ohio	31,639,375
Indiana	379,035
Illinois	14,906,648
Iowa	86,500
Missouri	97,000
Kentucky	6,732,000
Virginia	11,229,675
Georgia	48,000
Alabama	10,000
Tennessee	3,474,100
Washington Territory	131,350
	82,936,698

And yet this product is very small in comparison with what the future will bring forth. Our coal fields completely overshadow by their immensity all others yet known. England, France, Spain, Portugal, Belgium, Sweden, Poland and Russia says Professor Le Conte, have their beds of coal. It is found abundantly in Asia, Africa, and South America, but nowhere is the formation more extensively displayed than in the United States, and nowhere are its beds of greater thickness, more convenient for working, or of a more valuable quality.

There are within the limits of the United States, he further observes, no less than four coal fields of enormous dimensions. One of these, the Appalachian coal field, commences on the North in Ohio and Pennsylvania, sweeping through Western Virginia and Eastern Kentucky, and extends even into Alabama. Its area is estimated at 60,000 square miles. A second occupies the greater portion of Illinois and Indiana, an extent almost equal to the Appalachian. A third covers the greater part of Missouri, while a fourth occupies the greater part of Michigan. The estimates of the area of those great coal fields by Marcou and Rodgers, both eminent geologists, are 200,000 square miles, Professor Le Conte had previously estimated the area at only 135,500 square miles.

We may form an opinion of the extent of our Coal area by comparing it with those of British America and Europe. It is said by Mr. Lyell that the fifth Coal region on this part of the continent is in New Brunswick and Nova Scotia, from which a considerable quantity is exported. The proportions then stand thus:

United States	200,000	square miles.
British America	36,000	"
Great Britain	11,860	"
Spain	3,408	"
France	1,719	"
Belgium	518	"

It will be perceived that our coal measures are of a greater extent than all these others put together.

Upon the origin of coal, and the opinions of the learned on the subject we do not intend to enlarge, though it would be a pleasant task to do so, but of the character of the article itself commercially a few hints may be in place, and in time, during the present excitement in relation to coal mines. Thus when the analysis of any coal is presented to us as a guide to our subscription, and it contains not much more than 5 per cent. of ash, it may be considered quite pure; if it contains more than 10 per cent. it is quite impure, or in other words is too much mixed with foreign matter.

Aside from the earthy matter, the organic matter of coal consists of two mixtures, purely mechanical in their association, carbon and bitumen. The former is equivalent to pure charcoal. The relative proportions of these substances to each other give rise to the principal varieties of coal, so well known in our market. The pure Carbon Coal is called Anthracite (from two Greek words anthrax and lithos.) If it has 10 or 20 per cent. of bitumen it is called dry or semi-bituminous, when it contains from 20 to 30 per cent. it is bituminous or coking coal. When there is a greater per centage of the bitumen than this, it is called in this Country fat coal, for it blazes and melts away.

Another eminent authority Professor Ansted whose attention to the subject of the supply of coal in Great Britain has been recently drawn, makes some very pertinent remarks on the quality of coal, the value of which depends much if not entirely on the use to which we wish to apply it. Thus a good coal for the parlor grate may not answer at all for the gas works; a good article for the locomotive or steamboat may not do for furnace work. When it is pure carbon or nearly so,

it requires a strong draft to keep up combustion, and peculiar contrivances both in Engines, stoves and furnaces are being continually brought forward for this object. Cannel Coal which yields an enormous quantity of gas is a very expensive fuel for an open grate, or for a steam furnace, in the latter case because the heat is not sufficiently concentrated. Professor Austed therefore estimates the value of coal locally, or according to the place in which it is used. If it makes a large quantity of ash, too much of the caloric is wasted in keeping this ash at a red heat. No coal, says he can be considered bad when the quantity of this ash is only about 6 or 7 per cent, or where the per centage of volatile matter, amounts to 10 and not exceeding 25 per cent. If it has less than 10 it is anthracite, if 25 and upwards it is Cannel. The annual product of the Coal mines of Great Britain is now estimated at one hundred millions of tons, and as the total supply in the mines yet to be brought to the surface is estimated to be only 170,400 millions, Sir William Armstrong and other savans nearly shook the isle from its propriety by announcing that in two or three hundred years more the supply would be exhausted. Looking forward to such an event as possible, we might offer our sympathies, and assurances that the sixth or eighth generation of Britons yet unborn shall be kept warm and comfortable by American coal.

In looking over the report of the Morris Canal and Banking Company, April 4, 1863, of which we have given our usual abstract, we notice that its appendix contains some valuable tables showing the advance of the coal interests in Pennsylvania and Maryland, and inferring therefrom the inevitable increase of the business of the Canal which is a large transporter of Lehigh and Scranton coal.

In comparing the various tables which apparently give the total amount of the production of coal, especially in the anthracite regions of Pennsylvania, we find the discrepancies so great that we cannot decide on their correctness.

Fernon's Annual Coal Register gives the amount as corrected by the Superintendent of the United States Census for 1864 at 15,601,578, tons estimating the bituminous products at 25 bushels to the ton.

It is very evident, our coal fields offer inducements to capital and industry unknown in any other part of the world. The useful metals lie almost side by side with our coal, and are in large demand at renumerating prices, Our railways are now increasing in number, and are boundless in extent, our rivers on a gigantic scale there everywhere navigable, are ploughed by innumerable steamers, our climate requires for one season of the year enormous quantities of fuel for domestic comfort alone; our factories consume it at all times and in all places. This Coal of ours is being developed just in time and in quantity to meet the needs of a population increasing at an unexampled rate. The war over, as we trust it now soon will be, and our coal mines will become an element of our greatest power and prosperity. We may now and then feel oppressed with a sense of the national burdens thrown upon us by wretched and unscrupulous enemies, waging war on us without cause and without humanity; we may sometimes wonder how it is that this fair country of ours should have produced such ungrateful children, but it can never be lost while we adhere to principle and the Union. When there are no more gold and silver, no more coal, no more land, no more rivers and lakes and no more men, the republic may go down, but not till then.

Toledo and Wabash Railway.

The gross earnings of this road for the years ending December 31, 1862 and 1863 have been as follows:

	1862.	1863.
From freight	$1,090,949 42	$1,021,650 07
" passengers	248,642 15	349,339 91
" mails	24,416 67	24,300 00
" express	16,432 44	21,155 06
" other sources.	22,706 06	23,352 85
Total	$1,403,146 73	$1,439,797 89

Expenses, viz:

	1862.	1863.
Repairs of road bed	$176,895 86	$242,018 03
" bridges, etc.	2,058 69	3,837 82
" build'gs etc.	11,802 92	11,734 75
" engines	62,451 41	87,758 69
" cars	84,680 99	101,362 78
" tools, etc	11,049 85	12,310 16
Fuel	82,842 80	98,981 41
Oil and waste	19,469 94	29,551 59
Loss and damage	10,176 49	20,153 85
Agents and clerks	28,913 61	32,113 28
Conductors, etc	105,955 26	109,770 66
Handling freight	18,694 43	26,819 00
Rent of depots, etc	6,880 48	7,277 00
Other transp. expenses.	37,673 46	47,715 91
Taxes, rents, insurance, etc	111,605 45	67,471 42
	$771,151 64	$898,876 35
Net income	$631,995 09	$540,921 54

There have been received during the year the following amounts from sources exclusive of earnings, viz:

General stock	$568,000 00	
Preferred stock	28,800 00	
Equipment bonds	513,046 83	
Profit and loss—disc'nts	2,725 46	
		1,112,572 29
Total		$1,653,493 83

Appropriated as follows:

Renewal of bridges, iron, chairs, spike and ties	$149,529 35
Construction and equipment	312,950 97
Interest, etc	795,197 83
Amount paid for $95,970 S. F. bonds	93,295 48
Amount of overdrawn acc't of 1862.	154,765 11
Balance carried to 1864	147,755 09
Total	$1,653,493 83

Of the above balance of $147,755 09 which is brought forward as an asset into the year 1864, $95,708 97 is available, viz:

Post office department	$4,962 76
U. S. Military	18,087 49
Peru and Indianapolis R. R. military.	7,478 41
Deposited in Bank at New York	31,733 16
" " at Toledo	40,374 15
	$102,635 97
Less amount due on notes	6,927 00
Actual net available surplus	$95,708 97

Compared with the previous year the gross earnings show an increase of $36,651 16; with an increase in expenses of $127,724 71—making the decrease in net earnings, $91,073 55.

The capital of the company, and which relatively represents the cost of its roadway, equipment and other property is thus compared:

	1862.	1863.
General stock	$1,409,350 00	$2,331,878 00
Preferred stock	926,200 00	982,900 00
First mort. bonds	3,400,000 00	3,400,000 00
Second "	2,500,000 00	2,500,000 00
Sinking fund bonds.	245,700 00	151,830 00
Equipment "		600,000 00
First mort. coupons funded (notes)	62,741 24	27,164 38
Do. unfunded	3,176 95	1,866 81
	$8,547,168 19	$9,995,636 19

The capital has been increased during the present fiscal year by the issue of 18,510½ shares of general stock, and 1,134 shares of preferred stock, and also by the issue of $600,000 of equipment bonds. Of this increase of capital 450½ shares of the general stock were issued to holders of stock in the late Toledo, Wabash and Western Railroad Company, and 334 shares of preferred stock to holders of evidences of indebtedness against that Company, as they have from time to time been presented for redemption, and in strict conformity to the agreement hitherto made in that behalf. Otherwise the increase of the capital was made by authority of the stockholders, for the expressed purpose of completing the construction of the road, the erection of freight buildings, machine shops, the procurement of locomotives, cars and other equipment, which was imperatively demanded for the safe and successful operation of the road, and also for the further object of reimbursing the operating income department of the road, which had been largely overdrawn for construction expenses, and which were properly chargeable to the capital of the Company.

The amount realized from this increase of the capital, is $1,109,846 83, such increase of capital being predicated upon amounts withdrawn from the operating income of the road for equipment and construction purposes for previous years, together with like expenditures for the current year, as follows:

For the fiscal year 1859	$166,325 46
" " 1860	42,216 53
" " 1861	89,883 28
" " 1862	435,914 65
" " 1863	462,580 32
	$1,196,920 24

The principal of the entire issue of First Mortgage Bonds matures on the first day of August, 1865. The Company, in view of the proximity of their maturity, recently proposed to the holders to extend the date of their payment for a period of years, and receive the proper interest coupons therefor. This proposal has been acquiesced in by the holders of a large majority of these bonds, and accordingly they have already presented their bonds at the office of the Company for the registry of such extension, and received the proper coupons. Other holders have signified their intention to pursue the same policy, and it is believed that at an early day the extension of the entire issue will be perfectly consummated. This extension is made in pursuance of prior covenants and agreements which are duly of record and on strictly legal principles.

The amount of Sinking Fund Bonds authorized to be issued was $249,112 50. Inasmuch as this bonded liability was created for the purpose of retiring over-due coupons of the Second Mortgage Bonds, it was deemed advisable to make provision for their gradual payment, and accordingly a

sinking fund was created for that purpose. In compliance with this original plan the Company, during the current fiscal year, have taken up by purchase, at an average rate of ninety-seven per cent., $95,970 of bonds, which have been canceled. The total amount of Sinking Fund Bonds now outstanding is $151,830.

The Funded Coupons originally embraced two installments of coupons of the First Mortgage Bonds which matured prior to the purchase of the road, and hence necessarily became a capital liability. The total sum of this indebtedness with accrued interest amounted to $147,689 37, which was adjusted by promissory notes payable in five equal annual installments. This original liability is now reduced to $27,164 38, and will mature on the first day of November next. The report says:

The revenue account of the past, as compared with that of the previous year, shows an increase of $92,894 96 from passenger earnings, and a falling off of $68,642 24 in freight earnings.

For the first six months the gross earnings from freight transportation were largely in excess; and there was every indication that the most sanguine estimates for the year would be exceeded by the result. But after the first of July various causes combined to diminish the receipts, and to divert in other directions the trade on which these estimates had been based. The great increase of vessels on the lakes, in proportion to the business offered, opened a water competition which it was difficult, and at many points impossible to meet, so that the grain from a large area of country in Illinois heretofore tributary to this line was diverted to Chicago.

The partial failure of the corn crop, caused by the drought of July and the August frost, was also seriously felt, and although the amount saved has been larger than anticipated, the wants of the army have diverted it from its usual channels, and instead of passing over the road, large quantities from our best local stations have been sent to Louisville and Cincinnati for distribution south.

Thus while other lines have been benefited by the war, this line has comparatively suffered, from diversion of its legitimate freight as well as in great increase of expenses. The restoration of freight to its natural channels, and the return of labor to the soil, cannot fail to supply it with a heavy and permanent business, and make it one of the most prosperous lines in the country.

Notwithstanding these drawbacks, very much has been done toward putting the roadway in first class condition, and supplying power and facilities for moving and handling as heavy a business as can be anticipated. One hundred first class box freight cars have been purchased, and fifty-two box freight cars and twenty-seven platform cars built at the Company's shops at Fort Wayne. Five new freight locomotives have been added to the stock of the Company, and three light passenger locomotives have been disposed of and replaced by engines of the most powerful class. In view of the embarrassments heretofore experienced in the handling and storage of freight and grain at Toledo, very large additions have been made to the freight buildings, elevators and docks at that terminus, and it is believed that no Company in the country has now better or even equal accommodations for the handling and transfer of freight, in connection with rail and water.

On the 1st of January, 1863, the amount of storage room under cover was 38,000 square feet, open platform 20,000 square feet. At present the Company has under cover 86,000 square feet, and of open platform 31,000 square feet, making 117,000 square feet against 58,000 square feet last year.

In addition to the completion of the extension of the Lake Freight House 270 feet in length, a Transfer House has been built in connection with the Cleveland and Toledo Railroad, of ample capacity to handle all the freight passing, or which may for some years to come pass between the two roads. These buildings are built in the most substantial and permanent manner.

Messrs. King & Co., have also largely extended their elevator capacity as indicated in the last published report, and can now furnish storage room for 1,452,000 bushels, against 691,000 bushels the capacity on the first of January, 1863.

The increasing requirements for room for the manufacture of new cars and for the repairs of those in use, have made it necessary either to make additions to the shops at Fort Wayne or establish new ones at some other points. The location was finally decided in favor of Toledo, principally on account of its advantages as the terminus of the road, and the facilities for obtaining lumber and materials, and also of a donation from citizens of $10,000 to be applied toward the construction of buildings. The foundations for these shops on an extensive scale have been laid ready for the brick work, and a large stationary engine procured, but farther work has been for the present suspended until the business of the road should be such as to warrant their completion. The total amount so far expended has been $7,876 39.

Much labor and expense has been expended upon the track and roadway; gravel trains have been kept at work on all the divisions of the road, and that portion particularly between Defiance and Fort Wayne, heretofore the roughest and most difficult to maintain, has been thoroughly ballasted and relaid with new iron and ties.

The statistics of improvements are as follows:

Number of miles ballasted	30
" " new iron	37
" " repaired iron	22
" of new wrought iron chairs	28,083
" " ties	120,762
Feet of truss bridge rebuilt	1,789
" stringer " "	84
" pile " "	575

A convenient brick freight house, 100 feet long by 35 feet wide, has been erected at Fort Wayne, and an elevator for the transfer of grain at Logansport.

The prospects for the future are encouraging; large quantities of provisions have been packed at important points on the line of the road and its tributaries, the greater part of which are still held for the opening of lake navigation.

The amount of wheat in the country at this season of the year was never larger, and there is every indication of such a demand for it eastward and abroad, that a strong movement in the spring must reasonably be anticipated.

The amount of corn saved is also quite large, the high price preventing the usual waste while it will tend to draw it all to market.

Since the last report the new road from Clayton to Keokuk has been fairly opened, and a very large trade from Southern Iowa has been and will be thrown upon this line which it has never before received.

Negotiations have been in progress for the construction of a road from Attica to Rockville, connecting at that point with the Evansville and Crawfordsville Railroad, and at Terre Haute with the Terre Haute, Alton and St. Louis Railroad. The length of road required to form this highly important connection is but 38 miles, and it is expected that the right of way and grading can be mostly paid for by local contributions. It is hoped that some plan can be devised by which, with some assistance from this and other companies interested, this link can be completed at an early day, opening at once communication with the Ohio River at Evansville, with its heavy tobacco trade, and with St. Louis by the shortest lake and rail route. It affords access to a large country naturally and legitimately tributary to Toledo and Lake Erie, and would give us a trade that could not be affected by the competition of the canal, or by the low water rates from Chicago.

The equipment consists of 47 locomotives, 18 passenger, 661 box freight, 10 mail and baggage, 150 stock and 107 platform cars. Miles run by engines, 1,279,950. Passengers carried, 262,952.

GENERAL BALANCE, December 31st, 1863.

Road bed and equipment	$9,995,636 19

Directors.—Azariah Boody, James Spears, Isaac H. Knox, William Baker, Hector Morison, George Cecil, James R. Jesup, Rob't Brackenridge, William Kent, Warren Colburn, John Ross, William Kidd, Chauncey Vibbard, J. H. Brotherton, J. N. Drummond.

President.—AZARIAH BOODY.

Vice President.—WARREN COLBURN.

Secretary & Treasurer.—JOHN N. DRUMMOND.

Marietta and Cincinnati Railroad.

The following report has been made to the Stock Exchange by the Committee on Securities:

There seems to be no objection to admit to the regular list the Marietta and Cincinnati Railroad Company's First Mortgage Bonds, (JOHN L. TAYLOR, of Chillicothe, Ohio, Trustee,) 7 per cents., payable 1st August, 1891; Coupons due 1st February and August, in New York. 2,500 Bonds of $1,000 each, $2,500,000; 1,800 Bonds of $500 each, $900,000; 1,000 Bonds of $100 each, $100,000—$3,500,000; of which $1,000,000 are by special indorsement made payable, both principal and interest, at the London Joint Stock Bank, London, at the fixed rate of 4 shillings sterling per dollar. All the Sterling Bonds and $1,000,000 of the Dollar Bonds are stated to have been sold. The line completed from Marietta to Loveland, 182 miles; Portsmouth (56) and Hillsboro (21) branches, 77 miles; Main line extension to Cincinnati, under contract to be completed this year, 24 miles—283 miles. The position of this Company is as follows: Mortgage above recited, $3,500,000; First Preferred Shares, $50 each, entitled to 6 per cent. in cash, or in kind, and entitled to share with the Common Stock above 6 per cent. per annum, $5,445,442 21; Second Preferred Shares, $50 each, with the same privileges as the Firsts, $3,483,571 97; Common Stock Shares, $50 each, $1,850,000—Aggregate, $14,279,014 18. Transfer Office in New York, Farmers' Loan and Trust Company.

☞ An amendment to the Railway Law in Nova Scotia authoring the Government to arrange for the Pictou line, or any of the lines provided for in the general act, by paying any company that may undertake to build any of the lines, four per cent on the cost of construction, not to exceed £10,000 currency per mile, for a period of twenty years, was carried unanimously.

Agreement for the use of a Bridge.—Restriction of Right to Carry Passengers.

In the case of the Niagara Falls International Bridge Company against the Great Western Railway Company the facts were peculiar. The plaintiff had erected a suspension bridge across the Niagara River. In 1853 the plaintiff agreed with the defendant for the sum of $45,000 to lease the railroad floor of the bridge, excepting the sidewalks and gates, for the entire use of the railway company. The agreement contained many special provisions. The railway company was to have the exclusive right to extend to other companies and persons the privilege of crossing the railroad bridge with locomotives, trains and cars carrying passengers and freight, and pursuing a legitimate railroad business, subject to certain conditions. The railway company was not to afford the means to other persons, except railroad passengers, of crossing and evading the payment of tolls to the bridge companies, and they were to be responsible that the companies and individuals to whom they should underlet should keep within the restrictions—they having all the profits arising therefrom. Regular railroad passengers, coming from a point five miles distant from the bridge, or going to such point, on producing tickets from the railroad company, showing them to be regular railroad passengers, were to be permitted to pass over the upper sidewalks and lower floor—free of toll, walking or riding; the bridge companies having the right to charge the regular toll on the carriages. The railway company was thus restricted, and it agreed to adopt reasonable regulations necessary to prevent evasions of the rights of the bridge companies to have tolls from all except legitimate railway passengers; and if any agents should be guilty of collision or evasion, the railway companies were to dismiss such agent on the fact being made known to them. The bridge companies were to allow the directors and employees of the railway company and such other railway companies as the Great Western should make arrangements with, free tickets to pass the bridge, and the Great Western agreed to allow from their own, and procure from the railroad companies with whom they should arrange for the use of the bridge, as aforesaid, free tickets for the directors and officers of the bridge companies over their respective railways.

The plaintiffs complained of a breach of the contract touching the use of the cars by the Great Western Railway Company, in carrying passengers across the bridge, and also in not procuring free tickets or passes for their directors over the road of the New York Central Railroad Company. They complained of continual breaches of the agreement relating to passengers crossing the bridge in the cars of the Great Western, and alleged large damages, and as a part of their relief they prayed for a perpetual injunction. The issues joined were referred to three referees, who found the facts above stated.

As conclusions of law, the referees decided that the plaintiffs were entitled to recover of the defendant, the Great Western Railway Company, the sum of $486 61, and the interest thereon, $65 64, and the sum of $361 33, being in the aggregate $918 58, as and for damages sustained prior to the commencement of the action, for the aforesaid breaches of the agreement, and that the plaintiffs are entitled to an injunction, as prayed for, restraining the Great Western Railway Company, &c.

Judgment was accordingly entered, and the Great Western Railway Company appealed.

MARVIN, J.—The defendant excepted to the final report of the referees, and the judgment entered thereon, and to each and every part thereof, and particularly to certain portions of the report finding certain facts, and to the conclusions of law or judgment touching damages, and the injunction.

There is a particular exception to the finding of the referees, that the Great Western Railway Company granted to the New York Central Railroad Company the right to the use of the bridge for the carriage and transportation of freight across the same. This finding of the referees is important, as upon it, the item of damages for neglecting to furnish to the directors of the plaintiffs, free passes over the New York Central is made to depend. This fact was so found from written evidence, and rests upon construction. In the agreement of September 29, 1856, between the two railroad companies, it is provided that "the freight brought to Suspension Bridge by the New York Central Railroad Company to pass over the Great Western Railway, is to be conveyed in the cars of the New York Central Company, and placed free of expense or charge for tolls to the New York Central Company alongside the freight warehouse belonging to the Great Western Company, and hereinafter referred to." By the agreement or lease of October 1, 1853, the defendant was to have the exclusive right to extend to other companies and persons the privilege of crossing said railroad bridge with locomotives, trains and cars carrying passengers and freight on such terms as they might agree to, subject, however, to the conditions prescribed in the indenture to the defendant. In a subsequent article, it is provided the plaintiffs are "to allow the directors and employees of the defendant, (Great Western,) and such other railway companies as they shall make arrangements with, free tickets to pass their bridge, and the parties of the second part, (the Great Western,) shall allow from their own and procure from the railroad companies with whom they shall arrange for the use of the bridge as aforesaid, free tickets for the directors and officers of the parties of the first part to pass over their respective railways." On reading these clauses, it seems to me entirely clear that the referees have not erred in their construction of the agreements. The New York Central Company is to convey in its cars, the freight which is to pass over the Great Western over the bridge to the freight warehouse of the Great Western, free of expense or charge for tolls, that is, no tolls were to be charged to the New York Central. Now is not the New York Central a railroad company with which the Great Western Railway Company made an arrangement for the use of the bridge? Most clearly it is, and an arrangement most valuable to the New York Central. It gave the company the use of the bridge free for its freight business destined for the Great Western, and in effect extended its road into Canada. It, at once, under a provision in the agreement between the plaintiffs and Great Western, gave to the directors and employees of the Central free tickets to pass the bridge of the plaintiffs, that is, any portion of the bridge, sideways and lower bridge. It follows that, by the agreement, the defendant was bound to procure from the New York Central free tickets to pass over its railway, for the directors and officers of the plaintiffs. No objection is now made to the validity of such an agreement, but objections are made that the evidence did not show a breach of the agreement. In my opinion the evidence was quite sufficient to sustain the findings of the referees touching the breach of the agreement, and also the damages. I am also of the opinion that the evidence justified the finding of the referees touching the permission of persons to cross the bridge in the cars of the defendant, in contravention of the agreement, and the collection of tolls from such persons, or some of them, and also the amount of damages sustained by the plaintiffs by reason of such breaches of the agreement. The conclusion of law, to which the referees came touching the damages, is not erroneous. This brings us to that part of the judgment awarding an injunction, and of which it is understood the defendant, (the Great Western,) most complains. It is insisted that a proper case for an injunction has not been made. That this question may be properly considered, it may be well to bring together briefly, the leading facts of the case affecting the question.

The plaintiffs constructed and own the suspension bridge, or rather bridges, as there are two, one above the other the lower bridge for carriages and foot passengers, and the upper one, having a railroad track to be used by locomotives and trains of cars. It has also sidewalks for foot passengers. The plaintiffs leased to the defendant "the railroad floor and structure including all its supports, fixtures and gates, excepting the sidewalks and their gates to be for their, (the defendant's,) certain use and under their control for and during the continuance of their charter, for railroad purposes." The defendant also has the exclusive right to extend to other companies and persons the privilege of crossing the railroad bridge with locomotives, trains and cars conveying passengers and freight subject to the conditions and restrictions prescribed. The lower bridge and the sidewalks of the upper railroad floor were to be under the control and for the use of the plaintiffs. It is declared in the agreement to be understood that the privilege of the defendant was for the purpose of passing locomotives and cars with freight and passengers in the prosecution of legitimate railroad business, and that it was not to afford the means to any other persons or person except railroad passengers, of crossing and evading the payment of tolls to the plaintiffs, and the defendant stipulated to be responsible that the companies or individuals to whom they should underlet should keep within the restrictions and conditions. The plaintiffs agreed to permit railroad passengers to pass over the upper sidewalks and lower floor free, on the production of tickets showing that they were regular railroad passengers coming from or going a distance of five miles east or west, to or from the bridge. If such passengers rode across in carriages, then the plaintiffs were permitted to charge the regular toll on the carriages. It was agreed that the defendant should not carry passengers over the bridge or give tickets to them unless they had come or were going at least five miles to or from the

bridge; and that the defendant should at all times adopt such reasonable regulations as should be necessary to prevent evasions of the rights of the plaintiffs to have tolls from all except legitimate railway passengers. The case shows that these provisions have been constantly violated. Persons are carried over the bridge in the cars of the defendant almost daily who are not *regular railroad passengers*, and at times these persons are numerous. It was made a matter of complaint by the plaintiffs for a long time prior to the commencement of the action, and some efforts were made by the defendant to correct the evil. It was arranged at one time that the plaintiffs should put a collecter upon the trains for the purpose of receiving or collecting tolls of persons passing over in the cars, who were not the regular railroad passengers, and such collector was employed for a short time, when the defendant excluded him from the cars, the arrangement working badly, and in practice producing difficulties with passengers. The defendant employed, and I suppose still does employ, *a bridge conductor* to take the trains from the New York Central depot across to the defendant's depot, and he collects twenty-five cents from every passenger over the bridge *who has no ticket*, or it is made his duty to do so. It is not made his duty to ascertain where the passenger from whom he collects is going.

The conductors on the trains of the defendant from the west continue on over the bridge to the New York Central depot, and they collect *bridge fares* and pay over in gross to the bridge conductors. No fare is collected of those who have regular railroad passenger tickets. Now it may be that the person from whom fare is thus collected came to the bridge a passenger in the cars a distance of five or more miles, or that he is going a passenger in the cars a distance of five or more miles, and if so, the defendant, by the agreement, had and has the right to carry him across the bridge in its cars. Or it may be that such person is only "passing from one side of the river to the other," and if so, the defendant has no right to carry him in its cars. It is obvious that the plaintiffs have no practical means of ascertaining who are or who are not properly carried over the bridge by the defendant. The plaintiff's have no right to put a collector upon the cars, and if they had it would not be possible for him to ascertain who were not "regular railroad passengers."

In my opinion the entire judgment should be affirmed.

Judgment affirmed.

☞ The Atlantic and Ohio Telegraph Company have declared a dividend of two dollars per share. The consolidation of this Company with the Western Union Telegraph Company, is to be effected in the following manner: a lease is made of the former by the latter Company for ten years, at ten per cent. per annum, on the par of $70, payable quarterly. Those stockholders who prefer to dispose of their stock on or before the 16th of May, can have that privilege at seventy dollars per share, cash, or can exchange it for Western Union stock at the rate of twenty shares of Atlantic and Ohio for seven shares of Western Union. This privilege to extend only till the 16th of May, inclusive.

Morris Canal and Banking Company.

We have the report of this Company for the fiscal year ending February 29, 1864. From this we learn that the improvements that were being made, and the ordinary repairs to the canal and its works were completed by the time the weather would allow the water to be let into the canal, and to be opened for business, about the 25th of March. The navigation of the year was terminated by ice about the 15th of December.

The revenues of the company from tolls and other sources were		$374,601 76
And the expenses were:		
Repairs of canal & works	$103,035 58	
Operating canal	37,712 83	
Salaries, law and other expenses	$27,643 93	
Less gain in int.	7,391 69	
	20,252 24	
Transportation expenses	1,828 87	
		162,829 52
Balance—profits of the business		$211,772 24
Balance at credit Feb. 28, 1863		10,108 21
		$221,880 45
Dividends on preferred stock		$117,500 00
" consolidated stock		35,875 00
Interest on mortgage bonds		44,340 00
Bad debts		7,674 51
Balance—surplus		16,490 94
		$221,880 45

Compared with the previous year the revenues show an increase of $71,447 37; with an increase in expenses of $27,015 01—making the increase in net revenue $44,432 36.

The expenditures during the year for the permanent improvement of the canal and its works have been as follows:

Lengthening and improving locks	$6,841 59
Piers, wharves and basins at Jersey City	8,923 69
Land damages and real estate	10,411 36
Outlet lock at Mill Creek, Jersey City	1,320 66
Osgood dredging machine	5,317 04
Water power building, at Newark	2,480 16
New Boating stock	8,089 75
General Improvement account	5,175 43
Total	$48,559 68

This amount added to construction account, less $1,020 premium on $23,000 mortgage bonds sold, gives as the total cost of canal and appurtenances to date of the report, $2,973,029 89.

During the past year, the wood lock at Stanhope has been replaced by a cement stone masonry lock. The lift lock at the head of the Pompton feeder has been so enlarged as to allow the ordinary sized boats to pass into the slack water at the head of the feeder, and thence up the Pompton river, a distance of two miles, to the site of the Furnace and Rolling Mill, known as the Ryerson Iron Works. An outlet lock has been constructed into Mill Creek, at Jersey City, thereby increasing the facilities for passing boats to and from New York bay and the Hudson river. Some additions have also been made to the piers and wharves for handling and storing coal at Jersey City. The engineer, in his report, says:

It will be recollected that the work of lengthening the locks was suspended at the outbreak of the war. At that time 9 locks had been lengthened, leaving 22 lift and guard locks to be lengthened, in order to allow an increase of the length of the boats ten feet. One lock has been lengthened since that time, leaving now only 21 to be lengthened. Of these, 3 are west of Port Washington, leaving only 18 to be lengthened, in order to give the trade to and from that point the benefit of longer boats and greater tonnage.

Should the improvement, recommended in the annual report of April 1st, 1861, be made in the line of Canal at Dover, it would do away with the necessity of lengthening 5 locks, and reduce the number to be lengthened east of Port Washington, to thirteen. The line of Canal can be greatly improved by making one inclined plane, in place of the 3 lift locks west of Port Washington, that have not been lengthened.

These improvements cannot safely be longer delayed. The Morris and Essex Railroad is being extended to Easton, which, when completed, will open a direct railroad communication between the coal mines and the consumers of coal on the line of the Morris Canal, and also between the Jersey ore mines and Pennsylvania furnaces.

This will induce a strong competition for what is called the "way trade" of the Canal, and will rrquire the cost of water transportation to be reduced to its lowest possible rates.

With these improvements completed and the depth of water increased to six feet, thereby enabling the boats to carry one hundred ton cargoes; the water communication will, it is believed, be able to secure the carrying of all the trade that it can conveniently accommodate.

The winter repairs have been completed, and the Canal has been throughly cleaned preparatory to opening the navigation for the ensuing season. The water was let into the Canal on March 19th.

Notwithstanding the current expenses have been much increased over those of previous years, owing to the general advance in prices of labor and materials, the earnings have been such that the company have been enabled to pay the interest on their bonded debt, the usual dividend of 10 per cent. on their preferred stock, and a dividend of 3½ per cent. on their consolidated stock, and have a net balance to the credit of profit and loss of $16,490 94.

The entire tonnage of the canal the past year has been 718,519—an increase over the previous year of 6,501.

President.—EPHRAIM MARSH.
Engineer & Sup't.—WM. H. TALCOTT.
Secretary.—LEWIS N. CONDIT.

Penn Haven and White Haven Railroad.

The Penn Haven and White Haven Railroad crosses the river at Penn Haven, upon a substantial bridge, the piers and abutments of which are up, and the timbers in such a state of forwardness as to warrant its completion in a month. The road then follows the river bank, through almost a continuous bed of solid rock to a point where it again crosses the river near White Haven. We learn that the track is laid upon two-thirds of the entire road. We may, therefore, safely conclude that ere many weeks elapse the products of our valley will be opened up to market by a continuous line, while travelers can go to Philadelphia or New York in a little more than half the time now required.—*Luzerne Union, April 13.*

Stock Exchange and Money Market.

The great financial experiment of the present hour is that of the 10-40's, a 5 per cent. stock offered to the public by the Government, in further aid of its necessities. Every attempt has been made to delay the subscriptions to this loan on the part of those who deem 5 per cent too low a rate of interest, and want more for their money, as well as those who, actuated by secret desires for the success of the rebellion, and the overthrow of free institutions, seek to disparage the credit of the Country, and prevent its securing any further popular loans.

This last class is much larger, and more active than is generally supposed. But beyond all question the loan will be a success, for the reasons that the interest being punctually paid in gold, the holders really receive about 8 per cent, and on the other hand, the holders, on the return to specie

payments which will take place at no distant day, will even then get a fair interest for their money, though gold and paper should have become convertible terms. Again, of all the securities so far put upon the market, those of the Government are, except perhaps a few California loans, those only which pay their dividends in gold. That the people of the North have confidence in the stability of the Union, and the boundless resources of the Country is evident from the celerity with which they have hitherto responded not only to the calls of the Treasury, but the generosity they have shown in furnishing out of their own pockets as gifts, about two hundred and eighty seven millions of dollars towards various other expenses of the war, in the raising and equipping of regiments, establishing hospitals, and taking care of the sick and wounded.

Mr. Chase unmoved therefore by the personal appeals of capitalists, or the combinations of the friends of the confederates, or the open attacks of political opponents in Congress, will make no change in the tenor or terms of the 10-40's. So that they who hold off for an increase of the rate of interest will be disappointed. It is well enough in this connection also to note, that exclusive of this last loan, the actual funded debt of the Government is but $768,000,000, notwithstanding all the clamor about thousands of millions as being the actual amount. The present interest paid and payable on this debt is exactly $47,735,000, and on this, next year, there will be a saving of 1 per cent. by the conversion of the 7-30's into 6 per cents. The receipts in gold at the Custom House have thus far been more than double the amount required for the payment of the interest, with an accumulating surplus.

This extraordinary success in finance should cause a blush of shame on the cheeks of those who are decrying the resources of the Nation and the financial policy of the Treasury department. When Mr. Gladstone succeeds in getting two or three millions a head of the immediate wants of the British Exchequer, he is lauded to the skies. When Mr. Fould by dint of consummate skill can get the receipts and expenditures of a single year of French finance in "equilibrium," all Paris sets up a shout of praise for the wonderful talent of the minister. When Mr. Chase finds money for an expensive war without a single foreign loan, when he has a large fund of gold always on hand, and pays his interest regularly on that commodity, when at the end of three years all the claims against his Department, civil or military are liquidated and discharged, what is his reward? Why a struggle to sustain even his reputation as a man of integrity.

When we speak of the funded debt, it is all which really will remain for the future to take care of. Whatever of legal tenders, or short bonds or certificates of indebtedness may remain, are clearly within the reach of absorption at an early day. Two years of taxation under the amended revenue law will take up the whole, and even if the Government returned to specie payments to morrow, a large portion of the legal tenders would be retained in circulation, by the voluntary preferences of the people. This is an important fact that should not be forgotten when we are engaged in solving the financial problem.

A feature in the money market of the last week is the effect produced by the recent passage of the resolution in Congress, raising the tariff 50 per cent. for a temporary period, and until the Tariff itself as amended takes effect. The merchants have generally warehoused their latest importations under this measure, and the duties at the custom house have necessarily declined. These duties, however, are not lost, as they will have to be paid on the withdrawal of the goods from the warehouses for sale.

If a check to imports are given by the amended act, we shall be glad of it, for if our merchants are so intent on gain that they will import till the last dollar of capital or credit is staked, they deserve no commendation for their patriotism.

There was a time in our early history, just after the first peace with England, that free trade and unchecked importations were fully tried by us. Mr. Cary in his memorable volume the "Olive Branch," relates that with free ports in some of the States, and low duties in others, the Confederation was filled with foreign goods, often the sweepings of foreign warehouses, or the gimcracks of the day; that these drew away all the specie left in the country by our French allies, or had been hoarded up by our prudent forefathers; that mortgages were next taken in payment for foreign goods, and then whole blocks of houses were sold by the sheriff, as in Philadelphia, to discharge the foreign indebtedness. Not until the new Constitution, and a new tariff did the Country achieve its pecuniary independence. And so now, when our importations begin to take hold of our purses, and empty them into the pockets of those who send us their surplus products, manufactured by unfortunate people working for ten cents a day, when we give real security for the pitiful works of art (so called) paid for in their weight in gold, we too shall find whole blocks in our cities transferred to foreign houses by our zeal for art, and love of luxury.

The gold market has fluctuated considerably the past week, having suffered in all, a reduction of about 10 per cent. from its highest recent price. There has been a dull feeling in the Stock Exchange generally, and a large number of operators have retired from a contest, where the principal portion get nothing but hard blows, where the giants get all the honors, and the little ones who follow in their train, do so at the loss of wind and limb.

Enormous losses have followed several combinations also, where veterans were engaged against veterans, politicians against ocean navigators; and millionaire adventurers, the birth of a day against old hoarders and ancient chroniclers of former excitements.

This condition of things has necessarily unsettled the market, and it also waits to see the effect which the pending Congressional measures will have upon its future. Those who think that legislation is wholly unable to control the movements of commerce and of money are mistaken. There are always some subjects on which law is potential even with free traders. In France for example, where tobacco is as great a necessity as wine, the whole population submits to have the Government monopolize the entire supply, control the manufacture and adjust the price. In England, the Government also virtually permits no one to smoke, snuff, or chew, except through the medium of an excise of monstrous disproportion to the ale which he drinks by the gallon. There is not a civilized nation on the globe which is not known by its positive interference with natural laws of some kind or other. The true art of legislation is to make these burdens of society as light and as equitable as possible, but in the abstract, burdens they are and burdens they will be to the end of time, and there is no escape from them except by a flight to the wilderness, or consorting with the wild beasts of the forest. Nothing is more absurd than these ranting declamations about freedom of trade or commerce. There is really no such thing. We have come the nearest to it, but have not only been in danger of losing all our commerce, but if the rebellion had been successful, of losing all the liberty which was ours by conquest or descent.

Let us look our difficulties therefore manfully and cheerfully in the face, and not suffer ourselves to be destroyed by financial sophisms of any kind. We owe a large debt, but we are able to pay it.

We are pleased to notice the recommendation of Governor Seymour to pay the interest on our State debt in gold to the foreign holders. These persons are not to blame for the derangement of our finances, nor the issue of paper money. The troubles we meet are of domestic origin, and must be borne as well as they can. When we had their money it was in gold, and it is dishonest and disreputable to repudiate the original contract. And there are doubtless hundreds of merchants, bankers and capitalists in this city who would be only too happy to advance to these foreign creditors the paltry amount required to save the honor of the State. There are no more generous men in the world than a certain class of our merchants, none who judge better on some subjects, and we trust that the controller will find them eager to assist him, and the Governor quick to applaud them for this creditable purpose.

The increase of the wealth of the City of New York since the war, has been made apparent by the recent returns of the valuation of its real and personal property since 1863. This increase is found to be in the valuation of personal property, $25,000,000, and in real estate $11,000,000, in all thirty-six millions of dollars. We have no doubt that a large increase will also be discovered in all the principal cities and towns in the loyal States, an evidence of the indomitable enterprise and industry of our people, and an assurance of their increasing resources in spite of the war. Let the sceptics of the old world consider this fact, and take it as a reply to their doubts about our future.

In the Senate of the United States an amendment of the bank bill is proposed by Mr. Doolittle that no bank or banking association whatever shall issue any new notes, except National notes, after the passage of the act, not redeemable in gold or silver coin on demand; and also, that every bank, etc., shall reduce the amount of their circulation to the amount of cash capital paid in and per cent added thereto, or amount secured by pledge of United States or State stocks, on penalty of a tax of one per cent. per month on all excess of circulation after a period not yet specified.

This is a move in the right direction. It would effectually stop the further increase of local bank currency, issued without the least necessity for it, and only increasing the further inflation of paper

money without an adequate justification. If the Government inflates, it is for cause, and the greatest of causes, while local institutions do so from the sole desire of making money, irrespective of the cause or the country.

The amount of the National banks currency about which such an outcry has been made is quite inconsiderable in proportion to their capital. The circulation on the 15th of April, was as follows:

Fives	$7,012,200	Above tens.	$511,000
Tens	8,307,000		
Total			$15,860,200

It is one of the advantages of the new system, that the public will always know what the circulation is.

The business at the Sub-Treasury on Tuesday was as follows:

Amount on hand	$34,136,500
Receipts from customs	85,000
From other sources	157,102
Total	$34,378,602
Payments	3,352,638
Balance	$31,025,964
Subscriptions to ten-forty loan	62,200

The total value of the exports of produce and merchandise, exclusive of specie, from the port of New York during the past week was $2,544,056.

The receipts from internal revenue last month amounted to upward of ten millions of dollars, by far the largest amount received in any one month from that source since the law went into operation.

The aggregate exports of produce and merchandise (exclusive of specie) for the past week were $2,544,056.

The foreign exports from Baltimore during the last week were $282,467.

Gold has fluctuated the last week, but the transactions were inconsiderable and without animation.

Exchange on London ruled for 110 in gold. Government securities are firm but not very active. Money is plenty, and the rate is from 6 to 7 per cent.

The railway, share and bond market has been depressed, with a disposition to rally, but it is very evident there is prevailing much caution among dealers which must for a time at least prevent any great advance from present quotations, which to speak the truth are generally as high as *bona fide* operators can safely handle.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—N. Y. State 5s, 1874, 104; Wisconsin 6s, 99; Kentucky 6s, 105; Illinois War Loan, 101¼; U. S. 5s, 1874, coupon, endorsed, 102; At. & Gt. ling, 68@91; do., currency, 88@91; do., 6 per cents, 1872, currency, 101@102½; Montreal City bonds, 6 per cents, 96@97½; do., Water Works, 6 per cents sterling, 96@97½; Quebec City 6s, 95@96; Ottawa City 6s, 1880, 91@92; Toronto 6s, 1872, 90@92½; County debentures, 80@90; Montreal Consols, $2½@5; Huron Copper Bay, 65@70; Montreal Telegraph Co., 129@131; City Gas Co., 122@125; City Passenger Railway, 122½@123½.

Chicago Lake Tunnel.

This bold attempt to introduce pure and wholesome water into the city of Chicago, by tunnelling a great main from the shore out into the lake, appears to be not only feasible, but to meet with greater facilities of execution than was at first expected. The great tunnel progresses. The iron portion of the shore shaft has been sunk, and has reached the expected stiff clay. If this clay continues throughout, both questions of cost and trouble, may be considered settled. There is every reason to expect that the tunnel will pass through a uniform stiff clay, in which case the operations of the workmen will be easy. The clay is found to be of excellent quality for making bricks, and it is now planned to make the bricks required for the tunnel out of the clay excavated, thus effecting a greater saving.

The Great South American Railway.

It appears quite probable that a railway may be constructed across the continent from Chili to Buenos Ayres. Mr. Henry Meiggs, the American, having sent some engineers into the chain of mountains of Colchagua, they discovered a pass highly favorable to the construction of a railroad by which to connect the Atlantic with the Pacific. The report states that the pass, called the "Valley of the Marshes," has an elevation of only 6,600 feet above the Central Valley of Chili, and its extent over the mountains is 87 miles. They calculated that the "total expense of the line would be $8,000,000," and the time necessary for its construction, two years. None of the grades and curves will be more difficult than those on the road from Pabellon to Chanorcillo, on which steam is used in the ordinary manner. On some portion of the line there are many indications of copper and silver.

☞ The Lehigh Coal and Navigation Company have decided that full certificates of stock in the capital of the company shall be forthwith issued to the holders of the scrip certificates, according to the number of shares in the latters' certificates specified, and that until the necessary exchange of certificates can be effected the present holders of said scrip certificates be entitled now and hereafter to all the rights and privileges of stockholders of the company.

☞ In the U. S. Senate, on the 30th ult., Mr. Harlan, from the committee on public lands, to whom had been referred the Senate bill, with House amendments, granting lands to Minnesota for a railroad from the Mississippi to Lake Superior, reported it back with a recommendation that the Senate concur in the amendments. Agreed to, and the bill thus passed.

☞ The colonists of the Saguenay District are proposing to construct a canal to unite Bagotville with the waters of Lake St. John.

Interest and Dividends.

The Chicago, Burlington and Quincy Railroad Company have declared a dividend of four dollars per share in cash, free of Government tax, payable on the 25th of May at the Bank of Commerce, in New York, at the office of J. E. Thayer & Brother, Boston, and at the office of the company in Chicago. Also an option on new stock at par in the proportion of one new share to six old ones.

A dividend of 2½ per cent. on the common stock of the Elmira and Williamsport Railroad Company has been declared, payable on and after the 2d day of May, at the Pennsylvania Railroad Company Building, Room No. 1, corner of Third street and Willing's alley, Philadelphia.

The Concord, Nashua and Lowell, and Manchester and Lawrence Railroad Company have each declared dividends of four per cent.

The coupons due 1st of May on Scioto and Hocking Valley Railroad first mortgage bonds (J. F. D. Lanier, Trustee,) will be paid on presentation, to Winslow, Lanier & Co.

Coupons of the Evansville and Crawfordsville Railroad Company due May 1, will be paid at the office of the Farmers Loan and Trust Co.

Coupons due 1st of May on the mortgage bonds of the Indianapolis and Madison Railroad Company, will be paid at the office of J. & S. Ferguson, No. 35 Pine street, New York.

The coupons of the St. Croix and Lake Superior Railroad Company, due on the first of May, will be paid by the New York National Exchange Bank.

The Lehigh Zinc Company announces a dividend of five per cent., clear of the usual amount of tax, payable on the 10th instant.

Elevated Tops to Railway Carriages.

To the Editor of the American Railroad Journal:

Dear Sir:—I perceive that the construction of raised, or elevated, tops to railway carriages has become quite a *mania* with managers of railways on this continent. I have been combating this propensity but to little effect, and it is therefore that I venture to endeavor to enlist the aid of your valuable Journal in opposition to it.

All that *can* be said in favor of this practice is summed up in three words "It looks better." Now will the sensible portion of this great community always be content with *looks* at the expense of utility? Give public opinion *time* and it will sooner or later come right and mere *ornament* if it comes in contact with, or becomes antagonistic to, utility, must eventually give way before it. I have no fear but the public will ere long, when the advantages and disadvantages shall have had time to be fully weighed, put its veto upon this elevated roof business, but it is all the time working an enormous injury.

1st. They cost on an average, in stained glass and superior gilt mouldings and the various *et ceteras*, about six hundred dollars each.

2d. It will take double the quantity of the common stove arrangement, and more than double the quantity of fuel to properly warm a car.

3d. It makes a car *top-heavy* and has a greater tendency (especially upon the narrow gauge roads,) to upset.

4th. The air impinges upon its sides (in a degree greater being higher up,) than upon the same area of the *sides* of the car, (to say nothing of the *end*,) and in so far requires more power of the engine.

5th. It *prevents* the ventilation of the car on a narrow gauge track where this elevated top is over 3½ feet wide, or a broad gauge if over 4 feet, and very much increases its expense under any circumstances.

Now let us try the old fashioned common car.

1st. The *expense* of this raised top will fully ventilate three or four cars.

2d. Half the quantity of stove arrangement, and less than half the quantity of fuel will answer.

3d. No top heaviness.

4th. But very little more power of the engine (the receiving cap being short,) will be required than the common ventilators (which moreover are now all dispensed with,) would take.

Thus you see that we may have all our cars thoroughly ventilated for both winter and summer, for about one-third of the expense that we can have a raised-top car without any ventilation, for either winter or summer! This is exactly the result of our senseless proceeding of the sacrifice of comfort to looks!

It is true that a few of the cars on the "through line between New York and Washington," belonging to the Philadelphia, Wilmington and Baltimore Railroad Company have been ventilated, and have lately been put upon the road, notwithstanding these have elevated tops, but this has cost the company a large sum of extra money, and this boon to the public has been obtained entirely through the public spirit and enterprise of that company.

But if any one wishes to see just as perfect a ventilation which has cost but half the money, they will see it on the Michigan Central Railroad where they have no elevated tops.

Henry Ruttan.

Cobourg, April 27, 1864.

Milwaukee and St. Paul Railroad.

The bonds and shares of the Milwaukee and St. Paul Railway Company have been admitted to official dealings at the Stock Exchange Board. They embrace the following:

First and only mortgage	$4,600,000
Income bonds	289,000
Preferred stock	2,400,000
Common stock	1,000,000
Total	$8,289,000

☞ The Philadelphia, Wilmington and Baltimore Railroad Company have completed a double track from Philadelphia to Newark, Del., and, in a few weeks, it is expected that the additional track will be completed to the Susquehanna river. The work on the bridge over the river is also progressing rapidly.

Camden and Amboy Railroad.

A meeting of the stockholders of the Camden and Amboy Railroad Company was held in Bordentown on the 28th ult. In the report made, the extensive and radical improvements now in progress were dwelt upon at length. The double track, enlarged stations, and increase of equipments, were shown to be in rapid progress. The stockholders heartily acquiesced in and endorsed the necessarily heavy expenditures.

☞ We understand that Mr. Burpee is to be entrusted with the survey of the Western Extension route via Douglas Valley; that Mr. Buck is

to conduct the survey of the Branch line from St. Stephens to St. Andrews; and that Mr. Boyd, Resident Engineer of the European and North American Railway, will make the survey to the Nova Scotia border in the event of it not being included in the Intercolonial survey.—*St. John News, April* 20.

New York Central Railroad.

Hon. Erastus Corning has resigned the Presidency of the Central Railroad; and at a meeting of the Directors, held last evening the resignation was accepted and Dean Richmond, of Buffalo, elected President and Hon. Richard M. Blatchford, of New York, elected Vice-President of the Company.

The retirement of Mr. Corning marks an important event in the history of that corporation. His connection with it dates back to its very origin. First as controlling Manager of the Utica and Schenectady and afterwards as President of the Consolidated Road, his administration covers a period of thirty years. And not only was he long regarded as the presiding spirit of the corporation with which he was more immediately connected but as, in some respects, the head of the Railroad interests of the country. He was widely known, and enjoyed a potential influence in business councils not only within but beyond the borders of our State.

Mr. Richmond, who succeeds him, is a man of great energy of character and business sagacity, and commands in an eminent degree the confidence of the Directors and Stockholders of the Road. Mr. Blatchford, the Vice-President elect, has been identified with the Central for a long time, thoroughly understands its interest and will make a faithful and efficient officer.—*Albany Journal*, April 29.

Railroad Earnings--Weekly.

The earnings of the Milwaukee and Prairie du Chien railroad for the week ending April 14, were:

	1864.	1863.
Freight	$20,574 91	$13,854 60
Passengers	10,206 61	4,936 84
Mails, rents	968 50	1,044 69
Total	$31,750 02	$19,356 13
Increase		$12,393 89

The earnings of the Chicago and Northwestern Railway for the third week in April, 1864, were $40,458 10
Corresponding week of 1863 22,311 57

Increase $18,146 53

The Detroit and Milwaukee Railroad traffic for the week ending April 21, 1864:

Passengers	$11,179 05
Freight and live stock	15,758 51
Mails and sundries	571 22
Total	$27,508 78
Corresponding week last year	18,894 18
Increase	$8,614 60

The traffic of the Great Western Railroad for the week ending April 22d, 1864, was as follows:

Passengers	$23,218 84
Freight and live stock	46,747 01
Mails and sundries	2,501 31
Total	$72,467 16
Corresponding week of 1863	53,455 93
Increase	$19,011 23

The earnings of the Chicago and Alton Railroad Company for the week ending April 23, were:

	1864.	1863.
Passengers	$15,047 64	$12,751 44
Freight	24,126 24	23,830 24
Sundries	2,018 72	1,109 47
Total	$41,192 60	$37,691 15
Increase 1864		$3,501 45

The earnings of the Grand Trunk Railway for the week ending April 23, 1864, were:

Passengers	$29,573 39
Express freight, mails and sundries	3,000 00
Freight and live stock	73,339 49
Total	$105,912 88
Corresponding week, 1863	73,873 60
Increase	$32,039 28

The earnings of the Hannibal and St. Joseph Railroad 2d week in April, 1864, were $50,582 55
Corresponding week of previous year 25,827 29

Increase $24,755 26

Union Pacific Railroad, Eastern Division.

The *Commercial Gazette*, of Wyandotte, Kansas of the 9th ult., brings us important information in relation to the condition of this road. At the annual meeting of the stockholders on the 4th ult., at which 125,545 shares were represented, the former Board of Directors was unanimously elected, with the exception of John C. Fremont—Samuel A. Stinson being elected in his place—as follows:

John D. Perry, late President Exchange Bank, St. Louis, Mo.

J. B. Alexander, President Exchange Bank, St. Louis.

Timothy B. Edgar, President Second National Bank, St. Louis.

J. P. Devereux, late Cashier Union Bank, St. Louis.

James C. Kennedy, of New York.

A. C. Anderson, Merchant, St. Louis.

R. J. Wood, Merchant, St. Lonis.

John K. Hale, Wyandotte, Kansas.

S. A. Stinson, Leavenworth, Kansas.

The officers for the ensuing year as follows:

John D. Perry, President.

John J. Devereux, Secretary and Treasurer.

Samuel Hallett, General Manager.

From the official report and the statements contained in the *Gazette* it appears that 40 miles are now graded and ready for the rails, with 84 bridges, averaging 100 feet, including the bridge over the Kansas River, all nearly completed, and 73 culverts. The ties are out and distributed, the poles for the telegraph set, and the wire, insulators and instruments on hand.

Rails are in rapid course of delivery for 100 miles, cars, locomotives, and all the rolling stock provided for and in course of delivery, and a new steamer purchased to run in connection with the road from Weston and Leavenworth, to Wyandotie and Kansas City. The brick are contracted for and being manufactured for engine houses, machine shops, &c., and several of the large brick buildings on the levee have been purchased for offices, warehouses, &c.

The second section of 40 miles is already located, the ties are under contract and in rapid course of delivery, and machines and men for grading one mile a day are on the road.

Twenty miles of the third section are located, and the progress of the work is such that 100 miles will be completed by November next.

On the 5th an excursion took place over ten miles of the road which is in running order, on which two engines and a number of construction cars are constantly employed. At a celebration of the opening, a public meeting was held at which numerous addresses were made, all of them eulogistic of the work, its prospects, and of the energy of the general managers. We notice also that letters from the P. M. General and Secretary of the Interior have been published which give assurance of Governmental favor, in the following words:

DEPARTMENT OF THE INTERIOR,
WASHINGTON, D. C., Feb. 6, 1864.

Samuel Hallett, Esq., Contractor Union Pacific Railway, E. D.:

DEAR SIR:—The energy and vigor with which you have pushed the great work of constructing the Union Pacific Railway, E. D., is a subject of public gratification.

By the arrangement just now made by you, with Messrs. John D. Perry, Esq., of St. Louis, and Thomas C. Durant, Esq., of New York, a just confidence is inspired that all obstacles in the way of the immediate and successful prosecution of the work are overcome.

The company may confidently rely upon the good will and cordial support of the Government in affording every lawful facility in its power that will tend to forward the early completion of the enterprise.

The Government is particularly gratified to have the main line and branches so united in interest, that all the friends of the Pacific Railroad may work in harmony together.

Very respectfully, your obedient servants,

J. P. USHER, Sec'y Interior.
M. BLAIR, P. M. General.

From this it will be seen that the Government recognizes only the parties who are really engaged in this great work.

So great were the difficulties attending its commencement it was feared they would be insuperable, but these seem to have yielded to the indomitable energy and financial enterprise of the company, ably directed by the manager and contractor.

Grain Elevators.

At the terminus of the Milwaukee and St. Paul Railway, at some convenient point on the Menomence river, an Elevator and warehouse are about to be constructed, which may be well called Monsters, at least in size. The work is already parcelled out, and the material is being brought together. It may be as well to state that the Milwaukee and St. Paul Railway will by the 1st of August, have completed their road from Portage City to Watertown, and from the Watertown junction with the Milwaukee and Prairie du Chien Railway to Milwaukee. The dimensions of this elevator are unprecedented. The length is to be 280 feet, width 88 feet, height to lower eaves 78 feet. It will contain 112 bins. The warehouse will be furnished with nine receiving elevators and five shipping ports, capable of taking in 45,000 bushels and giving out 25,000 bushels per hour. Its ordinary capacity is to be one million three hundred thousand bushels. And the extraordinary capacity will be fifteen hundred thousand bushels, being the largest grain warehouse in the world.

We may conceive some idea of its size, when we are told that there will be used in its construction 7,500 piles, 3,500,000 feet of lumber, 8,000 kegs of nails, in short whole cargoes of material.

Another of these huge fabrics is being erected in Milwaukee, on a location between the Canal and the river just south of the Cherry bridge, and as is supposed by the Milwaukee Dock Company, under a charter obtained from the last legislature. It is intended for the accommodation of the rapid-

ly increasing business of the St. Paul Railway, and will accommodate the trade of the Horicon Division, and the main line east of Portage City, while the Elevator described above will accommodate the trade of the Watertown Division, and the main line west of Portage City. It will be ready to receive the fall crop. The dimensions are 145 by 160 feet, and the height to the eaves 80 feet. The first story is to be built of brick and the balance iron-clad in the usual style of plank warehouses. The foundation piles are now being driven at the rate of 25 a day, and will soon be doubled. The dock is built and the dock piles for the foundation already driven. The other material is being delivered upon the ground as fast as the state of the roads will permit. It will rest on a foundation built upon more than 6,000 piles. It will have eight receiving and shipping elevators, capable of handling 30,000 bushels of grain per hour. It is to have 116 bins, with an aggregate storage of 1,250,000 bushels, being larger than any other elevator on the continent, with the exception of the one described above.

With these great improvements completed, the St. Paul Railway will have a connection with storage capacity, and a receiving and shipping facility, equal to any railroad in the country if not in the world, It will probably be able to handle more grain, with the same equipment, than any road in America. But the development of the country northwest of Milwaukee warrants the ample outlay, and timely provision for handling the rapidly increasing trade. The great system of roads now constructing in Minnesota; the speedy completion of the St. Paul Railway to Winona, will pour over this railway a stream of products now unknown in our commercial history. It is stated in a Chicago paper that the great Rock Island Elevator is the largest in the world. Milwaukee will soon bear away the palm in this respect, as she has for several years as the greatest primary wheat receiving market in the world.

A brief comparison will show the relative capacity of the great Chicago Elevator and those now constructing in this city.

	Area.	Capacity.
St. Paul Elevator	24,640 ft.	1,500,000
Mil. Dock Company	23,200 "	1,250,000
Rock Island	22,000 "	1,100,000

These elevators are purely an American idea, and are characteristic of American ingenuity and sagacity. On the Black Sea the wheat of the Country is brought to Odessa, and piled up in the open air, in banks sometimes miles in extent. It has been known to remain there so long, that the surface actually sends forth sprouts enough to make a thatch, but of course so imperfect a one, that the quality is injured by the exposure. The exporters there have neither warehouses nor even sheds enough to protect the grain from the weather, while here it is carefully housed, lifted from railway cars to the merchant vessels with extraordinary despatch, and preserved throughout its transit with a care, which tells not only on the price but on its reputation, as a merchantable article.

We may add that these elevators are a wonderful economy and assistance to the grain raisers, dealers, shippers and exporters, and wherever we see them or hear of additional structures like those we have described, we know that the localities where they are erected are rapidly increasing in resources, production and wealth.

Finances of the City of New York.

The following is an abstract of the report of the Comptroller for the year ending December 31, 1863:

The amount of money in the city Treasury at the commencement of the year was	$1,739,911 72
—and the receipts into the Treasury from all sources during the year	18,447,828 64
Total means	$20,181,745 36
Amount of warrants on the Treasury paid by the chamberlain and by him returned to the comptrol'r	18,526,803 59
Balance, Dec. 31, 1863	$1,654,941 77

The aggregate valuations of property within the city and county, as returned by the Commissioners of Taxes and Assessments to the Board of Supervisors, were as follows:

Real estate		$402,187,382
Personal owned by residents	$179,277,329	
Personal owned by non-residents	12,689,832	
		191,967,161
Total as returned by Commissioners		$594,154,543

But the Committee on Annual Taxes of the Board of Supervisors, on examination of the rolls found several errors which they caused to be corrected, and approved of the following statement, which was adopted by the Board as the basis for estimating and computing the tax:

	As returned by the Commissioners of Taxes and Assessments.	As reported by the Comm'tee on Annual Taxes and adopted by the Supervisors.	As ascertained on extending items of Taxes.
Real estate	$402,187,382	$402,196,652	$402.196,532
Personal	191,967,161	192,000,161	192,000,161
Totals	$594,154,543	$594,196,813	$594,196,693

The amount of the yearly taxes levied in this county during the last five years was as follows:

	For the use of the corporation.	For County and State purposes.	Total.
1859.	$6,546,034 11	$3,314,891 98	$9,860,926 09
1860.	6,085,448 60	3,673,059 26	9,758,507 86
1861.	6,713,293 40	4,944,338 88	11,627,632 28
1862.	5,111,056 08	4,795,215 02	9,906,271 10
1863.	6,341,202 96	5,750,702 18	12,091,905 14
Tot.	$30,797,035 15	$22,448,207 32	$53,245,212 47

The aggregate funded and temporary indebtedness of the corporation at the close of the year 1862 was		$27,491,642 00
The amount of stocks and bonds issued was		5,799,500 00
Total		$33,291,142 00
The amount redeemed and canceled in 1863 was as follows, viz.:		
Revenue bonds of 1862	$183,600	
Revenue bonds of 1863	1,824,600	
Street improvement fund bonds	317,000	
Volunteer soldiers's family aid fund bonds, No. 2	500,000	
Volunt'r soldiers's bounty fund bonds	500,000	
Public building stock No. 2	50,000	
Public stock for rebuilding Tompkins Market.	17,000	
		3,392,200 00
Total amount, Dec. 31, 1863		**$29,898,942 00**

The aggregate indebtedness at the close of 1863, as above was contracted for the following purposes:

For introduction of the croton water	$10,364,033 00
For Central Park—land and improvements	8,789,571 00
For erection of public buildings	442,000 00
For building docks and slips	500,000 00
For payment of damages on acc'nt of fire in 1855	402,768 00
For indebtedness of Old Public School Society	154,000 00
For purchase of West Washington and other market property	600,000 00
For liquidation of floating debt in 1859	2,748,000 00
For expense growing out of and connected with the present war.	3,885,570 00
Total	$27,885,942 00
In addition to the above amount the corporation have borrowed from time to time, to enable them to make advances to contracors and others for opening and improving streets, which is payable from the assessment to be collected for such improvements, and for which bonds are outstanding, the sum of	2,013,000 00
Total amount of city debt	$29,898,942 00

The amount of city debt, as above (exclusive of the "Trust Funds,") is payable as follows:

From the sinking fund for the redemption of the city debt	$20,346,372 00
From future taxation	7,539,570 00
Total	$27,885,942 00
The amount of investments by the Commissioners of the sinking fund, applicable to the redemption of said debt is	$7,731,501 00
Amount of cash in said fund	253,650 71
	7,985,151 71
Actual amount of indebtedness Dec. 31, 1863	$19,900,790 29

In closing his report, Mr. Brennan says:

It is satisfactory to know that, notwithstanding the increase of the public expenditures growing out of the present war, the city government occupies a sound financial position both at home and abroad, and its loans are readily taken by capitalists as safe and permanent investments at a premium on their par value.

Milwaukee and Prairie du Chein Railway.

The following is the essential section of a very important act which recently passed the Legislature of Wisconsin, empowering the Milwaukee and Prairie du Chien Railroad Company to bridge the Mississippi at Dubuque, and to complete their southern branch at that point:

The Milwaukee and Prairie du Chien Railway Company is authorized to lease or purchase from any company a railroad from the terminus of the said road in Monroe, Greene County, in this State, to the Mississippi River and across the same, to in and through the City of Dubuque, in the State of Iowa, when constructed, or in process, or in contemplation of construction, upon such terms and conditions as may be agreed upon between the parties. And they are also empowered to construct a railroad between the points aforesaid, that is, from Monroe to the Mississippi River, and to, in, and through Dubuque. And the Milwaukee and Prairie du Chien Company is empowered to lease, purchase, build, or construct a bridge or bridges at and from any point or points in either or both Grant and Crawford Counties across the Mississippi River for the purpose of crossing the same with a railroad track or tracks, provided such bridge or bridges can be so constructed with

draws that the navigation of the river shall not be unnecessarily incommoded thereby. And the said Milwaukee and Prairie du Chien Railway Company is empowered to lease or purchase any railroad or railroads constructed, or hereafter to be constructed, in the State of Iowa, having its terminus, or their termini, on the Mississippi River opposite, or nearly so, of any present or future terminus or termini of the said Milwaukee and Prairie du Chien Railway Company on the Mississippi River.

Pittsburg, Fort Wayne & Chicago Railway.

To the Bondholders and Stockholders of the Pittsburg, Fort Wayne and Chicago Railway Company.

The undersigned, Commissioners to carry into effect the recent financial arrangement between the bondholders and stockholders, deem it proper to communicate to you this statement:

1. The application of earnings of the railroad to improvements of the property, in the nature of construction, have been, according to the books:

During the receivership under the order entered Jan. 17, 1860	$1,007,650 06
During the six months from November, 1861, to May 1, 1862	236,694 60
From May 1, 1862, when the present company went into possession, to Dec. 31, 1862	970,147 56
(Of which $536,678 were for depot and bridge bonds)	1,517,162 25
Total	$3,731,654 47

Which investment is now bearing good interest, in the shape of enlarged earnings, and virtually increases the intrinsic value of the stock full $3,500,000.

2. This expenditure has been made without increasing the debt or stock of the company, as reorganized. Net earnings over interest supplied a million last year, and large sums before; and the residue has been provided for by remission of interest, made in conformity to the agreement for reorganization, and by surpluses in the hands of the bondholders' committee resulting from provident adjustments.

3. Before the late financial arrangement, the company had provided for $1,912,509 to be expended for improvements during the present year; most of which was to have been furnished by net earnings, and the residue from the other resources mentioned. It was not contemplated, in the execution of this work, to increase the capital stock, or to incur any additional bonded debt, or any floating debt. No doubt was entertained that the net earnings, after paying interest, would have been sufficient for these purposes. Neither the officers of the company nor the committee of the bondholders felt any hesitation in acting upon this conviction.

4. The purchase and construction of new equipment has formed an important share of these expenditures. Among them was a provision for 95 new locomotives. The cars have been proportionately increased. Contracts for iron have also been advantageously made. The track has been greatly improved. It needs still further expenditure. The equipment received is still inadequate to the business which offers. The savings on this work, as compared with the present range of prices, will be nearly two millions of dollars.

5. It was in this condition of things that the desire of the Board to proceed more rapidly with the improvements contemplated, and the demand of the stockholders for the application of the net earnings to dividends, led to a conference between these interests and the bondholders which has resulted in some modifications of the financial plan fixed in 1859, by the agreement of reorganization.

These modifications are substantially the following:

To the bondholders is accorded—

1. An extinguishment of the right of the company, after July 1, 1867, to require them to accept six per cent. bonds, or to receive payment of the principal; a change which leaves all the bonded debt of the company irredeemable until July 1, 1912.

2. The establishment of sinking funds for the first and second mortgages having priority over dividends, and the application of their incomes to the purchase of the bonds at their market value.

3. Incidentally, an increase of their security by a large additional expenditure of new capital upon the property.

4. An enlargement of the voting power of the first and second mortgage bondholders from one vote on every $200 to one vote on every $100 of par value.

5. The payment of interest on the third mortgage bonds semi-annually instead of annually.

To the stockholders, upon these conditions, is accorded:

1. The power to provide for all new construction by issues of new capital stock.

2. A release of the provisions of the trust deeds which require all net earnings over 6 per cent. on the original $6,500,000 of capital to be applied as sinking funds to purchase in the bonds; or in some cases, to new improvements.

The practical result of these measures is, to leave the net earnings in each year, after paying interest and sinking funds, at the disposal of the company, for dividends upon the stock; and the policy may now be deemed to be settled, by the unanimous action of the stockholders and bondholders, to apply such surplus of net earnings to dividends, as far as prudence and sound discretion will warrant.

6. The annual charge for interest and sinking funds will be as follows:

8 per cent. on $5,250,000 of 7 per cent. first mortgage bonds	$420,000
8 per cent. on $5,160,000 of 7 per cent. second mortgage bonds	412,800
7 per cent. on $2,000,000 of third mortgage or income bonds	140,000
On bridge bonds and Chicago depot b'ds.	30,950
Total interest and sinking fund	$1,003,750

7. The net earnings for 1863, as stated in the President's Annual Report, were $2,106,623 18, which would have been sufficient to pay the interest on the bonds, and the installments of the two new sinking funds, and to leave a surplus of $1,102,873 18, which, if the new financial arrangement had then existed, would have been applicable to dividends on $6,500,000 of stock, being over 16.96 per cent.

This was, in the main, without the benefit of the $1,517,162 of new capital expended on the road and equipment during that year, and with an equipment very inadequate to the business which offered.

The President's estimate of net earnings for the present year, made also in the Annual Report, is $2,500,000; and, in a Special Report, he stated that the net earnings for March, after deducting the proportion for interest and the new sinking funds, were over 2½ per cent. on the present amount of the stock.

Thus far the receipts for April are quite equal to those of March.

8. In judging of the value and productiveness of your property, it is to be noted:

That it is a direct and continuous line, without branches or dependencies, between great industrial and commercial centres, 468 miles long, every part having a through business and an abundant local traffic, rapidly increasing, with easy grades and slight curves, more than two-thirds of the distance being straight line, traversing a grain-growing region of unsurpassed fertility, as yet but partially developed.

That the investment of capital in bonds and stock is less than that of any other leading line of equal, or even similar, productive capacity, by more than one-third.

That the present affluence of earnings is mainly due to these permanent causes.

If the business capacity of the line be properly sustained and developed, there is no reason to doubt, in the judgment of the undersigned, that it will maintain its dividends in every condition of circumstances which will allow of dividends in similar enterprises.

It must be borne in mind, also, that as *none of the bonds are payable for 48 years, and none of them are* CONVERTIBLE *into stock*, the whole increase of net earnings arising from a natural and permanent growth of business enures to the stock, which forms at present but one-third of the invested capital. The less permanent effect of an inflated currency will operate, during its continuance, in the same manner.

The undersigned, in the exercise of the discretion intrusted to them by the bondholders and stockholders, will not now press the sale of any new issue of stock under the new arrangement; they see no cause for a premature issue. That measure can be deferred until an easier condition of the money market; and the gradual and general distribution among permanent investors of the present stock will enable us more nearly to obtain its real value.

Dated New York, April 27, 1864.

JAMES F. D. LANIER,
J. EDGAR THOMSON,
SPRINGER HARBAUGH,
SAMUEL J. TILDEN,
LOUIS H. MEYER,
Commissioners.

NOTE.—The following is a copy of the Special Report made by the President, hereinbefore referred to:

NEW YORK, April 8, 1864.

GENTLEMEN: The unanimous action of the stock and bondholders has liberated the net income of the railway after paying interest and sinking fund, so as to place it at the disposal of the Board of Directors for the purpose of dividends, surplus funds and other objects consistent with the interests of the corporation.

The first and second mortgage bonds, being five-sixths of the whole funded debt, were so arranged in six series as to make the amount due for interest each year payable in monthly instalments of one-twelfth each month. Two years having confirmed the theory upon which the plan was adopted, it might now be well to assimilate to it the plan of paying dividends on the capital stock by paying quarter annual dividends, instead of annual or semi-annual dividends, as is generally customary with other corporations.

I herewith submit an approximate statement of the earnings, expenses, and disbursements for the months of January, February, and March past, which is sufficiently near correct to justify the Board acting upon it with a view of making a dividend, if it is thought best to declare one at this time:

Earnings for January		$290,675 81
Earnings for February		455,211 02
Earnings for March		602,603 28
Total for three months		$1,348,490 11
Deduct operating expenses:		
For January	$210,296 21	
For February	263,328 22	
For March	330,000 00	
		803,624 43
Balance		$544,865 68
Less interest and sinking fund as follows:		
Three months on first mort.	$91,875 00	
Three months on 2d mort.	90,300 00	
Three months on 3d mort.	35,000 00	
Three months on Chicago depot bonds	1,737 50	
Three months on interest and sinking fund on Allegheny bridge bonds	6,000 00	
Sinking fund of one per ct. on first and second mortgages for three months	26,025 00	
		250,937 50
Leaving a balance of		$293,928 18

Which is applicable to dividends, and subject to the order of the Board. The above balance of unexpended and unappropriated income is equal to a dividend of 4.52 per cent. on the outstanding capital stock.

The small earnings for January were caused, as you are aware, by an almost total suspension of the business of the railway for about one-fourth of the whole month, arising out of a combination of the locomotive runners to interfere with the police and management of the railway.

It would not be prudent at this time to divide all the surplus earnings, as unforeseen contingencies may affect future earnings, and, to enable the company to make full dividends in adverse times, a surplus fund ought to be accumulated.

Respectfully submitted.

(Signed) G. W. CASS, President.

To the Board of Directors of the Pittsburg, Fort Wayne and Chicago Railway Company.

Upon the reading of the above report, it was unanimously resolved to declare a dividend of 2½ per cent. for the quarter year from January 1 to March 31, 1864, payable at the office or agency of the company on the 15th day of May next.

CHICAGO AND NORTH WESTERN RAILWAY CO., April 23, 1864.

THE ANNUAL MEETING OF THE BOARD AND STOCHOLDERS of the CHICAGO AND NORTH-WESTERN RAILWAY COMPANY, for the election of DIRECTORS, and for the transaction of any other business that may come before them, will be held at the Office of the Company, in the City of Chicago, on THURSDAY, the 2d day of June, 1864, at 3 o'clock P. M.

4t-19 WILLIAM B. OGDEN, President.

TRANSFER OFFICE OF THE CHICAGO AND NORTH WESTERN RAILWAY CO., No. 8 Wall st., NEW YORK, April 23, 1864.

THE PREFERRED STOCK BOOKS of the Chicago and North Western Railway Company will be closed on the 15th day of MAY next.

On all Preferred Stock then issued and outstanding, a Dividend of ONE and THREE-FOURTHS PER CENT. will be paid on the 1st of JUNE next.

Future Dividend days on above Stock will be Semi-Annually on the 1st of DECEMBER and JUNE.

By order of the Board,

4t-19 JAMES R. YOUNG, Secretary.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat pieces nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

American Railroad Journal.

New York, Saturday, May 14, 1864.

Chicago and Alton R. R.

We give this week a full abstract of the recent annual report of this company. We learn that the company has recently completed a lease of the Alton and St. Louis Railroad, which will be built within the next three months. This will give the company uncontrolled possession of the line through from Chicago to St. Louis.

Chicago and Great Eastern Railway.

Work on the Chicago and Great Eastern Railway is progressing rapidly. The rails have all been purchased, and with the exception of 170 tons, are already delivered, and being forwarded to Chicago. The purchase was made at an average of about $96 per ton, saving to the Company at least $140,000 below the present market rate. A large force is employed, and the line will probably be open for traffic early the ensuing Fall.

The opening of the Chicago and Great Eastern Railway will give the Cincinnati and Chicago Air Line unrestricted facilities for traffic between the Northwest and the Atlantic cities, from which it has heretofore been entirely excluded, and must very largely increase its business.

The following is an official statement of traffic of the Cincinnati and Chicago Air Line Railroad, from January 1st 1862, to March 31, 1864:

Year 1862.	1863.	Increase.
$328,656.79	$528,364.15	$199,707.36, or 61 per ct

January, February, and March,

1862.	1863.	1864.
$71,460.78	$106,118.87	$169,104.93
Increase, 34,658,09		63,986,06
or 48 per ct.,		or 68 per ct.

Increase for three months of 1864 over 1862, $98,644 15, or 139½ per cent.

Central Pacific Railroad of California.

We have received and read with attention the report of the Finance Committee of the Senate of California on the subject of the Central Pacific Railroad, of which we give the following abstract:

By the act of Congress of July 1, 1862, this project was included as one of those recipients of its bounty, opening as it did the only organized plan for the construction of a road across the Sierra Nevada. The Company is now engaged in its construction, and will soon be ready to transport passengers and freight over a portion of the line. It has actually expended in the purchase of the rights of way, real estate, engineering, construction, buildings, superstructure, rolling stock, and other necessities, grading, bridging for 30 miles, and all the rolling stock for 60 miles, a sum exceeding $1,660,000.

A large sum will still be needed to complete the nineteen remaining miles of the first fifty miles, and it is highly important to the Company and State that this division of fifty miles should be completed by the 1st day of December next. The grading of this nineteen miles is very heavy and expensive, as much of it consists of deep cuttings through rock and cemented gravel. The Company must rely to a great extent upon State aid for the means to complete it, as the assistance granted by the National Government is not available until forty miles are completed.

It is also necessary that a large amount of work should be performed during the present season upon deep rock cuttings, tunnels and heavy embankments, on that portion of the line east of the first fifty miles, as otherwise the progress of construction will be greatly delayed. It is believed that after the construction of the first fifty miles, there will be no difficulty in securing the necessary means, which with the Government grants, will insure an early completion of the work. The Senate bill, No. 302, which this report alludes to was based on the principle of issuing State bonds to the extent of $1,500,000, such bonds to be delivered to the company which should first complete a line to the Eastern boundary of the State; the great point being to complete the road over the mountains to the Valley beyond. This Company is the only one organized for the construction of a railroad over the Sierra Nevada, or that uses a gauge in conformity with that required by that act. *It is then, the only line which can really form a part of the great Union Pacific Road.*

The report recommends, therefore, as the act 302 is to operate in futuro only, while immediate assistance is required, that its consideration be indefinitely postponed, both because it is not advisable to increase the State debt, and efficient aid can be better extended to the Company by allowing it to issue its own bonds, secured by a mortgage on its property, the State to pay the interest on a certain portion of said bonds as the same become due; the money to pay such interest to be raised by a special tax for that purpose.

A bill is therefore presented by the Committee as a substitute for the other, by which last the State agrees to pay from the proceeds of a special tax the interest on the bonds to the amount of $1,500,000 (to be issued by the said Company,) for the period of twenty years, and in consideration thereof, the Company is to perform valuable and important services to the State, and especially to transport free of charge all troops and munitions of war belonging to the State. The company also agrees to convey to the State a half section of land with a large portion of a ledge of granite adjacent to the main line of their road, 22 miles from Sacramento, suitable for public buildings hereafter to be erected by the State.

The report makes one valuable statement which should not be overlooked, and is applicable to other States than California, viz: that the road costing about fifteen millions, and the lands it will raise in value many millions more, will pay yearly taxes into the State Treasury double the interest (at the lowest calculation) which the State will advance during the 20 years.

The Company is willing to accept the proposed bill in place of the former one, as its aid is immediate and valuable, while that of the bill 302 is remote and contingent. The report is a clear sighted paper evincing a thorough knowlededge of the subject, of its financial relations, and its importance to the Great State of California and the other States.

Chicago and Alton Railroad.

We have the report of this company for the fiscal year ending December 31, 1863, from which we learn that the earnings during that time were:

From freight		$1,120,448 40
" passengers		736,058 58
" mails		28,112 53
" express		35,579 44
" sundries		17,988 58
" military		83,582 69
Total		$2,021,770 22
Less payments to—		
Joliet and Chicago R. R.	$187,122 37	
St. Louis, Alton & Terre Haute Railroad	59,479 71	
Alton & St. Louis Packet Company	55,692 48	
U. S. tax on passengers.	22,709 98	
Omnibus transfer, ferry, etc.	23,059 08	
		348,063 62
Earnings Chicago and Alton R. R.		$1,673,706 60
And the expenses were:		
Repairs of road	$236,728 07	
" locomotives	77,282 77	
" cars	96,280 75	
" bridges	11,633 38	
" build'gs. etc.	29,137 23

		$854,400 89
Payments from this account—		
Interest on bonds	$256,480 00	
Dividend on pref. stock	84,763 00	
" common "	44,575 00	
Contribution to sinking fund	15,000 00	
Construction account	103,841 28	
		504,659 28
Balance		$349,741 61
This balance is represented by—		
Advanced trustees on renewal account	$120,000 00	
Cash on hand	98,343 98	
Accounts due the Co.*	115,251 50	
Stores on hand, paid for.	166,881 17	
	$500,476 65	
Less due by the Company	151,735 04	
		348,741 61
Difference		$1,000 00

* In addition to the above there is due from U. S. Government the sum of $25,800 for rolling stock sold.

The difference of $1,000, is amount paid on account of reorganization, and not yet charged to income account.

The expenditures on construction and renewal account during 1863 were $330,523 73; of which $103,841 28 is charged against income account, and the remainder, $226,682 45 is charged against the 300 first mortgage bonds issued for renewals, that being the balance unexpended January 1, 1863.

The capital is $8,305,939, (less $15,000 paid trustees of the sinking fund 1st August, 1863, to redeem a like sum of preferred sinking fund bonds,) represented by the following bonds and shares of stock:

First preferred sinking fund bonds, 7 per cent.	$585,000
First mortgage bonds, 7 per cent	2,400,000
Income bonds, 7 per cent	1,100,000
Preferred stock, 7 per cent	2,422,596
Common stock	1,783,343
Total	$8,290,939

The first section of alterations and modifications of the bondholders agreement of the assented creditors of the Chicago and Mississippi Railroad Company, approved July 9th, 1862, requires an annual appropriation of $72,000 for interest and sinking fund, as applicable to the payment of interest and the redemption of $600,000 first preferred mortgage sinking fund bonds. $15,000 was paid to Samuel J. Tilden and Lewis H. Meyer, trustees of the mortgage, on the 1st August, 1863, for the redemption of bonds, and their report enumerates those drawn in the presence of Philip F. Smith, Notary Public. The Trustees deed designates the 1st February and 1st August in each year, for the redemption of bonds, which will increase the amount of sinking fund and diminish the interest from year to year, the annual appropriation of $72,000 remaining the same, until the final redemption of the $600,000 first preferred mortgage sinking fund bonds.

The receipts from all sources, for the fiscal year, are $2,021,770 22, less $338,063 62 rent paid Joliet and Chicago Railroad Company, and compensation to St. Louis, Alton and Terre Haute Railroad Company, Alton and St. Louis Packet Company, and cost of transfer at St. Louis, &c., making those of the company $1,673,706 60, for its line of 220 miles between Joliet and Alton; an excess of $448,705 77 over the earnings of 1862, or $7,607 75 per mile, against $5,568 55 in 1862, being a gain of $2,039 20 per mile, equal to 36.73 per cent.

The military earnings for 1862 were $152,483 90 and for the fiscal year of 1863, $67,102 10, (a falling off of $95,381 80,) deducting these respective amounts of earnings from those derived from the regular traffic of the company in each year, its increase in 1863 over 1862 is $534,107 57, or 43.90 per cent.

The operating expenses for the fiscal year are $971,840 78, or 58.08 per cent. on earnings of $1,673,706 60, leaving the balance of profit, $701,865 82, carried to the credit of income account. The operating expenses of 1862 were $767,207 01, or 62.62 per cent. on its earnings of $1,225,000 83, leaving a balance of profits of $457,793 82, making a gain of $244,072 in the profits of the fiscal year 1863 over those made in 1862, or 53.32 per cent.

In the report of January, 1863, $75,820 59 appeared to the credit of reserve material account, for stores delivered by the late receiver on his surrender of the road on the 16th October, 1862, this item being an asset and a credit, it is deemed proper to dispose of it by passing it to the credit of construction and to the debit of stores on hand, so that this account, as it now stands, should represent the actual stores belonging to the company.

The balance of $349,741 61 at the credit of income account derived from profits unexpended and earned since the organization of the company, on the 16th October, 1862, over and above interest and dividends paid, will be subject to reduction on the final rendering of the account of the Trustees of the assented creditors of the Chicago and Mississippi Railroad Company, owing to the expenses incurred in the execution of this trust. Our report of February 21st, 1863, enumerated $800,000 first mortgage bonds, in the hands of Trustees, as part of unappropriated assets; these bonds were granted for the purposes of improvement and renewal of the line of road and rolling stock, its appurtenances and other purposes of organization and their execution and delivery to the Trustees for their signature contemplated their restoration on their approving improvements then estimated and since completed. Application has been made to the Trustees for the surrender of these bonds, and the account of expenditures on improvements and renewals of road and rolling stock, made up to June 30, 1863, amounting to $284,558 89, has been duly rendered to them; they have, however, not signified their approval of it, and only surrendered $180,000 of the $300,000 first mortgage bonds, the remainder, as we are officially advised, being appropriated to meet the expenses of reorganization, and other purposes, as appears in statement. Of this appropriation of first mortgage bonds, $54,000 were paid to James Robb, Esq., Receiver, viz: $14,000 on account of a distributive dividend on $24,000 first mortgage bonds of the Chicago and Mississippi Railroad Company not entitled to the benefits of the bondholders' agreement, and $40,000 as a deposit to await the decision of the U. S. Court for the Northern District of Illinois, as to claims preferred by certain parties, creditors of the old corporations, claiming to participate in the proceeds of the price bid for the railroad by Samuel J. Tilden and Lewis H. Meyer, Trustees. If the decision of the Court is adverse to claimants, the deposit of $40,000 reverts to the foregoing Trustees, and from them to the company, for the benefit of its renewal fund, less a distributive dividend of 2 per cent. on $24,000 first mortgage bonds of the Chicago and Mississippi Railroad Company, and expenses of defending suit.

The balance of renewal fund accounted $120,000 in the hands of Trustees will be lessened and become an item of available cash assets by the recovery of the $40,000 deposited with the receiver, and now subject to the award of the United States District Court, and such other securities in possession of Trustees, not needed to satisfy the obligations of their trust, the amount of which cannot be stated without the final rendering of their account whatever it may be, inclusive or exclusive of the $40,000 deposited with the receiver, will go in reduction of the renewal fund of $120,000, making the balance unsatisfied as chargeable to income account, and without this adjustment being concluded, and the state of the fund clearly ascertained, it is inexpedient to make any dividend on the shares of the common stock of the company out of the profits of the last six months of the preceding year.

The Judge of the Circuit Court of Cook County on the 24th of August, 1863, granted an injunction restraining the payment of a dividend on preferred and common stock ordered by resolution on the 27th July on a petition filed by Corydon Weed, a creditor of the Chicago and Mississippi Railroad Company for about $6,000, and without notice or hearing being given to the Company. The proceedings, in answer to Weed's complaint, were conducted by A. W. Church, Esq., counsel of the company, assisted by James F. Joy, Esq., of Detroit, a demurrer was filed to the complainant's bill for want of equity, and a decree entered sustaining the demurrer and dismissing the bill.

The debts of the old corporations, and those contracted under the Spencer lease, now outstanding, are large. The company is without data to fix their amount, but it is not supposed they exceed $700,000, principal and interest. Nominally they would appear to be much larger, but many creditors holding large claims, have been satisfied out of securities lodged as collateral, as these

claims have given rise to reports calculated to prejudice the credit of the securities of the company. We submit a letter of the company's counsel which is made part of this report.

We deem it proper to append as a part of this report, an opinion of the Hon. Thomas Drummond, Judge of the United States District Court for the Northern District of Illinois, delivered December, 1863, in the case of creditors claiming a recognition of debts contracted subsequent to the mortgages executed by the old corporations. This opinion is conclusive of the utter futility of any attempt to disturb the title of the company.

The 11th section of the charter of the company requires the renewal of the lease subsisting between the Joliet and Chicago Railroad Company, and the Receivers of the St. Louis, Alton and Chicago Railroad in February, 1861. Prior to the organization of this company, a written proposition was submitted by the President of the Joliet and Chicago Railroad Company to the bondholders' committee of reorganization for the execution of a perpetual lease of the road of said company, with the option of purchase by this company of the same, for the price of $1,300,000. Disagreements arose as to the carrying out of this proposition, and in April last application was made by the Joliet and Chicago Railroad Company to the Circuit Court of Cook County for a writ of mandamus to compel the appointment of arbitrators as specified in the 11th section of the charter of this company; a suit was commenced for rent, claimed as due for the use of the Joliet and Chicago Railroad, on the terms of compensation provided in the lease with receivers. No notice having been served on the Joliet and Chicago Railroad Company, of the intention of this company to terminate the use of its road, a settlement of rent was made in September, 1863, on the terms of the receivers' lease, with notice given at that time, that the road would be abandoned on the 31st December, 1863. Pending this notice, the following letter was addressed to the executive committee of this Board, by Governor W. A. Buckingham, of Connecticut, containing a proposition to sell for $900,000 the $1,000,000 of shares of the Joliet and Chicago Railroad Company:

NORWICH, October 26, 1863.

MESSRS. ROBB, HAVEMAYER & ROBBINS,

Executive Committee Chicago and Alton Railroad Co., New York:

GENTLEMEN:—A majority of the stockholders of the Joliet and Chicago Railroad Company having given me authority, by Power of Attorney, to negotiate for a settlement of the existing controversy between the last named company and the one you represent, by a sale of their stock, and all efforts, thus far, having failed to accomplish the desired result, I now make the following offer as a compromise for the purpose of avoiding all future controversy:

To the authority I now hold, I have no doubt but I can obtain power from others so as to control seven-eighths, if not the whole stock, which I will sell and transfer to you, or your company, on the 1st day of January next, on the payment, in cash, of ninety dollars per share, or at the rate of $900,000 for the entire road, which will, however, be subject to a mortgage securing the issue of bonds to the amount of $500,000. It is however understood, and this offer is upon the condition that no sale of property shall be made by the Joliet and Chicago Railroad Company before such transfer, and that the Chicago and Alton Railroad Company shall pay to the Treasurer of the Joliet and Chicago Railroad Company all rents which may be due up to the 1st of January next, which rents, together with all moneys, notes, and accounts, now in his hands, or which may at that time be in his hands, belonging to said company, shall be used for the payment of their floating debts, after which the balance, if any, shall be divided among their present stockholders.

I make this proposition at a price much below what I regard as the cash value of the stock, and would request a reply in writing within fifteen days of this date, should it not be accepted within that time this offer would be regarded as withdrawn without further notice.

I am, yours very respectfully,

WM. A. BUCKINGHAM.

Insufficient time being allowed to permit this proposition to be submitted to you and obtain the written consent of three-fourths of your shares, as required by the charter of the company, in order to provide means to comply with the proposition of Gov. Buckingham, by the issue and conversion of new securities, the privilege of the purchase was surrendered to friendly parties on condition of their concluding a perpetual lease of the Joliet and Chicago Railroad to this company, which is made part of this report.

Reference to this report will show the compensation paid the Joliet and Chicago Railroad in 1863 to be $187,122 37, but had the lease now in force been in operation for the same time, the compensation would not have exceeded $140,000, viz:

Dividend on $1,000,000 shares at 7 per cent.	$70,000
Eight per cent. interest on $500,000 mort. bonds	40,000
Cost of maintaining 37 miles of railroad track and taxes	30,000
	$140,000

Equivalent to a gain of near $50,000 on the compensation allowed in 1863.

Your consent has been obtained to lease the extension of the line of road from Alton to East St. Louis, at an annual cost of $50,000, preliminary negotiations are commenced with the Alton and East St. Louis Railroad Company, a corporation chartered in 1857, and since organized, but they may not be successful without a further authority from you to increase the compensation owing to the greatly enhanced price of iron, ties, and labor over those current in the earlier part of 1863. The traffic of the company is now conducted between Alton and East St. Louis over the St. Louis, Alton and Terre Haute Railroad, and with the Alton Packet Company. The compensation paid for this service in 1863 amounted to $115,172 19. Notwithstanding this excessive expense the service has been performed in the most unsatisfactory manner and with facilities so inadequate as to seriously impair the traffic of your road to an extent quite equal, if not greater than the compensation paid the railroad and packet companies.

Every consideration of economy, facility in conducting traffic and the removal of all objections to the line as not offering the advantage of an unbroken through line between Chicago and St. Louis suggests the advantages of its earliest completion. Had the traffic of 1863 been conducted by the company on the basis of the present lease of the Joliet and Chicago Railroad, and the proposed lease with the Alton and East St. Louis, the result would have been as follows:

Earnings Chicago to St. Louis		$2,021,770 22
Expenses	$971,840 78	
Add repairing Joliet & C. R. R. and repairing Alton extension	50,000 00	
		1,021,840 78
Balance		$999,929 44

FIXED CHARGES.

Joliet & Chicago R. R. lease	$145,000	
Alton extension	50,000	
Interest on Chicago and Alton sinking fund bonds	42,000	
Sinking fund on same	30,000	
Interest on Chicago & Alton 1st mortgage bonds	168,000	
Do. Income bonds	77,000	
		512,000 00
Surplus		$487,929 44

The St. Louis, Jacksonville, and Chicago Railroad Company have 54 miles of its line in operation, and it is expected to complete 50 miles additional, this year, south of Jacksonville, connecting with the line of the company 4 miles north of Alton. The road from Petersburg north will connect at or near Bloomington, and a contract between the two corporations is made part of this report. It is designed to promote the traffic of each and prevent injurious competition; the 10 per cent. drawback conceded to the St. Louis, Jacksonville, and Chicago Railroad Company on the traffic it gives to the line of the company is yielded as an inducement to adopt it in preference to others, and we anticipate that large advantages will be permanently secured to both corporations in the execution of their contract, as the section of country through which the Jacksonville line of over 150 miles is located is extensively settled, and among the best improved of the State.

The equipment of the road consists of 52 locomotives; 32 passenger, 524 freight, 106 stock, and 216 platform cars—total freight and construction cars, 846. Miles run by locomotives, 1,002,440. Passengers carried, 306,994.

In the annexed Balance Sheet there is a debit to the trustees, and a corresponding credit to issue of bonds and stocks of $85,000, which may need explanation:

The plan adopted in the issue of the new securities of the Chicago and Alton Railroad Company has been to debit the trustees and credit the issue of stocks and bonds with the gross amount of the securities sent trustees, and the trustees were credited and issue account debited as the bonds and stocks were issued. The $85,000 represents amount in hands of trustees unissued on December 31, and comprise $49,000 first mortgage bonds, $22,000 income bonds, and $14,000 common stock.

GENERAL BALANCE SHEET, DECEMBER 31, 1863.

Cost of road, equipment, &c.		$8,280,639 00
Reorganization expenses		1,000 00
L. H. Meyer and S. J. Tilden, "Trustees," bonds and stocks unissued as per contra		85,000 00
Fund for renewals		500,000 00
Advanced Trustees on renewal acc't		120,000 00
Cash in hand		98,343 98
Due by sundry persons		115,251 50
Stores on hand—unused		166,881 17
United States Government—rolling stock sold them		25,300 00
		$9,392,415 05
Seven per cent. sinking fund bonds	$585,000	
Seven per cent. first mort. bonds	2,400,000	
Seven per cent. income bonds	1,100,000	
		$4,085,000 00
Seven per cent. pref. stock	$2,422,596	
Common stock	1,783,343	
		4,205,939 00
Sinking fund account		15,000 00
Sundry bonds and stocks unissued as per contra		85,000 00
Income account		849,741 61
Due to sundry persons		151,735 04
Joliet and Chicago shares on hand		500,000 00
		$9,392,415 65

Superintendent.—C. H. ALLEN.

☞ The Supreme Court of Massachusetts has decided that a corporation is not taxable for its personal property, except the machinery of a manufacturing corporation by a special provision. The tax upon such property is by an assessment upon the stockholders for the value of their shares.

The Lake Superior Iron Trade.

Less than nine years ago, the first shipment of iron ore from Lake Superior to the lower lake ports were made, the entire shipments for that year (1855) amounting to 1,447 tons. The business of iron mining in this region before this, had been carried on rather as an experiment than otherwise, for although the mines were known to be equal in extent and richness to any in the world, the means of transportation from the mines to the lake shore were inadequate to the demands of the business, and the interruption in the water communication at Saut Ste. Marie was a serious inconvenience and an additional expense. The completion of the Saut canal in that year, and of the Bay de Noquette and Marquette Railroad, to the mines in 1858, have removed these difficulties, and the business has since been steadily increasing, with wonderful rapidity and without interruption —except during the first year of the rebellion— until, in 1863, the shipments reached 185,257 tons.

The following table shows the amount of annual shipments of ore from each working mine, from the year 1855, to and including the past year.

SHIPMENTS OF IRON ORE.

Year.	Jackson Iron Co.	Cleveland Iron Co.	Lake Sup'r Iron Co.	Total Gross tons.
1855....	.....	1,447	.....	1,447
1856....	4,497	7,100	.....	11,597
1857....	13,912	12,272	.....	26,184
1858....	11,104	19,931	.....	31,035
1859....	10,662	30,344	24,668	65,679
1860....	41,286	42,696	33,016	116,998
1861....	12,919	7,311	25,200	45,430
1862....	42,767	35,244	37,710	115,721
1863....	63,688	47,612	74,057	185,257
Total amount shipped to date.....				599,348

These amounts, especially those for the last two years, fall far below the demand, the difficulty having been in procuring transportation for the ore, and men to mine it. The quantity actually spoken for to supply the various furnaces using this ore, before the opening of navigation in 1862, was over 140,000 tons, while, in 1863, 250,000 tons would not have supplied the demand.

The products of the furnaces have not been as great, during the past year as might have been desired, owing partly to the insufficiency of ready money put into the business in the early part of the year, and partly to the extreme difficulty of procuring laborers to keep a supply of coal on hand. Considering the price of pig iron has maintained, the length of time some of our furnaces have stood idle has been waste of a valuable opportunity for heavy profits. The past year has added another to the list of blast furnaces in this county. The Morgan Furnace, at the Little Cary, was started on the 27th of November last, since which time it has turned out over 12 gross tons of pig iron per day, and the arrangements are such that no stoppage for want of fuel is anticipated. The money to be made in the business has induced the company to lay out a sufficient amount of capital to carry on the work without cessation throughout the year, thus saving the valuable time that they would otherwise be idle, as well as the expense of stopping and starting, and the damage to the furnace, occasioned by the cooling. The following table shows the products of the several furnaces since the inauguration of the business in 1858:

PRODUCTS OF PIG IRON.

Year.	Pioneer Iron Co.	Collins Iron Co.	Forest Iron Co.	Northern Iron Co.*	Value pr ton.
1858..	1,627	.....	.....	.....	$25
1859..	4,683	2,575	.....	.....	25
1860..	3,500	1,950	.....	150	25
1861..	2,580	2,060	2,430	900	23
1862..	1,438	2,207	2,802	2,143	35
1863..	2,237	2,141	2,626	1,904	45
Morgan Iron Company.....					405 tons.

The running time of the several furnaces was as follows: Collins, 5½ months; Forest, 10 months, (though for a part of this time it was working slowly for want of sufficient fuel); Northern Iron Co., 6 months; and Morgan, from the time of starting to the close of the year. The running time of the Pioneer we have not learned, but we think it has not exceeded 5 or 6 months.

* Estimated, except for 1863.

The average value at Marquette of the ore shipped during the past year was $5 per ton, and that of the pig iron produced $45 per ton, giving the aggregate value of the iron product of the country for 1863, $1,327,245.

Heretofore there have been but three producing mines, and, until the completion of the Morgan Furnace but four furnaces in operation, only one of the Pioneer furnaces having been worked. But with the revival of trade since the financial crisis that followed the breaking out of the rebellion, has come an increased demand for iron, with a very large advance in price, which, with the experience of numerous furnaces and rolling mills proving the superiority of the Lake Superior ore, has turned the attention of capitalists towards this region more than ever before, for purposes of mining and smelting, as well as for furnishing railroad transportation. * * * *

With the further extension of the Marquette and Ontonagon Railroad, a rich iron region in the vicinity of Lake Michigamme will be made available—a result that may be expected by the opening of the season of 1865.

The increase of this business has been so great, and the future so promising as to induce the building of a railroad to connect the mines with the waters of Lake Michigan, as well as preparations to continue the road to Green Bay City, which is to be commenced as soon as the connection with navigation on Lake Michigan is established. It has also set on foot other railroad projects, which, however, have not yet assumed a shape to be considered as fixed facts.

The blast furnaces will be made to turn out iron during the coming season, nearer to their full capacity than ever before, while new ones will, we doubt not, be added to the number. * *

One new furnace, we understand, is settled on for the coming season, on the Marquette and Ontonagon Railroad., near the Escanaba river, and we presume the American Iron Mining and Manufacturing Company will build one on their location near L'Anse bay.—*Marquette News and Journal, April* 15.

Indianapolis and Madison Railroad.

The Legislature of the State of Indianapolis in the session 1836–'37, passed an act providing for an extensive system of internal improvements on the part of the State, and appropriated some $12,000,000 to that object to be raised by the sale of 5 per cent State bonds.

Under the provisions of this act the construction of many railroads, canals and turnpike roads was commenced. Among the most prominent and important of these works was the—

MADISON AND INDIANAPOLIS RAILROAD —designed to connect the capital of the State, and the fertile and rapidly developing region around it, with the navigation of the Ohio River at Madison, a distance of 87 miles.

The construction of the works indicated was entrusted to the sole control and management of a Board of Public Works, elected by the Legislature in joint ballot.

The Madison and Indianapolis Railroad was put under contract in the spring or summer of 1837, and was pushed forward with considerable vigor for that early period of such improvements in the West. Unfortunately the terminus at Madison was unnecessarily made over an inclined plane of 314 feet to the mile, giving an ascent of some 420 feet in about one mile and a third. This work cost a large sum of money, and consumed so much time as greatly to retard the operations of the line.

In the year 1841 the road was completed and put in operation to what was termed Griffith's Depot, a point 26 miles north of Madison at a cost of about $1,200,000; and from this point north to Edinburg, a further distance of about 30 miles, about $450,000 was expended in grading and bridging. The twenty six miles completed was laid with a T rail weighing forty-two pounds to the yard.

In 1837, great pecuniary embarrassments came all over the States, particularly in the West. The State of Indiana failed to meet the interest on the debt she had already created under the act aforesaid; and being, of course unable to negotiate further loans to carry on the extensive system of improvements she had commenced, was compelled to suspend operations on all the lines from want of funds.

The unfinished works of the State being as yet almost entirely unproductive, (the twenty-six completed miles of the Madison and Indianapolis Railroad, having produced under State management a nett income in the year 1841, of only $1,152,) and all going rapidly to decay, the Legislature at the session of 1841–'42, passed an act authorizing the organization of Companies to which the various public works should be conveyed for the purposes of completion.

The terms upon which, according to this law, the Madison and Indianapolis Railroad was to be conveyed were as follows:

1st. That the projected company should complete the road to Indianapolis by the first day of January 1848, and thereupon the $450,000 expended on the "unfinished" portion of the line should become a grant or donation to said company.

2d. The proposed company should pay the State until the first of January 1845, (subsequently extended to the thirteenth of January 1853,) the sum $1,152 annually, as rental for the use of the twenty-six miles already finished by the State.

3rd. The Company might at any time purchase the interest of the State by paying in the original bonds thereof, the cost of constructing the twenty six miles being $1,200,000; and if the Company should not elect to do so, then the purchase to remain open on the same terms to individuals or other corporations.

4th. That if the Company should not purchase this interest before the 13th January 1853, then the State should be entitled to receive annually thereafter, such portion of the nett revenues as the twenty six miles constructed by her, should bear to the whole length of the line being a fraction less than one-third.

5th. The sole control, management and property of the road to reside in the company, and the Board of Directors elected by the stockholders; but reserving to the State after the 1st May, 1867, the right to purchase the road by paying the company the cost thereof, with six per cent interest thereon, unless the dividends in the mean time should have paid such rate of interest.

Under this law a company (the Madison and Indianapolis) was organized in 1842, for the completion of the road, and with great effort and difficulty a sufficient amount of stock was procured, to complete ten miles of the road north of Grif-

fith's Depot. To this corporation the whole finished and unfinished portions of the road were duly transferred.

The road, thus far, having given so little promise of usefulness or profit, the pecuniary embarrassments of the country continuing, the amount necessary to the completion of the work being comparatively so great, the credit and means of the company being so low, the price of rails being exorbitant, and the croakers of the financial world continually predicting that the road when completed, would not pay the running expenses, the company found themselves in a most embarrassing position. They had not credit for a ton rails or even a keg of spikes, and scarcely means from subscriptions for the grading and bridging of the route.

However, by the timely aid and credit of one or two individuals at Madison who loaned money and endorsed paper, the company was enabled to purchase flat bar iron for thirteen miles of road. This being added to the twenty-six miles already in operation, the greatly increased business began to show that the road when completed would be a valuable and profitable work.

In 1845, J. F. D. Lanier, one of the Directors made a loan of $50,000 in New York on the 7 per cent bonds of the Company convertible into stock, and guaranteed by himself and a few other men of wealth. This loan was taken by the house of Winslow and Perkins, and was about the first Western Railroad loan negotiated in that city. In the exhibit of the affairs and prospects of the company made by Mr. Lanier at this time he gave it as his opinion that within two years after the completion of the road to Indianapolis the gross receipts would reach $150,000 to $200,000 per annum. How much more than realized was this the subsequent years' history of the road need only be referred to.

In 1846, the Company through the same parties negotiated another loan of $100,000.

These loans, with a sale of stock at par, enabled the company to complete the work to Indianapolis within the time specified, though with a flat bar over three fourth's of the line. Immediately upon the completion of the road these bonds were converted by the holders into stock.

Hitherto the efforts and means of the company had been entirely directed to the completion of the line within a given time, and hence every other object had been neglected. The equipment was deficient in every sense whether in necessary buildings, motive power or rolling stock. When the line reached Indianapolis the inclined plane was worked with horses, and there was upon the road only four locomotives, three inferior passenger cars and sixteen freight cars. No machine shops, engine houses, wood houses or water stations, and but small and inferior station buildings had been provided.

In 1848, the capital stock was increased $300,000 to take up twenty eight miles of flat bar, and substitute T rail, and to provide motive power and rolling stock.

In 1849, a further addition was made to relay the remaining forty miles with heavy rail, and provide the necessary grounds, buildings and other fixtures, and to add still further to the equipments. This was accomplished in the years 1850 and 1851. Large buildings were erected at Madison and Indianapolis for depots, machine shops, engine houses, car shops, etc. Wood houses and water stations were provided, two wharves were constructed and ample grounds purchased to facilitate the transhipment of produce at Madison, and a Union track built at Indianapolis to connect this with other railroads centering at this point.

In 1851, the largely increased business of the road rendered necessary a further addition to its equipments, and an issue was made of $250,000 in bonds of the company bearing 7 per cent. interest, secured by mortgage on the road and convertible into stock after the 1st May 1853. The expenditure of this sum placed the road in good condition and equipment, and at the end of the fiscal year it had 23 locomotives, including two for working the inclined plane, 24 first class passenger, baggage and express cars, and about 300 freight cars. The station and engine houses, machine shops, etc., were also sufficient for its current business. In the same year a second track was laid between Columbus and Edinburg.

During the legislative session of 1851 and 1852, a bill was passed authorizing the sale of the State's interest in the road to the Company for $600,000 in the 2½ per cent. stocks of the State, or $300,000 in money, the payment to be divided into four annual instalments to be made from the 1st January 1854, to the 1st January 1857. This proposition the Company promptly accepted, and the contract was closed.

The same act required the Company to construct within four years a new terminus at Madison so as to avoid the inclined plane at that city. For the construction of this new work, the company now resolved upon an issue of $200,000 of bonds similar to those already issued, and under the same mortgage. At this time the companys stock was $1,650,000, and its debt $250,000, or with the proposed issue a total of $450,000.

The new track at Madison was completed in the Spring of 1854. It reduced the grade from 314 to 100 feet, and lengthened the road nearly one mile.

In 1853, the Martinsville and Franklin, (25 miles) and the Columbus and Shelbyville (23 miles) railroads were completed, the first in May and the latter in December. Both these roads had been largely aided by the company, and by it been operated from the date of opening. In October of the same year a running arrangement was made with the Jeffersonville Railroad Company, for the use of the company's track between Edinburg and Indianapolis. The arrangement was carried into effect on the 16th November, and during its existence the Jeffersonville Company was bound not to continue its own line between the two places.

The same year (5th September 1853,) the Madison and Indianapolis, and the Peru and Indianapolis Companies agreed to consolidate their interest, the two to become one corporation under the title of the "Madison, Indianapolis and Peru Railroad Company." The consolidation was consummated on the 1st January 1854. The connection, however, was but short-lived. A considerable portion of the original stockholders in the Peru Company, having become dissatisfied with the arrangement, took measures in the latter part of August to dissolve the consolidation, and on the 4th September procured a decree from the Circuit Court temporarily enjoining the Madison Company from further operating the Peru road and from that date joint operations were discontinued. A final decree of separation was rendered in May 1855, by consent of both parties to the contract, and providing for a fair and equitable adjustment of accounts between the parties on interest. The receipts upon the Peru portion of the road during the eight months of consolidation amounted to $63,076 82, and the amount expended for the benefit of said road had been $140,131 23.

The capital account of the Madison Company at the end of the fiscal years 1853'–54 stood as follows:

Share capital	$1,647,700
7 per cent. mortgage bonds	600,000
Income bonds	59,000
Domestic bonds	2,300
	$2,289,000

Which amount represented the cost of the road, etc., exclusive of the amount due to the State.

(To be Continued.)

☞ We give elsewhere an abstract of the report of the McGregor Western R. W. Co. We learn that they are vigorously pushing the work on the extension of their line to Austin. They have secured the rails for the whole 80 miles on favorable terms, and intend to have it completed this year. The prospects of this company are of the most encouraging character.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending April 29th, 1864, was as follows:

Passengers	$21,374 05
Freight and live stock	26,692 68
Mails and sundries	1,227 01
Total	$59,293 74
Corresponding week of 1863	54,274 19
Increase	$5,019 55

The earnings of the Grand Trunk Railway for the week ending April 30, 1864, were:

Passengers	$31,260 00
Express freight, mails and sundries	2,500 00
Freight and live stock	76,475 38
Total	$110,235 38
Corresponding week, 1863	80,902 77
Increase	$30,212 61

The earnings of the Galena and Chicago Union Railroad for the week ending April 30, were:

	1863.	1864.
Freight	$31,414 46	$38,128 31
Passengers	8,396 82	18,572 31
Mails, &c	2,085 84	1,300 00
Total	$41,897 12	$58,000 62
Increase 1864		$16,103 50

The earnings of the Marietta and Cincinnati Railroad for the 4th week in April, were:

	1864.	1863.
Passengers	$7,840 33	$5,195 30
Freight	13,788 34	11,480 56
Mail, express & telegraph	1,058 18	962 81
Total	$22,686 85	$17,638 67
Total this month to date	$73,215 01	$64,305 82

The earnings of the Chicago and Alton Railroad Company for the week ending April 30, were:

	1864.	1863.
Passengers	$14,564 40	$9,358 98
Freight	24,613 14	16,630 89
Sundries	2,661 14	1,048 48
Total	$41,838 68	$27,038 35
Increase 1864		$14,800 33

The earnings of the Hannibal and St. Joseph Railroad 3d week in April, 1864, were. $51,606 00
Corresponding week of previous year.. 24,456 00
Increase $27,150 00

Stock Exchange and Money Market.

The aspect of the Money Market and Stock Exchange has changed very considerably since our last issue. Gold has continued to decline, having fallen within the past week 18 per cent., and for some days, the sales were not only inconsiderable in amount, but the operators diminished in boldness and numbers.

The well arranged, yet daring and dashing movements of Gen. Grant, which all along took the enemy by surprise, have had their effect here as well as elsewhere, and should Richmond fall as Vicksburg did, under his heavy and persistent blows, we may expect to see a further decline in gold and exchange, occurring a second time, as it did after the capture of that place.

In a recent letter written by Mr. Chase to a friend in this city, he expressed the opinion that the success of our arms would be an important

aid in restoring the equilibrium between the National currency and specie, since as long as the war drags along and more money is required, there can be but temporary restrictions in some of the forms of its issues.

No greater absurdity has ever been maintained than that it could be carried on by means of gold and silver only. We have maintained this as well as we were able from first to last. It was another absurdity to propose that the Government should sell its stocks in the market for any price it could obtain, and take payment for it in the local bank currency, everywhere suspended in its lawful redemption, everywhere at a discount, and nowhere certainly solvent. We are surprised at the infatuation of those bankers and financiers who have maintained the contrary.

We have therefore read with particular interest and pleasure the late speech of the Hon. Samuel Hooper, of Massachusetts, delivered in the House of Representatives, on the 6th of April last, where we find our positions not only reaffirmed, but stated in a clear and masterly manner. This gentleman, is not only a financial writer of wide reputation, but is as much opposed to paper money in excessive use, as any of the most inveterate bullionists; yet he perceives the difference between a Nation at peace and engaged in ordinary trade and commerce, and a Nation struggling in the battle field for existence. This makes all the difference, not only in the condition of things theoretically but practically. Mr. Hooper shows that the banks in this city decided as early as December, 1861, to suspend specie payments, never very unwilling to do so, as they had suspended only a short time before in a panic, and their object then was to induce the Treasury department to make exclusive use of their dishonored bills. He asserts also, that when the banks were called upon to take the 7-30 loan, some of them demanded a higher rate of interest, looking possibly to 12 per cent. as was the rate during the expiring year of Mr. Buchanan's administration. We may see by this what would have been the fate of the Nation, if its financial resources, and with these its power of military action, had depended on a bank oligarchy. It would have been a scene of disasters, and the end would have been our ruin.

Mr. Hooper also entered upon the discussion of the subject of inflation, and showed most conclusively where the real danger lies. Taking up at random twenty-five banks, six of them in our own State, he furnished evidence that these with a capital of $1,982,968 were issuing circulating notes to the amount of $5,998,088. One of these remarkably elastic institutions, the Bellinger Bank, located we believe in some village on the very lively banks of the Mohawk River, having a capital of $10,000, has a circulation of $76,280, seven times and a half more than its capital. It is no answer to say that the bills of the Bellinger Bank are good and will finally be redeemed; it is the inflation of which it is the agent, and the promoter, of which we complain. And so it is found on examination, that these twenty-five banks with a capital of less than two millions, have within a few hundred dollars, *six millions of bank notes in circulation!!* The inflation then we have to fear, and the inflation under which we are now suffering may be fairly chargeable to these very banks who are complaining that the Government has interfered with their profitable and dangerous prerogatives.

Mr. Hooper also shows, that during the ten years before the war, more gold was exported than would have supplied coined money for the whole currency of the country, a fact we have verified often in our tabular statistics. These conservative banks did not care, however, about retaining it! Nor do they seem to have any other business on hand at present, but to get as many notes in circulation as possible, and to oppose the influences and the operations of the National Bank system, which would most effectually restrict this very improper circulation.

The argument of Mr. Hooper is altogether conclusive that to escape inflation, the power of issuing currency should not be left open to mere associations of individuals, irresponsible to the Nation at large, but that it should be under the control of the National Legislature exerting at all times a wholesome check on the volume of the currency. This the National Bank system will do most effectually if persisted in and enforced.

The necessity of paper money to the extent to which it is now afloat, will we trust soon be over. This opinion which we have also maintained under every discouragement, which disaster and imbecility have thrown on our military progress seems to be that of Mr. Hooper also. He says "unless defeat and disaster attend our military operations, I believe that specie prices and specie payments might be restored within the coming year."

And this belief assumes a very probable shape, if the events of the last week are any indication. The blow struck, and now striking at the head of the rebellion must inevitably lead to such results.

It has been very common with a certain class of writers on these subjects to hold up the Mississippi bubble and the fate of John Law as a terrible scarecrow to American financiers. These persons had better read the recent volume of M. Thiers, one of the most eminent statesmen and writers of France, in which the biography and the schemes of Law are most graphically given. The rock upon which he split was the connection of his bank with distant commercial speculations in America. He commenced this scheme of a bank with thirty years financial experience and study of the subject. He made all his notes payable at sight, in coin current at the time of their issue. He publicly declared that a banker deserved death, if he made issues without ability to answer all demands. A penalty which if inflicted in our day would make short work with a good many celebrated bankers. He discounted at moderate rates, kept merchants' accounts for them, and usury that was eating up the people disappeared before his liberal management.

"It was not long" says Thiers "before the trade of the Country felt the benefit, Languishing Commerce began to lift up her head, the taxes were paid with greater regularity and less murmuring. The deposits of gold and silver increased perceptibly. *If Law had devoted himself entirely to this institution*, he would be considered one of the benefactors of our Country, and the originator of a magnificent system of credit; but his impetuous nature joined *to that of the people among whom he operated*, brought about in a short time, a gigantic and disastrous imitation." France though his financial ability at once recovered from the ruin of the long wars of Louis 14th, but the folly of the Regency, and the Mississippi scheme, taking for their basis his successful monied institution, ended in the bursting of the greatest bubble of the age. Law unhesitatingly gave up all he had to those who had trusted him, unlike many modern Financiers, who generally escape with their ill-gotten plunder, leaving their victims in poverty and despair.

The inflation we have most to fear is that of speculative and private institutions, who using the really national power of issuing paper money for the uses of trade and commerce, without caution or consideration swell its volume at pleasure; at will change the whole character of all exchangeable values, making us rich or poor as they pour out their currency in a flood, or contract it into a rill, where the sufferers perish from thirst.

It is not the Government which is justly to be followed with denunciation and contumely for raising money to save the Union and conquer a peace, whatever else it may be blamed for. Our criticisms in this direction should be tempered with discretion, and modified by circumstances. No man among all the cavillers has yet appeared, who can prove that the Secretary of the Treasury could have done any better than he has done. We are no partisans, and in this JOURNAL, have no politics, (using the word in its ordinary acceptation,) yet we have the opinion, that the war ended during the present year, Mr. Chase's system will come through triumphantly, and his name associated with those of the greatest men of the age.

We must not forget that England at the end of her wars in 1816, when her whole National wealth was but ten thousand four hundred millions of dollars, had a national debt of four thousand three hundred millions of dollars or 41 per cent of her whole property valuation. Yet she went bravely through every difficulty and in 1861, that property had risen to the value of $31,500,000,000, so that her debt but slightly decreased from the amount as it stood in 1816, became a charge of only 12½ per cent. on that valuation. In 1850, our National aggregate of property was about $6,174,-000,000. In 1860, it had become $14,183,000,000 although values under $500 to a great extent had been entirely omitted in the Census, and of this enormous increase, $10,716,000,000 were in the loyal States. In six years more, 1870, we may safely expect at the rate of our former advance the aggregate will be, upwards of twenty eight thousand millions of dollars. This will make a charge with even two thousand millions of national debt, on the value of the nation's property of about 7 per cent only. The increase for 1850 to 1860, was 127 per cent., and the ratio is likely to be greater than ever. No man however sagacious can limit this increase. Half a dozen States equal to half a dozen Californias, in the production of gold and silver, and all the best of the commerce of the Pacific ocean are to mingle in the elements of our National life by the time the next Census is taken. Here in the city of New York we see something of a shadow of the future in the increase of the value of its real and personal estate in a single year by the enormous sum of thirty six millions of dollars. When Congress shall have placed some fifteen or twenty of our newest and fastest wooden war steamers on the routes designated in the late memorial of the Chamber of

Commerce, the cheapest and most useful method of employing our surplus vessels, re-establishing and protecting our foreign trade, at least until private enterprise comes into the field we shall see with the revival of the Ocean Mail service, an extension of our foreign commerce, compared with which the past will seem to have been trifling and inconsiderable.

The following may be taken as a general summary of the character of the market since our last issue.

The import entries have fallen off during the past week, amounting to only $3,645,795, against $4,019,307 same week last season. The Export clearances of Domestic Produce amount to $3,900,520 against $2,499,208 same week in 1863. The Export of Specie is $1,174,000, against $452,000 same week last year. The Customs for the week are $1,112,000.

The Specie Export from New York, from July 1 to March 31, amounts to	$39,896,000
Add since April 1	6,959,000
Total to date	$46,355,000
Against same time 1863	49,288,000
Decreased Specie Exports since July 1	$2,933,000

The foreign exports from the Port of Baltimore during the past week amounted to $167,209.

The value of foreign goods imported at the port of Boston for the week ending May 6, was $421,247, against $557,525 for the corresponding week in 1863.

The total value of exports from Boston for the week ending May 6, was $464,540, against $148,518 for the same week in 1863.

The balance in the Sub-Treasury on Tuesday were as follows:

Amount on hand	$31,969,401
Receipts from customs	66,000
From other sources	700,390
Total	$32,735,791
Payments	1,803,039
Balance	$30,932,752
Subscription to ten-forty loan	135,350

The demand for Government stocks continues good, the sales continuing at firm prices.

The Stock Market is pronounced strong with a tendency to advance. Our usual tables will show the latest results at the Exchange. The railways are all doing so well, they appear to be beyond the reach of any immediate reaction. They all appear to be carefully and successfully managed, and promise future dividends without interruption. The earnings for April show accordingly a large increase. It is understood that the 10-40's are being rapidly absorbed, about fifty millions being already taken. The subscriptions thus far have been far in advance for the same period, of those of the five-twenties. It is also known that large orders for the 6 per cents are coming in from the continent through the leading foreign agencies here.

It may be safely concluded that when the news of the recent operations of Generals Grant, Butler and Sherman reach Europe, it will create such increased confidence in the persistent spirit of the North, and their ability to put down the rebellion, now making its expiring struggle, that American securities will be eagerly sought for. They must then become the most esteemed of all disposed of in the foreign marts. The National Bank Bill has passed the Senate with an amendment by Mr. Sherman, as follows, striking out in the thirty-second section lines one, two, three, four and five, the following words:—"That each association shall select subject to the approval of the Comptroller of the Currency, an association in either of the cities named in the preceding section, at which it will redeem its circulating notes at par," and insert in lieu thereof, "That each association organized in any of the cities named in the foregoing section shall select, subject to the approval of the Comptroller of the Currency, an association in the city of New York, at which it will redeem its circulating notes at a rate of exchange for all cities west of the Alleghany mountains not exceeding one-fifth of one per centum, and for all cities east of the Allegheny mountains at par; and each of such associations may keep three-fifths of its lawful money reserve in cash deposits in the city of New York, and each association not organized in the cities named in the preceding section shall select, subject to the approval of the Comptroller of the Currency, an association in either of the cities named in the preceding section, at which it will redeem its circulating notes at par."

The bill as amended was passed by a vote of 30 yeas against 9 nays.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—At. & Gt. Western (Ohio div.) 1st mort., 100; McGregor Western, 70¼; do., 1st mort., 92; Milwankee and St. Paul 1st mort., 100; N. Y. Central 6s 1887, 110; Long Island R. R., 93; U. Extension of the Atlantic & Great Western.

The enterprise, and administrative ability of the manager of the Atlantic and Great Western Railroad, are being again exemplified in the fact, that it has been determined under his recommendation to extend the line of this road from Salamanca, its point of connection with the Erie, to the City of Buffalo. The surveys are completed, the contracts will soon be awarded, and the work will be completed within a year. This settles a great question for Buffalo, as it will make it the chief distributing port for the anthracite and bituminous coal of Pennsylvania and Ohio, for lake steamers, furnaces, forges, and the increasing demand in Canada. It will also throw an immense coal business on the line of the Atlantic and Great Western.

Harbor of Refuge on Lake Michigan.

The Legislature of Wisconsin has an application before Congress for a grant of land, in aid of the proposed construction of a harbor at Sturgeon Bay, by cutting a canal a mile and half in length from the bay to the Lake. This would give entire security to vessels caught in a gale below Sheboygan, which is the only good harbor there. Sturgeon Bay makes up from Green Bay in a Southeasterly direction, and can be easily connected with the lake in the way proposed.

Besides affording shelter to vessels caught in a gale off this point, it would save the fleets of lumber vessels continually loading on the western shores of Green Bay for Chicago and Milwaukee, a distance in navigation of two hundred miles. The application is one of great merit, and should be at once granted by Congress.

Interest and Dividends.

The Northern Central Railway Company have declared a dividend of two per cent. on the Capital Stock and on the instalments paid in for the quarter ending 15th inst., and also an extra dividend on the same of three per cent., both free of State and National taxes. The dividends are payable on and after the 25th inst.

The Pennsylvania Coal Company has declared a dividend of 7½ per cent. payable on the 19th inst. The Company paid 15 per cent in February, and now 7½, making 22½ per cent. since January.

The Pacific Mail Steamship Company have declared a quarterly dividend of 5 per cent. payable on the 19th inst.

The interest coupons of the sinking fund bonds of Cincinnati and Chicago Air Line R. R. Co., due May 1, will be paid at the office of the company, No. 37 William street.

New London Northern R. R.

The only obstacle that has hitherto prevented the extension of what was formerly the Amherst & Belchertown—now a part of the New London Northern—Railroad, namely, the right of crossing the road at Amherst Mass., has been removed by an act of the Massachusetts Legislature. The road will soon, therefore, be extended to Montagne, connecting with the Vermont & Massachusetts Railroad at that point. Since the Amherst & Belchertown became the property of the New London Northern Railroad Co., its affairs have been more liberally managed, and it has afforded better public accommodation than formerly. The proposed extension will increase the facilities and, we believe, materially enhance the value of the property to the Northern Company.

A New Railway to the Ohio River.

A charter has been issued from the Secretary of State's office for a new railroad, to be built from Columbus down the Scioto Valley, through the counties of Franklin, Ross, Pickaway, Pike, and Scioto. Ex-Governor Dennison, of Columbus; L. M. Hubby, H. B. Payne, and Amasa Stone, Jr., of Cleveland, and William H. Clement, of Cincinnati, are the corporators. Capital one million five hundred thousand dollars. The survey will be commenced this week, and the road will be put through as fast as possible. The line of this road takes about the same route as the Ohio Canal to Portsmouth on the Ohio River, and is virtually a continuation of the Cleveland and Columbus road to that point.—*Cleveland Herald.*

Detroit and Milwaukee Railroad.

From the report of this company we learn that the traffic for the past year has shown an increase over that of 1862 of $159,383, or 18.15 per cent. The enhanced price of materials and rates of wages, and the scarcity of labor—consequent upon the war—have necessarily increased the working expenses of the line; but, notwithstanding this serious change, the diligent attention of the officers of the company has been so directed to prudent economy, that the aggregate expenses exceed those of 1862 by only 4 per cent. After paying all the accrued interest on the Oakland and Ottawa, and Detroit and Pontiac, and funded coupon bonds, river front mortgages, &c., amounting to $107,162; and after expending $79,061 on construction account—the whole of the floating debt of the company, with the large amount of interest due thereon, amounting together to $144,916, has been discharged out of the net revenue of the past year, leaving still a balance at credit of that account of $73,883.

While this satisfactory increase in the income of the road enabled the company to extinguish the remainder of its old debts, it was insufficient to provide also for the payment of the current interest on the first and second mortgage bonds, and arrangements were accordingly made with the holders of those bonds for funding the three coupons due in November, 1862, and May and November, 1863; and up to this time coupons have been funded representing over $2,000,000 of the bonds.

There is every reason to hope that the company will be able to resume the payment of interest on the first and second mortgage bonds on 16th May, and thereafter to continue its regular payment.

During the past year, $250,000 of Detroit and Pontiac 8 per cent. bonds, which had matured, have been extended for fifteen years, the rate of interest on them being reduced to 7 per cent. The mortgages on a portion of the company's property at Detroit, which had been foreclosed, and were bearing interest at 10 per cent., amounting in all to $58,245, have now been discharged, by the holder of the mortgages perfecting his title, the company re-purchasing the property, subject to a mortgage made by the purchaser, for $50,000 bearing interest at 7 per cent., the cost being paid out of the net revenue. Two other mortgages, which also were in suit, amounting, together with costs, to $4,924, have been paid off, at the expense of net revenue. The net revenue account has likewise been debited with the cost of a year's insurance on the whole of the company's property—including the rolling stock, and freight and baggage, in store, or in transit over the road.

The report of the engineer shows that during the past year $59,327 have been expended in his department, on the completion of the line, and charged to construction account; $77,069 on maintenance of way, and $55,004 on renewals of rails, sleepers, fences, &c.

The completion of the Flint and Holly railroad, eighteen miles, to connect the Detroit and Milwaukee at Holly with the Flint and Pere Marquette line to Saginaw, is expected in June next; and it is confidently anticipated that the salt, lumber, &c., products of the Saginaw Valley will cause a considerable accession to the freight and passenger traffic of the Detroit and Milwaukee.

The business of the Lansing railroad in connection with the Detroit and Milwaukee at Owosso is greatly increasing, and as its stage connections are improved, will add materially to the traffic it at present brings to Owosso station.

Extension of the M'Gregor Western R. W.

We gave in our issue of 8th of August last a very full abstract of the report then recently made in relation to the M'Gregor Western Railway Company.

We have now received a prospectus, accompanied by numerous auxiliary documents of a proposition on the part of the Company to extend their line of road during the present year from a point sixty miles west of M'Gregor, the eastern terminus, to Austin, in the State of Minnesota, there to connect with the Minneapolis, Faribault and Cedar Valley Railroad, now under construction, and forming with that a continuous line from Chicago *via* M'Gregor to St. Paul. It says:

The first division of forty miles is now nearly complete. All the grading is done; the cross-ties purchased and distributed along the line; all the iron purchased, and, with the exception of a very small quantity delayed by ice at Buffalo, already delivered on company's grounds. Fourteen miles of the track are laid and in operation; ten miles more will be opened for business on the 1st of April, and sixteen miles more, making up the distance of forty miles, from McGregor to Ossian, will be completed and opened for traffic by April 20th.

The funds have been provided for completing and equipping a second division of twenty miles, with the utmost possible dispatch. Contracts have been made for the construction of these twenty miles; the iron has been purchased at favorable rates; and it is the intention of the managers to have this portion of the line ready for business by the first of September next.

The portion of road already built has been constructed in the most thorough manner, and is, in all respects, a first class road.

It will be seen from the foregoing statement, that all the funds required for constructing sixty miles of road, and furnishing it with the requisite rolling stock, shops, and other buildings, have already been provided, leaving the company entirely free from floating debt.

To provide the means for building and equipping the remaining division of sixty miles, it is proposed to issue common stock of the company, to such amount as may be necessary, not exceeding $40,000 per mile, and to offer the same to existing stockholders and others at 70 per cent. of the par value thereof, payable in monthly instalments, as follows:

10	per	cent.	on the	1st of	May, 1864.
10	"	"	"	June,	"
10	"	"	"	July,	"
10	"	"	"	Augt.,	"
10	"	"	"	Sept.,	"
10	"	"	"	Oct.,	"
10	"	"	"	Nov.,	"

The stock will be issued to subscribers in full paid shares, and not subject to further assessment.

H. H. Boody & Co., agents of the company in New York, will receive all moneys paid on account of subscriptions to stock, and will pay out the same for iron and other materials for the road, for rolling stock and for labor done, upon proper vouchers furnished by the engineer in charge of the work.

The McGregor Western Railway traverses the richest and most populous part of the State of Iowa. It has no competitor within fifty miles on either side. It can immediately command a very large business, ample, in the judgment of its managers and of those best acquainted with the resources of the country through which it passes, to pay large dividends on its stock from the moment of its completion. It is confidently believed, in view of the present resources of the country through which this line passes, and of the immense business awaiting its completion, that the securities of no line of railway, now under construction, offer more favorable inducements for investment than those now offered to the public.

It is estimated that sixteen counties in Iowa, and ten in Minnesota will use this line exclusively in the transportation of products and return merchandise. The following statements show the richness and the extent of the production of the country which is to be tributary to the road:

The quantity of wheat raised in the above named counties in Iowa, in 1860, was estimated at fifteen hundred thousand bushels, and in 1863, at over three millions of bushels.

The corn crop of 1860 is placed at three millions of bushels, and in 1863 at five millions. Oats, two millions of bushels, and barley, rye and buckwheat, at five hundred thousand bushels.

Pork, beef and other productions of the country that would be likely to pass over the railroad, are estimated at twenty millions of pounds.

It is considered safe to calculate that two counties of Minnesota will add at least fifty per cent. to the above estimates. Hence the wheat raised in 1863, within the range of the McGregor Western Railroad, must exceed four and a half millions of bushels, and the corn, oats, barley, rye and buckwheat, at least eight millions of bushels, and other productions, (30,000,000) thirty millions pounds.

The productions from the above counties have gone heretofore to McGregor, Harper's Ferry, Lansing, De Soto, Brownsville and other river towns, and large quantities have gone from the Southern tier of counties to the Dubuque and Sioux City Railroad. But as this road runs much nearer to those those southern counties than the Dubuque road, it will not only draw the business from those counties, but also to some extent from the counties south and west of those above named.

Besides, the large shipments made by the Mississippi river, especially of corn, oats, barley, &c., there were sent over the Milwaukee and Prairie du Chien Railway from McGregor, in 1861, 1,274,748 bushels of wheat, 10,7bb barrels of flour, and 3,693,495 pounds of sundries.

In 1862, there were exported from the same place over that road, 1,090,884 bushels of wheat, 5,290 barrels of flour, and 8,812,857 pounds of sundries. From Lansing, 1,350 barrels of flour, 380,381 bushels of wheat, 393,550 pounds of sundries. From De Soto 271 barrels of flour, 51,282 bushels of wheat, 41,429 pounds of sundries. From Brownsville, 130,110 bushels of wheat, and 8,740 pounds of sundries. Heavy shipments of flour, wheat and sundries were made over the La Crosse Railroad during the same year, from these towns.

In 1861, there were also shipped from McGregor, 18,700 dressed hogs. In 1862, 24,500 dressed hogs and 5,000 live hogs. In 1863, dressed hogs were estimated at 35,000, and live hogs at 10,000.

The shipments from the above towns during the months of September, October and November, by the Milwaukee and Prairie du Chien Railroad, were as follows: wheat, 674,740 bushels, flour, 1,480 barrels, sundries, 6,262,900 pounds.

The statistics of 1863, so far as made out, show a large increase over the same months of 1862. There were, in addition, large quantities shipped to La Crosse, Dunleith, St Louis and other points, particularly of corn, oats barley and flour.

The counties from which the road at present derives its business are among the most productive in the West. The land is uniformly good, and adapted to agricultural purposes. While prairies predominate, wood land is sufficiently abundant, and so equally distributed as to supply fuel, fence posts and buildings timber for at least ten times the present population. The surface is gently undulating, and the country is well supplied with springs and streams of pure water.

The rich prairies are easily converted into fields of grain, and, in their native condition, afford peculiar facilities for raising cattle, hogs and sheep. It is estimated that the native productions of the prairies and forests furnish ample subsistence for at least ten times the quantity raised here at present.

The soil is admirably adapted to the growth of wheat, oats, corn, barley, rye, buckwheat, sorghum, hemp, &c. The wheat raised is of superior quality, and brings, in the Chicago and Milwaukee markets, from three to four cents a bushel more than the wheat raised in the counties south of the above named; and the crops are more reliable and uniformly good.

When we take into consideration that the climate is healthy; that schools and churches are well organized and patronized; that unoccupied lands are offered at moderate prices, and that the McGregor Western Railway is rapidly progressing through or contiguous to these counties, it may be safely assumed that no portion of this continent offers greater inducements to emigration. Hence the population and productions of the country are rapidly increasing. As there is no rival railroad nearer than fifty miles, it is confidently estimated that this road will be taxed to its utmost capacity.

An elaborate calculation as to the future earnings of the road when completed, made by the President Hon. Geo. Greene, on the 20th of January 1864, is with the following results:

Total earnings	$555,000
Add for drawback	128,000
	$683,000
Deduct for expenses 50 per ct.	$277,500
Interest on bonds	142,800
Sinking fund	15,000
8 per ct. div. on $2,760,000 stock	220,800
	$656,100
Surplus	$26,900

The President therefore believes that a 10 per cent dividend instead of 8 may be confidently anticipated.

The officers and directors of this company for 1864, are as follows:

President.—George Greene.

Directors.—William B. Ogden, D. J. Ely, H. H. Boody, S. J. Tilden, W. A. Booth, George Greene, David Hammer, F. Andros, W. Greene.

Vice President.—H. H. Boody.

Treasurer.—D. J. Ely.

Secretary.—H. B. Whitehouse.

Discrimination in Freights.

The following decision important to freighters by Railways has just been made by the Supreme Court of Pennsylvania, at Harrisburg, a full Bench present.

Twells *vs.* The Pennsylvania Railroad Co.—The question in this case is whether the defendants may rightfully demand from the complainants higher rates for transporting over their railroad coal oil consigned to him at Philadelphia and received by them for carriage, at Pittsburg, than they may demand of shippers generally from the same place of trading to the same of delivery, merely because the complainant intends to send the oil afterwards to New York. Does the place of final destination beyond the terminus of the defendants' road, justify an increase of the charge made for transporting over the road itself freight thus destined, over the rate established for similar freight destined for the terminus itself? The Court say—"It is clear that if they receive coal oil at Pittsburg, to be carried to Philadelphia, it can make no difference to them, either in the risk or cost of transportation, whether Philadelphia is

the point of ultimate destination of the oil, or whether the consignee intends that it shall afterwards be started anew on another line and forwarded from Philadelphia to New York. The point of final destination of the freight, is a matter in which they can have no interest as carriers over their own road." "We hold then that the rule of the defendants, of which the complainant complains, is unreasonable and such as they have no legal right to enforce. The apology set up for it is not sufficient:—That the imposition of higher rates for carrying the complainant's oil to Philadelphia, because it is afterwards to be forwarded in some way to New York, is necessary to prevent his having an advantage in the New York market over those who employ the defendants to transport all the way, or over those who send oil from Pittsburg to New York with through bills of lading, is a matter outside of their control. It has no proper relation to them as carriers." A decree refunding the excess of fare was made.

Negligence.—Personal Injuries from Carelessness of Railroad Employees.

The facts in the case of Gordon against Grand street and Newtown Railroad Company were novel. The case came before the court on an appeal by defendant from a judgment entered at the Circuit, after a trial before a jury. The action was brought to recover damages for an injury sustained by the plaintiff from the alleged carelessness of the defendant, or its servants and agents at the passenger depot in Brooklyn.

The following facts appeared. The defendant is one of the city railroad corporations engaged in the business of carrying passengers from various points within the city of Brooklyn, to other parts of the city and to Newtown, in Kings County. It has a depot or room for receiving passengers, where they enter the cars of the defendant, in First street, near South Seventh street. The road is operated by means of two tracks, the same cars arriving at the depot upon one track, and departing from thence upon the other. The waiting room for the passengers and from which they enter into the cars, is close to the track which is the means of departure from the depot, there being between the car when it is upon the outward bound track and the waiting room, a narrow platform two feet wide. The cars arriving with passengers are removed from the incoming to the outgoing track by means of a movable section of the track, placed upon what the witnesses call a slide, level with the floor of the depot, which is moved with the door upon it, from one track to the other by means of this movable slide. When the movable section, with the car upon it, is placed upon the outgoing track it approaches within a few inches of the narrow platform adjoining the waiting room. Over this platform, which is about a foot above the level of the track and floor of the depot, the passengers pass from the waiting room to the outgoing car.

On the 8d of November, 1862, the plaintiff, about 7 o'clock in the evening, entered the waiting room with a friend, to take the cars. A car came into the depot, the horses were removed, and she, thinking it was ready to receive passengers, stepped out of the waiting room on to the narrow platform and from thence upon the floor of the depot, for the purpose of entering the car After she stepped out of the waiting room she saw the car commence to move towards her sideways. She stepped back to get out of the way, but before she could get back, her foot was caught between the moving body of the platform and seriously injured. She fainted, and when she came to her senses she found herself in the waitroom, to which she had been removed. There was no lamp or light inside of the waiting room at this time, but there was a light in the office adjoining, which shed its rays into the waiting room. No one gave her any warning as to what she was to do when she went in, nor where to go. She had no knowledge of the manner of shifting the car, nor was there any notice to the passengers directing them how to proceed, or giving information of the shifting of the car put up at the depot or waiting room. The defendant's conductor testified that there was light enough to see all around the depot, from a light in the receiver's office. At the time he commenced to slide the car from one track to the other, quite a number of persons were standing about in the depot, and he told them to stand back and get out of the way, and those who were on the floor of the depot got upon the platform. Supposing all the passengers had got upon the platform, himself and the driver pushed the car, got it upon the slide, and then started the movable section with the car upon it, and after it had moved the distance of two or three feet he heard the plaintiff scream.

He did not notice the plaintiff at all, and saw no one on the table or slide at the time he started it. Another witness for the defendant testified that he was switch tender at the time, and heard the conductor tell the ladies to step back into the waiting room, and saw the plaintiff there. After he told them to stand back he pulled the bolt. The other passengers stepped back. She stepped back at first, and when the car began to move, the plaintiff stepped down again and immediately she screamed.

Brown, J.—This accident, it will be observed, did not occur in the usual and ordinary passage of the cars over the defendant's road. The track of the road is visible to all persons exercising ordinary care, and so is the approach of a car moving upon it. And when a person places himself upon the track while the cars are passing and repassing upon it, such an act would be strong if not positive evidence of carelessness. The injury to the plaintiff was not the result of the usual passage of the cars over the track of the road. It occurred while the car was being moved from the one track to the other. This movement was effected by the voluntary action of the conductor and the driver, and the moving body was entirely within their control. If passengers were upon the floor of the depot they could suspend the movement until they removed themselves out of the way. The conductor saw this at the time, for he gave express directions to the persons on the floor of the depot to stand back and get out of the way. The mistake he made was in moving the slide with the car upon it before his directions were complied with; for if the persons present failed to comply with his directions, from not hearing them or not comprehending what he meant, it was gross carelessness in him to put the slide and the car in motion. Few people, I apprehend, would have had the sagacity to anticipate the movement which ensued. Cars do not usually move sidewise. Not one person in a hundred would have foreseen what the conductor intended to do, unless they had notice of and understood it before hand. It was a process that would not have been intelligible to many persons without previous explanation. A person standing upon a railway in the vicinity of a car or locomotive, might readily enough think the car or locomotive would probably move backward or forward and put them in jeopardy. But no one, without some previous knowledge, would be expected to provide against the contingency of a car, with the railway upon which it stood, coming upon him by a side movement, like that described by the witnesses. This consideration, it seems to me, imposed upon the defendant greater care and circumspection in moving its car from one track to another, than is usually imposed upon a railway company, while at the same time, and in the absence of all proof of knowledge of the structure for shifting the cars and the danger resulting to passengers therefrom by the plaintiff, it is a complete answer to the defendant's argument that the plaintiff's own carelessness contributed to the accident. She went to the defendant's depot to take passage, as she says, in the cars. She saw a car arrive and stop within a few feet of the room in which she was waiting, and without, as she says, any knowledge that the car was to be moved across the track. She proceeded to enter it. Here she was struck and injured, by the act of the conductor in moving the car. If what she says is true, (and the jury were to judge of that,) there was no want of care on her part. Negligence and carelessness cannot be predicated upon such an act. Care in avoiding danger implies that there is or would be with all prudent persons a sense or something to create a sense of danger; for if the circumstances are not such as would put a prudent and cautious person upon his guard, the omission to exercise more than ordinary attention is not the negligence which contributes to an accident. The real point in the case is that presented by the conflicting evidence of the plaintiff and the boy Lyon. He says, when the conductor told the persons on the floor of the depot to step back, she with the other persons, did step back at first, but "after the car began to move she stepped down again, and right away she screamed." If this was true, then undoubtedly she was negligent and should not be allowed to recover. The jury, however, did not concur in this view. They gave credit to her evidence rather than that of the boy Lyon, and that was their province not ours.

The counsel for the defendant insists that the relation of carrier and passenger did not exist between the parties at the time of the accident. This point, I think, cannot be maintained. Neither the entry into the cars nor the payment of the fare is essential to create that relation. Being within the waiting room waiting to take the cars, was as effectual to make her a passenger as if she had been within the body of one of them.

The waiting room is made for the purpose of receiving and accommodating the passengers until the car arrives. Nor can the time of taking the fare be material to create the relation. It is sometimes taken at the office. This is usually the practice upon the great railways of the country; but on the city roads it is almost universally taken after the passenger has entered the car, and while it is in motion over the route.

Seeing no error in the charge of the judge, upon the exceptions taken thereto, I think the judgment should be affirmed.

Judgment affirmed.

CIRCULAR.

To the Bondholders and Stockholders of the Pittsburg, Fort Wayne and Chicago Railway Company.

The undersigned, Commissioners to carry into effect the recent financial arrangement between the bondholders and stockholders, deem it proper to communicate to you this statement:

1. The application of earnings of the railroad to improvements of the property, in the nature of construction, have been, according to the books:

During the receivership under the order entered Jan. 17, 1860	$1,007,650 06
During the six months from November, 1861, to May 1, 1862	236,694 60
From May 1, 1862, when the present company went into possession, to Dec. 31, 1862	970,147 56
(Of which $536,673 were for depot and bridge bonds)	1,517,162 25
Total	$3,731,654 47

Which investment is now bearing good interest, in the shape of enlarged earnings, and virtually increases the intrinsic value of the stock full $3,500,000.

2. This expenditure has been made without increasing the debt or stock of the company, as reorganized. Net earnings over interest supplied a million last year, and large sums before; and the residue has been provided for by remission of interest, made in conformity to the agreement for reorganization, and by surpluses in the hands of the bondholders' committee resulting from provident adjustments.

3. Before the late financial arrangement, the company had provided for $1,912,509 to be expended for improvements during the present year; most of which was to have been furnished by net earnings, and the residue from the other resources mentioned. It was not contemplated, in the execution of this work, to increase the capital stock, or to incur any additional bonded debt, or any floating debt. No doubt was entertained that the net earnings, after paying interest, would have been sufficient for these purposes. Neither the officers of the company nor the committee of the bondholders felt any hesitation in acting upon this conviction.

4. The purchase and construction of new equipment has formed an important share of these expenditures. Among them was a provision for 95 new locomotives. The cars have been proportionately increased. Contracts for iron have also been advantageously made. The track has been greatly improved. It needs still further expenditure. The equipment received is still inadequate to the business which offers. The savings on this work, as compared with the present range of prices, will be nearly two millions of dollars.

5. It was in this condition of things that the desire of the Board to proceed more rapidly with the improvements contemplated, and the demand of the stockholders for the application of the net earnings to dividends, led to a conference between these interests and the bondholders which has resulted in some modifications of the financial plan fixed in 1859, by the agreement of reorganization.

These modifications are substantially the following:

To the bondholders is accorded—

1. An extinguishment of the right of the company, after July 1, 1867, to require them to accept six per cent. bonds, or to receive payment of the principal; a change which leaves all the bonded debt of the company irredeemable until July 1, 1912.

2. The establishment of sinking funds for the first and second mortgages having priority over dividends, and the application of their incomes to the purchase of the bonds at their market value.

3. Incidentally, an increase of their security by a large additional expenditure of new capital upon the property.

4. An enlargement of the voting power of the first and second mortgage bondholders from one vote on every $200 to one vote on every $100 of par value.

5. The payment of interest on the third mortgage bonds semi-annually instead of annually.

To the stockholders, upon these conditions, is accorded:

1. The power to provide for all new construction by issues of new capital stock.

2. A release of the provisions of the trust deeds which require all net earnings over 6 per cent. on the original $6,500,000 of capital to be applied as sinking funds to purchase in the bonds; or in some cases, to new improvements.

The practical result of these measures is, to leave the net earnings in each year, after paying interest and sinking funds, at the disposal of the company, for dividends upon the stock; and the policy may now be deemed to be settled, by the unanimous action of the stockholders and bondholders, to apply such surplus of net earnings to dividends, as far as prudence and sound discretion will warrant.

6. The annual charge for interest and sinking funds will be as follows:

8 per cent. on $5,250,000 of 7 per cent. first mortgage bonds	$420,000
8 per cent. on $5,160,000 of 7 per cent. second mortgage bonds	412,800
7 per cent. on $2,000,000 of third mortgage or income bonds	140,000
On bridge bonds and Chicago depot b'ds.	30,950
Total interest and sinking fund	$1,003,750

7. The net earnings for 1863, as stated in the President's Annual Report, were $2,106,623 18, which would have been sufficient to pay the interest on the bonds, and the installments of the two new sinking funds, and to leave a surplus of $1,102,873 18, which, if the new financial arrangement had then existed, would have been applicable to dividends on $6,500,000 of stock, being over 16.96 per cent.

This was, in the main, without the benefit of the $1,517,162 of new capital expended on the road and equipment during that year, and with an equipment very inadequate to the business which offered.

The President's estimate of net earnings for the present year, made also in the Annual Report, is $2,500,000; and, in a Special Report, he stated that the net earnings for March, after deducting the proportion for interest and the new sinking funds, were over 2½ per cent. on the present amount of the stock.

Thus far the receipts for April are quite equal to those of March.

8. In judging of the value and productiveness of your property, it is to be noted:

That it is a direct and continuous line, without branches or dependencies, between great industrial and commercial centres, 468 miles long, every part having a through business and an abundant local traffic, rapidly increasing, with easy grades and slight curves, more than two-thirds of the distance being straight line, traversing a grain-growing region of unsurpassed fertility, as yet but partially developed.

That the investment of capital in bonds and stock is less than that of any other leading line of equal, or even similar, productive capacity, by more than one-third.

That the present affluence of earnings is mainly due to these permanent causes.

If the business capacity of the line be properly sustained and developed, there is no reason to doubt, in the judgment of the undersigned, that it will maintain its dividends in every condition of circumstances which will allow of dividends in similar enterprises.

It must be borne in mind, also, that as *none of the bonds are payable for 48 years, and none of them are* CONVERTIBLE *into stock*, the whole increase of net earnings arising from a natural and permanent growth of business enures to the stock, which forms at present but one-third of the invested capital. The less permanent effect of an inflated currency will operate, during its continuance, in the same manner.

The undersigned, in the exercise of the discretion intrusted to them by the bondholders and stockholders, will not now press the sale of any new issue of stock under the new arrangement; they see no cause for a premature issue. That measure can be deferred until an easier condition of the money market; and the gradual and general distribution among permanent investors of the present stock will enable us more nearly to obtain its real value.

Dated New York, April 27, 1864.

JAMES F. D. LANIER,
J. EDGAR THOMSON,
SPRINGER HARBAUGH,
SAMUEL J. TILDEN,
LOUIS H. MEYER,
Commissioners.

NOTE.—The following is a copy of the Special Report made by the President, hereinbefore referred to:

NEW YORK, April 8, 1864.

GENTLEMEN: The unanimous action of the stock and bondholders has liberated the net income of the railway after paying interest and sinking fund, so as to place it at the disposal of the Board of Directors for the purpose of dividends, surplus funds and other objects consistent with the interests of the corporation.

The first and second mortgage bonds, being five sixths of the whole funded debt, were so arranged in six series as to make the amount due for interest each year payable in monthly instalments of one-twelfth each month. Two years having confirmed the theory upon which the plan was adopted, it might now be well to assimilate to it the plan of paying dividends on the capital stock by paying quarter annual dividends, instead of annual or semi-annual dividends, as is generally customary with other corporations.

I herewith submit an approximate statement of the earnings, expenses, and disbursements for the months of January, February, and March past, which is sufficiently near correct to justify the Board acting upon it with a view of making a dividend, if it is thought best to declare one at this time:

Earnings for January		$290,675 81
Earnings for February		455,211 02
Earnings for March		602,603 28
Total for three months		$1,348,490 11
Deduct operating expenses:		
For January	$210,296 21	
For February	263,328 22	
For March	330,000 00	
		803,624 43
Balance		$544,865 68
Less interest and sinking fund as follows:		
Three months on first mort.	$91,875 00	
Three months on 2d mort.	90,300 00	
Three months on 3d mort.	35,000 00	
Three months on Chicago depot bonds	1,737 50	
Three months on interest and sinking fund on Allegheny bridge bonds	6,000 00	
Sinking fund of one per ct. on first and second mortgages for three months	26,025 00	
		250,937 50
Leaving a balance of		$293,928 18

Which is applicable to dividends, and subject to the order of the Board. The above balance of unexpended and unappropriated income is equal to a dividend of 4.52 per cent. on the outstanding capital stock.

The small earnings for January were caused, as you are aware, by an almost total suspension of

the business of the railway for about one-fourth of the whole month, arising out of a combination of the locomotive runners to interfere with the police and management of the railway.

It would not be prudent at this time to divide all the surplus earnings, as unforeseen contingencies may affect future earnings, and, to enable the company to make full dividends in adverse times, a surplus fund ought to be accumulated.

Respectfully submitted.

(Signed) G. W. CASS, President.

To the Board of Directors of the Pittsburg, Fort Wayne and Chicago Railway Company.

Upon the reading of the above report, it was unanimously resolved to declare a dividend of 2½ per cent. for the quarter year from January 1 to March 31, 1864, payable at the office or agency of the company on the 15th day of May next.

Union Pacific Railroad Company.

NOTICE is hereby given to the Subscribers to the Capital Stock of the Union Pacific Railroad Company that a call for a further payment of ten per cent. upon the amount of their subscriptions has been made this day, payable at the office of the Company, 13 William street, New York, on or before the 20th of June next.

By order of Executive Committee

JOHN A. DIX, President.

JOHN J. CISCO, Treasurer.
New York, May 10, 1864. 2t-20

Transfer Office of the Chicago and North Western Railway Co., No. 8 Wall st., New York, April 28, 1864.

THE PREFERRED STOCK BOOKS of the Chicago and North Western Railway Company will be closed on the 15th day of MAY next.

On all Preferred Stock then issued and outstanding, a Dividend of ONE and THREE-FOURTHS PER CENT. will be paid on the 1st of JUNE next.

Future Dividend days on above Stock will be Semi-Annually on the 1st of DECEMBER and JUNE.

By order of the Board,

4t-19 JAMES R. YOUNG, Secretary.

Office of the Illinois Central Railroad Co., New York, May 6, 1864.

THE ANNUAL MEETING of the Shareholders of the ILLINOIS CENTRAL RAILROAD COMPANY, for the election of Directors and the transaction of other business, will be held at the office of the Company in the city of Chicago, on WEDNESDAY, the 25th day of May, 1864, at 12 o'clock noon.

The Transfer Books of the Full and Scrip Shares will be closed at the close of business on the 12th instant, and reopened on the morning of the 28th inst.

2t-20 L. A. CATLIN, Secretary.

28 Beaver Street.

New York, 2nd April, 1864.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. Contracts negotiated by

E. A. & S. W. HOPKINS,

70 Beaver st., New York.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be repaired every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

Bureau of Agriculture.

The bi-monthly report of the Bureau of Agriculture has made its appearance, and contains an abstract of information obtained by it for the months of March and April 1863. It appears from the introduction, that 130,000 copies of the annual volume have not been enough to meet the demands of the public, and that 60,000 more copies are therefore to be printed. It was certainly a volume of great utility, and its information must have been gratefully received by intelligent agriculturists. It appears that a large correspondence has grown up out of its publication, and receives prompt and careful attention from the Commissioner, Mr. Newton.

Agriculture is indeed the predominant occupation of our people, and to its encouragement chiefly must we look for the population and prosperity of our Western States in particular, remote from the Ocean and necessarily less commercial than those which face the Atlantic. But the commerce of these very States is chiefly maintained by the products of the soil, and it is their interest therefore that our fields should be cultivated, the great prairies blossom like the rose, and the vallies be fat with corn.

The objects which seem most directly to be regarded by the Bureau, are the collection of Agricultural statistics, the numbers and character of farm products, and climatic influences. Proper arrangements have been made to obtain this information by a system of recognised correspondents, and when attained and made public, it exercises a wholesome check on speculation, and maintains a sort of fairness and regularity in prices. This is of immense advantage to dealers and exporters. We find some interesting statements as to the amount of stock in 1864 as ascertained by calculations and information, compared with those of the census of 1860.

HORSES.—These have decreased in number since 1859, by 149,999, and even more than this, according to the returns from Kentucky and Missouri. There has been a decrease in New York and Pennsylvania, and a considerable one in New England, but Ohio, Wisconsin, Iowa and Minnesota are making large accessions to their stocks. There is nevertheless a great demand for good work horses.

MULES.—There has been a decrease in this stock of 20,762, attributable to the drain of the war, and the market will be a remunerating one when peace returns.

CATTLE.—There has been an increase of 24,291, Kentucky and Missouri showing a large reduction, and Iowa an increase of 213,620. The average annual increase in the other loyal States is not large, being only about 3½ per cent. since 1859.

Our export of beef in tierces and barrels for the last three years has been as follows:

1861	$1,372,546
1862	1,963,422
1863	2,807,042

While the prices of our cereals have declined abroad, those of meats have remained steady. The following comparison of these prices is taken from the London Market Lane Express, of March 7. *Flour* was then but 84 cents per 112 pounds higher than in 1850, a year of low prices, whilst *beef* was $4 44 higher per 112 pounds, *mutton* 7½ cents per pound higher, *veal* 4½ cents per pound higher, and *pork* $1 12 per 112 pounds higher, than they were in 1850. Here is a great difference, especially in beef and mutton, "the two principal articles of consumption," as the *Express* says. That there is an increased consumption of meats in Great Britain is seen in these prices, and in the fact that more lands are being put down in grass. As the consumption of our meats increases there, the more will they be liked.

All these statistics admonish our farmers not to neglect cattle-raising; but keeping their attention constantly on their increase or decrease of any stock, and the causes of demand, to timely avoid a scarcity on the one hand, and an over-supply on the other.

COWS.—The high prices of butter and cheese, enhanced by the war, the currency and speculation, show that these animals must continue to be productive stock for our farmers. Their increase in the loyal States since 1859 has been 339,784, with a local falling off in Kentucky and Missouri, being a general increase from 1859 to 1860 of 36 per cent. The foreign exports of butter and cheese for the last three years have been as follows: Of *butter*,

1861	$4,190,745
1862	6,091,831
1863	7,176,648

And those of *cheese*, as follows:

1861	$3,181,171
1862	4,673,889
1863	5,603,884

SHEEP.—There has been a gratifying increase in these animals. As cotton became scarce and dear, wool necessarily came into demand, and our farmers have become raisers of the article on a large, and we are glad to say, remunerative scale. In three years, the increase in these animals has been 9,242,119, and about 61 per cent since 1859. Kentucky and Missouri have not participated much in this increase. It is calculated that this spring has added four or five millions, making the whole number thirty millions, or double what it was in 1859, in the loyal States. Though with approaching peace, the demand for clothing of the army will fall off, yet till Cotton is re-established in its old haunts by the aid of paid freed labor, it may be anticipated that the prices of wool will be steady, and should a European war break out, quite a possible occurrence, this staple would be in large demand abroad. The effect of a nearly permanent tariff on foreign manufactured cloths to last at

least as long as we have a large debt to provide for, must also be to secure a good home market for our wool growers. As we write this, we learn that the wool crop for the State of Michigan for the present season has been fully estimated, and the clip is calculated at 12,000,000 of pounds. In 1850 it was 2,043,283; and the number of sheep. 746,437. This clip has heretofore sextupled in fourteen years. Michigan must now have 4,478,610 sheep—an excess of 535,681 over what was possessed by any State fourteen years since.

Hogs.—This staple is characteristic of the fertile West, where crops of corn are raised of fabulous quantities, and enter very largely into our commerce. American pork is the best in the world, and our lard is famous in all Countries where butter is scarce or unknown. The increase was retarded last year by the destruction of the corn crops in the west, and the number of hogs killed and packed fell off in the loyal States almost a million, viz., 911,323, as nearly as could be ascertained. The value of the exports of this article was as follows:

1861	$13,996,314
1862	33,776,960
1863	39,020,419

The Cincinnati *Price Current* of April 6, contained full returns, of the pork packed in the West and says:

SUMMARY OF HOGS PACKED IN THE WEST.

	1862–'63.	1863–'64.
Ohio	991,183	648,836
Iowa	404,861	313,331
Indiana	585,428	394,217
Illinois	1,472.834	1,273,390
Kentucky	130,920	126,019
Wisconsin	201,745	164,576
Missouri	297,611	370,736
	4,084,582	3,291,105
Decrease	793,477	

The western States producing hogs rank in the following order of production as to quantity:

Indiana, Illinois, Ohio, Kentucky, Iowa and Missouri.

The report has a very interesting statement as to our cereal productions, showing by the following figures, that Great Britain has for the last nine years at least, drawn her principal supplies of wheat from the United States. From 1859 to 1863, both years inclusive, she has received from all parts of the world 49,737,904 quarters of wheat (480 lbs. to the quarter.)

Of these she received as follows:

From Prussia	8,340,202 qrs.
" Russia	7,186,403 "
" Egypt	4,152,230 "
" Canada	2,444,506 "

and from the United States (chiefly from the loyal States) 12,968,574, qrs. The only great competition we have to fear in the future is in the increased production of the great plains of Russia, and the introduction of the steam plough to bring them into fertility, On the other hand it may be said, that there must be consumption, that of population and social advancement to ensure production. No nation will produce much without having real or artificial wants, the latter the result of education, refinement and extreme civilization, if we may use the term. The population of the Russian steppes is sparse, and not far removed from barbarism in all that makes life enjoyable.

The following is a very practical and interesting account of the condition of the British markets the last two months:

Wheat.—The average price of wheat at 42 places in Great Britain was 40 shillings and 1 penny per quarter of 480 pounds. Estimating the shilling at 24 cents, this price per American bushel of 60 pounds would be $1 20. But American red and white winter wheat ranged at about $1 32 to $1 42 at London; and at Liverpool, at $1 30 to $1 65.

At San Francisco it was $2 25 to $2 40 per bushel, having advanced recently from 30 cents to 45 cents per bushel on account of the severe drought noticed more fully in our article on California.

At New York it was ranging from $1 70 to $1 86, currency value, being in gold value, by which it must be compared with English prices, at about $1 13 to $1 23, ascertained by estimating the discount of difference between gold and currency at about one-third.

Freight of wheat to Liverpool from New York was from 3 to 6 cents per bushel, and to London 10 cents. Making allowance for the rates of exchange, insurance, drayage, commissions, &c., it will be seen that the exportation of wheat affords but little profit at this time.

Flour.—In London the best article was worth about 3 cents per pound, and American flour in barrels ranged from $4 32 to $6 ;. in Liverpool, from $4 80 to $5 28 and $6 24.

In New York, from $6 65 to $8 30 per barrel, currency value; in gold, from $4 43 to $5 53; in San Francisco, $4 50 to $7.

Freight to Liverpool, from New York, was 24 cents per barrel, and to London 36 cents.

Indian Corn.—At Liverpool, corn was selling at from 78 to 89 cents per bushel of 56 pounds. In New York, from $1 28 to $1 30 in currency, equal to 85¼ and 86¼ cents in gold. At San Francisco it was $2 25 per bushel.

Provisions.—In London, new American butter was selling at 21 cents per pound; lard, in casks, at 11¼ cents per pound; pork, per barrel, $21 60; beef, per barrel, $23 52 to $26 88.

At New York, western and Ohio butter from 28 to 38 cents per pound, and State from 40 to 44; cheese, from 16 to 18 cents; lard, 13 to 13¼ cents; pork, prime, from $19 50 to $21 per barrel, and from $22 50 to $25 25 for mess; beef, prime, from $7 50 to $9 for country mess, and from $16 to $19 for extra mess. These are currency rates; gold values would be about one-third less.

The report expresses the opinion that owing to the great drought prevailing in California, the cereal crops will there be almost if not quite a failure. It is therefore probable that there will be an active demand for flour for the next six months on our Pacific coasts.

This report also informs us of the probable crops, of fruits, of rye, barley and clover, honey, maple sugar and molasses throughout the loyal States. We should judge from these that we shall have an average yield in all of them.

We notice the meteorological papers appended to the report, obtained from the Smithsonian Institution which are also valuable.

Meteorology though not yet reduced to the form and rules of a science is very likely to become an indispensable adjunct to Agriculture. Some general results have however been fully ascertained through the means of extended and carefully recorded observations. Thus we know the normal course of the winds in various sections of the Union, the mean of the fall of rain, that of heat and cold, clear, cloudy and pleasant days, and if climate is proper to be understood by those who would reap what they sow, then these observations are valuable to those who desire the best and healthiest locations, and the surest returns for their labor. Science is the best friend of industry, as we see in the improvements of agricultural implements, and the conversion of crops, and it is with this view of the subject we refer the readers of the Journal, to the abstract itself, of the Bimonthly report of the Agricultural Department at Washington.

Western (Mass.) Railroad.

The receipts from operations of this road for the years ending November 30, 1862 and 1863, have been as follows:

	1862.	1863.

From this deduct—

Interest on State loans and exchanges	$438,802 35	
One per cent. to sinking funds	50,000 00	
Nine per cent. dividends	463,500 00	
Excise tax on dividends	14,335 04	
		966,637 39
Surplus carried to contingent fund.		$226,193 89
Add balance of do. Nov. 30, 1862		553,174 60
Total contingent fund Nov. 30, 1863		$819,368 49

Compared with the previous year, the gross receipts show an increase of $339,789 64; with an increase in expenses of only $95,648 70—making the increase in net income $244,140 94.

The receipts of the Pittsfield and North Adams Railroad were $59,216 41; and the expenses, $28,090 37—leaving net earnings $31,126 04. Two dividends of three per cent. each, amounting to $27,000, were paid, and the balance, $4,126 04, carried to Western Railroad account, as above.

The securities in the sinking funds, many of which are standing on the books below their market value, have been examined by the Committee, and are found with the accrued dividends, and interest brought up to November 30, to amount to $2,971,361 35, showing an increase for the year of $257,014 79. This unusual accumulation is mainly due to the premiums received for interest paid in gold, on more than one half the funds. It is indeed true that four millions of the debt which these funds are provided to redeem is to be paid in gold, and the fact is not to be overlooked as affecting the ability of the funds to meet it. It is proper however to state in connection, the further fact that of the funds already in the hands of the commissioners for the payment of this indebtedness, full three-eighths of the amount are now in securities, the principal and interest of which are payable in gold, while it is to be hoped that long before the maturity of the debt these circumstances may cease to be of any importance in the calculation.

The business of the year, as herewith exhibited, is matter of congratulation. It shows that with receipts increased more than three hundred thousand dollars, the increased expenses are a little short of one hundred thousand dollars, a much larger rate of increase in receipts than in expenses. This result is attributable, *first*, to a heavier pass-

enger traffic, and a more equal distribution of the work, both in the freight and passenger departments through the whole year, and upon the trains moving in both directions, than has been usual, so that we have realized more to the mile run than in former years of more irregular traffic and lighter passenger trains; and *second*, to the fact that the year was commenced with a large supply of material, mostly laid in at a low cost. This last advantage will be considerably felt in the year already commenced, though not to the same extent, for there is now on hand a fair supply of material which stands on our books at much less than its present value.

The superstructure of the road, the station buildings and rolling stock, have been placed by repairs and renewals in a condition to insure safety, and more than meet ordinary depreciation. With peculiar difficulties in grades and location, the road has demonstrated its ability to maintain the cost and rates of transportation at points which compare favorably with other New England roads. The intelligent, cheerful and faithful cooperation of the officers and men in the performance of their several duties has contributed its full share to these gratifying results.

The scarcity of labor, and the high cost of material caused a suspension of the construction of the second track for the year. This work, which in ordinary times can be completed for five hundred thousand dollars, should be resumed at the earliest day, and carried at once to completion.

The differences in the accounts with the Worcester road have been all adjusted and settled to the first day of June, 1862. We take pleasure in making this announcement, but regret to add that the inequality of the present division of the joint receipts, as stated in our last report, still continues, and indeed has been greatly increased by the peculiar condition of the country, and the consequent change in the traffic. The stockholders of these corporations, in view of the prosperity of the past year, have certainly no cause to complain of their present profits, but the duties of the managers of a line which constitutes the chief artery between the seaboard of Massachusetts and the west do not end in securing profitable returns to the proprietors. It is due to the State and all that district of New England dependant upon the facilities afforded by this line, that all needless hindrances to the traffic should be removed. In this way only can the expectations of those who, with great personal labor and pecuniary risk projected and built these roads, be fully realized. It is hardly necessary to add that all measures to this end will receive the hearty support of the managers of this corporation. The true interest of the public and of these roads, rightly considered, can never be in conflict.

The equipment of the road consists of 18 passenger and 55 freight locomotives; 37 first class and 8 second class passenger cars; 10 baggage, 338 box, 261 platform, 80 gravel, and 46 hand cars. Also 54-234ths of 25 passenger and 11 baggage cars of the N. Y. and Boston Express Line.

The number of miles run by locomotives with passenger trains was 379,952; with freight trains, 854,199; with other trains, 41,778—total miles run 1,275,929, an increase over the previous year of 18,728 miles.

The number of passengers carried was 710,457; of which 56,243 were through, and 654,214 way passengers. Of the through passengers, 53,984 were 1st class, and 2,259 2d class. Of the way passengers, 644,895 were 1st class, and 9,319 2d class. The whole number of 1st class passengers was 698,879; 2d class, 11,578. The passenger traffic shows an increase of 152,410.

The number of tons of merchandise moved was 663,927; of which 485,562 was carried east, and 178,365, west. The through tonnage eastward amounted to 104,776; do., westward, 30,933. All other tonnage eastward, 380,786; do., westward, 147,432. Equivalent number of tons carried one mile, 53,808,561; equal to 344,927 tons carried over the whole road. The increase in merchandise traffic over 1862 was 11,631, and over 1861, 37,719 tons.

An aggregate of 85,758,268 passengers or tons of freight carried one mile in 1863, against 75,773,892 passengers or tons of freight carried one mile in 1862.

The cost of transportation for each passenger and each ton of freight one mile has been 1.407 cent., against 1.467 cent. in 1862; or assuming the cost of transporting each ton of freight to equal the cost of two passengers the same distance, we find the cost this year to be 0.865 cent. per passenger, and 1.730 cent. per ton of freight, against 0.870 cent. per passenger and 1.740 cent. per ton for freight per mile in 1862.

The cost of the Western, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1863, has been as follows:

Western Railroad	$7,481,945 24
Equipment	1,095,712 97
Albany and West Stockbridge R.R.	2,388,359 22
West Stockbridge Railroad stock	13,000 00
Hudson and Boston Railroad	183,838 98
Total	$11,262,856 41

The means provided for the construction and equipment of the same has been as follows:

Capital stock	$5,150,000 00	
Sterling bonds	4,319,520 00	
Albany City bonds	1,000,000 00	
Total means	$10,469,520 00	
Amount paid sinking funds	459,578 62	
	$10,009,941 38	
Dollar bonds	950,000 00	
		10,959,941 38
Balance expended more than realised from construction funds		$302,915 03

Central Pacific Railroad Act.

The following is an authentic copy of the Act in aid of the Central Pacific Railroad, recently passed by the Legislature of California, and approved by Governor Low:

AN ACT

To aid the Construction of the Central Pacific Railroad, and to secure the use of the same to this State, for military and other purposes, and other matters relating thereto, Approved April 4, 1864.

SECTION 1. The Central Pacific Railroad Company of California, a corporation duly organized under the laws of this State for the construction of a railroad from the city of Sacramento to the eastern boundary line of this State and one of the railroad companies to which said Congressional aid has been extended, is hereby authorized and empowered to execute and issue at any time hereafter the bonds of said company in sums of one thousand dollars each, bearing interest at a rate not exceeding seven per cent. per annum, commencing on the first day of July, 1864, and payable on the first day of January 1865, and on the first days of July and January of each year thereafter, the interest on the 1st fifteen hundred of said bonds, numbering from one to fifteen hundred, inclusive, to be made payable at the State treasury, and on the remainder of said bonds to be made payable at such place or places, and in such manner as said company may deem proper—said bonds to be executed and issued to an amount not exceeding twelve millions of dollars, payable not exceeding twenty years from the first of January, 1865, and said bonds to be secured by one or more mortgages on the railroad, rolling stock, buildings, machinery, fixtures, and corporate franchises of said company—the principal and interest of said bonds to be payable in United States gold coin; provided that said bonds shall contain an express condition that the counties of Placer, Sacramento, and city and county of San Francisco shall be exempt from all liability as stockholders for the payment of the principal or interest upon all of said bonds over and above the stock of said counties heretofore subscribed to the capital stock of said company.

SEC. 2. To expedite the construction of said railroad, for the reasons set forth in the preamble to this Act, there shall be levied and collected in the year 1864, and annually thereafter, until the expiration of the time for the payment of said bonds, in the same manner as other State revenue is or may be collected, a tax of eight cents on each one hundred dollars of the taxable property in the State in addition to other taxes, the same to be paid in the gold and silver coin of the United States; and the money to be derived from such tax, shall be, and is hereby, appropriated and set aside to constitute a special fund to be known as the Pacific Railroad Fund, out of which fund the coupons for interest on said fifteen hundred bonds, hereinbefore described, shall be paid as they may fall due and be presented for payment from time to time for said period of twenty years; and on payment thereof, said coupons shall be taken up and cancelled by the State Treasurer; and if at any time there should not be a sufficient sum of money in said fund to pay said interest when due, then an amount sufficient to make up such deficiency shall be taken from the General Fund for that purpose, or the State Treasurer shall make such other contracts and arrangements as may be necessary to make up such deficiency; and whenever on the first day of July of any year there shall remain a surplus in said fund, after the payment of the interest on said bonds as hereinbefore provided, such surplus shall be paid into the General Fund.

SEC. 3. A full and particular account and record shall be kept by the State Treasurer of said Pacific Railroad Fund and the moneys collected in accordance with the provisions of this Act, open at all times to the inspection of the Governor and Controller and of any Committee appointed by the Legislature or either branch thereof.

SEC. 4. The said grant to said company is made upon the express condition and consideration that said company shall and do, at all times when required, from and after the passage of this Act, transport and convey over their said railroad all public messengers, convicts going to the State Prison, lunatics going to the State Insane Asylum, materials for the construction of the State Capitol building, articles intended for public exhibition at the Fairs of the State Agricultural Society, and in case of war, invasion, or insurrection, as well as at all other times, also transport and convey over their said railroad all troops and munitions of war belonging to the State of California, free of charge, without any other compensation than as herein provided; and shall also construct and equip in running order, at the rate of not less than twenty consecutive miles of their said railroad each year hereafter, including that portion of said railroad now partially completed, until the same is fully completed and equipped, and shall also within ninety days from the passage of this Act file in the office of the Secretary of State a contract or agreement, duly signed by the President and Secretary of said company, and sealed with the corporate seal thereof, therein and thereby agreeing to faithfully do and perform and fully comply, on the part of said company, with all the terms and conditions set forth in this section, and therein also releasing all claim to the warrants provided to be issued by the Act entitled "An Act to aid the construction of the Central Pacific Railroad in the State of California, and other matters relating thereto," approved April 25, 1863—upon the filing of which agreement and release the said Act shall be repealed; and also agreeing therein that said company shall, within ninety days after the receipt of a patent therefor from the United States, execute, acknowledge and deliver to the State of California a deed in fee simple for the conveyance of the south half of Section 19, in township 11 north, of range 7 east, Mount Diablo meridian, situated in Placer county, on said railroad, and about twenty-two miles from Sacramento, with all the granite and granite quarries thereon, excepting and reserving therefrom, however, a tract or strip of land four hundred feet wide, and running across said half section, each one-half thereof lying on each side of the line running along the center of the main railroad track of said company; and in case said company shall fail and refuse to do and perform the said conditions and the said agreement on their part, the said company shall be liable to repay to the State the amount which shall have been paid by the State under this Act.

SEC. 5. The several sums of money necessary for the payment required to be made under the provisions of this Act are hereby appropriated from the said funds and from the State Treasury for said several purposes, and the State Treasurer is hereby directed to pay the same as provided by this Act; and this Act and the appropriations under the same shall not be subject to the provisions of an Act entitled "An Act to create a Board of Examiners, to define their powers and duties, and to impose certain duties upon the Controller and Treasurer," approved April 21, 1858.

SEC. 6. The Act entitled "An Act to aid the Construction of the Central Pacific Railroad in the State of California, and other matters relating thereto," approved April 25, 1863, is hereby repealed.

SEC. 7. This Act shall take effect and be in force from and after its passage.

International Bridge.

It is now settled that an International bridge across the Niagara, between Buffalo and Fort Erie, will be very soon undertaken. A large surplus of subscriptions was obtained for the work, the plans of construction are being matured, a grand depot for the benefit of all the converging railways will be erected in the city, and an immense traffic which has been diverted by the Suspension Bridge will now take its natural route and come to Buffalo.

Subscription for Stock of R. R. Co.--Town Bonds.--Statute Preliminaries.

The case of Town of Duanesburgh *vs.* Albany and Susquehanna Railroad Company, affords an important decision in regard to the power of towns to subscribe for railroad stock and to issue bonds for the payment of such subscription. The The case came before the court on an appeal by the plaintiff from an order refusing an injunction. There were two defendants, the railroad corporation and one Jenkins.

The defendant, the Albany and Susquehanna Railroad Company, is a body corporate, organized previous to 1853, for the purpose of constructing and operating a railroad from the Hudson River, at Albany, through the counties of Schenectady, Otsego, Delaware, Chenango and Broome, to Binghamton. In 1856, an act of the legislature was passed authorizing any town in said counties to borrow money on its credit to aid in the construction of said railroad. The first section provided that on the application in writing of twelve or more freeholders, residents of any such town, it should be the duty of the county judge of the county where such town was situate, to appoint, &c., not more than three freeholders, residents of said town, commissioners to carry into effect the purposes of said act. The second section declared that it should be lawful for said commissioners to borrow on the faith and credit of such town, provided the consent in writing of two-thirds of the tax-payers, representing two-thirds of the taxable property of said town, appearing on the last assessment roll, should be first obtained, proof of which should be by affidavit of one of said commissioners, filed in the town and county clerk's offices, any sum not exceeding $100,000, &c., and to execute bonds therefor, under their hands and seals. The other sections provided for the sale and disposition of such bonds, the investment of the money, the right of said towns to become stockholders, to dispose of stock, and to raise money to meet the payment of principal, interest, &c., &c.

On the 6th day of May, 1862, the defendant, Nathaniel C. Jenkins, was apponted as commissioner for the town of Duanesburgh, under the acts above cited, and accepted the trust. On the 13th day of the same month, he caused to be filed in the clerks' offices of the town of Duanesburgh, and the county of Schenectady, the affidavits of John D. Wood, Charles Courter, Nathaniel C. Jenkins, Joseph H. Ramsey, Benjamin F. Wood and Ira Marsh, all sworn to on the 5th day of May, 1862; and two further affidavits of Nathaniel C. Jenkins, one sworn to on the 14th, and the other on the 15th of May, 1862, which are claimed to be proof by affidavit of the consent in writing of a majority in number and amount of the resident tax-payers of said town, as per the assessment roll of 1855, being the last assessment roll of said town previous to the passage of the act of 1856; and the said commissioner thereupon subscribed to the stock of said railroad corporation for said town, the sum of $30,000, issued the bonds of said town therefor, and on the 26th day of May, 1862, delivered the same to the treasurer of said corporation.

JAMES, J.—"The power to subscribe for railroad stock, or issue bonds for the purchase of railroad stock, or the payment of subscriptions therefor, is not one of the general powers possessed by towns. Before any such act can be done by the officers of the town, or any commissioner in its name, the power must be conferred by act of the legislature. It has been decided by the highest court of this State, that such power may be granted. (The Bank of Rome *vs.* Village of Rome, 19 N. Y., Rep. 20. Starin *vs.* Town of Genoa, 23 N. Y., Rep. 439, 449.) Such power may be either general or special, and the legislature in granting the power, may impose as many conditions, limitations and restrictions as it shall deem proper." In this case, the power to subscribe for stock, and issue bonds, was special. It was conditional, 1st. That twelve or more freeholders, residents of the town, should apply to the county judge for the appointment of commissioners; 2d. The consent in writing of a majority in number, and amount of the resident tax payers of said town, that such subscription be made and bonds issued, designating the amount.

Without such application and consent no authority to take stock and issue bonds existed; they were pre-requisites or conditions precedent. Being in excess of the ordinary and general powers of towns, no jurisdiction could be acquired without complying with the conditions imposed; in fact, the language of the act is, that it shall be lawful to borrow money, &c., provided the consent be obtained. Persons receiving bonds issued by the towns are presumed to know the law, and bound at their peril to ascertain whether the statute authorizing their creation has been complied with. (23 N. Y. Rep. 439, 449.)

In this case no question is made as to the appointment of the commissioner, and we are therefore bound to assume that it was properly made. But it is claimed that the condition precedent, the requisite to make it lawful for the commissioner to act, viz., the consent of a majority in number and amount of the resident tax-payers, was never obtained, and that such fact affirmatively appears from the affidavits on file.

Jenkins was appointed commissioner May 6, 1861; the affidavits which it is claimed show consent were filed May 15, 1862; the subscription to the railroad stock was made, and the bonds for the same issued, after that; and the affidavits do not claim the consent of a majority of the tax-payers according to the assessment roll of 1861, the last roll preceding the subscription, but only the consent of a majority in number and amount of the tax-payers according to the assessment roll of 1855; while the allegation that a majority of the tax-payers according to the assessment roll of 1861 have never consented, is not denied. The statute is, that it shall be lawful for the commissioner to act, provided the consent in writing of a majority of the tax-payers appearing upon the last assessment roll shall first be obtained. What roll is meant by the term, "last assessment." Does it mean the one next preceding the first passage of the act; or next preceding the subscription for stock and incurring the liability? The defendants insist that this term has reference to the roll preceding the passage of the original act, and so the special term held. If such be the right construction, then it does not seem to be denied that a majority of the tax-payers on that roll had given their consent to this subscription.

As I have before shown, the original act authorizing towns to subscribe to the stock of the defendants, was passed in 1856, conditioned that

two-thirds of the tax-payers appearing upon the last assessment roll should consent; it is to be inferred that efforts were made to obtain the consent of a sufficient number of the tax-payers under that act, and that those efforts failed. The next year, 1857, the act was amended by reducing the consent to a majority of the tax-payers, and further providing that "in case the said consents, in whole or in part, shall have been obtained under the assessment rolls of the years 1855, or 1856, the same may be used and completed with the like effect, and shall be as valid, as if obtained under the last assessment rolls next preceding the said subscription, provided the consent subscribed shall represent a majority in amount of the said last assessment roll.

If the phrase "last assessment roll," in the original act, had reference to the roll next preceding the passage of the act, then the roll of 1855 was meant, because the act was passed on the 31st of March, 1856. If that phrase had reference to the roll next preceding the passage of the original act, it should be held to have the same reference when used in the amended act, which would there mean the roll of 1856, as the amendment was passed in April, 1857. It is true that the act of 1857 declares that "the second section of said act is hereby amended, and shall read as follows," still such amendment, not being made to correct an error in the former act, does not relate back and take effect from the passage of the original act, but only changes the original act from the passage of the amendment. (Ely *vs.* Holton, 15 N. Y. Rep. 595, 598.) And the legislature having by special words provided that the doings under the original act might be made available under the amendment act, having declared that they did not intend the amendment should have effect anterior to its passage.

But in my judgment the term "the last assessment roll," as used in both statutes, refers not to the passage of the acts, but to the time of the subscription for stock by the towns. What is it the legislature declared? That it shall be lawful for the commissioner of the town to borrow, &c., provided the consent in writing of a majority of the tax-payers is obtained. What tax-payers? Those who were tax-payers before the passage of the act, or those who were tax-payers when the subscription was to be made; or as in this case, the tax-payers of 1855 or 1861? It seems to me there can bb no mistaking the meaning of the law or the intent of the body that enacted it. The intent was that the commissioner should have the consent of the tax-payers to be charged before it would be lawful for him to act. In other words, if a majority of the then property owners of the town were willing to have their estates encumbered for such purpose, and said so in writing, the commissioner might incur the debt. Such is the construction put upon the act by the legislature itself, in the last clause of section two, as amended in 1857. It says, "in case the said consents, in whole or in part, shall have been obtained under the assessment rolls of 1855 or 1856," they may be used, &c. If the term "last assessment roll" had reference to the roll preceding the passage of the act, how happened it that consents were being obtained, according to the assessment rolls made after its passage, and why were such consents placed on a par with the consents obtained under the roll of 1855, unless upon the theory that the statute had reference to the assessment roll next preceding the subscription? But further, the amended act says, the consents obtained under the rolls of 1855 and 1856 may be used and completed with like effect and be as valid as if obtained under the last assessment roll next preceding the subscription, provided the amount shall represent a majority in amount of the said last assessment roll; clearly re-organizing the term "the last assessment roll" as meaning that preceding the subscription to the stock, but allowing consents previously obtained on former assessment rolls to be used with like effect as if obtained under the roll previous to the subscription, provided such consents should represent a majority in amount on said last assessment roll, that is, the assessment roll next preceding the subscription. The term "the said last assessment roll," at the close of section two, by all settled rules of construction, had reference to its next antecedents.

If I am right in this view, it follows that the consents required by statute to make it lawful for the commissioner to act, had not been obtained, and that it so appeared on the face of the affidavits filed. Therefore it was not lawful for the commissioner to make said subscription or issue said bonds; and the bonds are void, at least in the hands of the defendants, if not in the hands of every subsequent holder.

It follows from these views, that upon the case as now presented, it was not lawful for the defendant Jenkins, as commissioner of the town of Duanesburgh, to subscribe for the stock of the Albany and Susquehanna Railroad, and to issue his bonds therefor, because it is not shown that the consents of a majority in number and amount of the resident tax-payers to such acts was ever obtained; and because the affidavits on file, under which said commissioner assumed to act, furnish no proof of such consent, but on the contrary show upon their face that the consents were not of the tax-payers required by the statutes.

The order of the special term, dissolving the temporary injunction and denying the application for an injunction until final judgment in the action, should be reversed, and an injunction order restraining the defendents until final judgment in the action, according to the prayer of the complaint, be directed to issue in the usual form and upon the usual conditions.

Order reversed.

☞ H. J. Messenger, Banker, and formerly known as the President of the Marathon Bank in Cortland Co., this State, with large experience, has just commenced business in this city, at 139 Broadway. Besides dealing in National, State and other securities, gold, bonds and stocks generally, he offers to receive accounts from banks, bankers and individuals, and allow 4 per cent. on deposits subject to check at sight. We have no doubt his house will take a high position.

Graham, Second Vice President; G. B. Brodhead, Secretary; J. W. Munro, Assistant Secretary; W. A. Smith, Treasurer; E. A. Shipman, Rollkeeper. Committee on Securities—A. Campbell, W. H. Nelson, J. W. Underhill, C. R. Marvin, R. L. Cutting.

Railroad Earnings--Weekly.

The earnings of the Chicago and Rock Island Railroad for the first week in May, 1864, were $37,672 00
Corresponding week of previous year.. 31,799 00

Increase $5,873 00

The earnings of the Michigan Central Railroad for the 1st week in May, 1864, were ... $58,285 00
Corresponding week of previous year.. 48,799 00

Increase $9,486 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in May, 1864, were $39,971 00
Corresponding week of previous year.. 23,793 00

Increase, 68 per cent $16,178 00

The increase since January, is $186,337—62 per cent.

The earnings of the Chicago and Northwestern Railway for the week ending May, 7th 1864:

Passengers	$14,754 94
Freight	24,207 57
Mail	584 37
Express	384 17
Total	$39,931 05
Same period last year	23,287 31
Increase 71½ per cent	$16,643 74

The earnings of the Galena and Chicago Union Railroad for the week ending May 8, were:

	1863.	1864.
Freight	$19,682 84	$30,522 23
Passengers	8,719 22	12,312 03
Mails, &c	1,300 00	1,300 00
Total	$29,702 06	$44,134 26
Increase 1864		$14,432 20

The earnings of the Marietta and Cincinnati Railroad for the 1st week in May, were:

	1864.	1863.
Passengers	$12,979 83	$4,182 32
Freight	9,206 86	3,615 43
Mail, express & telegraph	1,169 58	750 00
Total	$23,356 27	$8,547 75
Since 1st of January	$321,739 77	$225,374 62

The earnings of the Chicago and Alton Railroad Company for the week ending May 7, were:

	1864.	1863.
Passengers	$13,524 50	$10,583 83
Freight	23,714 41	21,746 54
Sundries	1,474 34	1,658 22
Total	$38,713 25	$33,988 59
Increase 1863		$4,724 66

American Railroad Journal.

Saturday, May 21, 1864.

Stock Exchange and Money Market.

It is natural enough that when the money market of a country is greatly disturbed, when long settled values change their relations, when speculation takes the place of regular business, and gold becomes scarce and inconvertible into currency except at a large difference, that the subject should receive grave and constant consideration, that much alarm at impending consequences should be felt by large classes of the people with fixed incomes, and on the other hand, that those who have in charge the financial system of the Country should feel the deep responsibility which rests upon them.

The last is principally the feeling entertained by the present Secretary of the Treasury, unexpectedly called on to provide ways and means in thousands of millions for suppressing an unnatural and gigantic rebellion, and involving an outlay of money and of life unparalleled in modern times A minister of Finance placed in such a position might well be pardoned for many mistakes; but in this case, whatever of evil has followed or may follow his policy, is light and bearable in comparison with the utter ruin national and pecuniary, which would have followed the want of adequate means, at the moment of the public danger, and in this our great necessity. We had to decide on and accept a total public and private bankruptcy, a dismemberment of the Union, a complete disintegration of the States, the creation of a host of petty and discordant republics, the loss of our present Nationality, commerce and power, with local burdens of the most intolerable character, or to adhere, at all cost of money, to our former institutions. Though each drachma was a drop of blood we really had little choice. And we have accepted the latter alternative, wisely, as events have shown, and will further show, when the curtain shall drop and shut out the traitors who have been busy so long on the stage with their mortal weapons.

No one can doubt the perfect ability of this Country to recover itself from its financial embarrassments. It has been our study to show our readers in the darkest hours of this contest, our inexhaustible resources, our unchecked progress, our ability to sustain taxation, and to prove that our National debt if it shall finally reach two thousand millions of dollars, will even as early as the next census be no more than a charge of about 7 per cent on the real and personal property of the Country.

As it is becoming the settled opinion of the people that this war is near its close, that all but the rebel leaders in the South are weary of it, and that the operations of our armies now conducted by real generals are assuming a decisive character, we turn to the consideration at this time, of subjects having an immediate bearing on the money market, and through it on the other interests involving the want, the employment and the investments of capital.

It is understood that MR. CHASE, seeing the true bearing of the various necessities of the Country, is ready to assume the most conservative and wholesome policy with regard to the currency, and he is believed to have stated within a very few days, that in all his operations he has never lost sight of an early resumption of specie payments; and that if Congress would only pass a good loan bill, an immediate and sufficient tax bill, and the amendment to the National Bank bill, this resumption might, if deemed expedient, take place at once. And we have faith in this assertion; for with these, and the increased revenue from the Customs, he might realise from four to five hundred millions per annum. And the Country could give it easily, for it must not be forgotten that at least seventeen hundred millions of dollars have been paid out to the people by the Government thus far, most of it received in the shape of profit, on manufactured and agricultural products, realized by the producers and factors.

But as Congress continues to debate month after month, on subjects of utter worthlessness compared with these, we must expect further delay, not only in legislation, but in the working of the machinery which is to bring this money into the Treasury. Our expenditures must there-

fore continue for some months to come, to be in advance of the receipts. In what shape, the most convenient, economical, and satisfactory to the people, can the Treasury be supplied? It is understood also on good authority that it will not offer any more advantageous loans to investors than the 10-40's, which at the present price of gold is equal to an 8 per cent stock, and which at 5 per cent on the resumption of specie payments will then be equally satisfactory. It has occurred to Mr. Chase, at sometime, as we have reason to believe, to offer a choice of 10-40's, 5-20's or 1881 bonds with an abatement from the market rate, which would give a slight advantage over subscriptions at par, or purchase in an ordinary market. It might be that such an offer at one quarter, or one-half, or even one per cent. below the true price, (considering the 10-40's at par) if continued open for 30 or 60 days, would bring large subscriptions. It has also been an idea with the Secretary that a legal tender, bearing interest at 6 per cent, compounded every six months, and payable with the whole interest three years from date, or as we think better a 7-30 note with interest payable in lawful money without the character of a lawful tender, might answer the purpose. We are not prepared to discuss these views at this time, but remark that in our judgment the true policy of the Government is not to issue any further securities which can be made use of as ready money. What it wants, is to get back from the people, either in taxes or loans, money enough to meet its daily expenses, lessening and cancelling by the way as much of this currency as possible.

For at present, there are two parties putting out paper—the Treasury and the State Banks; and the latter especially are issuing more than their share, and in case of any serious difficulty more than they could ever redeem. And this is one of the great difficulties in Mr. Chase's way at this moment. The loans made by him, are rapidly absorbed by the banks and by them made a basis of circulation, so that unless by a proper amendment of the National Banking Law, as fast as Mr. Chase would absorb by his loans the redundant currency known as greenbacks, similar amounts would be issued by the banks on these very securities, and the inflation would go on in a currency by no means as satisfactory as that of the Government.

So that unless the State banks are positively checked as to the amount of their issues, we shall never get rid of this inflation except by a general bankruptcy. The Government might pay its interest regularly in gold, and yet its securities might not sell in a crisis for anything near the principal.

So too if the Government should retire its own legal tenders, and pay out the currency of the National or State Banks instead of its own, as long as specie payments were suspended, it would be guilty of the stupendous folly of paying 5 or 6 per cent. for the use of bank currency, not as good, nor as popular, nor as current as its own. And this is precisely what Mr. Chase declined to do at the beginning, and what the banks wanted him to do, and would like him to do now. So that in the opinion of some of our deepest thinkers, if the war is to be carried on and closed with a paper currency, if there is to be an inflation as large as ever under any circumstances, it is better and cheaper for the Treasury, and will be more satisfactory to the people, to issue legal tender currency till the war is over, than pay six per cent. to the banks for the use of their currency which is not legal tender. And there is force in this view of the subject.

That this inflation is understood and encouraged by the local bank interest cannot be doubted. Yet it has been asserted by some of their most capable managers, that they have not contributed to the present inflation, and are not responsible for it The Bank Superintendent, Mr. Van Dyke, attempted to make a case for them, but we imagine he did not succeed. We have before us at this moment a communication from one of our wealthiest bankers, one long at the head of a prosperous institution, a writer on finance whose opinions were always authority, and withal a profound philosophical thinker, who thus disposes of this part of the subject:

"The bank returns of this State made up to the 12th of March last, and which I have just examined, show that these State Banks have increased their indebtedness to the public since June 13, 1863, (9 months,) upwards of eighty millions, and which increase has been invested as follows:

Increase in loans and discounts	$16,751,848
Increase in cash items	56,867,950
Increase in stocks and promissory notes	7,678,437
	$81,298,235

Being increase of lucrative investments within the nine months. It is also susceptible of proof that these banks have increased their debt to the public from June 29, 1861, to June 13, 1863, $145,029,425. Add the above $81,298,235, and we have a total increase of bank debt in the last two years and 9 months of $226,327,660; and this on a capital of $108,499,653. The banks now owe the public $516,727,137, which shows that on the 12th of last March they owed beyond their capital $408,227,484, and $226,327,660 more than usual. Nothing, therefore, can be more fallacious than the attempt of Mr. Van Dyke and others to show that the banks have had no agency in the inflation of money, and 'have pursued the even tenor of their way, unseduced by the opportunity to make money.'"

No one can blame the banks perhaps for trying to make profits; but we should not praise them for a forbearance they have not practised, and thereby assist the general illusion, that if banks refrain from increasing their note circulation, they are exempt from the responsibility of increasing the volume of money. The March statement referred to, shows it is true, that the existing bank circulation of this State is $1,286,612 less than it was in June 13, 1863; yet notwithstanding in the 9 months alluded to, they had increased their lucrative investments upwards of eighty-one millions—a sufficient refutation of the fallacy that banks possess no agency in increasing the volume of money but through the medium of their notes. The capacity for bank notes in any community is not limited by the volition of banks, but by the wants of commerce; and while the greenbacks so called have to a great extent competed with bank notes as a circulating medium, the volume of bank notes has necessarily diminished, despite any efforts made by the banks to keep them afloat, especially as the public greatly prefer them.

We have thus presented the latest opinions of two of the most distinguished financiers of this country, and commend them to the perusal of the readers of the JOURNAL.

The loan market the past week has been abundantly supplied at 6 per cent., with the usual exceptions. There are some parties always operating and always compelled to pay the highest rates.

Sterling bills are 194 for currency, and 109½@ 109¾ for gold.

The sales of the 10-40's continue in a regular way, and the temporary loans with Mr. Cisco are increasing.

The week's exports from this port of domestic produce and miscellaneous goods (exclusive of specie) have been to the value of $3,326,892, against $2,479,642 same week last year, and $2,453,500 the corresponding week of 1862.

The total value of foreign exports from the port of Baltimore for last week was $362,417.

The value of foreign goods imported at the port of Boston for the week ending May 13, was $646,246, against $295,842 for the corresponding week in 1863. The value of exports was $345,141, against $567,060 32 for the same week in 1863.

The news from abroad is not favorable to operators on foreign account. The Bank of England under a pressure for money has raised the rate of interest to 8 per cent. and it may go to 9. The London Conference has done nothing, and the condition of affairs in Italy looks threatening. The recent attack of Spain on Peru will unquestionably excite much anxiety in England. If the shade of Canning could be invoked, it would pronounce its heaviest curses on his own country for allowing the balance of power in the New World which he did so much to establish, to be now disturbed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Central Pacific Railroad of California.

We give elsewhere a copy of an act recently passed by the Legislature of California, to aid the Central Pacific Railroad.

This company has undertaken the great enterprise of constructing a railroad over the Sierra Nevada Mountains—crossing the summit at an elevation of 7,000 feet above the seas. It is a gigantic work, but it can be done. The distance over the mountains is about 150 miles. We learn that the first section of 31 miles is nearly completed, and that the company expect to commence running regular trains in a few weeks. As many Eastern men are interested in the road, any information of its progress will without doubt be of interest to our readers.

Western Maryland Bonds.

The Baltimore City Councils have passed an ordinance authorizing the endorsement by the city of the second mortgage bonds of this company to the amount of $300,000, the proceeds of which are to be devoted to the construction of the road from Union Bridge, in Carroll County, to the border of Washington County, to be issued in pro rata amounts on the completion of each mile of said road from Union Bridge on the route selected towards Hagarstown, provided the city is secured by a mortgage on the property and revenues of said road; said mortgage to take precedence of all incumbrances on the property of said company, except the first mortgage given to the city. And provided also that before the Register shall make the endorsement, the Mayor, Register and Comptroller shall be satisfied that the Commissioners of Washington County have bound themselves to endorse similar bonds to the amount of $300,000, upon conditions which will make them available for the construction of the road, within the limits of said county, and that an additional amount of stock subscriptions are obtained to the amount of $400,000. On the 12th ultimo the Commissioners of Washington County determined to endorse the bonds of the company to the amount of $300,000, for the purpose of constructing the track in that county.

☞ We would call the attention of our readers to the advertisement of Messrs. Robinson & Ogden, late with Fisk and Hatch, who have just commenced business as bankers and brokers, at No. 4 Broad street. These gentlemen bear names long known and honored in this city in its financial, commercial and social circles, and enter upon their business with the hearty good wishes of numerous friends. Trained in the best of schools, and possessing well known talents and influence, they cannot but fulfil the expectations entertained of their entire success. They propose to deal in Government and other securities, and in gold, and to execute all orders entrusted to them for the purchase or sale of these, with promptness and dispatch. We have no doubt their customers will find them in every way a first class house, and we take pleasure in noticing their business card.

Union Pacific Railroad,

At a meeting of the Directors of the Union Pacific Railroad, held at St. Louis, the following named gentlemen were elected Directors: Thomas L. Price, of Jefferson City, Adolphus Meier, Giles F. Filley, and C. S. Greely, of St. Louis in place of John K. Hale of Wyandotte, Kansas, T. B. Edgar, J. B. Alexander, and Robt. J. Wood of St. Louis, resigned. This change has been made with a view to carrying out an arrangement recently made by which the following gentlemen have become associated with J. D. Perry and R. E. Carr of St. Louis, in advancing a sufficient sum to at once complete the first section of 40 miles of the road, in contemplation of much more, looking to no less than the construction of the road to Fort Riley within the present year, viz: Giles F. Filley, John How, Adolphus Meier, Henry Ames, A. F. Shapleigh, S. H. Laflin, S. M. Edgell, C. S. Greeley, Henry Martin, A. C. Anderson, Barton Able, Thos. L. Price, D. R. Garrison, G. R. Taylor, Wm. M. McPherson and William Hubbard. The

members of the Board are now John D. Perry, President; Adolphus Meier, Vice-President; J. P. Devereux, Secretary and Treasurer; C. S. Greeley, Giles F. Filley, Thos. L. Price, J. C. Kennedy, A. C. Anderson, Saml. A. Stinson.

☞ At an election of the New York and Harlem Railroad Company on the 17th inst., the following gentlemen were elected Directors for the ensuing year: Cornelius Vanderbilt, William C. Wetmore, Horace F. Clark, John Harper, Abram B. Baylis, Albert D. Akin, Augustus Schell, Jas. H. Banker, John Steward, John M. Tobin, John B. Dutcher, William H. Vanderbilt and Oliver Charlick. And, at a meeting of Directors on the 18th inst., Cornelius Vanderbilt was elected President, and William H. Vanderbilt Vice-President.

☞ Last year over four hundred thousand tons of coal were raised from the different mines in Cape Breton and Nova Scotia, giving a value of £200,000 at the pit's mouth.

Long Island Railroad.

The following is a comparative statement of the receipts and expenditures of the Long Island Railroad during the years ending on the 31st of March in 1863 and 1864:

	1863.	1864.
Passengers	$186,852	$260,376
Freights	108,136	143,845
Mails	8,255	8,219
Total	$303,213	$412,440
Expenses	164,875	142,931
Net earnings	$138,338	$269,509

Railroad Earnings--Monthly.

The earnings of the Hudson River Railroad for the month of April, 1864, were..... $278,540 41
Corresponding month of previous year 270,675 92

Increase..... $7,864 49

The earnings of the Galena and Chicago Union Railroad Company for the month of April, 1864, were..... $196,871 68
Corresponding month of previous year 136,601 18

Increase..... $60,270 50

The earnings of the Cleveland and Pittsburg Railroad for the month of April, 1864, were:

Freight	$112,000 00
Passengers	73,000 00
Miscellaneous	8,919 16
	$193,919 16
April, 1863	140,952 46
Increase	$52,966 70

The traffic of the Cincinnati and Chicago Air-Line Railroad for the month of April:

	1864.	1863.	1862.
Passengers	$26,232 45	$15,458 14	$8,217 89
Freight	28,710 68	22,461 93	9,712 78
Miscellaneous	4,662 50	2,720 76	1,536 08
Total	$59,005 63	$40,640 83	$19,446 75
Increase over 1863	45 20.100 per cent.		
Increase over 1862	203 per cent.		

The traffic receipts of the European and North American Railroad for April, 1863 and 1864, were:

	1864.	1863.
Passengers	$3,897 32	$3,952 95
Freight	5,445 36	5,826 78
Mails and Sundries	462 80	625 37
	$9,805 48	$10,405 10
Decrease		$599 62

The earnings of the Chicago and Rock Island Railroad Company for the month of April, 1864, were..... $175,838 00
Corresponding month of previous year 122,255 00

Increase..... $53,583 00

The earnings of the Cleveland and Toledo Railroad for the month of April, 1864, were.. $156,027
Corresponding month of previous year .. 117,908

Increase..... $38,119

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of April, 1864, were:

	1863.	1864.
From passengers	$22,092 48	$36,073 80
" freight	18,671 99	31,224 81
" miscellaneous	2,293 69	2,062 21
Total	$43,058 16	$69,360 83
Increase 1864		$26,802 66

The earnings of the Chicago and Northwestern Railroad for the month of April 1864, were:

Passengers	$66,755 61
Freight	104,019 82
Miscellaneous	3,749 16
Total	$174,589 59
Same period last year	103,449 68
Increase	$71,139 91

The following is a comparative statement of the earnings of the Dubuque and Sioux City Railroad Company for the month ending April, 30:

	1863.	1864.
Passengers	$5,467 66	$9,393 24
Freight	10,330 03	22,435 21
Total	$15,797 69	$31,828 45
Increase		$16,030 76

The earnings of the Chicago and Milwaukee Railroad Company for the month of April, 1864, were:

	1864.	1863.
Passengers	$35,787 86	$21,825 67
Freight	14,202 79	10,303 53
Miscellaneous	1,904 66	1,628 74
Gross earnings	$51,894 81	$33,757 94
Increase		$18,136 87

Comparative earnings from Jan. 1 to April 30, 1863 and 1864:

	Gross Earnings.
1864	$181,908 83
1863	132,387 73
Increase	$49,521 10

The earnings of the Erie Railway for the month of April, 1864, were..... $1,079,507 75
Corresponding month of previous year 948,058 72

Increase..... $131,449 03

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of April, compared with the same period last year, were as follows, viz:

	1864.	1863.
Freight	$375,284 50	$299,556 46
Passengers	177,716 21	144,418 53
Express matter	5,200 00	2,600 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	1,570 98	1,504 24
Total	$574,680 02	$462,986 56
Increase		$111,693 46
En'gs fr. Jan. 1 to April 30	$1,925,171 81	$1,628,899 52
Increase for four months		$296,272 29

Increase for April, 24 3-10 per cent.; average increase to April 30, 18 per cent.

The business of the Illinois Central Railroad for the month of April, 1864:

LAND DEPARTMENT.

Acres construction lands sold	20,158.50 for	$200,611 80
Acres Interest Fund Land sold	801.03 "	10,324 80
Acres Free Lands sold	8,727.70 "	64,644 42
Total sales during month of April, 1864:	29,687 28 for	$275,581 02
To which add town lot sales		6,082 75
Total of all		$281,663 77
Acres sold since Jan. 1, 1864	110,173.39 for	$1,152,818.68
Cash collected in April		$142,636 47

TRAFFIC DEPARTMENT.

Receipts from passengers	$176,921 01
" freight	228,177 50
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of April, 1864	$421,456 84
Total receipts in month of April, 1863	289,223 52
Increase	$32,233 32

The earnings of the Michigan Central Railroad for the month of April, 1864, were ... $338,275 00
Corresponding month of previous year 238,495 00

Increase..... $99,780 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of April, 1864, were..... $327,206 00
Corresponding month of previous year 267,793 00

Increase..... $59,413 00

The traffic returns of the Atlantic and Great Western Railway for the months of January, February March and April, 1864, were respectively as follows:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February	50,189	178,852	229,041
March	60,518	166,215	226,733
April	63,992	133,275	197,267
Total	$213,314	$647,025	$860,339

The following table shows the earnings of the Milwaukee and St. Paul Railway Company for the months of January, February, March, April, 1863 and 1864:

	1863.	1864.
January	$94,810	$99,133
February	85,131	92,264
March	72,465	129,423
April	126,505	153,133
Total, 4 months	$378,911	$473,953

The earnings of the Norwich and Worcester Railroad were:

1863-'4.		1862-'3.	
Dec.	$44,531 93	Dec.	$29,475 53
Jan	33,778 92	Jan	27,793 24
Feb	39,603 85	Feb.	23,882 68
March.	48,820 80	March.	28,784 01
April	59,101 81	April	31,647 85
Total	$230,837 31	Total	$141,583 31
	141,583 31		
Gain	$89,254 00		

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of April, 1864, were..... $140,417 00
Corresponding month of previous year 88,176 00

Increase..... $52,241 00

The traffic receipts of the New Brunswick and Canada Railway for the month of April, 1863 and '64 were:

	1864.	1863.
Passengers	$976 52	$688 73
Freight	5,224 36	4,126 12
Totals	$6,200 88	4,814 85
Increase in 1864		$1,386 03

☞ The English official return of the imports and exports of bullion and specie for the week ending April 27 shows that there were imported into the United Kingdom gold valued at £59,879, and silver, £24,336; together, £84,215. There were exported gold valued at £404,549, and silver valued at £87,054; together, £491,603. The exports, therefore, exceed the imports by £407,388.

According to the British Board of Trade returns for March, the value of British produce exported during the month was £13,550,000, against £10,217,000 in 1863, and £9,664,000 in March, 1862. For the first three months of the present year the increase is above £10,000,000 in excess of the same period in 1862, the totals for the respective years being £26,400,000 £27,500,000, and in 1864 £36,600,000.

Indianapolis and Madison Railroad.

(Continued from Page 493.)

At the session of 1853–'54, application was made to the legislature for a modification of the terms of purchase of the State's interest in the road under the act of 1852, and the result was the passage of an act appointing commissioners with full powers to arrange the terms of a compromise for the debt, and to release and convey such interest to the company. These commissioners met on the 10th of April, 1854, and on full examination of all matters connected with the road, made their award providing for the release of all claims of the State against the company on account of such interest, and a conveyance of said interest to the company for the sum of $75,000 of the 5 per cent. stocks of the State, deliverable within one year thereafter. These terms were accepted by the company, and thereby it became sole owner of the whole line.

The company had already felt the effect of powerful competition from other lines running in the same direction. Until lately it had been the sole railroad line extending from Indianapolis to the Ohio River. It had now to compete for traffic with the Jeffersonville Railroad, and also with the Lawrenceburg and Upper Mississippi Railroad; and the consequences had become apparent in diminished receipts and augmented expenditures. No dividend could be paid to the stockholders, and the dividend scrip issued in January 1854, had become an additional burden on the finances of the company. On this subject the report for 1854–'55, says: "It is not pretended that with the powerful competition of parallel roads on either side, and with so large a stock account, the road can ever regain its position as a first class paying investment, but with prudent management it is believed that it may be so far recuperated as to make its stock of fair standing among Western roads. It already does a heavy local business which must for the future increase rather than diminish."

On the 1st of December, 1855, a new arrangement previously agreed upon with the Jeffersonville Company was carried into effect. Under this the Jeffersonville Company acquired the right to use the Madison road between Edinburg and Indianapolis, and transport passengers and freight over it, to be drawn by its own machinery. For this privilege the Madison Company was to be paid 60 per cent. of the gross earnings, provided the total receipts should not exceed $65,000; 55 per cent. if not exceeding $75,000, or 50 per cent. if exceeding the latter sum. In the same year the city of Madison resigned to the company all its interest on the Columbus and Shelbyville Railroad for $24,000.

From this period the income of the company appears to have gradually declined, while its liabilities became more and more oppressive. To pay interest and keep the road in good order and properly equipped, was the extent of its abilities; and at length the receipts of the road became altogether unsufficient for its proper maintenance and the support of its credit.

Under these circumstances and considering the company as utterly bankrupt, some arrangement with its creditors now became necessary. As a preliminary the president of the company issued a circular dated March 11, 1861, address "To the bond and shareholders of the Madison and Indianapolis Railroad Company," detailing in brief the situation of the company, suggesting a plan whereby a foreclosure and sale of the road, and the organization of a new company, not only would the holders of the first mortgage bonds be fully protected and secured, but something might be saved to the junior creditors and shareholders, and calling a meeting to be held at the office of Winslow, Lanier and Company, in New York, on the 10th of April following.

In pursuance of this call the parties interested assembled at the place designated, and after discussion appointed a committee to whom was referred the matters relating to the interests of the road—the committee to report to an adjourned meeting to be held at the Astor House on a subsequent day.

At the adjourned meeting the recommendations of the President were substantially adopted, and a committee was appointed to draw up an agreement and secure the co-operation of the holders of the first mortgage bonds, the junior creditors and the shareholders of the company, and act as agents or attorneys in fact, for the purchase of the road when sold and in the organization of a new company under the laws of the State of Indiana, etc.

Messrs. John Ferguson, Elihu Day, and George Griswold Jr., acting as the committee, secured the acquiescence of the holders of more than nine-tenths of the first mortgage bondholders, and that of a sufficient number of the holders of junior claims and of the shareholders; and then as agents or attorneys in fact of those who signed the agreement, called upon Peter McMartin, Esq., upon whom the trust in the mortgage deed had devolved to foreclose the same and proceed to a sale of the road. Under advice of council in Indiana the Trustee proceeded and obtained a decree of foreclosure and sale of the road, its property, franchises and appurtenances in the Circuit Court of the United States for the District of Indiana.

The road was offered for sale on the 27th of March, 1862, and purchased by the agents or attorneys in fact as aforesaid, for account of the parties to the agreement, and of such others as might thereafter be admitted to a participation of its benefits. A conveyance of the same having been made to the purchasers they were put in possession of the whole property covered by the mortgage and so sold, and having previous to the sale of the road also received a transfer by assignment, as agreed upon, of certain assets belonging to the company not covered by the mortgage as a further security to the holders of the first mortgage bonds, the committee did on the 28th of March, the day following the sale and delivery of the property organize a new company the style and title of the

INDIANAPOLIS AND MADISON RAILROAD

company; and conveyed to it all the property, rights and franchises purchased by them as aforesaid, and appointed the first Board of Directors to serve for one year or until the 1st of April, 1862.

Under the reorganization the capital account of the company is composed of the following classes:

Capital stock preferred 8,500 shares	$425,000
" common 8,500 "	425,000
Total share capital 17,000 shares	$850,000
1st mortgage bonds	685,000
Total capital	$1,535,000

being the cost of the road and property to the present company.

The first mortgage bonds in the above schedule represent the first mortgage bonds of the old company with the arrears of interest thereon. These bonds carry interest at 7 per cent., made payable 1st of May and 1st of November; the principal payable 1st of May, 1881. A sinking fund is provided for their redemption.

The preferred stock covers the old income or 2d mortgage bonds and dividend scrip, which were received at one-half their nominal value, principal and interest.

The common stock represents the old stock at one-fourth its original or nominal value.

The first report of the reorganized company brings affairs down to the 31st of March, 1862, and exhibits the fact that in the previous year the net earnings had sufficed for all necessary operations, the payment of interest on the bonded debt, and of dividends on both classes of share capital —on preferred 8 per cent., and on common 6 per cent.

The following exhibits the details of the income account for the year ending 31st of March, 1863:

Passengers	$72,006 42	
Less Government tax	1,756 63	
		$70,249 79
Freight		109,191 38
Express and mails		7,550 00
Military passengers and freight		17,962 83
Miscellaneous		5,387 51
Jeffersonville Railroad		66,314 27
Transportation receipts		$276,655 78
Rent	$253 33	
Old iron sold	3,526 80	
Telegraph wires, etc	624 15	
		4,404 28
Col. and Shelby transp	$12,617 86	
Less expenditures	8,741 18	
		3,876 68
Steamboat and railroad freight and ticket balances		1,037 21
Receipts on all accounts		$285,973 95

Transportation expenses		$157,205 95
Taxes		2,928 22
Operating expenses		$160,129 17
Commissions, etc	$1,606 35	
Interest, premiums, etc.	33 85	
		1,640 20
Tax on interest due Nov. 1, 1862	$711 90	
Coupons due Nov. 1, 1862, less per cent. tax	21,252 77	
	$21,964 67	
Less interest received	2,711 25	
		19,253 42
Uncollected accounts		21,013 27
Special deposits		83,937 89
Total disbursements		$285,973 95

The ledger balances stood thus on the 31st of March, 1863:

Capital stock common	$406,450 00	
" " scrip	5,562 50	
		$412,012 50
" preferred	$353,900 00	
" " scrip	6,899 25	
		360,799 25
Mortgage bonds (less $3,000 cancelled and $21,000 redeemed by sinking fund)		661,000 00
Sundries		4,913 89
Profit and loss		100,037 27
		$1,538,762 91
Cost of road		$1,433,811 76
Sundries (coupons, sinking fund, dividends, etc		104,951 15
		$1,538,762 91

The following is a statement of the earnings, expenditures and dividends since the opening of the line to Indianapolis:

Fiscal Year.	Gross. earnings.	Operating and repairs.	Net profits.	Dividends.
1845	$60,053	$47,415	$12,638	10
1846	101,014	52,202	48,812	10
1847	156,653	91,669	64,948	10
1848	212,126	123,406	88,720	10

Brockville and Ottawa Railroad.

They are going on briskly with the Brockville and Ottawa Railway on both sides of Arnprior. Already a number of workmen are employed at cutting and blasting a portion of rock on the line of road. R. Shanly, Esq., Chief Engineer, has arrived at Arnprior, and taken up his residence there for some time. Timber for the bridge at that place has been contracted for, and very great activity prevails. It is the determination of the new company, as alleged by themselves, to push on the road to Pembroke. A proposition will be made, at the spring meeting of the board of directors, to raise an additional supply of funds to complete the line of road to the county town. Of course they do not intend to go further this year than Arnprior, but their design is to push on the road gradually to the utmost limits.—*Montreal Gazette, April* 20.

* 5 per cent. cash, and 8 per cent. scrip.
† On preferred stock.

SHEAFER'S NEW MAP

OF ALL THE

Anthracite Coal Fields

OF PENNSYLVANIA,

IS READY FOR DELIVERY.

It represents the Coal Fields of

Schuylkill, Luzerne, Carbon, Northumberland, Columbia, Dauphin, and Lebanon Counties,

Embracing all the Anthracite Coal Basins of the State; showing all the Railroad lines and their various ramifications, the position of each colliery, the canals, the topography, &c., &c.

Its new and striking features are the

Wyoming and Lackawana Coal Fields,

And the MAHANOY AND SHAMOKIN COAL DISTRICTS—each in detail, each one of which is worth the price of the Map. This is decidedly, the cheapest, most compact, and the most perfect Map ever issued of the Coal Regions. The above map will be furnished for $1 25 in sheets; in covers, $1 50; on rollers, $2 75; Framed, $2 75.

Also, Sheafer's New and Official

Coal, Iron, Railroad and Canal Map

OF PENNSYLVANIA.

Published by order of the Legislature of Pennsylvania showing the entire area of the State, its ANTHRACITE AND BITUMINOUS COAL FIELDS; its CANALS and RAILROADS; the location of each FURNACE, ROLLING MILL, FORGE, &c., in Pennsylvania; all their avenues and distances to market by the various routes.

No one but so patient and persistent a statician as Mr. S., with his intimate knowledge of the mineral resources of his native State since his connection with the State Geological Survey of Pennsylvania in 1837, could compile in so small a compass, so much valuable and reliable information as we have in the above two maps.

Price of State Map—in sheets, $1 25; in covers, $1 50; on rollers, $2 75. Both Maps in sheets, $2 25; in covers, $2 75; Framed, $2 75.

One copy of the Miner's Journal one year, and both Maps, in sheets, $4 25; in covers, $4 75.

One copy of the Miner's Journal and one copy of either Map, in sheets, $3 25; in covers, $3 50.

These Maps, on sheets and in covers, will be sent by mail to any address, post-paid, on receipt of prices named. Those on rollers can be sent by express.

Nicaragua Railroad.

The following is a copy of the contract entered into by Commander Pim, R. N., and the Government of Nicaragua, for the construction of a Railroad across that Isthmus:

The undersigned Licentiate, Don Antonio Silva, Finance Minister of the Supreme Government of Nicaragua, especially commissioned, and Bedford Clapperton Trevelyan Pim, Commander in the English Navy, for himself and for the Company that will be formed, have agreed on the following contract:

ARTICLE 1. The Republic of Nicaragua concedes to Commander Bedford Pim, of the Royal Navy, and to the Company he proposes to form, the heirs, successors, administrators or assignees of the same, the right of establishing a Transit from the Atlantic to the Pacific Ocean, by means of a Railroad from Monkey Point on the Atlantic, to Corinto on the Gulf of Fonseca, on the Pacific, passing along the northern side of the Lake of Nicaragua, crossing the Tipitapa or Panalaya, and continuing along the southern side of Lake Managua in its entire length to Leon and either entrance indicated above, also the right of preference for any branches proposed by foreigners, or that he or the Company may deem proper to undertake.

ART. 2. It concedes also the unoccupied lands which may be requisite for the route, its necessary and accessory works, as road, wet and dry docks, wharfs, landings, places, stations, warehouses, coal depots, hotels, buildings, electric telegraphs, convenient or half an English mile on each side of the railroad, and in the case of lands belonging to towns or private persons, the right of appropriation in accordance with the laws of the Republic, on payment of the just value of said lands as well as damages as decided by experts; such value being the actual price, without reference to that which it might subsequently attain from the passage of a railroad.

ART. 3. It concedes all the right of using for the railroad or for any accessory works the national products or materials which the unoccupied lands may contain, without any indemnification, and also any national products or materials contained in lands of private persons, upon payment for the appropriation according to law; provided that previous to the occupation of lands or taking possession of the materials, notice is given to the owner and the Prefect of the Department.

ART. 4. The foregoing concession will continue for fifty years, counting from the conclusion of the works; provided the works commence within two years of the final ratification of this contract and are concluded within the seven following years, and in case the works are not commenced or not concluded within the time stipulated, this charter shall be absolutely forfeited.

ART. 5. The Railway enterprise shall enjoy exemption from any import duty on all the material and machinery which they may introduce for their works, and also the persons engaged on the works shall not be interfered with, except only in case of offence against law and police, or foreign war, or of military services of military men in time of peace, without exception, but the establishment of the railroad shall not be an asylum for persons prosecuted by the legitimate authority, neither can any foreign flag be used in such establishment, unless by persons representing foreign governments.

ART. 6. In the event of an inter-oceanic canal being constructed, the works thereof shall not be embarrassed by the Railroad Company; but it is expressly understood that the right of Commander Bedford C. T. Pim and Company, the heirs, successors, administrators or assignees of the same is exclusive only for a Railroad from the Western extreme of Lake Managua and the Port of Tamarinda, which is exclusive to the westward, and that each exchange is not to be understood as against Nicaragua or Central American enterprise.

ART. 7. The persons, goods or mails in Transit from ocean to ocean by the Bedford Pim Railroad, shall be exempt from any trouble or import, and the ships which may arrive at the extreme ports shall also be free from any anchorage or tonnage dues, but the Republic reserves to itself the right to make what regulations it considers necessary in regard to persons who may come to reside in the territory of the Republic for however short a time, and to impose the usual import dues upon whatever articles are intended for interior consumption, and the Railroad shall not knowingly permit such regulations to be eluded or infringed but on the contrary, loyally assist the Government in their fulfilment.

ART. 8. The questions that may arise between the Company and any inhabitant of the Republic, shall be subject to Nicaraguan laws and tribunals, and those which may arise between the Government and the Company shall be settled within the Republic, and according to its laws, by the arbitration of two important persons, whether natives or foreigners, appointed by each party, and in addition of a third chosen by the aforesaid in the event of their disagreement, and in case the two arbitrators cannot agree in the nomination, the ballot shall decide amongst four of whom two shall be nominated by each arbitrator.

ART. 9. The Republic shall receive two per cent. on the gross produce of the undertaking, which sum shall be verified by the books of the Company and paid annually.

ART. 10. The Railroad Company shall have entire liberty of action, and of regulation in the operations of the Transit, so that they shall only be responsible for any damage which it may cause, whether it be to persons or property by any default without any indemnification.

ART. 11. The usual roads on the lands through which the railroad is to pass, are not to be occupied or cut, without being consistently established.

ART. 12. The treaties celebrated with other nations in respect to transit of passengers, goods and mails, as also their protection and the tariffs, being the law of Nicaragua, the Company shall submit to their stipulations.

ART. 13. The Company shall always recognize the sovereignty of the Republic over the territory of the concession from ocean to ocean, without interfering in any way with any other authority.

ART. 14. At the expiration of this contract for any proved default on the part of the Company, in regard to stipulations in favor of the Republic, the railroad and all the accessory works, real and moveable, belonging to the Transit, and which shall exist in the Republic, shall pass into the possession of the Government.

ART. 15. It is especially stipulated that Commander Bedford C. T. Pim and Company, the heirs, successors, administrators or assignees of the same, shall never alienate the present contract or the works made under it to any foreign government, company, or individual, without the consent of the government of Nicaragua.

ART. 16. All persons employed in the Company must maintain the strictest neutrality in anything

relating to the political affairs of Nicaragua, upon pain of immediate dismissal, when the Government gives notice to the Company of their failing to observe this regulation.

ART. 17. The contract shall be of no effect without the acceptance of Congress and without the consultation of the Executive with the Governments of Guatamala and Costa Rica, for which purpose sixty days are given as time for granting the privilege.

Given in the Hall of the Chambers of Deputies, 16th March, 1864.

In witness whereof, we have signed the same in duplicate with our own hands in Nicaragua, on the fifth day of March, A. D. 1864.

ANTONIO SILVA,

BEDFORD C. T. PIM.

C. Bedford C. T. Pim, Commander in the English Navy, in my own name and that of the Company I am about to form, hereby accept, confirm, and ratify the railroad contract which I have signed this day with the Commissioner of the Supreme Government of Nicaragua, Licentiate Antonio Silva, Minister of Finance.

In witness whereof, I sign the same with my own hand in Nicaragua, the fifth day of March, A. D. 1864.

BEDFORD C. T. PIM.

Dubuque and Sioux City Railroad

The Dubuque and Sioux City Railroad Company are successors of the—

DUBUQUE AND PACIFIC RAILROAD

Company, a corporation organized under the code of the State of Iowa, (Title 10, chap. 43,) and invested with ample powers to construct and maintain a "railroad from some point in the City of Dubuque, thence westerly, on the best route towards the Pacific Ocean."

The company was duly organized on the 28th of April, 1853, to continue for fifty years with the right of renewal, and fixed its share capital at $15,000,000, divided into 150,000 $100 shares; and by the eleventh section of the articles of incorporation the directors are authorized to issue bonds or other evidences of debt bearing such rate of interest not to exceed ten per centum as they may deem proper, and to sell the same for such price as they may deem advisable. The same article also authorizes the board to endorse any bonds or other obligations issued for the purpose of assisting in the construction of the road, or any of its branches by any county or town, or by any companies or individuals in the State of Iowa, or any other State. The indebtedness and liability of the company, however, was limited to the sum of ten millions of dollars, unless the company should be specially authorized by law to create a liability exceeding that sum, in which case the liability should not exceed the sum prescribed by such law.

On the 15th of May, 1856, an act was passed by the Congress of the United States "making a grant of lands to the State of Iowa to aid in the construction of certain railroads in said State; and on the 14th of July following, the State having accepted the grant, transferred so much thereof as was appropriated to aid in the construction of a railroad to Dubuque on the Mississippi, to Sioux City on the Missouri River, to the Dubuque and Pacific Railroad Company. This act was duly assented to and accepted by said railroad company in accordance with the terms thereof.

In January, 1857, the legislature of the State passed a further act, authorizing the issue of construction bonds.

The practical effect of the above legislation and proceedings was that the Dubuque and Pacific Railroad Company became endowed with a grant of land of 3,840 acres for each mile of road, or as the road when completed, and including Tete des Morts Branch would be 330 miles long, with a total grant of 1,267,200 acres in alternate sections and located on the line of the projected railroad.

The act of January, 1857, authorized the company to issue any amount of construction bonds necessary to secure the completion and equipment of the road, and to sell the same at any price, the company being forbidden by the law to plead usury against the purchaser.

It may here be observed that the title to the lands granted to the company accrues as expressed in the Act of Congress, granting the same to the State, as each twenty miles of railroad are completed and brought into use.

Under the State law of January, 1857, the company provided for an issue of 7 per cent. construction bonds to the amount of $12,000,000, (principal payable, April 1887, and interest semi-annually April and October in the City of New York,) and secured the same by a mortgage on the railroad, the franchises of the company and the lands donated by Congress. The company also reserved the right to issue $3,000,000 additional should the original issue be found insufficient for the completion and equipment of the road.

In drawing up the mortgage great care was taken to secure—1st, the faithful application of the proceeds of the bonds to the construction of the road; and—2d, the faithful application of the proceeds of the lands to the redemption of the bonds. For this purpose it was provided that the Trustees should hold the bonds when executed, negotiate and sell the same and pay over to the company for work actually done on the road and other necessary expenses under contract, approved by the Trustees and certified to by the Engineer of the Trustees. The lands were conveyed to the Trustees to be under their sole management to be disposed of to the best advantage, and the proceeds thereof to be used solely in redeeming the bonds and paying the interest thereon. The payment of interest was further assured by the payment of $1,000,000 of stock capital, and by the issue of $14,000,000 of optional rights to stock which when exercised would be assessable for interest, after the road is opened for business and by the further pledge of the net income of the road itself. The security thus afforded for the payment of interest, and the ultimate redemption of the bonds was ample and complete. The land grant of the Illinois Central Railroad Company was precisely for the same number of acres per mile, and it was known at this time that the sales by the company had reached nearly 1,000,000 acres, and that the price had been yearly increasing, but had averaged from 1854 to the present time $10 an acre. It was not therefore unreasonable to anticipate that the Dubuque and Pacific Railroad Company would be equally successful with its land grant. The road had, moreover, the advantage of traversing a region of great fertility and one to which population was rapidly accruing. It would also become a part of one of the great thoroughfares of transit across the continent.

The line of route from Dubuque to Sioux City is 319½ miles in length, or only seventeen miles longer than an air line; the maximum grade is 45 feet to the mile; the curves of course are favorable, and there are 65 miles on which no curves are found. Such an easy line, indeed, is probably unequalled in the world.

The first construction contract was let to R. B. Mason & Co., on the 1st of September, 1855, and covered the first thirty miles from Dubuque westward. Including buildings, equipment, etc., the company agreed to pay the contractors $36,666 per mile.

This division of the road was very expensive and of difficult construction; but it was thought best to submit to a large original outlay for the purpose of securing low grades, and thus economize the future workings of the road. It was opened to Dyersville the western terminus of the section on the 11th of May, 1857, and immediately received a fair share of business.

The contractors received in payment for this division of the road $550,000 in construction bonds, and $200,000 in bonds of the City of Dubuque—the balance by the terms of the contract was payable in cash, but the contractors received a portion in bonds at 85 cents.

On the 9th of October, 1856, the Division from Dyersville to Cedar Falls, 70 miles, was let to Mason, Bishop & Co., for $23,500 a mile; and to the same parties on the 18th of March, 1857, the division from Cedar Falls to Fort Dodge 92½ miles for $23,000 per mile, without equipment, but including all buildings, shops, etc., for a first class railroad.

The report of the company for the year ending 31st of December, 1857, furnishes the following information respecting the condition of the property at that date. From Dyersville to Manchester the road was nearly graded; from Manchester to Independence it was one-third graded, and from Independence to Cedar Falls it was partially but less than one-third done. From Dyersville to Nottingham 8 miles the road had been completed and opened for business on the 22d of December 1857, and to date about 40 miles from Dubuque was completed and ready for business. The company had on hand iron enough to lay the track nearly to Manchester, seven miles further west, and it only required about $250,000 to enable the company to continue the track to Independence next fall. This length of road completed, and it was supposed that the earnings the first year would be at least $5,000 a mile. The total earnings on the first 80 miles of the road from the 11th of May to the 31st of December, 1857, had been $28,707, or $957 per mile. As yet it was quite too short to make large earnings. In the meantime the increased value of lands in the counties through which the road passed was very great having been for the counties of Dubuque, Delaware, Buchanan, Black Hawk, Grundy, Butler, Hardin, Hamilton and Webster—in 1856, $28,997,563, and in 1857, $29,298,014.

After the land grant was made to this company many influential parties who had much experience in railroad matters, were desirous of becoming interested in this work. Each had a plan which if adhered to would secure all the money necessary to build the road in five years at the outside. At that time the stock of the Illinois Central Railroad Company was selling at 135 to 140. The

signal success of that enterprise was admitted by all and no other company enjoyed the unlimited confidence of money lenders of America and Europe to the same extent.

Thomas E. Walker, and Abram S. Hewitt two of the directors of that road were willing to act as trustees in negotiating bonds in England. A financial plan was proposed, modelled after that of the Illinois Company.

The company under these auspices executed a mortgage and deed of trust upon the road and land grant to the two gentlemen already named, and F. Schuchardt and Curtis B. Raymond, to secure $12,000,000 of construction bonds with the privilege of using $3,000,000 more. These bonds have been already described.

The trustees were satisfied that the negotiation would be successful, and that one-half the amount would be taken in London as soon as the bonds could be sent over.

The plan did not admit of a stock subscription of more than $1,000,000. At an early stage of the existence of the company two series of mortgage bonds had been issued at 8 per cent.—a first amounting to $450,000, and a second to $200,000. These were converted by the holders into stock, with the proviso that each share of full paid stock should entitle the holder to subscribe for seven shares more when the road was completed to Sioux City. This plan was regarded with so much favor that applications to take stock and pay for it at par in cash were made almost daily from all parts of the country. Applications for bonds were not so numerous, but sufficient could have been sold at Dubuque to meet all the wants of the company.

The policy adopted by the Company in regard to its bonds, was to favor the foreign buyer. It was declared that the English market should have all, or that the negotiations would have to be abandoned. Counter influences, however, were at work, and we soon learn that some jealous parties had been representing that the lands were not good, that the country indeed was little more than a desert plain, and a labyrinth of barren knobs, etc. These reports and presentations led to an examination of the country, by a gentleman deputed for the purpose by English capitalists, which of course occasioned considerable delay. Thus refusing money at home and awaiting that from foreign lands the company found themselves in perplexity, and the work had to be partially suspended. This was done by discontinuing operations beyond Manchester, a small force being retained on the 17 miles from Dyersville to that point.

The examination of the lands lasted until late in the season. In the meantime the negotiation of $6,000,000 for the time being was regarded as a little too large, and it was cut down to $2,000,000. Then came rumors of the Anglo-Indian war, and $500,000 was made the possible limit; and soon after this the great panic and financial crisis of 1857 banished every hope of receiving a single cent from England. At this time the company owned (including means to complete the road to Manchester) a floating debt of $750,000. The report of the examiner however was very satisfactory, but the stingency of the money market was now such that almost every one was down upon all railroad enterprises, and a man suspected of having any sympathy for or relations with them, was marked and regarded as unworthy of credit. The debts which had been incurred on the strength of the ship load of six millions from England, while the bonds were too good for the American market, were left to be paid by the company the best way they could.

Thus thrown back on their own resources the Company came to the conclusion that the only possible method of extrication from their difficulties, was to resort to the original plan of raising means by county and private subscriptions in Iowa; and considering the hardness of the towns it is creditable to the company that the work was not entirely abandoned.

The financial condition of the Company on the 1st January 1858, was as follows:

Capital stock		$838,086 50
1st mort. 20 yrs. 8 p. c. bonds	$450,000	
Deduct retired..	445,500	
		4,500 00
2d mort. 15 yrs. 8 p. c. bonds	$200,000	
Deduct retired..	182,500	
		17,500 00
Construction bonds $943,000, or nett		753,600 00
Bills payable		438,430 98
Individual accounts		3,355 94
Gross earnings (11 May, to 31 Dec.)		51,670 82
		$2,107,144 20
Company expenses from organizat'n.		$14,516 35
Engineering		33,248 83
Salaries		29,146 32
Transportation account		29,231 58
Construction 1st Div..	$1,208,675 60	
" 2d " ..	185,531 54	
" Tete des Morts Br.	25,769 73	
		1,419,976 87
Iron account 2d Division		65,054 00
Equipment		166,822 53
Dubuque depot grounds		20,109 99
Land damages		237,009 96
Bills receivable		15,729 74
Interest account		25,420 72
Individuals accounts		16,052 50
New York office		6,908 43
Cash on hand		9,770 92
		$2,107,144 20

The revenues of the company applicable for the payment of the floating debt and the further construction of the road at this time were:

Unpaid assessments on stock		$61,492 50
Black Hawk County bonds $200,000 valued at		160,000 00
Webster County bonds $200,000 valued at		160,000 00
Land and building lots		1,136,050 00
Bills receivable		15,829 74
Accounts receivable	$16,052 50	
Accounts payable	12,696 56	
		3,355 94
		$1,536,728 18

The Road machinery and tools in shops Jan. 1st 1858, were as follows: 8 locomotives and tenders, 6 passenger and 2 baggage cars, 42 platform and 35 house freight cars, 5 hand cars and 4 trucks which including machinery and tools in work shops and stationary engine were valued at $174,229 41.

The gross earnings of the road since opening had been $51,670 82, and the operating expenses $29,231 58 leaving profits $22,439 24 or 44 per cent of gross income.

A glance at the map of Iowa will show a line of road finished and unfinished extending in a nearly direct line from Dubuque to Sioux City. This is the line of the Dubuque and Pacific Railroad. The Country through which it passes will now be described.

The *First Division* from Dubuque to Dyersville 30 miles traverses a rolling country; the grading is heavy, much of it through rock and very hard earth. The gradients of the whole line are very favorable the maximum being only 45 feet per mile. This division owing to the deep excavations through which it passes will require a greater expense in repairs than any other part of the line. Stone and timber are convenient and of good quality. The body of timber along the Little Maquoketa River will be ample for fuel for several years; and the whole line is amply supplied with water. The soil is not strictly first rate but is capable of sustaining a dense population. The principal mineral is galena which has been profitably worked near Dubuque for many years.

The *Second Division* from Dyersville to Cedar Falls 70 miles passes over an undulating prairie country, but which is far more level than the first division. The grades are more favorable and the general direction of the road is nearly straight, there being no curves less than 2,000 feet radius. In proceeding west from Dyersville the country gradually becomes more level and of richer soil. Building material is abundant and the bottoms of the streams are favorable for solid foundations; material for ballast is convenient. There is a very good body of timber near Delhi and Coffin's, Ead's and Buffalo groves, and sufficiently near for supplying fuel. The timber upon the Wapsipinicon and Cedar rivers is very good, and in sufficient quantity to supply the road for several years.

The *Third Division* from Cedar Falls to Fort Dodge 92½ miles has a good allignment varying little from a straight line. Ballasting material is very abundant. The nature of the soil is such as to warrant the belief that the road can be kept in repairs at a small expense. This division passes over a country far more fertile than either of the divisions already described. It is equal to the best parts of the West. Timber is more scarce than on the second division, but is ample. There is good timber on the Iowa, Boone, Des Moines, and there are large groves. Except at the crossings of the streams there is very little stone. The general character of the country is an open rich prairie producing a heavy growth of grain, and other vegetation. Coal is abundant on the Iowa, Boone and Des Monies. It is a fair quality of bituminous coal. Tracks from the main line of the road can be run into the mines. Gypsum is very abundant and of good quality; also hydraulic cement, building stone etc. Water is everywhere in great abundance.

The *Fourth Division* extending from Fort Dodge to Sioux City 130 miles is generally of the same character as that east of the first named place. To the Little Sioux 75 miles an almost air line is run and there is little variation from level grade. Beyond and to Floyd River the road covers a country more undulating and varied but the soil is as fertile as any on the line. The valleys of the streams make magnificent farms. After leaving Lizzard River a short distance beyond Fort Dodge rock is scarce and difficult to obtain for structures, but ballasting is abundant. Timber too is found in lesser abundance and consists generally of hard wood. Coal which is abundant must supply

its place. The transporting of lumber west and of coal to the east is expected to become a source of great traffic when the road is built.

The Tete des Morts Branch 10½ miles runs down the bank of the Mississippi River. The country is rough and the grade not favorable.

The years 1858 and 1859, were years of struggle with the company. Money was hard to be obtained at any price, and the work of construction was interrupted and slow. It took from the end of 1857 to the fall of 1859, to complete the section from Nottingham to Manchester, and to the end of the year to reach Masonville. Somewhat greater energy was now infused into the company, and as money became more plentiful the work progressed more satisfactorily until May 1860, when the line was completed to a distance of 80 miles from Dubuque, and within 20 miles of Cedar Falls. At this time the capital accounts of the company stood thus:

Share capital	$890,654
Bonded debt	1,393,100
Floating debt	117,354
	$2,401,112

But this sum does not exhibit the full cost of the road as at various times large amounts of the bonds had been cancelled by sales of land, say at least $1,000,000 so that the cost hitherto had been nearly $3,500,000 or $43,850 per mile. The earnings in the meanwhile had been small and inadequate—in 1858, they amounted to only $62,520 and in 1859 to only $58,620 or in the two years to $121,140, from which may be deducted for operating expenses at least two thirds the amount, leaving only $40,380 or $20,190 per annum for interest.

In the meanwhile interest on a large portion of the bonded debt was left unpaid, no more money could be had to proceed with construction, and all work was suspended.

(To be Continued.)

Dedication of Land to Public Use.--Easement.--Right of Railroad Company in Public Highway.--Intrusion upon Real Estate.

The case of Perrin against the New York Central Railroad Company, was an action to recover possession of land in city of Rochester. The defendant claimed that the premises in controversy had, upon a map made by plaintiff, in 1848, of a tract owned by him, been designated as a street, park or open piece of ground, appurtenant to other lots laid down on that map, and that the said street, park or open space of ground, became, and was fully dedicated by the plaintiff as a street or highway, for the use and benefit of the adjoining lots, and as appurtenant thereto, and for the exclusive use and benefit thereof. That all the lots adjoining said street or park were sold by the plaintiff, and were now held and owned by the defendant; and that plaintiff, in and by such dedication and sale, had parted with all his title to, and interest in, the lands sought to be recovered. The action was tried without a jury. The following facts appeared on the trial:

In 1849, the plaintiff was the owner in fee and in possession of a tract of land called the Frankfort tract, in the city of Rochester, of which the premises in controversy were a part. In that year the plaintiff caused said tract to be plotted out and subdivided into 36 lots, and a piece designated "park," bounded on three sides by nine of said lots, and on the fourth side by a public street known as Jones street; and he caused a map of said plot and subdivision to be made for him, and filed and recorded in Monroe County Clerk's Office. The land represented on said map as "park," is the same parcel of land particularly described in the complaint. The plaintiff subsequently sold and conveyed all the said nine lots abutting on said "park," at different times and to different persons; describing them in every conveyance, by their numbers, and by a reference to said map filed and recorded as aforesaid. In 1855, the defendant, under such conveyances from the plaintiff and his grantees, acquired the title to, and now owns and occupies, all of said nine lots abutting on the "park." There is no means of access by any public street or private way, to any of said nine lots last named, other than two of them, except through the said piece called "park," and the railroad track shown on a map which runs out to the public streets of the city. After the sale of two of said lots by plaintiff dwelling houses were erected thereon, and the piece called "park" was used as the only way of access thereto, so long as the dwelling houses remained thereon. They so remained until 1855, when the defendant took possession and removed the same. The piece of land in controversy is now used by the defendant for ingress and egress in respect to the lots so occupied by the defendant, and for other purposes. The defendant has constructed two railroad tracks, running north and south, across and on the piece in dispute, and uses and occupies the same for other purposes; and was, at the commencement of this action, and still is in the possession of the whole of the premises described in the complaint, claiming to be the exclusive and absolute owner thereof.

The Court also found that the space called "park" was designed by plaintiff as a park for the use of the persons who should purchase and own the lots fronting upon and bounded by the same, and also as a street or way of ingress and egress for said persons, with their carriages and teams, and other persons having occasion to go to and upon said lots, but not for the use of the public generally, otherwise; and that it was dedicated by the plaintiff for those purposes. And the judge found and decided as matter of law that the defendant was the owner of said space or "park," and was entitled to the possession thereof. Judgment was ordered in its favor, accordingly, and plaintiff appealed.

WELLES, J.—The question to be determined in this case is, whether, when the plaintiff conveyed the lots abutting on the premises in question, he parted with his title to such premises; and that depends upon the question whether those premises can properly be regarded as a street. If it was designed by the plaintiff as a street, lane, alley, or way for ingress and egress in order to afford communication between the lots abutting upon it and Jones street, which was one of the public streets of the city of Rochester, the law is settled that the conveyance of those lots by the plaintiff carried the grantees to the middle or centre of the piece of ground in question. It was never doubted that in regard to public highways in the country, such was the rule. For the case of Bissell *vs.* these defendants, (23 N. Y. Rep. 61,) it was decided that the same rule applied to streets in a city. The same rule applies also to a river, creek, ditch, wall, or any similar object when given as a boundary. The grant is regarded as extending to a line running through the centre of the river, creek, &c., unless an intention to the contrary appears upon the face of the instrument. In the present case, the map made and recorded by the plaintiff constituted a part of the description of the premises in the conveyances of the lots abutting upon the piece of land in controversy; and if it cannot be collected from the deeds in connection with the map that the plaintiff designed the space indicated on the map as a "park," for a street or passage way merely, the rule referred to will not apply, and the grants will only extend to the exterior line of the park adjoining the lots conveyed.

After a good deal of hesitation, I have come to the conclusion, that when the plaintiff laid out and plotted his tract, which includes the premises in question, he intended that space of land to be, what he has designated it on the map, a park, and not a mere passage way leading by and to the adjoining lots; at least that such was his primary and leading object, and that when he afterwards conveyed the adjoining lots, the presumption is that his intention was the same. I admit that a part of his design was to afford access to the contiguous lots; but that, it seems to me, was subordinate and incidental to the principle and leading object. He had the unquestionable right to devote it to such lawful purposes and uses as he chose. He declares, in substance, that he designed it as a "park." No definition of that word will describe a street or passage way. One of Webster's definition of the word "park" is "an enclosed place in cities, for exercise or amusement." His other definitions of the same word are inapplicable. It is the usual, and so far as I know, the universal practice, when the idea of a street, alley, or lane is intended in the description of the premises in a conveyance, for the grantor to employ those words. But here, the word used fails entirely to convey any such idea. These premises are in no sense a public street, as there is but one entrance, which is at its intersection with Jones street at the east end, and does not terminate at the west end, or communicate elsewhere with any other street or other passage way. It is what is called a *cul de sac*, like Jauncey Court which leads from Wall street in the city of New York. I cannot believe it was intended for a mere lane or alley for passage, although that is possible. I conclude that it was not, in fact, the intention, for the reason that the plaintiff has nowhere so expressed it, but on the contrary, has expressed an entirely different intention. He has declared it to be a park, and has omitted to give it any other designation. It is much wider than we would naturally suppose he would dedicate for the mere purpose of a lane or alley. It is wider than any of the lots laid down on the map. I admit the size or width is of little or no importance in determining whether it was designed for what the plaintiff declared it—a park; but in examining whether it was intended as a mere passage the fact of its unusual width for such purpose has a legitimate bearing on the question. Suppose it had been a piece of ground ten rods square, I apprehend no one would contend that the plaintiff's title would pass by a grant of the adjoining

lots; and yet every consideration in favor of the application of the rule before stated would apply to the case supposed.

We know that in our cities, parks are public and private, large and small. The size has almost nothing to do with the question, whether a park or not. There are parks in the City of New York much smaller than the one in question, for example, those in Park Avenue.

We are to inquire for the plaintiff's intention at the time of the alotment of his tract. It is said that this was not a park because not enclosed. Nothing was enclosed at the time of the alotment, and the question is, did the plaintiff intend to enclose it, if that was essential to make it a park?

If it was essential, we should intend that his purpose was that it should in due time be enclosed. There is another consideration equally potent with any of those stated. Suppose the plaintiff, after he had made the alotment and recorded the map, had conveyed one of said two lots which are accessible only by said piece called "park," and the railroad track, by the same description as used in the description of those which he did convey, as stated in the case. The lot I refer to, is bounded on the east by Jones street, and on the south by the premises in question. According to the theory of the defence the grantee would take to the centre of the premises. And suppose the plaintiff, at the same time or afterwards, should convey the other of said lots, lying opposite and bounded on the east by Jones street, by a similar description except the number; by the same theory the grantee in the last conveyance would take to the same centre on the south side, so that all the other lots bounding on the premises in question would become completely shut out from any public street or highway. This, it seems to me, could never have been the intention, and cannot be the operation of the conveyances of the lots adjacent to the premises in question.

If the foregoing conclusions are correct, the judgment should be reversed and a new trial ordered.

Judgment reversed.

Legal Tender Decision.

Hon. S. P. Johnson, presiding at Erie, Pa., has rendered an important decision in reference to legal tender notes:

The plaintiff had deposited six hundred and twenty dollars of gold with defendants and taken a certificate of deposit payable in gold, dated May 1, 1862, and claimed the market value in gold at the same time suit was brought. By arrangement of the parties the premium on gold was fixed at fifty per centum. The defendants claimed the right to pay the certificate of deposit in legal tender Treasury notes, under act of Congress of 25th of February, 1862, and tendered plaintiff notes for the par value of the certificate of deposit not payable in money, but expressly payable by a return of the deposit *in kind*, is not a debt within the act of Congress aforesaid, and therefore the plaintiff was entitled to recover the market value in gold. The Court also held that the certificate of deposit containing an express promise to pay gold was a waiver of the right or privilege of paying in legal tender notes; that although debts are payable in legal tender notes, the right or privilege to pay with such notes may be waived as well as the right to exemption, stay of execution, trial by jury, and many other statutory and constitutional rights which have long been held liable to be waived by the acts or arguments of parties interested.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending May 13th, 1864, was as follows:

Passengers	$20,055 51
Freight and live stock	30,875 91
Mails and sundries	1,575 01
Total	$52,506 43
Corresponding week of 1863	46,863 26
Increase	$5,643 17

The earnings of the Marietta and Cincinnati Railroad for the 2nd week of May, were:

	1864.	1863.
Passengers	$13,583 58	$3,251 61
Freight	6,597 11	4,304 87
Mail, express & telegraph	1,169 58	750 00
Total	$21,350 27	$8,306 48
This month to date	$44,706 54	$16,854 23

The earnings of the Chicago and Alton Railroad Company for the week ending May 15, were:

	1864.	1863.
Passengers	$15,020 10	$13,001 55
Freight	18,547 63	22,162 64
Sundries	1,474 34	1,719 73
Total	$35,042 07	$36,883 92
Decrease 1864		$1,841 85

The earnings of the Galena and Chicago Union Railroad for the week ending May 15, were:

	1863.	1864.
Freight	$21,989 58	$31,054 66
Passengers	7,810 35	11,987 21
Mails, &c	1,300 00	1,300 00
Total	$21,099 93	$44,341 87
Increase 1864		$13,241 94

The earnings of the Chicago and Northwestern Railway for the week ending May, 14 1864:

Passengers	$11,721 86
Freight	24,248 82
Mail	584 37
Express	384 17
Total	$36,939 22
Same period last year	23,589 30
Increase 56½ per cent.	$13,349 92

The earnings of the Michigan Central Railroad for the 2nd week in May, 1864, were $63,016 07
Corresponding week of previous year 49,335 87
Increase $13,680 20

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2nd week in May, 1864, were $36,927 42
Corresponding week of previous year 18,072 85
Increase, 104 per cent $18,854 57

The increase since January, is $204,191—62 per cent.

The earnings of the Chicago and Rock Island Railroad for the second week in May, 1864, were $38,886 00
Corresponding week of previous year 29,373 00
Increase $9,463 00

The earnings of the Grand Trunk Railway for the week ending May 14, 1864, were:

Passengers	$25,920 96
Express freight, mails and sundries	2,500 00
Freight and live stock	61,505 89
Total	$89,926 85
Corresponding week, 1863	74,531 67
Increase	$15,395 18

The Detroit and Milwaukee Railroad traffic for the week ending May 19, 1864:

Passengers	$9,405 22
Freight and live stock	13,291 29
Mails and sundries	645 15
Total	$23,341 76
Corresponding week last year	20,112 89
Increase	$3,228 87

The earnings of the Illinois Central Railroad the 3nd week in May, 1864 $93,218 00
Corresponding week in 1863 76,847 00
Increase $16,371 00

Railroad Earnings--Monthly.

The earnings of the Housatonic Railroad for April, 1864, were $29,473 99
Corresponding month of previous year 22,145 56
Increase $7,328 43

The earnings of the Toledo and Wabash Railroad Company for the month of April, 1864, were $123,987 36
Corresponding month of previous year 132,110 54
Decrease $8,123 18

The earnings of the St. Louis, Alton and Terre Haute Railroad for April, 1864 $157,785 55
March, 1863 123,115 01
Increase $34,670 54

The gross earnings of the Ohio and Mississippi Railroad for the month of April, 1864, were:

	1864.	1863.
Eastern Division	$153,448 31	$146,273 30
Western Division	106,318 16	100,419 06
Total	$259,766 47	$246,692 36
Increase		$13,074 11

☞ The Chicago and Great Eastern Railway Company are offering for sale the remainder of their issue of 7 per cent. first mortgage bonds.

Missouri River Valley Railroad.

The stockholders of this company have unanimously voted to transfer its rights and franchises to the North Missouri Railroad Company, and executed a deed to the North Missouri Railroad Company for this purpose. This gives to the North Missouri road the control of the line that is to be built to connect it with St. Joseph. This line has now applicable to its construction $700,000 of the first mortgage bonds of the North Missouri Railroad, well secured, 25,000 acres of land in Chariton County, $175,000 subscribed by Carroll County and $200,000 subscribed by Ray County. The first fifteen miles of the road next to the North Missouri Railroad has been graded. The construction of the road will be commenced as soon as the bonds are prepared and negotiated. —*St. Louis Republican.*

It will be seen by the foregoing that there is a project in process of execution by which a railroad will be constructed from a point on the North Missouri road to St. Joseph by our city. The road leaves the North Missouri road at Huntsville, and then pursues an air line route westward to Leavenworth, then to intersect the Platte country road, then to St. Joseph. Fifteen miles of the road have already been graded, and the arrangement just completed will ensure its speedy construction throughout the entire length of the route. The road is to be constructed from Huntsville to the Mississippi river, there to connect with the eastern roads. When the road shall have been completed from our city to the Mississippi river it will be the most direct route from Kansas to Washington and all the eastern cities. It will be some eighty miles shorter from our city route to St. Louis than by any other.—*Leavenworth Bulletin.*

American Railroad Journal.

Saturday, May 28, 1864.

Stock Exchange and Money Market.

The agency of banks in the inflation of money should not be measured by the amount of bank notes in circulation merely. On the 12th of March last the banks of this State owed "depositors on demand" $291,662,726. To the extent that the banks have used these deposits in loans or otherwise, they have repleted money as effectually as they could have done by issuing bank notes, the banks still leaving the whole of that sum in the ownership of the depositors, and subject to their call on demand. If then we assume that the amount of bank deposits is the amount of unemployed money seeking investments, the banks augment the glut of issuing the deposits, and thus double that glut. That the banks have thus used these deposits is evident from the report of the 13th of March last, which exhibits the assets of all our State banks, as follows:

Loans and discounts	$200,399,286
Over drafts	586,926
Due from banks	28,753,043
Due from directors, brokers and real estate	8,521,359
Cash items, (probably stock demand loans)	105,350,120
Stock, promissory notes, and U. S. securities	117,159,915
Bonds and mortgages	4,915,315
Solvent bank notes and U. S. demand notes	33,159,241
Loss and expense	786,180
Specie	22,146,592
Bills of suspended banks	245
Add for cents	910
Total assets	$516,729,137

Total debts the same of course.

The deposits of all our State banks were:

June 1861	$100,315,092
" 1862	150,438,244
" 1863	218,717,725
And in March 1864 they were	291,662,726

As some passions grow by what they feed upon deposits also increase by the very plethora which creates them, and the banks add to this plethora by forthwith employing the deposits. So that the man who deposits his money to-day, for the reason that he can see no investment, finds his case to be worse to-morrow, the very bank in which he placed his money; becoming thereby a new competitor in the market by just so much more deposited.

The cry of inflation made by the banks against the Treasury is therefore exceedingly unjust, inasmuch as they themselves are doing the same thing without the same reason for it.

The people seem to think that our State banks may owe five hundred millions of dollars with great propriety, but if the Government, which in this sense means the whole nation, issues five hundreds million of greenbacks, for the sole purpose of saving it from absolute destruction, then chaos is come again, repudiation is close upon us, and the world is nearly at an end!

Such are the follies of ignorance, or fear, or such the arguments of the secret friends of the rebellion, and the sympathisers with despotism.

But if New York, which is in most respects highly conservative in its financial views as an admitted thing, and very watchful of the vicissitudes in the Treasury department and the National currency, can allow its own banks to increase the volume of money in this enormous way, what shall we say of those States where no such feeling prevails. If we really wish to know what inflation is and where it is to be found most rampant, let us look a little farther.

In January 1861, the paper circulation of the banks of the free States was about $178,000,000.

We will take the city of Pittsburg as an illustration, with a population of 50,000 inhabitants, and we find the following to be the movements and present condition of its banking institutions:

Capital and Circulation of the Banks of Pittsburg, Pa., in November, 1861, and Circulation in January, 1864:

Banks.	1861. Capital.	1861. Circulation.	1864. Circulat'n.
Alleghany ..	$500,000	$358,270	$960,154
Citizens'	500,000	875,743	958,600
Exchange...	1,000,000	1,083,554	1,862,557
Iron City	400,000	320,177	770,014
Mechanics'..	500,000	303,247	992,125
Mrcts & Mfs.	600,000	601,039	1,843,833
	$3,500,000	$3,041,030	$7,382,283

Here is an inflation of 242 per cent! So that, in the words of a cotemporary of authority and sound judgment, if "all the banks in the country have expanded their circulation at the average rate of 242 per cent., they have added to the paper currency $450,760,000 00, making a total for the issues of the State banks, which are a substantially irredeemable loan without interest, from the people to those banks, of $628,760,000 00, or about two-fifths of the entire expenses of the war to the present time."

And that this is very near the truth, we may infer from the following table which shows the per centage of inflation in the banks of the New England States, as exhibited in the bank reports of 1862 and 1863, from January to January:

	1862.	1863.	Per cent. of increase.
Maine.....	$4,047,780	$6,488,473	Over 60¾
N. Hampshire.	2,994,408	4,192,034	" 39¾
Vermont.	2,522,687	5,621,851	" 119¾
Massachusetts.	19,517,305	28,957,630	" 48¾
Rhode Island.	3,306,530	6,413,404	" 93¾
Connecticut..	6,918,018	12,842,758	" 100
N. Eng. Stats.	$39,306,719	$65,516,155	Over 66⅔

Here is an inflation at the rate of 66⅔ per cent. per annum, or 200 per cent. for the three years. The following are the figures for New York, New Jersey and Pennsylvania:

	1862.	1863.	Per cent. of increase.
New York...	$30,553,020	$39,182,819	Over 28
New Jersey.	3,927,535	8,172,398	" 108
Pennsylvania	16,384,643	27,689,504	" 68¾
	$50,865,198	$75,044,721	" 47½

The banks of this city show anything but a conservative and contractile policy at this very moment, when the cry of inflation is raised by their managers against the Secretary of the Treasury. For in the single week ending the 21st of May they had increased their loans by the sum of $3,178,018, notwithstanding a loss of specie to the extent of $553,564, during the same week. On a capital of $69,927,725, they owed their stockholders, depositors and billholders $318,345,-432! This bents the operations of Mr. Chase, and the financial policy of the Government entirely out of sight.

In New England there are fifty banks whose circulation is $1,387,000 in excess of their capital in other words over 130 per cent.!

Now when the people voluntarily lend themselves without interest about $470,000,000, by taking greenbacks and circulating them as money, a great cry is made against the Treasury and the Government which thus avail themselves of the patriotism and generosity of the people, but when a host of bank corporations get as much and more than this out of the public without a particle of reason for it, beyond the one of private interest on the part of these institutions, not a word, not a whisper is uttered against the proceeding. Such is the folly, such the inconsistency of a class of people who will not think for themselves, but allow a certain other class, gorged with privileges and franchises, to lead them into every quagmire which covers up their tracks.

The whole thing lies in a nutshell. That there is too much paper afloat we all admit. For one kind there has been an inevitable necessity. It must have been issued or we should have perished. For the other kind there is no such necessity. At the best it is uncertain in its value, management, and redemption, and at par nowhere beyond the circle where it is flung around.

The National money does not represent even a fractional part of the National wealth, and is on the secure foundation of the National resources increasing over 100 per cent. every decade. No banks can pretend to any such security, such permanence, such final resources, nor such universal acceptance by the people. We therefore do not need two currencies of such diverse character in all respects. We do not want this race after expansion kept up. We want of a paper currency the very best we can get and no other, and this is precisely why we favor the Government legal tenders over the issues of our hydra-headed banking system.

There is no question whatever but that the Government can absorb all its greenbacks in a few months if Congress will only attend to its proper business. It is well-known that this done, Mr. Chase can operate hereafter if advisable on a specie basis; this he asserts can be done, and the mode of doing it is easily made intelligible. But where will be the local banks, where their currency, if they at the same time are compelled to redeem in specie? The very wisest course with regard to these institutions, is to curtail their issues and credits at once, and for Congress to protect the people by compelling them to do so. A heavy tax on circulation and additional stamps on loans in bank paper are obvious necessities, if this inflation is to be checked and the currency brought down to a reasonable standard.

The condition of the gold market and of foreign exchange, has during the last week been the subject of much remark. Our imports continue large, and are made up of many articles wholly without any real advantage to this country. We do not allude to luxuries, many of which we could do better without, yet which wealth will always seek no matter at what cost, but other articles of a less glaring character. In looking over a recent return of the exports from Liverpool to this city for a single week in April, we found among the list large quantities of woollen shoddy, glass beads by the ton, iron skewers for kitchen use, twine, lint, and a score of other things of all sorts and names, a heterogeneous assortment which looked like the sweepings of an English workhouse, or junk shop, sent here to be turned into money no matter at what price, and remitted in gold to England. There was scarce a really valuable and necessary article in the whole list, certainly few that we could not have well done without, and this we call commerce! Is there not iron enough, are there not blacksmiths' shops enough in this Country to supply our cooks with skewers? And is fashion so intolerant of American work, that it will wear no glass beads of our own manufacture? And are we so badly off for wool, that the rags of the old clothes men of London are to be converted by tons into cloth to be worn by unsuspecting Americans, at an enormous cost, carrying in its fibres not only rottenness but disease? Certainly we are overdoing this business of importation, and our home leagues should not stop with the refusal to purchase luxuries, but everything else of the paltry and worthless character of most of our late imports.

Gold has consequently upon this state of things advanced again, and Exchange has actually gone up to 200, and with this rise a corresponding advance is taking place even in articles of home production, and of the most perishable nature. Even the vegetable market feels the effect, and the combination is so complete, that sellers suffer their green stock to rot in their shops, rather than sell it at the old standard. Within a few days past, Mr. Cisco has been selling Government exchange in considerable amounts ($1,250,000) at 109, for specie, fixing his price before hand and giving the operators a chance to sweep the whole and keep the price up to suit themselves without competition. If this is Mr. Cisco's discretion we can not praise it. It is well known that the Custom duties in San Francisco amount to a very large sum, and are received in gold without disturbance of the money market there as here.

This is now, since the war, sent direct to our Government bankers in London, and goes into the Bank of England. To a certain extent it is of great advantage to us, enabling us to pay our diplomatic and other necessary expenses abroad by bills on London. But the remittances from California on Government account have swelled to millions, and of consequence it has become necessary to remove it to our own vaults. We are inclined to think this whole operation is defective. The gold from California belonging to the United States, should be brought direct to this city and placed in the Sub-Treasury, and it could be brought in some of our war steamers, if the Merchant steamers are still endangered by the piratical cruisers of the enemy. These sums openly brought every few months to this city, would have a strong moral as well as financial influence, showing plainly to the people that our supplies are constant and regular. It would also lessen the balances which are so ostentatiously placed in the Bank of England, and made the theme of so much glorification in that country. And so too, instead of selling exchange in the way Mr. Cisco has done, actually losing by the operation, the specie we had abroad, estimated at three or four millions should have been brought over openly in the shape of Sovereigns, taken to the Sub Treasury, and thence sent to the mint to be re-coined in pieces of moderate size, not convenient for exportation, but very useful to be held in the Country as a hoard to meet the return of resumption by the banks of the country. The very act of shipping so large an amount of its own coin from England by this Country, would have a greater effect on public opinion abroad, and confidence at home, than almost any other financial operation of which we can now conceive. Bills of Exchange are scarcely traceable in their course from one Country to another, but the transfer of four or five millions of gold from London to New York at this moment, would have been as important as a great victory.

We imagine that it would have had the effect also of increasing the foreign demand for our national securities. It is understood that propositions from Germany have been made recently which would if accepted, absorb nearly all that remains of the 10-40 loan, which is being rapidly taken up at home, and is increasing in favor with the people. The London *Times* alludes to this foreign demand in a very lugubrious tone. It says:

"In the advices from Frankfort it is remarked that there have never been as many bills on London in circulation in that market as at present. The portfolious of the banks, bankers and capitalists are full of long bills, taken in exchange for short ones, which are eagerly bought up at rising prices by parties who have to make remittance for bills drawn on their account on London from New York, *in payment for the large masses of United States 6 per cent. stocks brought on the Frankfort Exchange.* 'These securities,' it is observed, 'are still bought *with astonishing eagerness for investment by capitalists in Southern Germany*, in spite of the heavy losses hitherto incurred. The high interest, until now punctually paid, induces capitalists to part with their best German stocks for these, at all events *very doubtful ones.*"

We can add to this last remark one which the *Times* might do well to consider, viz., that the German agencies in this city understand the resources of this Country better than they are understood by any other foreign agencies; they enter with spirit into the enterprise and vigor of our internal commerce, are very liberal men, and mingle thoroughly in American society, and understand our character. It is not strange that their friends abroad are better informed than are the correspondents of other nationalities represented among us, and under their advice, it is not wonderful that the great profits offered by American securities at present rates are more and more sought for, as the rebellion evidently is losing territory, resources, and hope.

It is no wonder either that the rate of interest in England has advanced in the Bank parlor to 9 and at private institutions to 10 per cent, or that Exchequer bills at the last dates were at 10 per cent discount.

Here our Government securities are all slowly improving, and having the confidence of the people, are sought for. The day will come when these will bring a premium beyond our present expectations. The condition of Europe is of a nature to favor a demand for American securities. If there is on the globe, an industrious, prosperous and growing country, it is ours. It is still fresh and young, and every man in it has a personal stake in its permanence, and prosperity. Our national debt is an honest debt, which we could not avoid incurring: twice we have paid our national debts, and our increase of over 127 per cent. every decade in the real and personal properties of the Country, and the compounding as it were our capital from census to census, are facts to which no European nation can pretend to offer a parallel. But the wars and debts of Europe are based on unsound and destructive principles, the elevation of a few families at the expense of the nations and their people; struggles for territory to enlarge the area of taxation, and increase the funds of princely prodigals." No wonder that European governmental securities should have met with so many disasters, and have a foundation only in excessive exactions upon the industry and economic pursuits of unfortunate millions, who no longer live for themselves but for their rulers.

Railway shares have been rather dull but maintain their position with a fair tendency upward. We notice in our foreign Railway exchanges the most flattering opinions of the condition, prospects and management of the Erie. In railway bonds the business is small but at full prices, Government securities, payable interest in gold, necessarily having the preference over all other kinds, the interest payable in currency.

The value of imports at New York last week was $5,593,903, against $2,278,794 for the same week in 1863. The exports for the same period were $3,326,892 against $2,470,642, and the shipments of specie were $1,884,000 against $309,000 for the same week last year.

The value of imports since July 1 is $195,768,-163 against $165,369,678, an increase of $30,398,-385. The exports for the same period were $148,-369,680 against $168,363,683 in the previous year, being a decrease of $19,993,703. The shipments of specie were $50,687,000 against $50,328,000, a decrease of $359,000.

The value of foreign goods imported at the port of Boston for the week ending May 20, was $810,-777, against $862,653 for the corresponding week in 1863. The value of exports for the week ending May 20, was $275,316, against $384,617 49 for the same week in 1863.

The sales of the 10-40s continue to be brisk, and the public are now looking to the future movements of Mr. Chase, of which we gave an inkling in our last week's review of the market, and which furnished unexpected topics for the cotemporary press during the week.

Money is easy at 6 per cent. The only real trouble at this moment is the advantage taken by dealers in almost all articles of necessity to demand exorbitant prices, an operation which is seriously injurious to persons of fixed incomes and salaries, who have no opportunity of making money out of the Government, the principal occupation of a very large number of persons.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—At. & Gt. Western (Ohio div.) 1st mort., 100; Milwaukee and St. Paul 1st mort., 102; Cincinnati Hamilton and Dayton R. R., 134 Ohio and Mississippi pref. cer., 91; North Carolina 6s, 56; Indiana 5s, 85; Mariposa 1st mort., 80; Saganaw Land and Mineral, 5; Copake Iron, 11½; Wyoming Valley Coal, 68; Con. Northern Railway of Canada.

The annual meeting of the shareholders of this Company was held at Toronto on the 11th of February last. The report was submitted by Mr. Cumberland the managing director, containing a statement of the transactions of the Company for the year ending 31 Dec. 1863, with the earnings, expenditure, capital and revenue accounts, and returns of the traffic and locomotive departments.

The construction accounts may be regarded as closed. The total expenditure on all services has amounted to $1,216,000 66. The consolidation of original bonds, and the issue to the Government of Canada represent a further sum of $1,381,646 68, or a total preferential capital of $2,598,313 34.

The gross receipts from all sources have amounted to $406,606 55 being an excess of $368 53 over those of 1862, but a decrease of $4,333 36 over those of 1861. The loss on American currency in 1862, was a practical reduction of $22,000 for the earnings of that year.

The local traffic was improved, showing an advance in 1863 of $72,439 50. The local passenger traffic is also increasing steadily:

Passenger Traffic.	1863.	1862.
Local passengers paying	103,961	95,403
Free and company's service	3,821	4,551
Foreign	nil.	1,575
Total	107,832	101,529

The total quantities of local flour and grain carried have been:

	1863.	1862.
Flour (in barrels)	71,795	64,443
Grain (in bushels)	791,793	566,010

The receipts at Toronto of the following articles have been:

	1863.	1862.
Flour (in barrels)	71,590	62,807
Wheat (in bushels)	724,338	531,753
Sawed lumber (B. M.)	25,626,000	25,626,000
Square timber	21,164,100	17,988,000
Rafting "	4,436,000	1,374,000

In sawed lumber there was a decrease of 1,720,000 feet.

The tonnage transported (local and through) has been:

	1863.	1862.
Ordinary freight, 1st, 2nd, and 3rd class	15,216	13,414
Flour	7,750	6,743
Grain	23,328	16,832
Timber and lumber	99,697	72,347
Total local tonnage	145,991	109,336
Total through tonnage	61,313	65,007
Gross tonnage of year	157,307	174,345

In the through tonnage there was a decrease of 56,694 tons, and in the gross tonnage a decrease of 17,037 tons on 1862. The train service has been economically and efficiently administered, the mileage having increased in 1863, 12,325 miles, The policy of adopting minimum rates payable in Canadian currency, and the avoidance of season contracts has been justified by its economy. In 1863 the loss on American currency was but $2,005.72 while in 1862 it was $23,596.92

The earnings and expenditure of the year are as follows:

Gross earnings from all sources	$406,606 55	£83,549 5 9
Working expense	218,538 62	44,965 3 10
Other charges to revenue	8,340 12	1,713 14 6
Total revenue expenditure 1863	$226,878 74	£41,018 14 4
Total revenue 1861	$179,727 81	£36,939 7 5

It appears that a permanent reduction in the working expenses has been effected as was anticipated in 1859, when the closing of the works account was projected.

In 1863 the gross receipts were $406,606 55 and the working expenses $218,538 62. So that full interest has been paid on the Company's bonds, and a balance of $27,680.47 been secured for other appropriations. The excellent condition into which the road, works, and permanent way were brought the last two years, has proved to be a great economy. The maintenance of permanent way has been reduced to $271.75 per mile per annum, exclusive only of iron and chairs, and the reduction in the whole cost in 1863, as compared with 1862 amounts to $13,427 18. In the locomotive department, the average cost of working and repairing Engines has been 17.76 cents per mile, and the average cost of running and repairing all classes of car stock has been 8.24 cents per train mile run.

In fact the engine mileage has been increased 12,325 miles, but the saving in the consumption of wood has been 3,520 cords or $8,006 66, effected by an improvement in the fire grate, an invention of Mr. Lister the Superintendent of locomotives. The cost of wood is per engine mile run but 4.72 cents. In oil and waste a reduction has been made of $5,000.50. By a further system of economy, such as fusion of offices, abolition of engineering and freight departments and closing agencies in New York, Boston and along the route, a reduction has been made of $12,000. The working expenses have thus been reduced to 52¾ per cent. of the receipts.

The net revenue of the year was $179,727 81 full interest paid on the preferred capital, an appropriation of $19,340.35 made to reduce charges on special works, and the net balance at credit of the revenue has been increased to $36,367.77.

The Directors claim that the results of the year have been favorable, and anticipate an increase of business the present year. The extension of the line to the Eastern part of the city of Toronto, and a friendly arrangement as to the Barrie branch are mentioned as being about to take place.

The report was accordingly well received by the shareholders and unanimously adopted.

☞ We invite attention to the Advertisement of the Chicago and Great Eastern Railway Company, in another column.

Nicaragua Railroad.

By the last steamer from Aspinwall, we received a copy of the contract entered into by the Government of Nicaragua with Commander Pim of the British Navy, for the construction of another Isthmus Railway, from Monkey Point on the Atlantic Ocean, along the Northern side of Lake Nicaragua, across the Tipitapa, thence along the southern side of Lake Managua to Leon and Corinto on the Gulf of Fonseca on the Pacific. Our readers are aware that both the French and English have for a long time been encouraging schemes of this description, and we may reasonably expect that some one of them will be finally executed. Is it not time that our Government should endeavor to secure from the present liberal Government of Colombia, an extension of the franchise of the Panama Railroad Company, so that in view of the coming competition it may remain securely in American hands. We give a copy of the contract entire in another part of this week's issue.

Bay de Noquette and Marquette Railroad.

All that remains to put the track in running order from Marquette to the Lake Superior Mine, is to finish the bridge over the cut of the Peninsula Railroad at Negaunee, where it passes under the track of the Bay de Noquette and Marquette Railroad. Preparations have been made for a large increase of business, and the ore cars now on the track are reckoned by the mile. One or two additional engines will be procured, if possible, and five trains will make three trips each per day between here and the mines. The following figures show the business of the road for the past two years—the freight being reckoned in net tons—and the increase of this year will more than double that of the last, if the engines can be had to move the iron, and the men to get it out:

	1862. Tons.	1863. Tons.
Pig iron, down	1,610	7,698
Iron ore, "	140,453	217,656
Miscellaneous		1,479
Merchandise up road	1,283	4,850
Totals	143,346	231,893
Number passengers both ways	5,168	10,868
Passenger receipts	$2,033 95	$4,567 13

Various opinions are expressed as to the effect of the completion of the Peninsula road upon the business of the Bay de Noquette and Marquette

road, but with the preparations made and still going on for extending the mining operations, we have no doubt that, whatever may be done by the former, the latter will yet have all the freighting business it can well do at present, while the passenger travel will be largely increased.—*Marquette News and Journal, April* 15.

Earnings of Iowa Railroads.

The following is an official statement of gross earnings of the several railroads in the State of Iowa, for the years of 1862 and 1863:

Railroads.	Earnings 1862.	Earnings 1863.
D. & M. R. R. R...	$201,684 49	$202,314 08
C. & R. M.....	29,894 87	103,062 13
C. I. & N.....	168,177 64	236,400 33
D. M. & W.....	21,013 89	36,128 50
D. & S. C.....	229,341 37	275,096 00
M. & M.....	265,425 63	348,608 34
K., Mt. P. & M.....	21,302 76	38,438 99
K., Ft. D. & M.....	170,119 66	227,024 08
M. S. R. R.....	2,386 03	3,474 10
Total earnings.....	$1,109,346 34	$1,570,546 55

The total gain in one year was $461,200 21. The amount of tax paid to the State for 1862 was $11,093 46; for 1863, $15,705 46. The earnings for 1864 are estimated at two millions of dollars. —*Western Railroad Gazette, May* 7.

Chicago and Great Eastern Railway.

This is one of the most important enterprises which has been recently undertaken, and when completed will open an entirely new first class trunk line from Chicago and the Northwest to the seaboard.

The line extends from Chicago easterly to La Crosse, Indiana, where it intersects the Cincinnati and Chicago Air Line. At Richmond it connects with the Little Miami Railroad to Columbus, Ohio, thence over the Central Ohio Railroad to Wheeling, or Bellaire, and over the Baltimore and Ohio Railroad to Baltimore.

The connection is also made at Columbus with the Steubenville line to Pittsburg, and thence with the Pennsylvania Central to Philadelphia and New York. The distance from Chicago to New York being shorter than by either of the existing lines *via* Dunkirk or Buffalo.

To Baltimore especially this line will be of great importance, affording as it will a first class route to Chicago *via* Wheeling or Parkersburg.

The company expect to open the line for business the ensuing fall.

Consolidated Coal Company.

The Consolidated Coal Company has a capital paid up of $2,175,000, under a special charter from Pennsylvania in 1856. The Directors are: Franklin F. Randolph, President; Edward A. Quintard, Joseph Skidmore, Frederick A. Lane, Charles Parish, Edward Wetherill, Thomas Bennet, Jr., Wm. H. Tillinghast. The property of the Company is in Luzerne county, Pennsylvania, on the Susquehannah River, mostly between Wilkesbarre City and Wilkesbarre Mountain. There are 1,800 acres owned by the company and 2,000 leased by the compay. There are ten different openings, shafts and tunnels, from which coal is now delivered at the rate of 1,500 tons daily, via the Wyoming Valley Canal, and is sold in Baltimore. The Company own 150 canal boats and a large amount of machinery, also a depot and wharves at Elizabethport, New Jersey. These are connected with the mines by the New Jersey Central Railroad—making a new coal supply equal to 500,000 tons per annum for the Eastern markets.

Albany and Susquehanna Railroad.

Since the decision published in the Railroad Journal of 21st of May was rendered, the Legislature has passed the following act which fully covers the defect referred to in the decision:

An Act amending chapter eighteen of the laws of eighteen hundred and sixty-three, in relation to town subscriptions to the stock of the Albany and Susquehanna Railroad Company.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Section one of chapter eighteen of the laws of eighteen hundred and sixty-three, is hereby amended to read as follows:

§ 1. In any case where the commissioner or commissioners of any town, authorized to subscribe to the stock of the Albany and Susquehanna Railroad Company, shall have filed in the town and county clerk's offices affidavits of the consent, subscribed, or authorized to be subscribed, of a majority of the tax-payers, their heirs, or legal representatives of such town, respectively, preliminary to a subscription on behalf of said town to the stock of said company; such affidavits shall be valid and conclusive proof in all courts, and for all purposes, to authorize and uphold the respective subscriptions to the stock, and the issue of bonds to the amount specified in such proof, for such towns respectively, and no clerical, or other defects in any of such affidavits, shall invalidate such proof, or the subscription to the stock, or the said bonds. And where bonds have been issued by the commissioner or commissioners of any town, and the said railroad shall have been constructed through such town, the bonds shall be valid and binding on said town, without reference to the form or sufficiency of such affidavits, and the principal and interest on the bonds shall be levied, raised, and paid in the manner provided in the original act.

§ 2. This act shall take effect immediately.

Consolidation of Maryland Coal Companies.

The Cumberland (Md.) *Telegraph* states that an arrangement has been effected by which the Mount Savage Iron Company, the Frostburg Coal Company, and the Ocean Steam Coal Company, (owning what is known as the "Aspinwall purchase," in the valley of George's Creek,) have been consolidated, and have purchased the road of the Cumberland and Pennsylvania Railroad Company, running from Cumberland to Piedmont. The names of the Directors are as follows: Wm. H. Aspinwall, Erastus Corning, David Headley, John M. Forby, Henry Delafield, Edward J. Woolsey, Adam Norrie, Jos. B. Varnum and David Stewart, all of New York, Frederick H. Walcott, Esq., is the President, and General Schuyler Hamilton, Secretary of the new company, which goes into operation and assumes the control at once.

☞ The Nashville and Northwestern Railway to the Tennessee River was opened on the 19th inst. The route lies through Davison, Cheatham, Dickson, and Humphries Counties, to the station of Johnsonsville, on the Tennessee, a distance of 78 miles. The work was begun in 1857, and finished 24 miles, when the rebellion suspended operations till the conquest of Nashville, when, Gov. Johnson was authorized to finish the work. The new portion of the track is said to be the finest in the country.

☞ The following directors of the Delaware and Raritan Canal were elected at a meeting of stockholders on the 10th inst.:—R. F. Stockton, Jas. Parker, Moses Taylor, John J. Phelps, John M. Read, Jno. G. Stevens, R. S. Conover, A. W. Markley, Richard Stockton.

Erie Railway.

We learn from the Rochester *Union* that the Erie Railway Company have decided to make Rochester the northern terminus of the Corning Branch instead of Buffalo. Trains will run between Rochester and Corning, and the route from Avon to Buffalo will be a branch. Heretofore the branch has been from Avon to Rochester. Accommodation trains will run westward from Avon, while the through trains will run to and depart from Rochester. There will be two daily express trains between New York and Rochester. "The Erie Company has resolved to make Rochester an important point for business, and will enter into the work of getting a share of the through travel by rendering the road and cars inviting to the public."

Atlantic and Great Western Railway.

The Cincinnati *Enquirer* says the track for the Atlantic and Great Western Railroad, on the bed of the Cincinnati, Hamilton and Dayton Railroad, is being laid, and will be completed by the 1st of June, about which time the opening of that important route to the East will be celebrated in that city and along the line of the road on a magnificent scale.

Mine Hill Railroad,

The Mine Hill and Schuylkill Haven Railroad was on the 16th inst., transferred to the Philadelphia and Reading Railroad Company, the Reading Company having leased the road, guaranteeing to the stockholders of the same, 8 per cent. dividend. This company now controls all the lateral roads in this region by lease. J. W. Alder, Esq., has been appointed General Superintendent of the road, and W. S. Coulter, Esq., Resident Engineer.

Interest and Dividends.

The Lehigh Coal and Navigation Company have declared a semi-annual dividend of three per cent., on both shares and scrip, payable on demand, free of the usual tax.

The coupons on the bonds of the Detroit and Milwaukee road, and the Oakland and Ottawa road, will be paid by Messrs. Duncan, Sherman & Company.

The Vermont and Canada Railroad pay a dividend of 5 per cent. less Government tax, June 1.

☞ The Union Village (Washington County,) *Journal*, says that the question of a railroad between Union Village and Johnsonville, where it will connect with the Troy and Boston Railroad, is again being agitated. The estimated cost of the road is $140,000, and responsible parties agree to lease the road and pay four per cent. on the capital stock upon its completion. As soon as one hundred thousand dollars shall have been raised by subscription, contractors stand pledged to take the balance of the stock and go on and build the road.

☞ The opening of the Princeton, N. J., branch of the Burlington County Railroad took place on the 10th inst. This road opens a splendid country to market, and is a most valuable spur of the Burlington County road. To the enterprise of General John S. Irick, President of the Vincentown Railroad Company, and the Messrs. John and Samuel Butterworth, the people of the interior of the county are indebted for this new line of connection with the great commercial centres.

☞ The eastern terminus of the Adirondac Railroad has been fixed at Saratoga Springs.

Hudson River Bridge.

Mr. William B. Taylor, State Engineer and Surveyor, has decided upon the location of the bridge to be built over the Hudson River at Albany. It will be in the northern part of the city commencing on a line sixty feet north of the northern side of Lumber street, and crossing to a point on Van Rensselaer Island, east of the front line of dock. It will be carried thence to the Greenbush shore on a line running southeast, with a radius of nine hundred feet. The bridge is to be built twenty-five feet above tide water.

Chicago & Great Eastern Railway Company,

SEVEN PER CENT

FIRST MORTGAGE BONDS.

The subscribers now offer for sale the remainder of the issue of SEVEN PER CENT. FIRST MORTGAGE BONDS of the CHICAGO AND GREAT EASTERN RAILWAY COMPANY, appropriated to the construction of their road from Chicago to La Crosse, Indiana.

The rails have all been purchased for the completion of the entire line, much below the present market value, and are now going forward to Chicago. The work is rapidly progressing and the Company expect to open the road for traffic early the ensuring Fall, forming a new and very short trunk line from Chicago to the Eastern markets.

The interest payable during construction has been provided, and is now on deposit with the Bankers of the Company. Apply to

SUBSTITUTE FOR

CAR DUCK.

Kingman's Patent Car Covering.

A HEAVY CANVASS, bedded in Water Proof Paste and Painted. Costing now about half as much as Car Duck. Full particulars, directions, and samples sent Also an experienced man sent to show the best way to apply it when requested.

WILLIAMS & PAGE, Boston.

FORTIETH VOLUME OF The Miners' Journal,

PUBLISHED AT POTTSVILLE, PA.

The 40th Volume of the MINER'S JOURNAL commenced January 1st, 1864, with new type, and a larger circulation than it ever attained before.

The JOURNAL, in addition to the general news of the day, publishes more complete reports of the Coal Trade of the United States, than any other publication issued in the country, and it goes wherever Coal goes in this country, and also in Europe. Its Annual Statistics of the Coal Trade, which appears in January of each year, is worth alone the price of subscription. The Coal Trade is also in a very prosperous condition and is attracting great attention throughout the country, and every large consumer and dealer abroad ought to take the JOURNAL for the correct information it contains with regard to the state of the trade. Its subscription price is small compared with the amount of money that may be saved by purchasers of Coal, by availing themselves of correct information.

While the circulation of the JOURNAL is large out of the County among those interested in the trade, it still circulates three times the number of copies in the County as any other paper issues, and is therefore a fine advertising medium for business men generally, Coal Operators and Land Owners, Iron Manufacturers, Machinists, Oil Merchants, Notices to Contractors, &c., &c., embracing the business men of all parties, and contains a very large portion of the capitalists of the country on its subscription list.

Terms for the JOURNAL, $2 25 per annum in advance, or $2 50 if not paid in advance. All subscriptions must be paid in advance unless the parties are known to the publisher. Subscriptions can be sent by mail.

☞ Advertisements inserted at reasonable rates.

Address BENJ. BANNAN,
Pottsville, Pa.

A Chart of the Coal Trade for 1863, price 10 cents, postpaid, is also furnished.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., New York, May 6, 1864.

THE ANNUAL MEETING of the Shareholders of the ILLINOIS CENTRAL RAILROAD COMPANY, for the election of Directors and the transaction of other business, will be held at the office of the Company in the city of Chicago, on WEDNESDAY, the 25th day of May, 1864, at 12 o'clock noon.

The Transfer Books of the Full and Scrip Shares will be closed at the close of business on the 12th instant, and reopened on the morning of the 28th inst.

2t-20 L. A. CATLIN, Secretary.

SHEAFER'S NEW MAP

OF ALL THE

Anthracite Coal Fields

OF PENNSYLVANIA,

IS READY FOR DELIVERY.

It represents the Coal Fields of

Schuylkill, Luzerne, Carbon, Northumberland, Columbia, Dauphin, and Lebanon Counties,

Embracing all the Anthracite Coal Basins of the State; showing all the Railroad lines and their various ramifications, the position of each colliery, the canals, the topography, &c., &c.

Its new and striking features are the

Wyoming and Lackawana Coal Fields,

And the MAHANOY AND SHAMOKIN COAL DISTRICTS—each in detail, each one of which is worth the price of the Map. This is decidedly, the cheapest, most compact, and the most perfect Map ever issued of the Coal Regions. The above map will be furnished for $1 25 in sheets; in covers, $1 50; on rollers, $2 75; Framed, $2 75.

Also, Scheafer's New and Official

Coal, Iron, Railroad and Canal Map

OF PENNSYLVANIA.

Published by order of the Legislature of Pennsylvania showing the entire area of the State, its ANTHRACITE AND BITUMINOUS COAL FIELDS; its CANALS and RAILROADS; the location of each FURNACE, ROLLING MILL, FORGE, &c., in Pennsylvania; all their avenues and distances to market by the various routes.

No one but so patient and persistent a statician as Mr. S., with his intimate knowledge of the mineral resources of his native State since his connection with the State Geological Survey of Pennsylvania in 1837, could compile in so small a compass, so much valuable and reliable information as we have in the above two maps.

Price of State Map—in sheets, $1 25; in covers, $1 50; on rollers, $2 75. Both Maps in sheets, $2 25; in covers, $2 75; Framed, $2 75.

One copy of the Miner's Journal one year, and both Maps, in sheets, $4 25; in covers, $4 75.

One copy of the Miner's Journal and one copy of either Map, in sheets, $3 25; in covers, $3 50.

These Maps, on sheets and in covers, will be sent by mail to any address, post-paid, on receipt of prices named. Those on rollers can be sent by express.

New York, Saturday, June 4, 1864.

Central Pacific Railroad.

The Legislature of California has passed an act agreeing to pay $105,000 per annum interest on the bonds of the Central Pacific Railroad Company, and to meet the same by taxation in consideration of certain valuable covenants on the part of the company to be performed for the benefit of the State. It is contended by the opponents of the law, that it is unconstitutional, as the Legislature cannot create a debt of over $300,000 without the consent of the people, "except in case of war to repel invasion or suppress insurrection." Nor loan its credit "to or in aid of any individual association or corporation." To this it is rejoined, that no debt is created by the law; that it is a gift donation for a good and sufficient consideration; that the State is in no way responsible for the payment of the bonds, they being issued by the company, and that by previous decisions of the Supreme Court of California in the case of McCauley the principle has already been settled, that such a contract is valid.

It is to be hoped that no more technical objections will be allowed to defeat the very judicious action of the Legislature, by which the people and the trade and the resources of that State will be enormously benefitted.

☞ On the 15th of June the New York Central Company will pay the principal and the last coupon of their 7 per cent, Bonds of 1854–'64, at the Bank of Commerce in this city. Holders are at liberty to present the bonds at once, and receive the principal, and accrued interest since payment of last coupon. The interest on the bonds will cease after 15th June.

Enlargement of the Canals.—Counter Reports of the Canal Board.

At the last session of the Legislature of this State, there was an evident disposition to enlarge the Erie Canal and its feeders sufficiently to admit vessels, at least of the size of the Monitors, the business of transportation to be a consequence of this military aptitude, rather than a primary cause. In reply to a resolution of inquiry as to the propriety and necessity of enlarging the locks upon these canals, (the Champlain was not even named in the resolution,) two reports were sent in, a minority and majority report. As these documents furnish the principal arguments for and against the proposition, we have thought it well to give an abstract of them for future reference, for though it is not probable the measure will be carried for some years to come, we must nevertheless see it continually agitated. There are those whom political and personal interests will never permit to cease from continued attacks on the Treasury, who see in disbursement advantage to their private and partizan interests, and who will not permit the country or the State to enjoy the fruits of their industry, commerce or sacrifices, nor even revenue from their finished public works without a continual struggle to incur farther expenditure and debt.

The majority report of the Canal Board in favor of the enlargement contained the following statements:

That the Erie Canal has, during the last two years nearly reached its maximum capacity for the transportation of property seeking tide water.

That, by reason of the large number of boats necessarily employed to move the tonnage, frequent crowds have been occasioned at the locks and at other places, creating embarrassing and vexatious delays, increasing the time of passage, and materially increasing the cost of transportation.

That the large amount of business now transacted upon the canals, demands, and should have additional facilities, and, in our opinion, the retention of the present trade requires some radical improvements.

That the trunk line of the canal is capable of sustaining the pressure of a large and steady accumulation of trade for many years, and, that to fully appreciate and realize the value of the enlarged canals, it is necessary that the locks should have comparative capacity with them.

That, by thus increasing the capacity of the locks to pass a greater amount of property, the delays complained of would be avoided, the time of passage reduced, and the carrying of large cargoes instead of small ones, would sensibly reduce the cost of transportation.

That such a reduction would retain our present trade, and secure a large proportion of the increased productions of the Western States, which would naturally seek the channel of communication with the seaboard.

That the present unavoidable high rates of transportation tend to divert trade into other channels, and have a strong tendency to encourage the opening of new and rival routes.

That, in our opinion, a much greater necessity now exists for the initiation of improvements in our canals than in 1835, when the project of "enlargement" was determined upon.

The following table gives the total of tonnage for a series of 26 years:

Year.	From Western States, tons.	From this State, tons.	Total tons.
1837	56,255	331,251	387,506
1838	83,233	336,016	419,249
1839	121,671	264,596	385,267
1840	158,148	309,157	467,315
1841	224,176	308,344	532,520
1842	221,477	258,672	480,149
1843	286,876	378,969	635,345
1844	308,025	491,791	799,816
1845	304,551	656,039	959,590
1846	506,830	600,662	1,107,270
1847	812,840	618,412	1,431,252
1848	650,154	534,103	1,184,337
1849	768,659	498,068	1,266,724
1850	773,858	598,201	1,371,859
1851	966,993	541,684	1,508,677
1852	1,161,978	492,721	1,644,699
1853	1,213,090	637,748	1,851,438
1854	1,100,526	602,167	1,702,693
1855	1,092,876	327,839	1,420,715
1856	1,212,650	374,580	1,587,130
1857	919,998	197,201	1,117,199
1858	1,273,099	223,588	1,496,687
1859	1,036,634	414,699	1,451,333
1860	1,896,975	379,086	2,276,061
1861	2,158,425	291,184	2,449,609
1862	2,594,837	322,257	2,917,094

The following table gives the tolls paid on the tonnage going east, and merchandize going west during the 26 years:

Year.	Tolls on Agricultural and other Products. From other States.	From this State.	Merchandise from tide water.	Total on all Canals.
1837	$160,116	$723,756	$408,751	$1,292,623
1838	247,241	803,967	539,703	1,590,911
1839	310,072	756,723	549,587	1,616,382
1840	427,480	865 758	482,510	1,775,748
1841	500,630	924,326	609,927	2,031,883
1842	467,792	827,841	453,565	1,749,198
1843	623,297	892,151	566,142	2,081,590
1844	676,032	1,088,274	682,068	2,446,374
1845	677,922	1,240,678	727,582	2,646,182
1846	1,018,478	1,100,699	641,929	2,756,106
1847	1,583,500	1,213,761	837,943	3,635,204
1848	1,157,905	1,273,060	881,402	3,252,367
1849	1,101,860	1,261,229	905,137	3,268,226
1850	1,137,731	1,222,877	913,291	3,273,899
1851	1,251,390	1,027,124	1,051,213	3,329,727
1852	1,304,018	1,013,950	799,650	3,118,244
1853	1,383,422	945,968	875,328	3,204,718
1854	985,647	1,097,847	780,072	2,773,566
1855	1,148,098	857,859	799,620	2,805,077
1856	1,247,765	743,668	756,770	2,748,203
1857	899,380	674,057	472,204	2,045,641
1858	944,109	888,259	278,386	2,110,754
1859	813,154	682,405	228,386	1,723,945
1860	1,650,978	991,216	367,353	3,009,597
1861	2,682,969	957,697	268,119	3,908,785
1862	3,722,208	1,093,538	372,202	5,188,943

The average time and cargo of boats between Buffalo and Albany are as follows:

Year.	Average cargo of boat.	Day's time between Buffalo and Albany.	Year.	Average cargo of boat.	Day's time between Buffalo and Albany.
1841	41	9	1854	94	8½
1844	49	7½	1855	92	8½
1847	67	10½	1856	100	8½
1848	71	9	1857	100	8½
1849	68	18½	1858	126	8½
1850	76	9	1859	143	8½
1851	78	8½	1860	140	8½
1852	80	9	1861	157	8½
1853	84	9	1862	167	8½

During the last nine years the average speed of the boats has been 1¾ miles per hour only.

The finances of the Canal Department are in a flourishing condition, as will be seen by reference to the Auditor's financial report for the fiscal year ending the 30th of September. There was at that time in the Treasury to the credit of the various canal sinking funds, $4,605,144 58, besides having paid, of the canal debt, during the same fiscal year, the sum of $713,300, none of which was due, and which was purchased at a premium.

In addition to the above, there was a surplus of $981,376 17 from that fiscal year, which, added to the surplus revenue of the preceding year of $685,348 69, make an aggregate amount in two years, subject to the disposal of the Legislature, of $1,636,724 86.

The report then enters largely into the subject of Canadian competition and the naval defence of the lakes, all which have been fully and ably discussed in and out of Congress and the Legislature. The plan of the work as proposed by the report, and the estimates, are as follows:

The plan of improvement (prepared by the State Engineer and herewith submitted) recommended, is the removal of wall benches where they now occur on the enlarged Erie and Oswego Canals, the enlarging of one of the present double locks (where doubled,) and the construction of new locks where single ones are only in use, of a capacity suitable to pass boats 210 feet in length and 25 feet in breadth; the bottoming of these canals at all points so as to obtain 7 feet depth of water; the construction of feeders and reservoirs which may be required to fully supply water in the future; the enlarging of the aqueducts where deemed necessary, and all work demanded to effectually carry out the plan proposed.

The character of masonry adopted for the construction of the locks is hydraulic stone masonry, to be composed of good, sound, grey or blue limestone, with the face stone cut to one half inch beds, and end joints of similar size and quality as those which have been used in the construction of the present locks, the gates at the heads of the locks to be what are termed "tumble or drop gates."

The entire work in connection with the locks to be constructed with a view to strength and durability.

It is proposed to construct (as recommended in the gunboat report, submitted to the Legislature on the 6th of February, 1864, by the State Engineer and Surveyor,) a new entrance to the Troy Basin, at West Troy, three new combined locks at Lockport, instead of five as now in use, two locks at Lockville, in place of three present locks, with a new channel or canal for about three quarters of a mile, two combined locks on the Salina side cut (Oswego Canal,) namely: Nos. 1 and 2.

From a careful examination of the gunboat report alluded to the total estimated cost to complete the entire work is $8,950,000

The cost to deepen the canal one foot to obtain eight feet of water, as embraced in the report mentioned, is not included.

Below is given an abstract of the various branches of work contained in the estimate, with the cost of each:—

Construction of locks, Erie Canal	$4,400,000
" " Oswego Canal ..	1,650,000
Removal of wall benches	1,784,000
Land damages	875,000
Engineering and contingencies	801,000
	$8,950,000

The counter or minority report presented by Mr. Robinson contained the following statements,

That it would be a departure from precedent and policy to tax the people as proposed to enlarge the canals, and would be an "unequal and oppressive taxation."

That the maximum capacity of the Erie Canal has not been reached, as has been falsely asserted. It is stated that—

"The last annual report of the Auditor, page 20, shows conclusively that the maximum capacity of the Erie Canal has not been reached by more than twenty-five per cent. There can be no doubt of the accuracy of the Auditor. He speaks from the record, after long experience, and with all the official data before him. His report shows the capacity of the Erie Canal to be 8,000,000 tons per year—that is 4,000,000 each way; and yet, in 1862, when there was the largest business ever known upon the canals, the whole number of tons cleared from Buffalo was only 1,980,945, and from Tonawanda 99,711. Even the single locks between Rochester and Montezuma were, according to the Auditor, nearly half a million of tons short of the capacity. The whole number of tons arriving at tide water from the Erie Canal was 2,917,094. The total tonnage on all the canals was only 5,598,785, being much less than three-fourths of the capacity of the Erie alone. And 1862 was an exceptional year; an extraordinary state of things existed; there had been large crops at the West; the Mississippi was entirely closed; the Baltimore and Ohio Railroad, and the Chesapeake and Ohio Canal were partially closed; the crops in Europe were short, producing a heavy foreign demand for our breadstuffs; our large armies East and South had also to be supplied; and an immense and unnatural business was thus forced on to the Erie Canal. Such a combination of circumstances is not likely to occur again in a century, and probably not till the end of time.

The falling off during the last season, compared with 1862, was very heavy, and it promises to be much heavier during the ensuing season. Besides, in 1862, we had not the full depth of water and but few of the enlarged boats. During the last year we have expended $630,000 in extraordinary repairs, and have been promised the full depth of water for this year. At the same time, the large boats are increasing, so that, with a diminished business, we shall have largely increased facilities. How then can it, with any truth, be alleged that the maximum capacity of the Erie Canal has been nearly reached?"

Nor is the financial prosperity of the canal policy yet positively and finally determined, for it appears that—

"The temporary rush of business in 1862 produced an extraordinary revenue for that extraordinary year. Nothing can be more fallacious than to adopt that as an index for the future. In the Comptroller's report to the Legislature of 1863, he protested earnestly against its being so regarded, and stated that there was a moral certainty that the then apparent prosperity could not continue. The experience of a single year has verified the prediction. The falling off in the tolls in 1863 amounted to $543,736 03. There is every reason to apprehend that they will go still lower in 1864, leaving, in all probability, a deficiency in the revenue to be supplied by direct taxation. And whilst the revenues are thus diminishing, the expenses are increasing to an enormous extent. They will amount during the years 1863 and 1864, for superintendence, collection, ordinary and extraordinary repairs to at least $2,500,000, and probably to a much larger sum. At the same time the payments which the Constitution imperatively requires to be made to the General Fund Debt Sinking Fund are deficient to the extent of $1,487,500, which, with the quarterly interest required by the Constitution to be paid thereon, will amount to over $2,000,000. Awards for damages which have been made and are now due to the parties and no funds to pay them, as estimated by the Auditor, amount to $700,000. In every year for the last six years heavy direct taxes have been levied upon the people for the canals, and the amount of such taxes paid during six years is $8,030,442 14. Add to this the floating debt of $2,600,000, which the tax payers were obliged to assume in 1859, and we have a total within the six years of $10,630,442 18. But for this enormous amount of taxation the canals would have been irretrievably bankrupt. Such is the naked truth which the subject is stripped of its rhapsody and romance."

The report then proceeds to show how the actual cost of the canals, and their enlargement have been many millions beyond the estimates, and argues that the same result will again happen. It also shows the extent of the heavy burdens of debt the people of this State are now carrying and will have to carry for a long time to come, and concludes with asking if it is not wisest to wait until this rebellion is crushed, and the dominion of order is restored before these new and expensive projects are undertaken.

As our readers probably well know, the views of the minority making this report had the effect of preventing any definite action on the subject, we presume its recommendation to wait will have its effect on all legislatures to come, at least until the war is over.

We take this opportunity to remark, that at a meeting of a special committee of the Chamber of Commerce on the 20th of February last, held to consider the subject of the Niagara Ship Canal, there came up this very subject of the capacity of the Erie Canal, with reference to the traffic press-

ing upon it. Among the gentlemen present were several well-known canal forwarders and shippers, of great experience, and their testimony was unequivocal as to one point bearing directly on enlargement, viz., that with the increase of the size of canal boats their speed had proportionally diminished, and that vessels of 500 tons would be still slower in movement.

And here lies the exact truth, that after the canals were enlarged to admit vessels of from 500 to 1,000 tons, they could not be towed a half mile in an hour on the average. And to move them at this rate would require an enormous application of horse towing power, since the use of steam on a long canal would be a loss of freight room, of capital, and an expense in officers and crews if it were even practicable to use it at all.

A fleet of large steamers in the Erie Canal could not possibly be navigated through its viaducts, locks and embankments without constant collision, delay, interruption, and loss. The recent permission given by the canal board to load our present canal boats to a six feet draught has only been decided upon after mature consideration, but we venture the opinion that five of our present canal boats of 200 tons each will do the same business quicker, cheaper, and more satisfactorily than a vessel of 1,000 tons ever possibly could do.

The true policy of this State and of the Western States, is to construct the Niagara Ship Canal and get as free navigation as possible for our Western production. The Erie Canal let alone will be able to do all the business it is capable of doing. It will pay upon a certain amount of cost, but not an indefinite one. On forty millions which is its capital, it will pay expenses, interest, sustain a sinking fund and save the people from annual taxation several millions annually. Let the enlargement and the various schemes connected with it be carried, and a hundred millions will not cover the whole expense, and the canals will finally be the destruction of our finances. As they are now, they are nearly perfect, and should be let alone. When the maximum capacity is reached, the tolls will be large and remunerating, and the people will be rewarded by an overflowing Treasury and comparative freedom from taxation. If the production of the West presses beyond its future capacity, then we have the heaven given lakes and short ship canals, which if increased by eleven miles only at Chambly, will permit these products to come from Michigan into Lake Champlain, without unlading, whence they can be transported by rail across to Boston, or by canal to the Hudson. The great West need not fear the want of transportation. It is certain to be ready for them ere long.

☞ The Pennsylvania Legislature, before its adjournment, passed a new State Tax Law, taxing the tonnage of all railroads and transportation companies of the State, two cents per ton on the products of mines; three cents per ton on the products of farms, and five cents per ton on merchandize, manufactures and all other articles. Additional taxes are also imposed upon banking and saving institutions, and all other companies not paying a tax on dividends under existing laws. The new law, as estimated, will give an increase of revenue to the amount of about $750,000 a year.

☞ The telegraph line from Baltimore to Westminster has been completed, and is now open to the public. Congratulatory dispatches have been exchanged between the Mayor of Westminster, and the Mayor of Baltimore, both of whom express the earnest hope that the Western Maryland Railroad, which is now under contract to Union Bridge, will soon be completed to Hagerstown, thus putting the city of Baltimore in direct communication with one of the finest and wealthiest sections of the State.

Dubuque and Sioux City Railroad

(Continued from Page 516.)

It now became evident that without some further provisions, the company must lose the whole property. Judgments were daily been obtained against the property, and the bondholders were weary of waiting. On the 1st June 1860, the funded debt stood thus:

Construction bonds issued	$2,728,150
" " redeemed	1,154,800
" " outstanding	$1,576,350

And there was due, and outstanding for coupons passed since October 1st 1857, $46,160.

The bondholders now availed themselves of the provisions of the mortgage trust, and requested the trustees to take possession of the property, and to proceed to foreclose the equities of the Company therein.

Demand having been made by the trustees for the possession of the property because of the default in the payment of interest, the Board of Directors at their meeting held on the 8th June 1860, in view of the embarrassed condition of the Company resolved to consent to a foreclosure of the mortgages and waive all right of redemption; provided that the foreclosure should be brought about in such a way, as that the stockholders would become part owners of the property according to terms to be agreed upon by representatives of all the different interests concerned.

On the 7th July following a meeting of stockholders, bondholders and creditors of the company was held in the city of New York, and certain terms for an amicable foreclosure of the mortgages were agreed upon, to be submitted to the board of directors, and acted upon if approved.

On the 7th August 1860, the terms having been duly considered by the Board of Directors, were by them approved.

On the 9th of the same month the Trustees filed their petition in the District Court of Dubuque County, Iowa, praying that judgment might be rendered in their favor for the amount of principal and interest due, to be paid by a certain day to be fixed by the court or in default of which the equity of redemption on said railroad, franchises, lands and other property be forever barred and foreclosed.

The answer put in by the Company was that the facts and circumstances set forth in the complaint were true; and that the Dubuque and Pacific Company by the Board of Directors after mature deliberation, had come to the conclusion that it was for the best interests of all parties concerned that a decree of foreclosure should be entered, etc.

On consideration of the above petition and answer, and by consent of parties the court ordered, adjudged and decreed:

That the complainants have and receive of the said Dubuque and Pacific Railroad Company the sum of $1,722,510 due, and in default upon the mortgage named in the petition, and that if they fail to pay the same within ten days their equity of redemption in and to the properties mortgaged, be and forever remain barred and foreclosed, and the right and title thereof be absolute in the said complainants.

That the complainants in taking and acquiring the absolute right and title in said property shall take the same to be by them conveyed in conjunction with the Dubuque and Pacific Railroad Company to the—

Dubuque and Sioux City Railroad Company, in accordance with the terms and conditions hereinafter set forth, it being expressly agreed and understood that the same Dubuque and Sioux City Railroad Company is a new company formed under articles of incorporation drawn up and adopted for the benefit of all parties concerned in the Dubuque and Pacific Railroad Company, whether as stockholders, bondholders or creditors.

And by consent as aforesaid it is ordered, adjudged and decreed, That the bonded indebtedness of the Dubuque and Pacific Railroad Company, shall be exchanged dollar for dollar with accumulated interest to date, for preferred stock of the Dubuque and Sioux City Railroad Company, the whole amount of which shall not exceed $2,000,000, which the company have the right to redeem at par at any time; and, that the holders thereof shall be entitled to the net earnings of the road not exceeding 7 per cent, unless the earnings make a dividend of over 7 per cent. on all the stock, in which case the common and preferred shares shall receive the same dividend.

And that the shareholders of the Dubuque and Pacific Railroad Company shall receive in exchange for their stock therein, including dividend interest to 1st June 1860, common stock in the Dubuque and Sioux City Railroad Company to an equal amount.

And that the secured creditors receive in exchange for their claims preferred stock, and the unsecured creditors common stock in the said new company.

Other claims enumerated in the decree were ordered to be settled by the Dubuque and Sioux City Company in cash, preferred stock or common stock according to the nature of the claims respectively.

The Dubuque and Sioux City Railroad Company, in favor of which the above decree was pronounced, was incorporated under the laws of Iowa, on the 1st August 1860, and will terminate in 50 years unless renewed in accordance with law. The Company was formed as expressed in its charter for the purpose of acquiring all of the rights, privileges, property and franchises of the Dubuque and Pacific Railroad Company, and to complete and operate said railroad.

The capital of the company was fixed at $6,000,000 in $100 shares, and of this not exceeding $2,000,000 might be preferred stock.

The Board of Directors have power to issue bonds or other evidences of debt as they shall see proper, provided that three-fourths of the preferred stockholders give their written consent but the whole debt not to exceed at any time $4,000,

Stockholders owning not less than 100 preferred shares are alone eligible for directors, nor until a 7 per cent dividend is paid alike on the preferred and common stock of the Company can the common stockholders come into the direction. The number of directors is nine.

The principal place of business is at Dubuque, Iowa.

The formal conveyance of the road, franchise and property of the Dubuque and Pacific Railroad Company to the Dubuque and Sioux City Railroad Company was made on the 21st of August, 1860.

The Company thus re-organized and occupying the position of the old company, immediately took possession of the property, and back-dated their accession to power as of the 1st August 1860, which is held as the date of the re-organization. By the articles of agreement as already shown, this company succeed to all property, rights and franchises possessed by their predecessors. The share capital authorized is $6,000,000 in shares of $100 and of this $2,000,000 may be issued as preference stock, that being about the amount of the old construction bonds and coupons thereon, for the non-payment of which the road had been sold. By the decree of foreclosure the holders of the preference stock alone are eligible to vote at elections, until the holders of the common stock realize from the earnings of the road a dividend equal to that promised to the preference stockholders, viz., 7 per cent, and should the whole stock earn a larger dividend then the preference and common stockholders are to receive dividends at the same rate.

The *first report* of the new company for the year ending 31st December 1861, shows that the road had earned largely considering the limited machinery and rolling stock on it, and handsomely over the earnings of former years. The road had already been opened to Cedar Falls a distance from Dubuque of 100 miles. The managers in the meanwhile had settled up the entire back payments, and also a large amount due upon old vouchers besides diminishing the floating debt; and in order to settle in full the floating debt a circular had been issued, asking the consent of the preferred shareholders to mortgage the first 100 miles of road, and issue the bonds at par for this purpose alone. At the date of the report however, but few responses had been received.

The liabilities discharged under the decree of foreclosure amounted to this date to $2,539,343, comprising $1,144,400 construction bonds $149,308 interest, $839,800 capital stock, and various smaller sums of floating debt. On the 1st January 1861, there were sold and outstanding construction bonds and interest thereon $297,426, and also pledged and outstanding bonds and coupons $105,180, making a total of $402,606.

The lands granted by Congress to aid in the building of the road were about a million and a quarter acres of which about 350,000 acres had been sold by the Dubuque and Pacific Railroad Company or by the Trustees, leaving about 900,000 acres in the hands of the present company. Of this quantity they had sold 7,382 acres and pledged 76,981 acres. The prices realized from the lands sold had averaged between two and three dollars per acre.

From the Superintendent's report we learn that the condition of the road had been greatly improved during the year by a more thorough system of drainage and track repairs, and the track might be considered as in a fair condition. About 100 tons of iron, however, were required to put the track in proper condition for the economical working of the road. Stations, storehouses, etc., were also needed.

The rolling stock owned by the company consisted of 4 first class and 2 second class locomotives, and one switching engine; 65 box and 35 platform freight cars, and 7 passenger and 2 baggage cars—together a very insufficient compliment for the business offering.

The facilities at Dubuque and at Dunleath for transhipment were also very inadequate and were about to be extended; and arrangements had been made so that through freight trains could be run from Cedar Falls to Chicago in thirty-six hours.

The passenger and freight trains of the Dubuque, Marion and Western Railroad had as heretofore been carried over 22 miles of the Dubuque and Sioux City Railroad, between Farley and Dubuque. The revenue derived from that source during the year (1861,) had been $11,144 91.

The report also alludes to the ballasting, fencing and planting of trees along the line; and to arrangements made with the Illinois and Mississippi Telegraph Company for putting up a telegraph between Dubuque and Cedar Falls.

The *annual report* for 1862 shows a handsome increase in the earnings over those of 1861. Great efforts had been made during the year to retire all of the "Dubuque and Pacific obligations," but there were still outstanding—

Of sold bonds and coupons	$103,573 00
Of bills payable	41,732 10
	$145,245 10

When these bonds and coupons are settled according to the decree of foreclosure, by conversion into preferred and common stock the only remaining portion of the "obligations" will be the 1st and 2d mortgage bonds for which no provisions was made in the decree, and these must be paid in cash. These were secured upon the first 30 miles of road only, and amounted with interest to about $28,000. The total floating debt of the company on the 1st of January, 1863, as shown in the ledger account, amounted to $222,601 02. The report alludes to the effort inaugurated last year to secure the consent of three-fourths of the preferred stockholders to mortgage the first division of the road for a sufficient sum to wipe out the floating debt entirely, and promises that if successful that a dividend will be paid them from the earnings of the year.

The report also alludes to an earnest effort being made to extend the road at once to Fort Dodge. Such extension would benefit various and large interests, and enable the holders of some 500,000 acres of land, derived through this road to dispose of it at remunerative rates. Until the road was built indeed the lands must remain unsold and taxes accumulate.

The *third annual report*, or that for the year 1863, finds more than realized the highest expectations of the friends of the road. A dividend of 7 per cent. had been paid to the preferred stockholders from the earnings of 1862, and a like dividend for 1863, one half having been paid in July, and one half been declared payable in July, 1864. The preferred stockholders had also acceded to the proposition to mortgage the road. Bonds to the amount of $300,000 at 7 per cent., interest payable semi-annually, January 1, and July 1, and principal payable January 1, 1883, had consequently been placed in the hands of three trustees for negotiation, and $261,000 of these had been sold at a premium—the remainder $39,000 would be applied to settle up the balance of indebtedness, and thus free the company from floating debt.

In October, 1863, a contract was let for the construction of a portion of the Second or Fort Dodge Division of the road—from Cedar Falls to Iowa Falls 43 miles—and the work at the date of the report was progressing favorably. It is to be completed by the 1st of September next.

Contracts were also being negotiated, and arrangements perfected for the immediate extension of the remaining portion of the division to Fort Dodge. The total length of the division is between 92 and 93 miles in length.

Notwithstanding the large increase of earnings in 1863 the Superintendent reports that they would have been still larger if the Illinois Central Company had furnished sufficient facilities for taking away the grain and produce from Dubuque. On the last of October the freight got blocked; the elevator and all warehouses, and even the cars on the track became full. This state of matters continued at the date of the report.

The road continued in good condition except for the first 30 miles from Dubuque, the track of which is badly worn, and will require a hundred tons of new rails. Important additions and replacements had been completed, and many improvements were projected and progressing so as to furnish a first class railroad for public use.

The rolling stock on the 1st of January 1864, consisted of 9 locomotives and tenders, and of 130 eight-wheel, and 56 four-wheel cars. Of the 8 wheel cars 8 were passenger and baggage cars, and 122 freight, viz, 65 house, 20 stock and 37 platform cars; and of the four-wheel cars, 17 were hand, 19 truck and 20 dumping cars. All were reported in effective condition, and by improvements in the shops could be increased as needed on the present road. In view of its extension and increase of business more ample facilities for manufacture and repairs are recommended.

From the premises set forth in the several reports to which we have referred in compiling the history of this road, it must be evident that the enterprise has a brilliant future. Year by year since the reorganization, (which interposed a barrier between the bad management of the past, and the more rational proceedings of the present,) its prospects appear to brighten, and if no bad or foul management interpose we see nothing to hinder its becoming a first class property to all parties in interest. It will, however, take many years to develope the value of the line; but still with such advantages as it already possesses, nothing but an inane directory can spoil its productive capacity.

The following tables exhibit the operations of the company since its reorganization in 1860:

INCOME ACCOUNT.

Receipts and expenditures for the three years 1861, 1862, and 1863:

	1861.	1862.	1863.
Bal. from last year	$31,317	$113,096	$203,814

The "Dividend Fund" noted in the Ledger Account consists of the surplus profits from operating the road, and at the end of the year 1863 amounted to $145,278, derived as follows:

Surplus profits 1860	$31,317
" 1861	81,779
" 1862	90,719
" 1863	136,386
Total	$340,200

Dividends on preferred stock, viz:

7 per cent. on $1,812,700 in March 1863.	$126,889
3½ " on $1,943,800 in July 1863.	68,033
Total dividends paid	$194,922
Balance carried to Ledger	$145,278

A further dividend of 3½ per cent. on $1,981,200, was payable on the 15th of January, 1864, and also the interest on the bonded debt on the 1st of the same month, which payments would reduce the balance to $66,801.

The "Surplus Fund" is derived from the operation of the bonded debt, and from the proceeds of land sales. It is managed by the Trustees under the reorganization, and in 1863 operated as follows:

Amount received by Trustees as accumulated interest on coupons attached to first mortgage bonds at the time of sale.	$4,822 38	
Amount received as premium on bonds sold	4,952 50	
	$9,774 88	
Sundry expenses paid by Trustees	$402 89	
Coupons paid July 1, 1863	9,135 00	
	9,537 89	
		$236 99
Proceeds of sales of land grant, lands and town lots sold during 1863		108,697 92
		$108,934 91
Amount to replace earnings paid for—		
D. & P. R. R. Co. obligations	$1,825 34	
Construction	27,966 88	
Engineering	1,103 80	
Right of way	2,382 88	
Construction, Fort Dodge Division	19,976 07	
Taxes on lands	10,985 27	
Expenses charged to land account	4,883 76	
Equipment	19,308 63	
		88,432 73
Amount shown in Balance Sheet		$20,508 18

PROGRESS OF DEVELOPMENT.

Exhibit of the earnings, expenses and profit, from the opening of the first section of the road on the 11th of May, 1857, to the 31st of December, 1863:

Years.	Miles.	Earnings.	Expenses.	Profits.
1857 (7⅔ mos.)	30	$57,760	$29,231	$22,439
1858	47	62,520	41,680	20,840
1859	60	58,630	39,080	19,540
1860	80	121,028	89,509	31,317
1861	100	200,160	118,381	81,779
1862	100	228,560	137,841	90,719
1863	100	276,197	139,811	136,386

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 3d week of May, were:

	1864.	1863.
Passengers	$11,213 57	$3,219 27
Freight	6,551 75	3,069 46
Mail, express & telegraph	1,169 58	750 00
Total	$18,934 90	$7,038 73
This month to date	$63,641 44	$23,892 96

The earnings of the Chicago and Alton Railroad Company for the week ending May 23, were:

	1864.	1863.
Passengers	$17,801 00	$13,486 60
Freight	20,622 59	23,018 78
Sundries	2,192 00	1,719 73
Total	$40,615 59	$38,225 11
Increase 1864		$2,390 48

The earnings of the Galena and Chicago Union Railroad for the week ending May 22, were:

	1863.	1864.
Freight	$35,984 00	$37,710 08
Passengers	8,445 54	12,668 60
Mails, &c	1,300 00	1,300 00
Total	$45,729 54	$51,679 68
Increase 1864		$5,950 14

The traffic of the Great Western Railroad for the week ending May 20th, 1864, was as follows:

Passengers	$22,407 10
Freight and live stock	30,980 06
Mails and sundries	1,243 04
Total	$54,630 20
Corresponding week of 1863	47,174 15
Increase	$7,456 05

The earnings of the Grand Trunk Railway for the week ending May 21, 1864, were:

Passengers	$30,262 04
Express freight, mails and sundries	2,500 00
Freight and live stock	54,538 43
Total	$87,300 47
Corresponding week, 1863	80,631 09
Increase	$6,669 38

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in May, 1864, were $43,909 00
Corresponding week of previous year 24,428 00
Increase, 80 per cent $19,481 00

The earnings of the Michigan Central Railroad for the 3d week in May, 1864, were $66,420 00
Corresponding week of previous year 49,921 00
Increase $16,499 00

The earnings of the Cleveland and Toledo Railroad for the 3d week in May, 1864, were $26,065 00
Corresponding week of 1863 23,839 00
Increase $2,226 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of May, 1864, were $49,754 00
Corresponding week of previous year 53,215 00
Decrease $3,461 00

The earnings of the Chicago and Rock Island Railroad for the third week in May, 1864, were $43,441 00
Corresponding week of previous year 43,588 00
Decrease $147 00

The earnings of the Chicago and Northwestern Railway for the 3d week in May, 1864, were $40,984 45
Same period last year 23,560 91
Increase 73 per cent. $17,373 54

The earnings of the Hannibal and St. Joseph Railroad the first two weeks in May have been:

	First Week.	Second Week.
1864	$44,704 00	$38,186 39
1863	31,202 00	20,052 82
Gain	$13,502 00	$18,133 57

In April, 1864, the earnings were $209,465 98
April, 1863 124,853 01
Gain $84,612 92

The earnings of the St. Louis, Alton and Terre Haute Railroad for the first 2 weeks in May, were:

1864	$64,950 04
1863	48,202 97
Increase in 1864	$16,747 07

The earnings of the Dubuque and Sioux City Railroad for the week ending May 21, 1864:

Passengers	$1,967 35
Freight	4,341 59
Total	$6,308 94
Corresponding week in 1863	$4,977 81
Increase	$1,331 18
May 1 to 21, 1864	$19,776 19
May 1 to 21, 1863	13,748 30
Increase	$6,027 89
Jan. 1 to May 21, 1864	$109,851 68
Corresponding week in 1863	75,281 00
Increase	$34,070 68

American Railroad Journal.

Saturday, June 4, 1864.

Stock Exchange and Money Market.

The immense number of soldiers in the field, and the six hundred vessels of war which keep watch and ward along our coasts and in our rivers, would be unavailing for our defence for more than a limited period, if they were not supplied with munitions of war and the means of subsistence. So that we may say the President and his Cabinet and our gallant soldiers and seamen, are all dependent on the resources of a single mind to obtain as the base of their operations, money which is the sinews of war. In disposing of our praise therefore among those who are earning it by their incessant devotion to the cause of the Union, and the defence of the Constitution, we should not forget what is due to that mind which amidst every opposition and discouragement, has understood the resources of the Country, and has known how to call them forth, which has maintained the credit of the Government by the punctual performance of all its engagements thus far, as if we were in a profound peace and pays its interest in gold without the least difficulty in the midst of a large inflation of Bank money. Certainly something of respect if not of good will is due to the minister who bold yet confident, has provided thousands of millions of dollars during the last three years, and finds himself able to obtain as much more should a dire necessity compel him to make the trial. It is with this sentiment and this impression, we deem it our duty to give our aid to the policy and movements of the Treasury department, which rising above all individual influences and particular interests has given the war its strongest aid, by creating a money of, and for the people, thus becoming in finance what the Department should be, though under pressing circumstances, the master and not the servant of the currency.

Within the last few days it has been reported that Mr. Chase was coming suddenly into the market with another large loan of a new character, and so also it has been said that in the face of his repeated declarations of his intention to contract his issues, he has been freely circulating additional amounts of legal tenders. In the first place we doubt whether any such intention has been determined on, and should it become necessary to obtain more money in advance of the subscriptions to the 10-40, it will be attempted in one of the ways we have suggested in our late financial articles, and so as not to expand the currency but practically to abstract a large portion of it. One of these was by a sale of '81 bonds under the existing authority, and as these are selling at a handsome premium, they offer the simplest and most certain method of obtaining the desired amount. The difficulty of the hour is the dilatory action of Congress in passing the tax bill, and suffering itself to be influenced by the appeals of parties in interest against particular items of taxation. Most incomprehensibly to us, the additional rate on whiskey an article of all others morally and financially a very proper subject for taxation, and which would if taxed produce a revenue less felt, and less really injurious than any we can conceive of, is fought over with a pertinacity if not violence which is truly astonishing. And still more astonishing that Congress is open to any influences which can cause it to hesitate in so plain a case.

The Parliament of Canada on the 10th of May last passed in a single sitting, a resolution for a heavy additional tax on whiskey, and the same night by telegraph the Minister of Finance ordered the duty to be levied all through the Canadas. Even the opposition not only supported the measure, but urged the use of the telegraph to ensure its immediate effect. If Congress can be instructed by example, it now has the opportunity.

We have had one fear however all along, that, of the vast sums of money raised by the Treasury much of it is wasted, by bad administration, by corruption of agents, by connivance among contractors, by the carelessness and oversight of officers, and by ignorance of parties to whom the business of granting contracts is entrusted. We have recently seen how one great criminal in this city succeeded in defrauding the Government of enormous sums, and even after conviction seemed to think he had committed no unusual offence.

We have also seen millions upon millions used in experimenting in naval construction, under the advice of parties who are charged with having an interest in the improvements, and we may therefore urge the absolute necessity of economy in the departments from which the treasury supplies are disbursed. No patriotism of the people, no confidence of capitalists can withstand an unscrutinised and wasteful application of money, and it is the duty of Congress as it is of the honest Press to demand economy in public expenditure as a cardinal principle in every department of the Government.

We have several times shown as we think conclusively, that the inflation so much complained of is attributable almost entirely to the local Bank currency. We have also asserted that Mr. Chase is disposed to absorb the Treasury circulation and repress inflation. We have it in our power to demonstrate the truth of the latter proposition as clearly as we did of the former one.

The circulation of United States notes in round numbers on the 1st of February, was 400 millions of the original issue, and 48 millions of the 50 millions reserved to pay calls for temporary loans. These loans had been reduced between the 1st of October and the 1st of February, 75 millions; 48 millions being paid by the reserve and 27 millions from other sources; that is loans and revenue. Some of the New York bankers insisted that the whole of the temporary loan was in circulation; if so, the circulation between the 1st of October and the 1st of February was actually reduced 27 millions of dollars.

But more illustrative figures may be found in the statements of this month. On the 1st day of May the United States notes' circulation was 440 millions of dollars in the aggregate, to which sum it had been reduced from 448 millions on the 1st of February. The whole circulation on the 1st of May was 441 millions. On the 30th of May it was $440,700,000 showing a reduction of $800,000.

The interest bearing legal tender Treasury notes on the 1st day of May, were 208 millions; on the 30th they were 194 millions, showing a reduction in this description of notes of $13,000,000. This proves conclusively that the circulation of United States notes and legal tender interest notes has not been increased by one dollar during the month; but on the contary has been considerably diminished. Who inflates the currency we should like to know, and how senseless and unjust is the clamor made against the Treasury department by the managers of the local banks! And how imperiously necessary becomes the immediate action of Congress on the National Bank bill, if the real inflation of the day is to be checked and prevented.

We are happy to state that in a very short time, as soon as the revenue cutters are ready for service, the California customs receipts in gold, a million a month or nearly will come directly from Aspinwall to this port as formerly. The surplus funds of our Government in London have all been drawn for, and no further accumulations in the hands of the bankers, and the vaults of the Bank of England will take place. Our readers will remember our remarks on this subject last week, but we had no idea we were so soon to be gratified with the change of the system.

The gold market has taken another start. A year ago we ventured the opinion that by combination if nothing more, it might be put up to 200, and it has come within about eight per cent. of that figure the past week. The imports also continue large, and favor the combination, although practically as compared with other commodities gold is selling for more than it is worth. Government stocks should on the same principle rise to 200, a barrel of flour should sell for $20, and other articles in proportion. But it is not so. Indeed many articles of foreign growth and production paid for in gold, and subject to a heavy duty may be purchased at prices not greater than before the war. This fact is well-known to careful purchasers in this city. Most of the articles which have had the most rapid rise are known to have been bought up, contracted for and held by combination for an advance, and by men who are loudest in support of the Government and the war. Even politicians of great pretentions have not hesitated to engage in purchases of whiskey, and are doubtless among the warmest opponents of the present tax bill.

These, however, are difficulties not peculiar to our own country. They attend all violent changes in the habits and pursuits of the people of other countries. But it is well that public opinion, in the main correct, and honestly directed, should use all its power in enforcing economy at this moment, when the public credit is in possible danger.

It is believed that a foreign loan is within the compass of the Treasury department, if it be deemed advisable. We were in favor of the idea at the commencement of the war, for if we could have placed five or six hundred millions abroad, we should have had a powerful body of interested friends in Europe whose influence would have saved us a world of trouble. There would have been no Alabamas or Floridas, or iron rams fitted out in England to destroy our commerce, and the London *Times* which at the commencement of the rebellion was openly and warmly against the confederates, would have continued so. If an immediate resumption of specie payments be designed by the Secretary of the Treasury, the importation of one hundred millions of specie from abroad would be a step perfectly decisive. And should the campaign against Richmond be a success, it must not be forgotten that cotton enough will fall into the hands of the Government to produce a very large sum towards it. And that the South must in this way if no other, expect to pay a part of the expenses of this war, is very generally admitted. The financial opinions of the daily press we regret to say are supposed very often to be affected by particular interests, having secret relations with proprietorship, and it is often very difficult to comprehend their curiously diverse reports.

Fortunes have frequently been made within a few years past, by parties directing quotations and advocating particular views. Far removed from any such design, we give our readers the very best judgment in our power, and speak of the Money Market and Stock Exchange, personally with the most perfect indifference. We have an abiding faith in the strength, resources, and purpose of the American people, we believe in their solvency and good faith, and we shall continue to maintain, and if possible propagate these opinions. At the same time, there are many evils, dangers, and obstructions to be guarded against, inherent to debt and finance, and it is proper enough to discuss them and point them out "with good and justifiable motives." In connection with this view of the subject, we notice that the London *Economist*, a paper carefully edited and of high authority in Political Economy, has awakened to a "realizing sense" of the intrinsic strength of our Government and people. Whatever may have been its previous doubts as to their responsibility, it seems to entertain none at present, for it has come to the conclusion that we have a productive, an immediate and never-ceasing productive power beyond any hitherto known, and that we can easily bear a steady taxation of six hundred millions a year, a fact of which we believe there is not much doubt, however unpleasant the application of it might be.

The general aspect of the market during the week may be summed up as follows:

In gold very great efforts were made by certain parties to get the premium up to 200, in order to produce effects favorable to the rebel cause both in this country and abroad. For it is seen if the National credit can be effectually damaged, if alarm and anxiety can be created in the public mind, if prices can be disturbed from day to day, there is a hope that some sort of peace might be patched up favorable to the confederates. All these calculations, however, are baseless fabrics of a distempered vision. There is a large majority in the loyal States determined to carry on the contest till the real purpose of it is accomplished, and they have no intention of laying down their arms, or closing their purses till the Union is restored, and the flag floats again over every State of this Republic.

Government stocks are still in good credit, and maintain their quotations. State stocks are reported firm, bank shares inactive, railway bonds steady, and shares not so much sought for. The balance in the Sub-Treasury on Tuesday was $21,128,936 47.

The week's exports from this port of domestic produce and miscellaneous goods (exclusive of specie,) have been to the value of $3,387,911, against $4,606,695 same week last year, and $3,301,894 the corresponding week of 1862. Since 1st of January the exports have been $69,435,853, against $74,831,761 in 1863, and $50,358,779 in 1862.

The value of foreign goods imported at the port of Boston for the week ending May 27, was $911,076, against $566,233 for the correspondiug week in 1863. The value of exports for the week ending May 27, was $384,080, against $450,306 52 for the same week in 1863.

The total value of foreign exports from the port of Baltimore for last week was $218,320.

One of the notable events of the week was the receipt on Tuesday last at this port, by sea and rails of 1,970 bales of cotton of the value of two and a half millions of dollars. Our readers will remember that we have several times alluded to receipts of cotton, consequent on an early termination of the rebellion, as an element which would materially aid our foreign exchange account, and add to the financial strength of the country in adjusting the balance of trade.

We notice that by the steamer City of Limerick from Liverpool arrived within a few days, there came 4,000 Spanish doubloons, and by the steamer

City of Baltimore £16,800 to S. De Visser of this city, and £40 to Schuchardt & Gebhard.

The news from Europe is of a character to make it very probable that a general war is there near at hand.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Indiana War Loan, 98; North Carolina 6s, 58; Illinois War Loan, 100½; At. & Gt. Western (Ohio div.) 1st mort., 100; Central R. R. of New Jersey, 171; Sixth Avenue R. Toledo, Peoria and Warsaw Railway Co.

The Logansport, Peoria and Burlington Railroad (formerly Peoria and Oquawka Railroad,) having been purchased under foreclosure of mortgages by Chas. L. Frost, Edward Weston and H. G. Marquand, was reorganized on Friday in accordance with the plan agreed upon in December, 1862. The name of the new company under charter of the State of Illinois, is the "TOLEDO, PEORIA AND WARSAW RAILWAY COMPANY." The following are Directors for the ensuing year. Charles L. Frost, Edward Weston, H. G. Marquand, James W. Smith, and Zeno Secor of New York; John B. Brown of Portland, and H. F. Clark of Peoria. The Directors have chosen the following officers: CHARLES L. FROST, *President*; D. W. MCWILLIAMS, *Secretary and Treasurer*. A committee was appointed to meet immediately a similar committee on the part of the Toledo, Logansport and Burlington Railway, and agree upon terms of consolidation of the two roads. Efforts are also being made to complete the building of the road from Peoria to Warsaw (opposite Keokuk,) and thus to have a continuous through line under the control of one company from Logansport (on Toledo and Wabash Railroad) to the Mississippi River.

Pittsburgh, Ft. Wayne and Chicago R. W.

We call the attention of our readers to the advantageous terms offered to the present stockholders of the Pittsburgh, Ft. Wayne and Chicago Railway Company—see advertisement in another column—for subscription to a part of the new issue of stock, authorized by the bond and shareholders.

The total authorized was $3,500,000, of which it seems only $1,300,000, or 13,000 shares will be offered this year.

The Company earned in 1863, at the rate of 18 per cent. dividend on its stock, and the increased receipts of this year indicate it will earn equal to 20 per cent on its stock.

The policy of 10 per cent. dividends, payable quarterly, having been adopted, would leave of net earnings, say $650,000 applicable to construction. This and the proceeds of 13,000 shares, now offered, will suffice to cover the outlay deemed necessary last Winter, before the bond and shareholders agreed upon altering the terms of reorganization, and in view of scarcity of labor and the enhanced cost of building, it is deemed sound economy to progress slowly.

☞ At the organization of the Buffalo Extension of the Atlantic and Great Western Railway Company held in this city on the 15th ult., the following gentlemen were elected Directors: T. W. Kennard, New York; Chas. Day, New York; Gaylord Church, Meadville; S. Wann, New York; Henry Martin, Buffalo; Pascall P. Pratt, Buffalo; W. G. Hamilton, New York; S. L. M. Barlow, New York; Jeremiah Larocque, New York; W. A. Thomson, Buffalo; G. R. Babcock, Buffalo; James A. Patteson, New York; C. E. E. Blakesly, New York. The officers were: T. W. Kennard, President, Engineer and Chief; Chas. Day, Vice-President; G. R. Babcock, Solicitor; S. Wann Treasurer; C. E. E. Blakesly, Secretary.

Common Carrier.--Loss of Goods.--Lien for Freight.--Measure of Damage.

In Briggs *vs.* Boston and Lowell Railroad Company it appeared that the plaintiff residing at Racine, Wisconsin, delivered flour to the Racine and Mississippi Railroad Company, taking from their agents a receipt in which they agreed to forward and deliver it to Franklin E. Foster, at Williamstown in Massachusetts. By mistake of the agents of that company, the flour was erroneously delivered or billed to Wilmington, where there is a freight station on the road of the defendants. It was carried by the Racine and Mississippi Company over their road, and at its eastern termination delivered to the carriers next in succession in the line and route from Racine to Wilmington. And it was thus transported by the successive carriers in that line and route in their vessels and cars respectively, according to the bills and directions under which it was forwarded from Racine, until it arrived in due time at Groton, the point of the commencement of the Road of the defendants. And it was then received by them, they paying the freight earned by all the preceding carriers, and carried to Wilmington, where it was duly deposited in their freight depot.

But Franklin E. Foster, to whom it was directed, did not reside or have any place of business in Wilmington, and the defendants were unable to find there any consignee who could be notified of its arrival, or to whom it could be delivered. The defendants' agents immediately instituted a diligent enquiry, but they could not ascertain where the consignee or any other person entitled to have possession of the flour was to be found, or could be notified.

At the expiration of about two months, the defendants, being still unable to find either the owner or the consignee, and it being out of their power to procure a warehouse in which to store the flour for a longer time, caused it to be sold at public auction, and received the proceeds of the sale.

Upon these facts, the plaintiff seeks to recover the value of the flour; contending, in the first place, that as Williamstown was the place of destination of the flour, under the directions which he gave the Racine and Mississippi Railroad Company, and according to their agreement in the receipt given by them to him, the defendants had no right to receive the flour at Groton, and were guilty of the unlawful conversion of it to their own use by transporting it thence to Wilmington; although in such reception and transportation of it over their road they acted in good faith, and strictly in conformity to the bills and directions of the Racine and Mississippi Railroad Company, and by which it was regularly accompanied over each and all the lines and routes of the successive carriers.

Merrick, J. says in deciding this case, the same person may be, and often is, not only a common carrier, but also the forwarding agent or the owner of the goods to be transported. Story on Bailm, §502, §537. He must necessarily act in the latter capacity whenever he receives goods which are to be forwarded not only on his own line, but to some distant point beyond it on the line of the next carrier, or on that of the last of several successive carriers on the regular and usual route and course of transportation, to which they are to be carried and there delivered to the consignee. The owner generally does not and cannot always accompanying them and give his personal directions to each one of the successive carriers. He therefore, necessarily, in his own absence, devolves upon the carrier to whom he delivers the goods, the duty, and invests him with authority to give the requisite and proper directions to each successive carrier to whom, in due course of transportation, they shall be passed over for the purpose of being forwarded to the place of their ultimate destination. Otherwise they would never reach that place. For the first carrier can only transport the goods over his own portion of the line; and if he is not authorized to give the carrier with whose route his own connects directions in reference to their further transportation, they must stop at that point; for although in general every carrier is bound to accept and forward all goods which are brought and tendered to him, yet he is not so bound unless he is duly and seasonably informed and advised of the place to which they are to be transported. Story on Bailm § 532. Judson *vs.* Western Railroad, 4 Allen, 520.

Hence it results by inevitable implication that when an owner of goods delivers them to a carrier to be transported over his route, and thence over the route of a succeding carrier, or the routes of several successive carriers, he makes and constitutes the persons to whom he delivers them his forwarding agents, for whose acts in the execution of that agency he is himself responsible. And therefore if the several successive carriers carry the goods according to the directions which are given by the forwarding agents, they act under the authority of the owner, and cannot in any sense be considered as wrong doers, although they are carried to a place to which he did not intend that they should be sent. And in such case the last carrier will be entitled to a lien upon the goods, not only for the freight earned by him on his own part of the route, but also for all the freight which has been accumulating from the commencement of the carriage until he receives them, which, according to a very convenient custom, which is now fully recognized and established as a proper and legal proceeding, he has paid to the preceding carriers. Stevens *vs.* Boston and Worcester Railroad, 8 Gray 266.

Applying these rules and principles to the facts developed in the present case, the conclusion is plain and inevitable. It is conceded by the plaintiff, and agreed by the parties, that the flour was carried by the Racine and Mississippi Railroad Company over their road, and was then delivered to the carrier with whose route their own connected, and was thence transported in strict compliance with and exactly according to the directions given by them and contained in the bills which they forwarded with and caused to accompany the flour over the whole route from Racine to Wilmington, by the several successive carriers, and among others by the defendants. The Racine and Mississippi Company were the duly constructed forwarding agents of the plaintiff; and as the defendants acted under their authority, they rightfully received the flour at Groton and carried it to Wilmington. And having under that authority, paid all the freight which had accumulated in the whole course of the conveyance, including that which had been charged by the forwarding agent, up to the time when they received the flour they were, as soon as it was conveyed to and deposited in their own freight house, entitled to a lien thereon for the entire freight thus paid and earned and they cannot, either by the transportation of it under such circumstances over their own road, or by the detention thereof for the purpose of enforcing their lien upon it, be held to have unlawfully converted it to their own use.

The conclusion does not at all conflict with the decision in the case of Robinson *vs.* Baker, 5 Cush. 37, upon which the plaintiff, in support of his position, chiefly relies. For there is an essential difference between the facts in the present and those which appeared in that case. There it was shown that the plaintiff, the owner of a parcel of flour, delivered it at Black Rock, on board of one of their canal boats to the Old Clinton Line Company, who gave for it bills of lading in duplicate, wherein they undertook and agreed to transport it to Albany, and there deliver it to Witt, the agent of the Western Railroad. The plaintiff sent one of these bills of lading to Witt and the other to the consignee at Boston, thus reserving to himself the right and assuming the responsibility of giving to Witt the directions under which he was to act. The service which the Old Clinton Line Company was to render was exclusively in their capacity as common carriers. They had only to carry the flour to Albany and there deliver it to Witt. They had no other duty to perform; no right to exercise any control over it for any other purpose. They were not, therefore, the forwarding agents of the plaintiff, nor invested by him with any authority to give directions as to the further transportation of the flour, or to make any other disposition of it than its delivery to Witt. Yet upon its arrival in Albany, in consequence of the inability of Witt immediately to receive and take charge of it, the agents of the Clinton Line Company, without right and in violation of their duty, shipped the flour to the city of New York, and from there to Boston in the schooner Lady Suffolk, whose owners claimed a right to detain it under a lien upon it for the freight. But the court, upon the general principle that if a carrier, though innocently, receives goods from a wrongdoer without the consent of the owner, express or implied, he cannot detain them against the true owners until the freight or carriage is paid, determined they had no lien upon the flour, and that their claim to that effect could not be sustained. But if they had been the forwarding agents of the owner he would have been responsible for their acts, and his consent to the diversion of the property from its intended route of transportation would have resulted by implication from their directions, and the respective carriers would then have become entitled to hold it under a lien to secure payment of the freight.

When the flour had been carried over their road to Wilmington and deposited at that place in their warehouse, the defendants had, as has been sworn above, a lien upon it for all the freight which had been earned in its transportation from Racine. But this gave them only a right to detain it until they were paid; not to sell it to obtain the remuneration to which they were entitled. In the case of Lickbarrow *vs.* Mason, 6 East, 21, it is said by the court that an owner may sell or dispose of his

property as he pleases; but he who has a lien only on goods has no right to do so; he can only detain them until payment of the sum for which they are chargeable. And the rule which is now well established, that a party having a lien only, without a power of sale superadded by special agreement, cannot lawfully sell the chattel for his reimbursement, is as applicable to carriers as it is to all other persons having the like claim upon property in their possession. Jones *vs.* Pearle, 1 Stra. 556. 2 Kent. Com. (6th Ed.) 642 Doane *vs.* Russell, 3 Gray, 382. It is in distinct recognition of this principle that the legislature have provided that when the owner or consignee of fresh meat, and of certain other enumerated articles liable soon to perish for want of care, shall not pay for the transportation and take them away, common carriers who have a lien thereon for the freight may sell the same without any delay, and hold the proceeds, subject to their own lawful charges, for the use of the owner.

None of the provisions of the statute referred to extends to the case of flour transported in barrels as an article of merchandise. And therefore the defendants had no authority under the statute and no right at law to sell the flour which belonged to plaintiff, although they had a valid and subsisting claim upon it, and were unable to find after diligent inquiry where the person to whom it ought to be delivered resided or had his place of business, and there was no danger of its becoming worthless by longer detention of it in their warehouse. And consequently the sale which they made was an unlawful conversion of it to their own use, which renders them liable in an action of tort to the owner for its value, or rather for the value of all the right and interest which he at that time had in it, which is the merchantable value less the amount of the lien upon it.

Judgment for plaintiff.

Opening of the Ninth National Bank.

The Ninth National Bank opened their splendid and well appointed bank-rooms yesterday, at No. 363 Broadway. The suite of rooms embrace a business office 29 by 100 feet, and three private offices. A number of prominent gentlemen were present at the opening of the institution, among whom were the Hon. Geo. Folsom, C. B. Wilson, Prof. Webster, Col. Burton, S. B. Dutcher and Mr. Van Duzer. At the close of a princely lunch, S. L. Hill, esq., "toasted" the President of the Ninth National Bank, Joseph U. Orvis, esq. Mr. Orvis responded happily, and gave the following statistics: Deposits of this day, $2,166,000; subscriptions to 10-40 bonds $900,000. The next toast was given for the Father of the National Banks, Secretary Chase, and the Hon. S. B. Dutcher responded. The officers of the Bank are: Joseph U. Orvis, President; H. M. Humphrey, Cashier; Directors, W. A. Kobbe, T. A. Vyse, jr., G. A. Wicks, B. L. Solomon, S. A. Fellows, S. L. Hull, C. Minzesheimer, G. C. Whitehouse, and J. H. Orvis.

☞ Upon a rigid and careful examination [by officers of the UNITED STATE'S Navy,] into the merits of "BAIRDS PREPARATION," for the protection of steam boilers they pronounce it to be the best extant. The owners of the Steamships "Merrimac" and "Mississippi" through their Chief Engineer, certify as to its efficacy in preventing incrustation, oxidition or the deposit of lime and salts in the boilers of the two ships referred to. Merritt & Walcott, 64 Courtlandt street, New York, are the agents.

Interest and Dividends.

The Little Miami Railroad Company have declared a dividend of five per cent, payable in Cincinnati on the 6th of June. The government tax will be paid by the company.

The Indianapolis and Madison Railroad Company have declared a dividend of eight per cent, upon the preferred shares and of six per cent, upon the common shares (free of government tax), payable 1st June at the office of J. & S. Ferguson, 35 Pine st.

The interest due on the Bonds of the New York and New Haven Railroad Company, June 1, 1864. will be paid on presentation and surrender of the Coupons at the office of the Company, corner of Fourth avenue and Twenty-seventh street, or at the Bank of the Republic.

The coupons on the bonds of the Second avenue Railroad Company, due 1st June, will be paid at the office of Messrs. William & John O'Brien, No. 58 Wall street.

The coupons due June 1, on the fifth mortgage bonds of the Erie Railway Company, and on the mortgage of the Long Dock Company, will be paid upon presentation at the office of the Company.

The coupons due June 1st, 1864, on Milwaukee City Readjustment bonds will be paid on presentation at the office of W. Schall & Co., 58 and 60 Exchange Place.

Brazilian Steamship Line.

The bill to authorize the establishment of a line of steamers between the United States and Brazil, has passed both branches of Congress, been signed by the President and has become a law. The contractors are to perform twelve round trips a year, and for this service are to be paid $150,000. It is understood that the Government of Brazil is to contribute a similar sum. We are glad that this enterprise is at last to be undertaken. We want Ocean Mail correspondence to ensure a revival of our foreign commerce, and as one line is totally inadequate to secure this result, we insist upon it that our Government should at once employ our surplus wooden war steamers on other important routes, as has been recommended by the Secretary of the Navy, the New York Chamber of Commerce, and by the intelligent press of the country. When the war is over, these vessels will be totally without employment, and they could therefore be placed on a dozen different lines with half armament and crews, be usefully occupied in carrying mails, treasure, and express freight, become self-supporting, continue to be a school for our young officers, and give effectual protection to the flag in the various seas where they were employed. It is really strange that measures of such immense commercial importance can not receive more attention from Congress, then they do, while "trifles light as air" seem to catch their undivided attention. There can be no commerce without correspondence. Give our merchants regular mails to all the leading foreign ports, and business will at once revive.

☞ At the annual meeting of the shareholders of the Illinois Central Railroad Company, held at Chicago on the 25th ult., W. Tracy, W. H. Osborn, and A. S. Hewitt, were re-elected by a large majority to serve as directors for four years. Mr. Henry Chauncey was elected in place of Leroy M. Wiley.

Payment of Government Drafts.

The Bank of America having refused to receive payment of a draft on the Government in National bank notes, the Cashier of the First National Bank in this city wrote to the Comptroller of the currency on the subject requesting his opinion of the subject. To this letter the following reply was given:

TREASURY DEPARTMENT, OFFICE OF COMPTROLLER OF THE CURRENCY, Wash., May 28, 1864.

DEAR SIR:—Your favor of the 27th inst. is received. I am acting here in an executive and not in a judicial capacity, but I have no hesitation in giving my opinion upon the point presented by you, which opinion is, that Government depositaries whether they are Assistant Treasurers or National Banks, have the right to pay Government drafts, by whomsoever held, in the kind of currency which is receivable for Government dues, and by which Government obligations can be discharged.

The Government is bound to receive in payment of all its dues, except duties on imports, the notes of the National Banks. A draft of the Government upon a National Bank is clearly payable to the Government in the National currency, and I have yet to learn that the negotiation of a draft changes its character or the obligations of the payer.

Very truly yours.

H. MCCULLOUGH, Comp.

JAMES CURPHEY, Esq., Cashier First National Bank, N. Y.

Adirondac Railway.

It is stated that a Company has actually commenced the construction of a railway between some point on the Saratoga and Whitehall and Adirondac, the locality of the celebrated iron mines in the Northern part of this State. The products of these mines and the valuable lumber in the vicinity, it is believed will give all the freight necessary, to make the road profitable. Besides this, the very romantic and beautiful mountain and lake scenery along the line must attract a large pleasure travel during the summer months.

☞ The Boston *Commercial Bulletin* says, "T. W. Park of Bennington has bought up the Western Vermont Railroad for the purpose of extending the Harlem Railroad to the Vermont State Line and intersecting with the Western Vermont at North Bennington. The road will pass through Berlin, Petersburg, &c., and form a direct railroad route from Montreal to New York. Commodore Vanderbilt of New York is interested with Mr. Park in the enterprise."

☞ The Paterson (N. J.) *Daily Press* states that surveys have been made for a railroad from Sloatsburg Station, on the Erie, about 35 miles from Jersey City, the line to run west for five or six miles, to reach the old Sterling Works, with a branch of two or three miles to extend to the Ringwood Mines, in New Jersey. The stock has been taken, and the work of building it is to begin in a few days. The *Press* also announces that a company has been chartered to build a railroad between Newark and Paterson. A preliminary meeting of the corporators has been held, and the subscription books opened. The road will be about 13 miles in length.

☞ The Directors of the Boston and Erie Railroad, have decided upon the location of their road from Mechanicsville to Willimantic, which will carry it through Putnam, Conn.

Mr. Cisco announces that 5 per cent. legal tenders will be received from subscribers to the 10-40 loan at the full amount of face and June coupon.

☞ The Illinois Central Railroad Company, at their annual meeting, authorized the conversion of the cancelled bond scrip into the scrip shares of the company, and the process is now going on at their office in this city.

☞ Four new steamers have arrived at the mouth of the Colorado River, and are about to engage in its traffic. This will permit almost direct shipments of supplies, and the return of the products of a large number of mines, located at short distances from the banks of the rivers, fifteen of which are now being worked with a great prospect of success. In all the gold in the vicinity from 30 to 40 per cent. is obtained of silver.

The Overland Mail.

It is announced officially from the General Post-office Department that under the new law in relation to the overland mail to California, all the mail matter, except one newspaper to a bona fide subscriber and franked matter, must be prepaid at *letter rates* to entitle it to transmission through the mails, *by the overland route*, westward beyond the western boundary of Kansas and eastward from the eastern boundary of California.

Notice to the Holders of the Three Years' 7-30 Notes.

The Secretary of the Treasury has given the following notice to the holders of the three years' 7-30 notes, falling due after August 19 and October 1, 1864:

The three years seven-thirty notes, issued under the act of July 17, 1861, are exchangeable at any time, before or at maturity, for six per cent. bonds of the acts of July 17 and August 5 1861, when presented in sums not less than $500. The three years', notes were issued bearing date of August 19 and October 1, 1861, and become due after August 19 and October 1, 1864. Holders of the notes of either date are notified that they may be presented for immediate exchange for six per cent. bonds, with full coupons, drawing interest from July 1, 1864, up to which date interest will be paid, without delay, on the three years' notes, at the rate of 7-30 100 per centum per annum. The interest found to be due on the three years' notes up to July 1, 1864, will be transmitted by the United States Treasurer's draft, payable in coin.

The six per cent. bonds, which are exchanged for the principal of the three years' notes, will be issued drawing interest from July 1, 1864, the date up to which the three years' notes are settled, and will be transmitted as fast as they can be conveniently prepared. Parties wishing to exchange the three years' notes in the above manner must send to the Treasury Department in sums of $500, or its multiple, indorsed, "Pay to the Secretary of the Treasury for redemption," which indorsement must be signed by the party on whose account they are to be exchanged. They must be accompanied by a letter stating the numbers, denominations and dates of the notes, and the kind, registered or coupon, and denomination of the six per cent. bonds wanted in exchange. The six per cent. coupon bonds are of the denominations of $500 and $1,000, and the registered bonds are of the denomination of $500, $1,000, $5,000 and $10,000. When registered bonds are ordered, parties must state at which of the following places they wish the interest to be paid, viz: New York, Philadelphia, Boston, Baltimore or New Orleans.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern

PERKINS & LIVINGSTON,
54 Exchange Place,
NEW YORK.

NOTICE TO SHAREHOLDERS

OF THE

Pittsburgh, Fort Wayne and Chicago Railway Co.

THE UNDERSIGNED, commissioners, authorized to sell thirty-five thousand new shares of the capital stock of said company, by joint vote of the shareholders and bondholders, for the purpose of constructing a double track, procuring additional equipment, &c., now propose to sell thirteen thousand shares of the same as follows:

They propose to issue to the shareholders, who stand registered as such on the books of the company at 2 o'clock P. M., of the 10th of this month, one share for each five shares then standing in their name at the par value of $100 for each share.

Books of subscription will be opened at the office of Winslow, Lanier & Co., No. 52 Wall street, on the 11th of June, and kept open until the 20th of June, at 3 P. M., where each shareholder can call and subscribe, or signify his wishes by letter, addressed to J. F. D. Lanier, Chairman. The new shares thus subscribed for will bear dividend from the 1st July proximo.

Payments will be required as follows: One-fourth on the 21st June, on notification of acceptance; one-fourth on the 15th July; one-fourth on the 15th August, and one-fourth on the 15th September.

Transferable stock scrip will be issued, redeemable in full-share certificates on final payment of the installments.

Non-compliance with any of the conditions of this subscription subjects to forfeiture any payments made thereon.

This stock is mainly to pay for iron rails, rolling stock, &c., already advantageously purchased. The high price of labor, and the great difficulty of procuring the same, and the enhanced rates for all materials, in the opinion of the chief engineer and the chief executive officers of the company render it altogether improbable that any further amount of the stock will be offered during the present year.

If a further amount can be economically expended in increasing the capacities of the line this year, the company will probably have other means to meet the same.

The commissioners reserve the right to extend the time of subscribing to non-resident shareholders, who may desire to avail themselves of the benefits of this notice, on such terms and conditions as the commissioners may impose.

The commissioners, also, reserve the right to dispose of at their discretion, for the benefit of the company, any of the shares not taken by shareholders under this notice.

J. F. D. LANIER,
S. J. TILDEN,
J. EDGAR THOMSON,
SPRINGER HARBAUGH,
L. H. MEYER,
Commissioners.

NEW YORK, June 1, 1864.

NINTH NATIONAL BANK

OF THE CITY OF NEW YORK,

363 Broadway, cor. Franklin Street.

This Bank has a cash capital of
ONE MILLION DOLLARS,
and has commenced business in its new Banking Rooms, corner of Broadway and Franklin street.

We invite accounts and will discount business paper and receive all National Bank bills at par, and make collections throughout the United States and Canada at the lowest rates. Uncurrent money will be received on deposit, deducting for Eastern one-tenth per cent. and for State one-fourth per cent.

JOSEPH U. ORVIS, President.
H. M. HUMPHREY, Cashier.

Our Importations.

Our imports from abroad, especially from Europe, continue largely in excess of our exports. And we come to the unpleasant conclusion, that the United States are not large enough, industrious enough, and ingenious enough, do not produce and dispose of enough to pay for their purchases even in a single country like England, although it is not larger than some of our States and really unable without foreign assistance to procure full supplies of food or clothing for its population. For of neither wool nor wheat does England raise what she consumes. Yet with pauper labor and steam power she makes herself our creditor in spite of our superior advantages, and after surfeiting herself with our agricultural supplies, till she will hardly receive our cereals as a gift, demands our gold by hundreds of thousands of pounds monthly, and gets it. What is the secret of all this? How happens it that this commerce with England appears to be so largely in her favor. If we could solve this problem we should be doing the public a favor. Without attempting to do this, we shall be able to present some singular features attending this foreign trade.

In the first place there are no such markets in the world as the American markets. Our people are ready and cheerful consumers; they are free-handed, good-tempered and untrammeled by conventionalities and caste. They wear what they please, and eat what they please. The working classes are not only powerful as members of the body politic, but they earn large wages and if industrious rapidly acquire property. Foreign importations especially of novelties, useful or merely amusing, valuable or ornamental, are within the reach of all classes, and it is impossible to discover by the appropriation and use of such articles who are the rich or who the poor. The houses of our mechanics are more comfortably furnished, and their daily life is superior in all respects to those of any similar class in England, or France, or Germany; for there is among our countrymen no motive to lay up money for future generations, while there is every inducement to enjoy life as it goes, and life is worth having in a country where there is real equality before the law, every opportunity to improve time and talent, large reward open to industry and virtue, and rational enjoyment with even moderate expenditure. The habits of such a people, always on the march of progress, are free and generous, and the foreign merchants, through their agents, have found out that here is the place to make large profits, and here they *are* made with great rapidity. The men who have come from abroad and realized colossal fortunes in a few short years, would have had no chance whatever in their native countries. We must therefore expect to see for a long time to come, excessive importations, certainly as long as we are able to pay for them, and what is called the balance of trade will continue to be heavily against us. If we will buy as long as we can pay or get credit, the goods will come, for most of them if the truth must be told, could not be sold anywhere else. No other country would have them or is able to purchase them. Yet we are forcibly struck with the singular character of a large portion of these imports when we look over the lists of consignments by the vessels which come to this port. Thus the ship Research within the last few days, among an infinite variety kindly brings us from London large quantities of beer, wool, lead, skins, (we had supposed that no animals of the kind, no *feræ naturæ* remained in England to be killed for their skins,) soda, rags, horns, gums and lead; the Cordillera brings us rice, large quantities of *scrap iron*, grindstones, ginger, fifty cases of sauce concocted by some industrious London grocer, coarse salt, *scrap* lead, puncheons of whiskey, and iron in all manufactured forms and shapes. The City of Limerick brought us plough plates, just as if our ploughs were not already the best in the world. The ship Hemisphere brought us also a large quantity of fine salt, pig iron by the hundred tons, felt, brown stout, pig lead, &c. The Westminster generously brought us nutmegs, gathered in the East and sent round to Europe to make them dry before they were good enough for us, and skins (of more British wild beasts!) The Jeremiah Thompson brought more salt, flocks in hundreds of bales, 40 casks of plaster, of which our own State is full, while other vessels all arriving at the same time follow up the idea of landing all the iron, all the coal, all the salt, all the shoddy, all the pig lead all the beer, whiskey, etc., which their ships will carry, our warehouses hold, and our people buy.

Now there is scarcely one of these articles which could not be produced at home. Our iron and coal mines are inexhaustible and of the best decription. We have all the lead and zinc we want at hand, if we will dig for it. We can make our own glass, our own earthen wares, and if we want teas, spices and gums, we are as near to the countries of their production, and soon shall be nearer than England, and we can import them for ourselves, and at least save one commission. It has appeared to us that instead of confining our European exports to our cereals, and our provisions, we should attempt to turn the tables upon certain foreign nations by sending our manufactured articles among them in greater quantities. American pianos are without competition abroad. American furniture is now as elegantly designed and finished as the best Parisian, and is much more lasting. Our cotton prints have always beat the English among the nations of the East. Why not also send them over a few ship loads of articles such as we ourselves buy, and see what will come of them.

We however, may anticipate the reply, nothing. For the English as a nation want nothing but what they can eat and wear, and the large body of the people have no surplus funds to spare on anything else. The generous meals, the occasional bottle of champagne, which is no stranger at the board

of any American, the fine and well-fitting clothes which on Sundays and holidays cover almost every workingman among us, are things unknown of the same classes abroad. England then is not a country which will ever be a consumer such as ours. Her aristocratic classes spend all that is spent for luxury, art and fashion, but the number is limited. We must therefore expect to see our foreign commerce mainly consisting of imports as long as we are so prosperous and full of life, and so ready to enjoy the boon which freedom and equality offer without stint or reservation. If ours was not a gold producing country, if the production was not constantly and largely increasing we could not fail to suffer by these excessive importations.

A people that gives gold by the million in return for scrap iron, scrap lead, old copper, glass beads, etc., certainly deserves some sort of discipline to bring it to its senses. On the other hand it may be remarked, that those who have vilified us as a bankrupt nation, and as on the high road to ruin, not worthy of credit at home or abroad, should if they believe what they say, cease importing to us in the manner and to the extent they do. If not let them cease to depreciate us and to damage our credit and our national securities.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey present to the stockholders the following report, for the year ending December 31st 1863. For convenience of comparison, many of the statements are made to cover the year 1862 as well as the past year.

SERVICE OF THE ROAD AND FERRY.

The service of the road has been as follows:

	1863.	1862.
Miles run by passenger trains	214,483	201,833
" " merchandise "	187,159	146,136
" " coal trains	383,451	309,363
Total by transportation trains	785,093	657,332
Miles run by wood trains	1,662	2,463
" " gravel and constr'ction trains	25,285	26,410
Total miles run by trains	812,041	687,204

The passenger trains have also run 59,164 miles on the New Jersey Railroad, between Jersey City and Elizabeth, drawn by the engines of that Company, against 53,584 run last year.

During the year the boats have run 30,024 miles on the ferry between New York and Elizabethport, and 8,504 miles in carrying live stock to Fortieth street, making a service of 38,528 miles. In 1862 they ran 47,656 miles.

PASSENGERS FREIGHT AND COAL.

A comparison of the passenger business of the year 1863 with the year 1862 gives the following results:

	1863.	1862.
Number of passengers	529,017	419,803
Miles travelled by pass.	13,181,971	11,759,879
Equal to through pas'ngers	175,759	156,798

A comparison of the merchandise business of the two years, in tons of 2,000 lbs., (excluding iron,) gives the following results:

	1863.	1862.
Number of tons carried	263,625	196,958
Tons carried one mile	13,540,017	11,168,060
Equal to through tonnage	180,534	148,907

A comparison of the iron tonnage of the two years, in tons of 2,240 pounds, gives the following results:

	1863.	1862.
Number of tons carried	80,853	70,202
Tons carried one mile	5,172,456	4,487,108
Equal to through tonnage	80,820	70,111

A comparison of the coal business of the two years, in tons of 2,240 pounds, gives the following results, the through tonnage being calculated from Easton to Elizabethport:

	1863.	1862.
Number of tons carried	1,049,881	816,570
Tons carried one mile	56,795,557	43,447,732
Equal to through tonnage	887,431	678,871

There was an increase in Lackawanna coal of 111,579 tons, and in Lehigh coal of 121,732 tons.

The coal tonnage over the road, since the transportation of coal was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.
1856	98,670	33,325	131,995
1857	209,950	84,841	294,791
1858	417,726	122,923	540,649
1859	455,681	183,277	638,958
1860	590,863	263,906	854,769
1861	568,869	254,345	823,214
1862	502,375	314,195	816,570
1863	613,954	435,927	1,049,881
Total	3,458,088	1,692,739	5,150,827

EQUIPMENT.

The Company own 51 engines, of which 23 burn wood and 28 hard-coal. Of these engines, 39 are narrow gauge and 12 broad gauge. Fourteen new locomotives have been placed on the road during the year, and five more are ordered but not yet delivered. About thirty-five engines are reqnired for the ordinary daily service.

The equipment of cars is as follows: 20 first-class passenger cars, 2 second-class passenger cars, 7 baggage and mail cars, 75 house freight cars, 20 covered cattle cars, 103 eight-wheel platform cars, 200 eight-wheel coal cars, 110 six-wheel platform cars, 6 caboose cars, 42 four-wheel gravel cars, 18 dirt cars, and 1 wrecking car. Of the above, 2 passenger cars and 40 six-wheel platform cars have been added during the year, and 6 passenger cars are ordered but not yet delivered. The Audenried coal cars (eight-wheel and four-wheel have been purchased since the year closed.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1863 compared with 1862:

	1863.	1862.
Receipts:		
Passengers	$287,959 28	$230,305 41
Merchandise	605,335 27	481,977 11
Coal	1,021,151 57	661,280 85
Mail	7,600 00	7,600 00
Express	11,992 29	8,261 61
Rents	1,175 35	1,551 91
Miscellaneous	6,762 70	6,609 73
Total receipts	$1,941,976 46	$1,397,586 62
Expenses:		
Running expenses	$156,457 20	$129,839 30
Wood consumed	61,707 30	62,768 68
Coal consumed	113,980 04	50,006 28
Repairs of road	136,518 83	126,351 93
Repairs of engines	53,193 22	38,816 51
Repairs passenger cars	15,492 03	11,196 67
Repairs freight cars	12,005 73	13,951 33
Repairs coal cars	3,109 61	129 64
Repairs docks, Elizabethport	19,281 37	10,463 13
Repairs bldings, br'ges	19,119 98	8,727 66
Repairs tools, mach'y	2,391 16	5,378 86
Expense account	32,470 87	25,521 16
Miscellan's expenses	25,877 86	10,967 51
Ferry running expens.	49,313 58	44,840 13
Ferry boat repairs	9,559 95	11,840 24
Ferry miscell. expens.	13,247 52	11,647 87
Car service	91,005 69	60,799 26
Total expenses	$814,732 44	$623,245 06
Balance net earnings	$1,127,244 02	$774,341 56

The following table shows the receipts, expenses, and net earnings from the beginning of the annual reports to the Legislature to the present time:

	Receipts.	Expenses.	Net Earnings.
1853.	$349,018	$197,629	$151,389, or 43 p. c.
1854.	378,145	197,349	180,796, or 48 "
1855.	393,729	208,856	184,873, or 47 "
1856.	553,479	258,308	295,171, or 53 "
1857.	682,314	340,502	341,812, or 51 "
1858.	836,934	345,614	491,320, or 58 "
1859.	971 702	385,716	585,986, or 61 "
1860.	1,185,848	475,457	710,391, or 60 "
1861.	1,201,895	522,452	679,443, or 57 "
1862.	1,397,586	623,245	774,341, or 56 "
1863.	1,941,976	814,732	1,127,244, or 58 "
Total	$9,892,626	$4,369,860	$5,522,766, or 56 "

An increase in receipts is here shown of $544,389 84, or 28 per cent. The increase in passenger business was $57,653.87, or 25 per cent. In merchandise receipts, $123,358 16, or 25 per cent, distributed through every department. In coal receipts, $359,870 72, or 54 per cent. This latter is owing both to advanced rates and increased tonnage, but in the other freight rates and the passenger rates no changes have been made since the war began.

The expenses show an increase of $191,487 88, or 30 per cent. There has been an increase in running expenses of $26,617 90; in fuel consumed of $62,914 48; in repairs of road of $10,166 90; in repairs of equipment of $19,706 44; in other repairs of $16,222 86; in general expenses of $21,859 56; in car service of $30,206 43; and in ferry accounts of $3,792 81.

The gross receipts per mile run have been as follows: From passenger trains, $1.47 against $1.26 in 1862; from merchandise trains, $3.28 against $3.29; from coal trains, $2.66 against $2.14. The average receipts per mile run from all trains has been $2.47, against $2.12 the previous year.

DIVISION OF WORKING EXPENSES.

The following table, prepared by the Superintendent, is made up on the same principles as the one submitted last year:

	Passenger.	Freight.	Coal.
Running expenses	$36,180 78	$61,885 32	$58,441 15
Wood consumed on trains	20,994 00	22,462 50	14,409 00
Coal " "	2,739 00	14,690 50	65,675 50
" " ferry	14,358 92	14,358 92	
" " stations and shops	1,500 00	1,500 00	3,000 00
Repairs of road	24,878 31	32,563 86	79,076 66
" engines	15,311 83	12,425 02	25,468 37
" passenger cars	15,492 03		
" freight cars		12,005 72	
" coal cars			8,109 61
" buildings, bridges, etc	6,373 32	6,373 32	
" docks at Elizabethport	1,021 06	4,309 17	6,373 32
" tools and machinery	400 13	817 16	1,088 87
Expense account	10,823 45	10,823 47	10,823 47
Miscellaneous expenses	8,625 95	8,625 95	8,625 96
Ferry running expenses	11,412 61	87,000 97	
Ferry boat repairs	4,779 97	4,779 98	
Ferry miscellaneous expenses	4,148 12	9,104 40	
Car service		19,062 28	71,943 41
Total expenses	$179,124 43	$278,688 53	$361,969 48

By this statement it would appear that the cost of operating the passenger trains has been 62 per cent of the gross receipts, of merchandise trains 45 per cent, and of coal trains 35 per cent; the average cost of all the trains being 45 per cent.

FINANCIAL CONDITION.

The following is a statement of the financial operations during the year:

		Cr.
Gross earnings as per statement		$1,941,976 46
Capital, instalm'ts paid on new stock		990,160 00
Premium on stock sold, (see last report)		60,000 00
Total		$2,992,136 46
		Dr.
Ordinary expenses as per statement.		$814,732 44
Grading, second track, extension, etc.	$134,838 26	
Masonry	119,643 92	
Railway superstructure	146,601 24	
Bridge superstructure	26,816 20	
Land damage	93,714 82	
Engineering	4,693 15	
		*526,307 59
Station-houses		4,000 00
New ferry boats		98,164 06
Engines, difference between purchases and sales		154,427 00
Passenger cars		6,700 00
Cars built in shops or purchased		15,458 06
Tools and machinery, increase		4,450 00
Miscellaneous property, increase		447,174 36
Sundry accounts, materials, etc., inc.		20,282 18
Quarterly dividends for year, 10 p. c.		401,578 12
Interest account for year		147,711 30
State taxes for 1862, ½ per cent. on $4,904,668		24,576 26
United States taxes		21,731 05
Cash and accounts receivable, inc.		304,844 04
Total		$2,992,136 46
The profit and loss account has been credited with the gross earnings		$1,941,976 46
It has been debited as follows:		
Ordinary expenses	$814,732 44	
Interest account	147,711 30	
Taxes to State	24,576 26	
United States taxes	21,731 05	
Dividends, 10 per cent	401,578 12	
		1,410,329 17
Balance equal to 10½ per cent on stock, transferred to renewal fund		531,647 29
Premium on stock sold		60,000 00
Add balance to credit of fund last year		233,176 11
Total		$824,823 40
The Renewal Fund has been debited as follows:		
Depreciation in engines		$6,927 00
" passenger cars		3,200 00
" ferry boats		8,164 06
" miscel'ous property		1,946 37
" on docks in New York		4,000 00
Amounts withdrawn from cost of railroad, namely: Balance of miscellaneous expenses	$62,331 10	
Masonry at High Bridge, etc., superseded by embankment	100,000 00	
		162,331 10
Balance to credit of Renewal Fund		638,254 87
Total		$824,823 40

CONSTRUCTION.

The various works before reported in progress along the line have been continued during the year, though not pressed as they would have been had the prices of labor and materials been less disturbed. Satisfactory progress has, however, been made. The High Bridge embankment is still unfinished, but has been pushed till the bridge as such, has ceased to exist. The double-arch culvert at Springtown has been completed, at a total cost of $81,904 85, and is ready for the embankment, which is to replace the present bridge. The double-arch culvert at the Bloomsbury bridge has been commenced, and the materials to begin the stone viaduct at the Green's Mills bridge are on the ground.

The entire second track is now finished and in use for the ordinary business of the road, except two miles and a half between Bloomsbury and Springtown, which will be completed during the present year.

Wherever feasible, the public roads are being carried over or under the track. An effort is also making at the city of Elizabeth to arrange with the Common Council and the New Jersey Railroad some plan by which the present level crossings of streets can be avoided. This last is a difficult subject, but of an importance yearly increasing, and that would justify a considerable outlay both by the city and the railroads, and this Company are prepared to contribute their fair share of the expense. At present, though difficult, it can be carried out without much damage to property, but every year will increase the obstacles, and seen render it as impracticable as it would be to alter the New Jersey Railroad at Jersey City.

On the extension this matter of level crossings is being attended to at the outset, and will be in a great measure obviated.

EXTENSION TO JERSEY CITY.

The extension from Elizabeth to Jersey City has been pushed as vigorously as possible. The bridge across Newark Bay is far advanced toward completion. The most of it was made secure in time against the action of the ice, but the unfinished portions were in considerable danger when the ice broke up, and some 50 piles in this part were cut away by the floating cakes. The manner in which it has, while at this disadvantage, withstood the perils of the winter has given perfect satisfaction to the engineers, and proved it a capable and reliable structure.

The circular masonry pier 33 feet in diameter, in the middle of the channel, is completed, and the iron drawbridge, 216 feet in length, is in course of erection. The abutments and other portions of work round this double drawbridge are well advanced. From Newark Bay to Communipaw Bay, nearly the whole of the temporary track on the north-west side of the Company's roadway has been laid; the road-bridges are up, and everything is in a forward state. Steam excavators are to be used to take down the cuts to the permanent grade, and will soon be on the ground. The pile-bridge across Communipaw Bay (to be immediately replaced by embankment) is well advanced toward the point outside of the Morris Canal basin selected for the ferry to New York. The bulkhead against which the ferry-slips are to be built is in place, and the piers and slips will be immediately commenced. Considerable progress has been made with the bulkheads and the filling for the Company's station-grounds on the mud flats below Jersey City.

The coal wharves at the shipping port east of Bergen Point, will be commenced the moment the pressure of work now on hand will allow them to be taken up. At present it would only add to the difficulty of completing what has been commenced, without expediting the wharves themselves.

It is difficult as yet to fix the time when the trains can run through to Jersey City. It will not, however, be long before the passenger-trains can be passed over. To move the freight business from Elizabethport is a more serious undertaking, will take longer and be gradual in the transition. Much as the Company need this outlet to meet the pressure of old business enlarging and new business offering, yet the amount of preparation still to be made is considerable before they can do their whole business there in a satisfactory manner. With the lands and the water-front that have been secured, it is believed that no Company can offer such terminal facilities for business as this will be able to do when their works are further developed. It is proposed to receive nearly the whole of the merchandise freight business on the Jersey side, instead of New York, relying on the ferry for facilities in transporting the teams to and fro. The time consumed in crossing and recrossing the ferry will be far less than that now lost by carts in waiting their turns to unload.

SOUTH BRANCH RAILROAD.

Here also there has been delay. In ordinary times the road would have been finished to Flemington last fall with the greatest ease; but as it is, trains will not run through before June or July. The grading is all finished, except one difficult cut where a temporary track over the bank will be laid; the masonry is completed; the bridges are ready to be put up as fast as reached by the track; and some miles of track have been laid. At the first station some freight has been taken to accommodate the farmers. The prospects of business from this important branch improve.

COAL TRADE.

The coal trade has been in a highly excited state all the year. The immense demand, far exceeding the supply, has stimulated the sellers to higher and higher prices, and as these prices have advanced, the rates of transportation have also risen. A cessation of or serious reduction in the demand from the government, and those working for the government, would at once break down the market, but till then coal must apparently continue very high. This Company has been very unwilling to advance rates as often and as high as they have been, but as the transportation companies have only followed the advances made by the dealers, it was obvious that a different course would simply enhance the profits of the latter without benefiting the public.

CONCLUSION.

Another year of apparent prosperity for railroads has closed. Another year of civil war has also closed. There is little to add except that the Board, while omitting nothing feasible to meet the requirements of the increasing business, will avoid as far as possible expenditures at the inflated prices that now prevail.

BALANCE SHEET, January 1, 1864.

Railroad 64 miles double track		$4,592,747 43
Extension to Jersey City, 10 miles, in progress		252,125 85

American Railroad Journal.

Saturday, June 11, 1864.

Stock Exchange and Money Market.

The operations of the Government in the military and naval departments are on so large a scale, that the Secretary of the Treasury finds himself obliged to raise more money, however he may be inclined to retrench and economise. Those who disburse are always more free in the handling of money than those who have to provide it, and in some respects the department of the Treasury is a most thankless one; for whether it will or no it must be ready, must take responsibilities almost without support or sympathy, and has to meet the opinions, prejudices, fears, and opposition of the most sensitive of all classes of men, capitalists and investers. We do not think justly on this subject, or Mr. Chase would not be so often assailed as he is, for measures which are forced upon him by the necessities, the inexorable necessities of war. We have these facts to reflect upon, patent to all the world, that we have been forced into a conflict of the most bloody character; we are defending ourselves against a most unprincipled faction; our nationality has been all but destroyed, and the enemies of our republican institutions have shed seas of innocent blood in the prosecution of their treasonable designs. Vast sums of money were to be raised, in a country radically opposed to public debt and unaccustomed to taxation; foreign capital had been shut out from our reach, foreign bankers had been prejudiced against us, active emissaries were dispatched to every part of Christendom to decry our resources, and yet from the day of the shameful attack on Fort Sumter down to the present moment, there never has been a moment when the Secretary has not furnished the necessary supplies of money, nor an hour that his loans lost favor with the people, or had not heavy balances in the Sub-Treasury. Prejudice and opposition have stood rebuked and confounded at the success of our national finance, and foreign cavillers have been compelled to admit that their attacks upon our National credit have been in vain. It is impossible to deny that the country has been saved by our financial policy. We have lost battles, we have lost our commercial marine, our foreign policy has not been altogether satisfactory, but the Treasury department has rode out the storm and has not been obliged to move off its course, or repair a single disaster. The same skill, the same resolution, the same confidence, and our increasing resources will carry us through successfully to the end. If our financial garments were too large for us at first, we are rapidly growing into them. If our youth has been hardly taxed, our manhood is assuming the proportions of a giant. We are in fact thirty-four nations, many of them larger than many which occupy the Eastern Continent, operating as one people, growing more populous than any other part of the world, with more lakes, rivers, canals, railroads, coasts, mines, and fertile fields than any one of those styled first class powers, and it is not for us to quail or despond before any debt which the people are willing to incur and are anxious to provide for, and we never will. We shall rise from this contest like giants refreshed, and go on our way rejoicing. The vast sums of money we have expended, have been expended at home, and they have fertilized every domain of American industry, making every wheel revolve with greater rapidity, and producing everywhere "fresh fields and pastures new." We have no reason for discouragement. We now see what liberty and equality are worth, and do not count the cost of defending them. One hundred millions of freemen at the end of the present century will bless the name and honor the memory of every man who stood by the flag in these trying times, and the public debt will have shrunk into insignificance in the brilliant light of enlarged freedom and our secured institutions.

It is with these views we predict an entire success for the recent proposition from the Treasury department for a further loan of $75,000,000, being a portion of the sum authorized by existing law, and familiarly known as that of the 1881 6 per cent. bonds. Notwithstanding the official announcement of the proposed transaction the present 81's have advanced to 108 ex-dividend, and it is understood a proposition to take fifty millions

has been the response of the City Banks to the notice from the department, for which certificates will be immediately issued.

We cannot but approve of the course of the Secretary, because the new subscription ensures to investers a handsome advance at the very start, and none can complain who have already made or can make a profit on their previous subscriptions, and because it is no surprise to them, since they have always known that the Secretary had the power, and most probably would have the occasion to seek further subscriptions. The plan is therefore in all respects a good one, and must meet with general acceptance. It is farther stated that overtures have been made from abroad to take a large amount of these securities, and to ship gold to this country in payment. Under the circumstances we should not be surprised if these overtures should be favorably received, for the price of gold has advanced so rapidly as seriously to affect the contracts of the Government, as well as the pecuniary affairs of a large body of the people who are dependent on fixed incomes, now practically decreased by the rise complained of. And as the Treasury department, as we stated last week, is actually engaged in the work of contraction, a foreign loan, and a return shipment of gold would do much to bring paper to that equality with the metallic standard hitherto injuriously impaired. This too is an opportune moment for such a transaction, when the most unfriendly Europeans are staggered by the recent successful advance of both Generals Sherman and Grant, and the cause of the Union is recovering itself in the opinion of the old world.

It is a singular if not an amusing evidence of the real estimation in which Mr. Chase's skill is held even here, in the hot bed of the sympathizers with the confederates, that his sudden presence in this city, always breaks down the price of gold. Mr. Chase seems to be a terror to evil doers, if he is not always a praise to those who do well, since the price fell off 3 per cent, as soon as it was known that he had arrived in the city. It would almost seem to suggest the propriety of his frequent visits to the metropolis, when such excellent results follow his advent.

The deposits in the Sub-Treasury are also on the increase, amounting on Tuesday to more than a million of dollars, the certificates of which are highly useful at the clearing house. The twenty five millions already on deposit at 5 per cent. are to be allowed, on a continuance of the same, 6 per cent., so that in all probability there will be no reduction of these deposits, but an increase. We suppose the 5-20's will receive a check in the market till the seventy five millions are all taken, when they will again continue to be sought for; the Government securities all of them being favorites throughout the Country with those who seek permanent investments will gradually rise in value.

It has been attempted notwithstanding in certain quarters, to interfere with this prevailing confidence in these securities, by various contrivances. One has been to insist that the National currency is being continually inflated. This mis-statement we authoritively corrected in the JOURNAL of last week, giving the figures themselves, which showed a curtailment of more than thirteen millions. We have now another correction to the same effect of equal authority. It has been the practice to overstate the amount of the daily National expenditures, and of the public debt. The answer officially to these assertions is, that the daily expenses of the Government are but two and a-half millions of dollars, instead of four millions as has been falsely stated, and the public debt instead of being nearly three thousand millions of dollars is actually but seventeen hundred and seventy-four millions. So that the promises, estimates and policy of the Secretary of the Treasury have been fully sustained by the facts, although it would not have been his fault if he had been mistaken. This will appear conclusively from the following figures, showing indeed at this moment that the real footing of debt is not quite 1,774 millions.

Loans and issues, absorbed and unabsorbed, which have been authorized by Congress:

Loan of 1842	$242,621
Loan of 1847	9,415,250
Loan of 1848	8,908,341
Texas indemnity loan of 1850	3,461,000
Loan of 1858	20,000,000
Loan of 1860	7,622,000
Loan of 1861	18,415,000
Treasury notes, March 1861	512,900
Oregon war loan of 1861	1,016,000
Another loan of 1861	50,000,000
Three years Treasury notes	139,679,000
Loan of August 1861	320,000
Five-twenty loan	510,000,000
Temporary loans	104,933,103
Certi ficates of indebtedness	156,918,487
Unclaimed dividends	114.115
Demand Trea sury notes	500,000
Legal tenders 1862	897,767,114
Legal tenders, 1863	104,969,937
Postal and fractional currency	50,000,000
Old treasury notes outstanding	118,000
Ten-forty bonds	900,000,000
Interest bearing Treasury notes	400,000,000
Total	$2,884,912,818

Of the above amount the following remains to be negotiated:

Nine hundred million loan	$625,000,000
Five per cent legal tenders	250,000,000
Balance of Ten-forty loan	130,000,000
New bonds of the $900,000,000 loan	75,000,000
Balance of six per cents of 1881	66,000,000
Fractional currency	30,000,000
Total	$1,176,000,000

Difference or actual debt, $1,708,912,818. If from this amount we deduct the legal tenders of 1862 and 1863, and demand treasury notes which on a principle of contraction and absorption in the taxes and revenue receipts of the Treasury, are not likely to remain long as a part of the National debt, and which amount to $503,137,051, the permanent funded debt at the present moment according to the above figures is but about $1,205,775,767. This result is substantially correct, and will we trust be so palpable as to diminish the apprehensions of those timid persons who are shaken by every wind that blows from the South.

It is well understood that the price of gold has not been a legitimate one. All the power and all the funds of the friends of the rebellion here and at a distance have been used to raise the premium, on the principle that it is one of the most damaging blows which can be inflicted on the financial credit of the Country. We are astonished at the baseness of this conduct. It is hardly possible to account for such malignity in men who call themselves Americans, but it is to be hoped that the infamy which belongs to such a spirit will not be forgotten by an outraged people, but follow its possessors through the whole of their lives. Let the badges of disgrace go with them to their dishonorable graves. Money in view of the contraction now commenced and to continue has grown a little dearer and it is a good sign; and if the foreign loan is accepted, a smaller amount of paper in circulation will steady the market, and reduce the extravagant operations of the speculators to a more reasonable basis. The balance in the Sub-Treasury is still large, being $32,691,839 58 on Tuesday and rapidly increasing.

The exports for the week exclusive of specie were $2,839,180 00. The total value for the port of Baltimore during the same time was $248,621.

The Railway share market has had a downward tendency, most of the operations therein being for immediate advantage. Government securities remain steady. The 10-40's continue to be in good demand. The Custom House received during the week ending the 4th inst., $803,000 in gold, and we may shortly expect the proceeds of the California Customs to arrive here in the new Revenue Cutters, the present plan of Mr. Chase.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ We invite attention to the advertisement of the Fourth National Bank in another column.

☞ At the annual meeting of the stockholders of the Galena and Chicago Union Railroad Company on the 1st inst., the following new Board of Directors was elected: James D. Fish, William B. Scott, William R. Sands, Edward P. Bancroft, James W. Elwell, John B. Turner, Thomas D. Robertston, Alexander C. Coventry, Mahlon D. Ogden, Francis P. Peabody, Edwin H. Sheldon, William H. Ferry, Ira Y. Munn. It was unanimously resolved that the Galena and Chicago Union Railroad Company, should be consolidated with the Chicago and Northwestern Railway Company, under the name of the latter. By the terms of consolidation the stock of the former is to be exchanged for that of the latter, as follows: One share of Chicago and Northwestern preferred stock, and one share of Chicago and Northwestern common stock, with three dollars in cash, for each share of the Galena and Chicago Union. Exchanges may now be made, and the money received at the office of the Chicago and Northwestern Railway Company, No. 8 Wall st.

Concord, Manchester and Lawrence R. R.

The receipts of this company for the year ending March 31, 1863, including the net receipts of the Concord & Portsmouth R. R., were $565,874; expenditures, $303,671, leaving the net income $262,202. Of this net income three-fifths has been apportioned to the Concord Railroad, and the balance to the Manchester & Lawrence R. R. The Concord R. R. declared two dividends of 4 per cent. each, which amounted to $120,000, and leaves a balance remaining of $37,321. The present contingent and deterioration fund of the Concord road is $128,863.

Philadelphia and Erie Railroad.

The Philadelphia and Erie railroad is rapidly nearing completion. Only about sixteen miles of road are to be completed to connect its eastern and western ends, and all but three miles of this part of the road is ready for the track layers, and the iron is being laid as rapidly as it can be procured. The month of July next has been named as the time for its formal opening.

Rome, Watertown and Ogdensburg R. R.

At the annual election for Directors of this Company, held at Watertown on the 1st inst., the following gentlemen were unanimously elected:—W. C. Pierrepont, Pierrepont Manor; Charles E. Bill, John Ferguson, Edward Strong, Samuel F. Phelps, Marcellus Massey, New York; Henry Alexander, jr., Springfield, Mass.; Delos DeWolf, Oswego; T. H. Camp, Watertown; S. D. Hungerford, Adams; William Lord, Brownville; David Uttley, Rome; Calvert Comstock, Albany.

New Jersey R. R. and Transp. Co.

At the annual meeting of the stockholders of this company held at Jersey City on the 1st inst., the annual report was read by F. Walcott Jackson, Esq., Secretary and Superintendent, and unanimously approved. The stockholders then proceeded to the election of nine Directors, namely, Dudley S. Gregory, Henry B. Remsen, Hamilton Fish, Ferdinand Suydam, Abraham O. Zabriskie, Alfred L. Dennis, George B. Chetwood, Martin A. Howell, Nehemiah Perry.

At a subsequent meeting of the directors, A. L. Dennis was re-elected President; Hamilton Fish Vice President; H. J. Southmayd Treasurer, and F. Walcott Jackson Secretary and General Superintendent.

Northern (N. H.) Railroad.

The receipts of this road for the year ending March 31, 1864, were $457,141, against $366,845 for the preceding year—an increase of $90,296. The expenses were $251,070 being an increase of $37,943. This makes the net increase of receipts $52,352. The contingent fund amounted, March 31, to $58,671. The usual semi-annual dividends of 2 per cent. have been made, together with an extra dividend of 2 per cent., arising from the sale of $60,450 of Ogdensburg Railroad Bonds.

Central Pacific Railroad.

In the *California Farmer* of the 6th of May last, we find some interesting details of the progress and prospects of the Pacific Railroad, Western Division. The profile of the first fifty miles in the office of the company gives a good idea of the grades and the character of the work to be performed. On section No. 22 a granite quarry of fine shade and quality is found, out of which the State and other public buildings will hereafter be constructed. From this point the next ten or twelve sections eastward have very heavy grades, in some places 104 feet to the mile, yet the work is going on successfully and the road will be in use in September next, while in three weeks time the principal part of the route to Newcastle will be open for traffic. The *Farmer* continues:—

The Pacific route is now open, in connexion with the old Central road, to Lincoln and to Folsom, taking the up-river passengers to Lincoln, thence by the California Stage Company to Marysville in two hours less time than formerly, land passengers at Marysville at about 11 A. M., and at Folsom at half past seven A. M., ready for stage to Placerville and over the mountains.

When the road shall be opened to Auburn 31 miles, the balance of the grade up to section 38 will be about 90 feet to the mile. Section 39 and 40 is nearly level. Section 41 and 42 is only 26 to 52 feet grade. 43 to 50 is very heavy, about 105 feet to the mile; and yet with all this immense labor and heavy rise, there is no loss by a descent; what is gained is retained; and the whole elevation is less than that of the Alleghany Mountain road; and the summit on this route when attained is higher, but no loss by descending again. There is no descending till the summit is attained and the road passes down on the other side.

Some of the hardest and heaviest work is on section 48, here is a mountain of hard flint rock, that will cost $100,000 to penetrate, beyond this 48 and 49, 50 comes, the terminus of the first grand section of this road—this is above Illinoistown and Gooseberry Creek. Here is the New England Saw Mill, all ready for the new towns and cities.

When this road shall continue on to Donner's Lake, which is one of the garden spots of our State; and this road will receive large acquisitions to its freight list, from the ice that will be brought from the Lake to San Francisco.

The Central Pacific road is now surveyed five miles beyond the big bend of the Truckee River. The entire route is based, as it were, on the rib of a great backbone of the mountain where there are no breaks, or risk of breaks, by reason of river, or streams, or ravines, save only the one at Long Ravine, where there is a depression in the route. Here the road will cross over a bridge or embankment of 100 feet in height. This is just beyond Illinoistown on the 55th section.

From the present 50 mile division, from King's, on the Truckee River, a branch road will turn off over the mountains to the great Washoe Valley, to Virginia City shortening the present distance to that place 30 miles.

The present wagon road keeps open the way for travel now; and when the railroad opens to Newcastle, in a few days, the stages will go over this wagon road to Garden Valley, and intersect the Henness Pass road, thence by that road to Virginia City. From Dutch Flat, the road is excellent for loaded teams. It is wide, of easy grade, less than one foot to the rod.

From Donner Lake to Lake Bigler is only 18 or 20 miles, a good road up river; here too, is one of the fairy spots of our State.

Speedy as may be, another opening is coming on; 220 miles more and this road will open up the great Humboldt Valley.

We are glad to add that the saving of time between this city and Marysville, has induced the transfer of the mails from the Sacramento Valley road to the Pacific road; and as the work progresses other changes will be made.

Consolidation of the Chicago & Northwestern and the Galena & Chicago Union Railroads.

The new Board of Directors of the Galena & Chicago Union Railroad formally resolved to consolidate that road with the Chicago & Northwestern in accordance with and upon terms proposed by the management of the latter. The terms and specifications are not yet ready for the public eye, nor are all of the specifications involved, or the results expected to be realized by the consolidation, set forth as yet. It is understood, however, that the leading object is to secure an immediate connection, with at least three important railroads, namely: the Michigan Central, Illinois Central and the Chicago, Burlington & Quincy.

The Chicago & Northwestern, until two years ago, found an abrupt eastern terminus at the west end of Kinzie street bridge in this city. The construction of a "compromise track" along West Water street, connecting with the termini of the Pittsburgh, F. W. & Chicago, the Chicago, Alton & St. Louis, and the Chicago and Cincinnati Air Line Railroad, afforded little relief owing to the difference in the gauge of the roads.

Mr. Ogden's dreams were evidently pointing to a connection, in some shape, with the roads centering at the great Union Depot—the Michigan Central, Illinois Central, and Chicago, Burlington and Quincy. That his dreams were not entirely visionary is not because there was anything lacking in the shape of apparently insurmountable obstacles. The enterprise involved the right of way from the North Branch of the Chicago river to the lake, and the bridging of the river, near its mouth, to connect with the Union Depot. We all know, but without understanding how it was brought about, that permission has been granted by the Common Council to bridge the river at the desired point. The deliberate systematic purchase of a sufficient amount of Galena stock to control that road; the consolidation of that road with the Chicago & Northwestern, of which, as everybody knows, Mr. Ogden is god-father, thus securing the right of way from the North Branch to the Lake, professedly by the Galena road, were gigantic strides that followed each other with great rapidity. The rest is easy and clear.—*Chicago Journal.*

Damages by Fire Communicated from Locomotive Engine.--Negligence of Plaintiff Contributing to the Injury.

Though the case which we this week introduce is in some respects governed by the statute law of Massachusetts, yet the principles discussed and the rules announced are of more than local importance in cases arising under the common law upon an analogous state of facts. The statute referred to is as follows: "When any injury is done to a building or other property of any person or corporation, by fire communicated by a locomotive engine of any railroad corporation, the said railroad corporation shall be held responsible in damages to the person or corporation so injured, and any railroad corporation shall have an insurable interest in the property for which it may be so held responsible in damages along its route, and may procure insurance thereon in its own behalf."

The case of Ross against The Boston and Worcester Railroad Company, was an action brought to recover damages for the destruction of the plaintiff's building and contents, and trees growing upon his land, by fire communicated by a locomotive engine of the defendants. At the trial the defendants contended that the statute did not apply to articles of personal property which may be removed with facility at the pleasure of the owner; that, as to such articles, it applied, if at all, only to such as the corporation has knowledge or reasonable cause to believe are situated where they may be so injured. By agreement of the parties, all questions as to the construction of the statute were reserved for the whole Court, and it was left to the jury to determine whether the fire was communicated by the engine of the defendants under such circumstances as to charge the defendants with the loss of any of the property destroyed.

One ground of defence relied upon was, that no live sparks from the engine of the defendants did or could reach the buildings of the plaintiff; and the plaintiff was allowed, under objection to introduce evidence that the same locomotive, using similar wood fuel, within a fortnight before the day of the fire, emitted burning sparks that fell upon his premises. The defendants then introduced evidence tending to show that similar engines had been used for fifteen years on their road, and also on various other roads, and that they did not emit sparks that would set fire to buildings. In reply to this evidence, the plaintiff was allowed, under objection, to introduce evidence that similar engines, on one of said roads, had emitted sparks which had communicated fire to objects. It was conceded that the train alleged to have communicated the fire was passing at its usual hour, and was a regular train.

The Court instructed the jury "that the plaintiff was bound to exercise ordinary care and prudence in reference to his property thus situated near a railroad, and that if they should find any want of ordinary care and prudence in reference to his property by leaving open the door of the shed toward the railroad, or in reference to shavings in the shed, or by reason of having old and dry shingles on the roof of his buildings, he knowing the season was a dry one, and that the wind was from the railroad, if either of the things mentioned contributed to the communication of the fire, the plaintiff could not recover; that the burden was on the plaintiff to show that the fire was communicated to the property of the plaintiff by the engine of the defendants; that this fact was to be affirmatively proved by the plaintiff, and that it was not sufficient to show that it was possible, or a probability that the fire was thus communicated, but the fact must be shown that the fire was communicated by the engine of the defendants."

The jury gave a verdict for plaintiff, and the case was reported for the determination of the whole court.

Bigelow, C. J.—1. We cannot concur in the proposition of the learned counsel for the defendants, that the statute under which this action is brought, (St. 1840, C., 85, re-enacted in Gen. Sts. C., 63, § 101,) is to be very strictly construed. It is not a penal statute, but purely remedial in its nature; and it is to be interpreted fairly and liberally, so as to secure to parties injured an indemnity from those who reap the advantages and profits arising from the use of a dangerous mode of locomotion, by means of which buildings and other property are destroyed. Hart *vs.* Western Railroad, 13 Met., 99. That it was not intended to confine this right of indemnity to cases of injury or destruction of property of a fixed or immovable nature, is clearly indicated by the language of the statute, which is sufficiently broad and comprehensive to include every species of property liable to be injured or consumed by fire communicated by a locomotive engine. Nor are we able to see anything in the policy of the statutes, or the means on which it is founded to lead us to the conclusion that any restriction or limitation on these very general words should be imposed by judicial construction. There is certainly no distinction in principle by which a right to an indemnity should be secured to the owner of one species of property in case of its injury or destruction, and denied under like circumstances, to the owner of a different kind of property. The claim for an indemnity is as strong, and the necessity and expediency of creating the liability are as great, whether the property injured or consumed is of a fixed and permanent, or of a kind to be moved or changed at the pleasure of the owner. Indeed it would be difficult if not impossible to draw any line or establish any sound principle by which the distinction for which the defendants contend could be carried into practical effect. The statute prescribes a clear, plain rule,

arbitrary it is true, but one which can be easily and intelligibly administered. The decisions cited by the counsel for the defendants, giving a construction to a statute of the State of Maine, in terms the same as the one in question, serve to show the embarrassment which would be occasioned, if we departed from the plain and literal interpretation of the language of the statute. Chapman *vs.* Atlantic and St. Lawrence Railroad, 37 Maine, 92, (579) Pratt *vs.* Atlantic and St. Lawrence Railroad, 42 Maine.

The argument urged by the counsel for the defendants, that the provision giving railroad corporations an insurable interest in the property for which they are liable in damages under the statute necessarily operates to restrict the extent of their liability, seems to us to be founded in misapprehension. It assumes that no insurance can be obtained by them except on property exposed to the risk of fire from locomotive engines, of which they have previous notice or knowledge; and, proceeding on this assumption, it is contended that they should not be held liable for the loss of property which is movable or liable to change its situation, and of the existence of which in proximity to their railroad, the corporation cannot be supposed to have known. But we know of no reason for such limitation on the power and authority of corporations to procure insurance on property for the loss of which they may be held liable under the statute. On the contrary, we cannot see why they may not protect themselves by policies in an amount sufficient to cover all possible risks to which they may be exposed. No specification of the particular property covered by the insurance would be necessary, as the statute makes their insurable interest commensurate with the risk to which they are liable. The fact of loss by reason of fire communicated by a locomotive engine would therefore be sufficient to establish a right to an indemnity under a contract of insurance entered into in pursuance of the provisions of the statute. For these reasons, it seems to us that there is no sufficient reason for exempting the defendants from liability for the destruction of any of the articles belonging to the plaintiff, which the jury have found were consumed by a fire caused by one of their engines.

2. The evidence to which the defendants objected, was clearly competent. One of the grounds of defence was, that no sparks of coal from the engine of the defendants could reach the premises of the plaintiff, so as to communicate fire. To meet this position, it was certainly fit and apposite for the plaintiff to prove the physical possibility that fire could be so communicated by showing that on a previous occasion the same engine using the same species of fuel, had emitted burning sparks which fell within the enclosure of the plaintiff. Such evidence would have been open to question, if offered solely in support of the plaintiff's case; but it was rendered relevant and material by the ground taken in defence. On the same ground, evidence concerning the emission of sparks from similar engines used on other roads was admissible.

3. The Court were not bound to instruct the jury upon an assumed state of facts, in a case where there was a conflict of evidence, and especially where the question of negligence involved a series of complicated facts, that the plaintiff was not entitled to recover. As the case stood before the jury, it was a proper one to be submitted to practical men, having all the facts before them, to determine whether due care had been exercised by the plaintiff. It is only where the facts are undisputed, and taken together, they show a clear case of negligence, that the Court is bound to instruct the jury that a party having the burden of proof, to establish the use of due and reasonable care, is not entitled to recover.

Judgment on the verdict.

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 4th week of May, were:

	1864.	1863.
Passengers	$9,400 61	$4,838 57
Freight	9,540 88	5,580 51
Mail, express & telegraph	1,381 37	1,013 62
Total	$20,322 86	$11,432 70
This month to date	$83,964 30	$35,325 66

The earnings of the Chicago and Alton Railroad Company for the week ending May 31, were:

	1864.	1863.
Passengers	$17,986 85	$11,724 21
Freight	25,411 06	22,224 54
Sundries	1,452 00	1,658 23
Total	$44,799 91	$35,606 98
Increase 1864		$9,192 93

The earnings of the Galena and Chicago Union Railroad for the week ending May 31, were:

	1863.	1864.
Freight	$49,531 88	$63,852 00
Passengers	14,260 29	15,517 55
Mails, &c	2,019 30	1,300 00
Total	$65,811 47	$80,669 55
Increase 1864		$14,858 08

The traffic of the Great Western Railroad for the week ending May 27th, 1864, was as follows:

Passengers	$24,559 39
Freight and live stock	28,237 79
Mails and sundries	2,438 97
Total	$50,236 15
Corresponding week of 1863	49,958 45
Increase	$277 70

The earnings of the Montreal and Champlain Railroad for the week ending May 28, 1864, were:

Passengers	$2,700 02
Mails and sundries	188 00
Freight and Live Stock	1,582 57
Ferries	158 48
Total	$4,579 12
Corresponding week, 1863	5,098 70
Decrease	$519 58

The earnings of the Grand Trunk Railway for the week ending May 28, 1864, were:

Passengers	$27,758 79
Express freight, mails and sundries	2,500 00
Freight and live stock	65,215 48
Total	$95,474 27
Corresponding week, 1863	84,661 20
Increase	$10,813 07

The earnings of the Dubuque and Sioux City Railroad for the week ending May 28th were: $8,024 84

Corresponding week in 1863 5,394 45

Increase $2,630 39

Jan. 1 to May 28, 1864	$117,376 52
Corresponding week in 1863	80,675 45
Increase	$36,701 07

Railroad from Cherry Valley to the Central Railroad at Palatine.

By an Act of the Legislature of this State passed March 26, 1864, Wm. W. Campbell, Geo. C. Clyde, and Horatio J. Olcott, of Cherry Valley, were appointed Commissioners for said town, to hold their offices for five years, and until others are appointed in their places for the purpose of borrowing on the faith and credit of the said town a sum not exceeding $75,000 for a term not exceeding 25 years, at 7 per cent. or under, and to issue bonds therefor. The proceeds to be invested in the stock of a railroad to be constructed between Cherry Valley and the Central Railroad at Palatine (on the Mohawk River.) And for that purpose the Commissioners, in the corporate name of said town, may subscribe for and purchase stock of such company to the amount of seventy-five thousand dollars; and by virtue of said subscription or purchase of stocks and upon receiving certificates, of the transfer of certificates for the amount of said stock so subscribed for or purchased by them, the said town shall acquire all the rights and privileges, and be liable to the same responsibilties as other stockholders of said company.

The following sections provide for the payment of interest and redemption of the principal:

§ 4. The said commissioners authorized by this act, shall report to the Board of Supervisors of the County of Otsego, within three days after the commencement of their regular annual session in each year, the amount required to pay principal, or the interest, if any, on the said bonds, authorized to be issued under and by virtue of this act. The dividends arising from the stock so subscribed for or purchased by said town in pursuance of this act, or so much thereof as may be necessary, shall be received by said commissioners, and by them applied to the payment of the interest which shall from time to time accrue upon the bonds authorized by this act; and in case such dividends shall not be found sufficient, in any one or more years, to pay the interest accruing on said bonds, it shall be and is hereby made the duty of the said Board of Supervisors, and they are hereby authorized and required to cause to be assessed, and levied, and collected of the real and personal estate of said town, at the same time, and in the same manner as other taxes are assessed, levied and collected, such sum or sums of money as shall have been reported to said Board of Supervisors by the said commissioners authorized by this act, to be necessary to make good such deficiency in the payment of the interest on the said bonds, and the same when collected shall be paid to said commissioners, and by them applied to the payment of the interest on said bonds, or so much thereof as shall remain unpaid, after the application of said dividends to that purpose.

§ 5. It shall be lawful for such railroad company to agree with the said commissioners, in behalf of said town to pay the annual interest accruing on the bonds issued by said town, for the term of three years, or until such railroad shall be completed and in operation. The amount of such interest to be repaid by the said commissioners to such company, within three years after the said road shall have been opened and put in operation, in equal annual instalments, to be levied and raised in the same manner provided by this for paying the annual interest accruing on said bonds, or by a sale of the stock as herein provided, in case the dividends or income from the stock held by such town shall be insufficient for the purpose.

§ 7. After the expiration of twenty-five years from the passage of this act, it shall be and is hereby made the duty of said Board of Supervisors, and they are hereby authorized, unless the payment of said bonds are otherwise provided for,

to cause to be assessed, and levied, and collected upon the real and personal estate of said town, at the same time and in the same manner as other taxes are assessed, levied and collected, the sum due on the said bonds so issued in pursuance of this act, together with interest on said principal sum, or so much thereof as may remain unpaid by reason of the deficiency of the dividends and sale arising from the said stock. The amount so to be raised by the said Board of Supervisors, for the payment of the principal or interest, shall be determined by the report of said commissioners to the said Board of Supervisors as hereinbefore authorized by this act.

Central Pacific Railroad--Action of the Legislature.

The enemies of the Pacific Railroad having failed in all their attempts to prevent the Legislature from aiding the road, fall back upon the charge that the law passed is unconstitutional, hoping thereby to at least delay the work. In this, however, they will fail as in all their other efforts. There are only two clauses in the Constitution that are claimed to have any bearing upon the subject.

The first is that which prohibits the Legislature from creating a debt exceeding $300,000, without a vote of the people, "except in case of war, to repel invasion or suppress insurrection." The Act in question does not in fact create any *State* debt, but only authorizes the Railroad Company to contract a debt, the interest on a portion of which is provided for by the State. The bonds are executed by the Company, not the State. The Company promise to pay the principal and interest of these bonds, and the State merely raises the money by a special tax to pay the interest.

The law embodies a contract between the State and the company, by which the latter are to perform certain services and convey certain land to the State, in consideration of which the State agrees to pay the interest on a certain amount of the company's bonds. Neither this or any other clause of the Constitution prohibits the Legislature or the public officers from making contracts with individuals or corporations, relating to matters beneficial to the State, such as the erection of public buildings, the purchase of materials therefor, the transportation of public property, or anything else of a public character. Without such a power to make contracts, the wheels of government might be blocked entirely. It is evident, therefore, that the Legislature had full power to make this contract, and they are the sole judges of its necessity, and what was a proper compensation to be paid to the company therefor.

A similar question arose and was decided by the Supreme Court in the McCauley case, reported in 15 Cal. Rep., 429. A contract leasing the State Prison and convicts had been made with Estill, by which the State agreed to pay him $10,000 per month for several years; and it was held that it was a valid contract binding upon the State, and that she could not violate it without incurring a liability for damages. This decision was afterwards affirmed in 16 Cal., 11. The principles laid down in these cases apply to the law granting aid to the Railroad, and fully sustain its constitutionality. In the Estill contract, the State agreed to pay $10,000 per month. In the case of the railroad, it agrees to pay $105,000 a year, for an object fully as important to the whole State as the former.

But even if the law does create a debt, it clearly comes within the war exception. The Constition does not limit the amount of debt which may be created for war purposes, or require a law of that kind to be submitted to a vote of the people. The Act specifies particularly that it was passed for the very purpose of providing a means of defense in case of war, invasion or insurrection. The railroad is to transport troops and munitions in time of war, as well as at all other times. It was not necessary that there should be an immediate necessity for the use of the road for such purposes. It is the duty of the Legislature to make full provision for war, without waiting until the traitors or enemies are pouring hot shot into the city of San Francisco. They are the sole judges of the existence of the exigency calling for the exercise of the power to create a debt for war purposes, and the means necessary to provide for the public safety. No one can deny that the construction of the Pacific Railroad is one of the most effectual means of providing for the defence of the State.

In 1863 a law was passed to raise money by an issue of bonds to pay a bounty to the California volunteers, declaring the object to be to aid in repelling invasion and suppressing insurrection. In the case of Franklin *vs.* The Board of Examiners, decided by the late Supreme Court, it was held that this law was constitutional, although it had not been submitted to a vote of the people, and the Courts could not control the action of the Legislature in such cases. In that case this question was fully considered.

The next clause relied on is that providing that "the credit of the State shall not in any manner be given or loaned to or in aid of any individual, association or corporation." This prohibits using the credit of the State for such purposes, but there is no clause prohibiting the State from giving its money or property, or levying a tax to aid an individual or corporation. Otherwise, all laws passed making donations from the treasury to benevolent societies or aiding the unfortunate would be void. No such view has ever been seriously entertained. It is only the credit of the State that the Legislature is prohibited from using. This credit is evidenced by its bonds or other promises to pay money in the future. The law in question does not provide for issuing any State obligations, as the only bonds issued are those of the company, only the interest on a portion of which is paid by the State.

Besides, as has already been shown, the law is a contract between the State and the company, by which the former pays the bondholders of the latter certain sums of money at stated periods, for certain property and services. It comes clearly within the principles laid down in the McCauley case, in which such contracts were sustained. A careful examination, we are confident, will establish the validity of this law. The Legislature will certainly never attempt to repudiate its contract, thus fairly made.—*San Francisco Flag.*

Interest and Dividends.

The Wyoming Valley Canal Company has declared a quarterly dividend of four per cent., payable on the 21st instant.

The Catawissa Railroad Company has declared a dividend of three per cent, on its preferred shares, payable on the 1st of August next.

The directors of the Noble and Delamater Petroleum Company have declared a ten per cent. monthly dividend from their earnings, payable on the 20th instant.

☞ Judge Davis of the United States Circuit Court at Indianapolis, has rendered a decision setting aside the recent sale of the White Water Canal and the Peru Railroad, on the grounds of informality and injustice to creditors and stockholders.

☞ The Stock Exchange Board have admitted to membership Mr. S. S. Richards, of the house of T. P. Richards, and Mr. C. M. Raymond, of Saxon & Raymond.

☞ Mr. J. Lewis Grant has been appointed Superintendent of the Buffalo and State Line and Erie and North East Railroads.

☞ Mr. R. N. Brown has been appointed Superintendent of the Bellefontaine and Indiana, and Indianapolis, Cleveland and Pittsburg Railroads.

Wyoming Valley Canal.

The annual meeting of this company was held in Philadelphia on the 18th ult. The managers in their report, mention the reorganization of the company under an Act of the Legislature of April, 1863. The bonded debt of the company has been reduced $200,000, and the shares increased a corresponding amount. The debt of the company is now represented in 14,000 shares at $50 each, making $700,000, and six hundred and fifty bonds of $1,000 each, making $650,000, total $1,350,000. The company have no other obligations.

The gross receipts of the year 1863, were		$181,409 15
The expenditures, drawbacks and taxes	$49,961 41	
Interest on bonds	40,936 87	
For new weigh lock, dredge boat, feeder, &c	10,218 97	
Three dividends, being together, 14 per cent	78,702 00	
		179,818 75
Balance on hand		$1,590 40

The total tonnage of the year was 57,431 tons.
Lumber 60,000,000 feet.

Being an increase of about 20 per cent. over the business of 1862. The tolls for 1864 are increased and the drawback system abolished.

Tomah & St. Croix Railroad.

At a meeting of the directors of the Tomah & St. Croix railroad, it was resolved to proceed at once with a detailed survey. Engineers have been engaged to each end of the line. It is also contemplated to begin the grade on the other end of the route, and complete thirty miles of it the coming fall. Several prominent railroad men of the east are interested in this road, and the company have ordered work to commence at once. The capital to build this road is also at the command of the company.—*Hudson (Wis.) Times.*

Cumberland Coal Company.

At the annual meeting of the Cumberland Coal Company the following Board was chosen: For President, Allan Champbell; for Directors, Robt. P. Getty, William Bell, Charles A. Rapalie, David Jones, A. S. Jarvis, A. H. Wallis, David Palmer, A. Schell, George Witherell, J. B. Weir, A. Brett, E H. Tracy.

St. Croix and Superior Railroad.

At a meeting of the directors of this road held in this city last Wednesday, all the preliminaries were arranged, and the necessary preparations made for having the road built at once. The contract for building twenty miles, beginning two miles out from this city, is to be let to-day. The first two miles including all the heavy grade, will be built by the company, and is nearly complete. Over a hundred men are now at work grading. It is expected to have the first twenty miles in running order the coming fall. All the iron is purchased, also a locomotive, and cars for the construction train, and a contract made for their delivery here.

Our readers may rest assured that the St. Croix and Superior railroad is to be speedily built. All the impediments are removed, and the capital to build the road is at the control of the company.—*Hudson (Wis.) Times.*

☞ The Erie and Pittsburg Railroad is now completed to Pulaski, ten miles below Sharon. The work progresses slowly on account of the scarcity of laborers.

☞ The double track upon the Erie road from Paterson to Suffern will be completed in August, making a second line to Elmira.

Canton Company.

The following gentlemen have been elected directors of this company for the ensuing year: J. W. Randolph, Wm. Fisher, C. D. Baker, Joseph Reynolds, B. F. Gardner, Baltimore; Geo. T. M. Davis, Abner B. Baylis, Chas. A. Rappallo, Orville Oddie, New York.

☞ Through express trains are now run between this city and Buffalo over the Hudson River and New York Central railroads, without change of cars. The trains cross the bridge at Troy instead of stopping at Albany and transferring passengers, baggage, &c., by ferry across the river.

Fourth National Bank
OF THE CITY OF NEW YORK,
Capital, $5,000,000.

designated as a Depository and Financial Agent of the U. S.

Nos. 27 and 29 Pine Street,

(TWO DOORS BELOW THE SUB-TREASURY),

have on hand and receive subscriptions for the

TEN-FORTY BONDS,

convert the

SEVEN-THIRTIES INTO 1881 BONDS,

and attend to all business connected with the

GOVERNMENT LOANS.

Parties can avoid the inconvenience of addressing Government by applying at this Bank.

MORRIS KETCHUM, Pres.
D. W. VAUGHN, Cash.

THE THIRD NATIONAL BANK

OF THE

CITY OF NEW YORK.

Cash Capital, fully paid in,.....$500,000.

BAIRD'S PATENT
Incrustation Preventer,

AND REMOVER

FOR STEAM BOILERS,

In either Salt or Fresh Water. No invention connected with Steam Power combines so many advantages as this. The economy in fuel alone, from its use, repays the cost of the preventive. Certificates from Engineers and owners of Steam Boilers, at sea and on shore, can be seen at the office of

JAS. F. LEVIN,
23 Central Wharf, Boston.

MERRITT & WALCOTT, 69 Courtlandt Street, New York. 29 Front Levee, New Orleans.

NOTICE TO SHAREHOLDERS

OF THE

Pittsburgh, Fort Wayne and Chicago Railway Co.

THE UNDERSIGNED, commissioners, authorized to sell thirty-five thousand new shares of the capital stock of said company, by joint vote of the shareholders and bondholders, for the purpose of constructing a double track, procuring additional equipment, &c., now propose to sell thirteen thousand shares of the same as follows:

They propose to issue to the shareholders, who stand registered as such on the books of the company at 2 o'clock P. M., of the 10th of this month, one share for each five shares then standing in their name at the par value of $100 for each share.

Books of subscription will be opened at the office of Winslow, Lanier & Co., No. 52 Wall street, on the 11th of June, and kept open until the 20th of June, at 3 P. M., where each shareholder can call and subscribe, or signify his wishes by letter, addressed to J. F. D. Lanier, Chairman. The new shares thus subscribed for will bear dividend from the 1st July proximo.

Payments will be required as follows: One-fourth on the 21st June, on notification of acceptance; one-fourth on the 15th July; one fourth on the 15th August, and one-fourth on the 15th September.

Transferable stock scrip will be issued, redeemable in full-share certificates on final payment of the installments.

Non-compliance with any of the conditions of this subscription subjects to forfeiture any payments made thereon.

This stock is mainly to pay for iron rails, rolling stock, &c., already advantageously purchased. The high price of labor and the great difficulty of procuring the same, and the enhanced rates for all materials, in the opinion of the chief engineer and the chief executive officers of the company render it altogether improbable that any further amount of the stock will be offered during the present year.

If a further amount can be economically expended in increasing the capacities of the line this year, the company will probably have other means to meet the same.

The commissioners reserve the right to extend the time of subscribing to non-resident shareholders, who may desire to avail themselves of the benefits of this notice, on such terms and conditions as the commissioners may impose.

The commissioners, also, reserve the right to dispose of at their discretion, for the benefit of the company, any of the shares not taken by shareholders under this notice.

J. F. D. LANIER,
S. J. TILDEN,
J. EDGAR THOMSON,
SPRINGER HARBAUGH,
L. H. MEYER,
Commissioners.

NEW YORK, June 1, 1864.
